## A Lake Beyond the Wind

The year is 1948; the place, Samakh, a small town on Lake Tiberias, north of Jerusalem. People in Samakh are waiting -- for what, exactly, they do not yet know. The whistle of the Haifa-Deraa train doesn't sound anymore. Abd al-Karim, the shopkeeper, no longer goes into the city to buy new stock. You townspeople, says Haj Mahmoud, leader of the fighters in the 1936 rebellion, had better start digging trenches. There are dark days ahead. A Lake Beyond the Wind is a novel about the most catastrophic year in Palestinian history, a time marked by violent clashes between Zionist forces and the volunteers of the Arab Liberation Army. Yakhlif tenderly gathers all the town folk, the soldiers of the beleaguered army, the animals of the natural world into his tale, which makes it all the more powerful a lament for a world that is no more.

## Beyond the North Wind

"The North" is simultaneously a location, a direction, and a mystical concept. Although this concept has ancient roots in mythology, folklore, and fairy tales, it continues to resonate today within modern culture. McIntosh leads readers, chapter by chapter, through the magical and spiritual history of the North, as well as its modern manifestations, as documented through physical records, such as runestones and megaliths, but also through mythology and lore. This mythic conception of a unique, powerful, and mysterious Northern civilization was known to the Greeks as "Hyberborea"--the "Land Beyond the North Wind"--which they considered to be the true origin place of their god, Apollo, bringer of civilization.

Through the Greeks, this concept of the mythic North would spread throughout Western civilization. In addition, McIntosh discusses Russian Hyperboreanism, which he describes as among "the most influential of the new religions and quasi-religious movements that have sprung up in Russia since the fall of Communism" and which is currently almost unknown in the West.

100 traditional yet surprisingly modern recipes from the far northern corners of Russia, featuring ingredients and dishes that young Russians are rediscovering as part of their heritage. IACP AWARD FINALIST • LONGLISTED FOR THE ART OF EATING PRIZE • NAMED ONE OF THE BEST COOK-BOOKS OF THE YEAR BY THE WASHINGTON POST AND FORBES "A necessary resource for food writers and for eaters, a fascinating read and good excuse to make fermented oatmeal."—Bon Appétit Russian cookbooks tend to focus on the food that was imported from France in the nineteenth century or the impoverished food of the Soviet era. Beyond the North Wind explores the true heart of Russian food, a cuisine that celebrates whole grains, preserved and fermented foods, and straightforward but robust flavors. Recipes for a dazzling array of pickles and preserves, infused vodkas, homemade dairy products such as farmers cheese and cultured butter, puff pastry hand pies stuffed with mushrooms and fish, and seasonal vegetable soups showcase Russian foods that are organic and honest--many of them old dishes that feel new again in their elegant minimalism. Despite the country's harsh climate, this surprisingly sophisticated cuisine has an incredible depth of flavor to offer in dishes like Braised Cod with Horseradish, Roast Lamb with Kasha, Black Currant Cheesecake, and so many more. This home-style cookbook with a strong sense of place and evocative storytelling brings to life a rarely seen portrait of Russia, its people, and its palate—with 100 recipes, gorgeous photography, and essays on the little-known culinary history of this fascinating and wild part of the world.

#### The Wind and Beyond

A beautiful, lyrical non-fiction picture book about the water cycle. Issac empties his little jar of water into a stream and follows its journey through the country and the city until it joins the ocean. On the other side of the world, Cassi welcomes the rain in her dry village, where rivers now run and make their way back to the sea. The cycle is complete as the sun heats the ocean and clouds are formed that carry rain back to Issac once more.

#### The Wind Before Beyond

The Captain of the liner was an old man. He had sailed the seas for two-score years, at least half of them as master. At the outbreak of the Great War he was given command of the Doraine, relieving a younger man for more drastic duty in the North Sea. He was an Englishman, and his name, Weatherby Trigger, may be quite readily located on the list of retired naval officers in the British Admiralty offices if one cares to go to the trouble to look it up.

## The Wind and Beyond

A blind child questions all he encounters--a dog, wolf, elephant, mountain, bird, stream, and tree--about the color of the wind. Each responds differently, with a shape, color, smell, texture, or idea. Each page displays a visual and tactile palette of cutouts, textures, colors. It is a sensory experience that makes the invisible experiential, ending with the wind as the pages fly. A graduate of the Academy of Fine Arts in Brussels, Anne Herbauts expresses an original world in each of her books. Awake to the richness of the world, endlessly curious, and rigorous in her work, Anne has written and illustrated over twenty books.

## Beyond the Wild Wood

Published in the spring of 1936, Margaret Mitchell's *Gone With the Wind* was an immediate and over-whelming success; millions of copies were sold in its first year alone. By the time the film opened on December 15, 1939, the anticipation and excitement were so great that the city of Atlanta declared the day an official holiday. Since then, more than 300 million people have seen the film and every year hundreds of thousands of copies of the novel are sold in dozens of languages. This lavishly illustrated book is the ultimate behind-the-scenes history of the novel, the film, and the phenomenon of *Gone With the Wind*. It includes wonderful anecdotes, original quotes from the stars and the directors, souvenir programs from the original premiere, many rare never-before-published photographs, and more. From the smell of the smoke and the heat of the flames during the filming of the "burning of Atlanta" sequence to the soft touch of the red dust at the location Tara; from the fatigue on the faces of cast and crew after grueling months of shooting to the thrill of premiere night, you will experience the unfolding drama as if you were there. ## West Wind Drift

A rhymed tale describing the antics of a capricious wind. The wind blew, and blew, and blew! It blew so hard, it took everything with it: Mr. White's umbrella, Priscilla's balloon, the twins' scarves, even the wig on the judge's head. But just when the wind was about to carry everything out to sea, it changed its mind! With rhyming verse and colorful illustrations, Pat Hutchins takes us on a merry chase that is well worth the effort.

## What Color Is the Wind?

English Heritage Pocket Books encourage us to look beyond the obvious. Writer and photographer Peter Ashley champions the sometimes neglected and unsung architecture and related artefacts of everyday life, looking at everything from signal boxes to pre-war road signs, from lighthouses to canal tunnels. The series is beautifully produced with original colour photography throughout, accompanied by a witty and often idiosyncratic text. The windmill is one of our most conspicuous landmarks. This Pocket Book finds mills still rumbling and shaking as they once again grind corn, drainage mills out on lonely East Anglian marshes that in a very watery past pumped water up from low-lying fields into rivers, and the most ubiquitous mills of all, the derelict stumps out in the fields that still remind us of their past glories as essential working machines.

### The Wind and Beyond

The airplane ranks as one of history's most ingenious and phenomenal inventions. It has surely been one of the most world changing. How ideas about aerodynamics first came together and how the science and technology evolved to forge the airplane into the revolutionary machine that it became is the epic story told in this six-volume series, *The Wind and Beyond: A Documentary Journey through the History of Aerodynamics in America*. Following up on Volume I's account of the invention of the airplane and the creation of the original aeronautical research establishment in the United States, Volume II explores the airplane design revolution of the 1920s and 1930s and the quest for improved airfoils. Subsequent volumes cover the aerodynamics of airships, flying boats, rotary-wing aircraft, breaking the sound barrier, and more.

### The Wind and Beyond

The energy transition has begun. To succeed - to replace fossil fuels with wind and solar power - that process must be fair. Otherwise, mounting popular protest against wind farms will prolong carbon pollution and deepen the climate crisis. David Hughes examines that anti-industrial, anti-corporate resistance, drawing insights from a Spanish village surrounded by turbines. In the lives of these neighbours - freighted with centuries of exploitation - clean power and social justice fit together only awkwardly. Proposals for a green economy, the Green New Deal, or Europe's Green Deal require more effort. We must rethink aesthetics, livelihood, property, and, most essentially, the private nature of wind resources. Ultimately, the energy transition will be public and just, or it may not be at all

## The Wind and Beyond: Reinventing the airplane

The award-winning national bestseller, *Walking with the Wind*, is one of the most important records of the American civil rights movement as told by a true American hero, John Lewis, who Cornel West called a "national treasure." An eloquent and gripping first-hand account of the turbulent struggle for civil rights and the willingness and courage to change the course of history. Forty years ago, a teenaged boy named John Lewis stepped off a cotton farm in Alabama and into the epicenter of the struggle for civil rights in America. The ideals of nonviolence which guided that critical time of American history established him as one of the movement's most charismatic and courageous leaders. Lewis's leadership in the Nashville Movement—a student-led effort to desegregate the city of Nashville using sit-in techniques based on the teachings of Gandhi—established him as one of the movement's defining figures and set the tone for the major civil rights campaigns of the 1960s. During this decade, he was repeatedly a victim of violence and intimidation, but his singular belief in non-violent action, inspired by his mentor, Dr. Martin Luther King, was a defining characteristic of his leadership and vision. In 1986, he ran and won a congressional seat in Georgia, and remains in office to this day. *Walking with the Wind* is the story of an American hero. A boy from rural Alabama whose journey led him to Washington, and whose vision and perseverance changed a nation.

## West Wind Drift

USA TODAY BESTSELLER "Lt Colonel Dan Rooney is a true patriot who serves our country with courage and honor."—George H.W. Bush, 41st President of the United States F-16 fighter pilot, American hero, Folds of Honor founder, PGA professional, and inspirational family man Dan Rooney delivers a motivational code for living to help ordinary people ascend to their highest level in life. Part spiritual guide and part call-to-action, *Fly Into the Wind* combines Lt Colonel Rooney's fighter pilot stories with his discovery of faith and purpose in order to help each reader achieve a philosophy he calls CAVU, after the Air Force acronym that stands for "ceiling and visibility unrestricted." CAVU describes the perfect conditions for flying a fighter jet, when steel-blue skies invite pilots to spread their wings like supersonic eagles. In today's world of identity politics, fractured racial relations, and external turmoil, Rooney's book will show how all of us are connected by God in more ways than we realize, and that the path to fulfillment begins with changing ourselves in order to better one another. From the outside, Lieutenant Colonel Dan "Noonan" Rooney was living the American Dream: he was an F-16 fighter pilot, PGA Professional, husband to his college sweetheart, and father of five daughters. His position in life should have been a blessing. But a near-tragic mishap while piloting his F-16 triggered an ominous life storm that altered his trajectory and filled him with self-doubt. Realizing that a jet takes off into the wind because it requires resistance over its wings to fly, Lt Colonel Rooney's attitude toward the resistance he encountered in his life changed from resentment to humble introspection. Hyper-focused on the precise areas that are immediately under your control, CAVU is a disciplined approach to each day that will help you reshape, motivate, prioritize, and ultimately thrive. In *Fly Into the Wind*, Lt. Colonel Rooney breaks down CAVU into ten unique lines of effort (LOE), with each LOE building upon the previous one to provide a positive vector toward a new way of living. Along this enlightened path, readers will discover a renewed belief in themselves and the art of the possible. The time for self-discovery and ultimate achievement begins now.

#### The Wind and Beyond: A Documentary Journey Into the History of Aerodynamics in America, V. 2

"When we believe the Bible as it is, we will see the power of God move in our lives and in our community as it did centuries ago in Bible times." -Mel Tari Translated into dozens of languages, with millions of copies sold, *Like a Mighty Wind* remains a beloved classic from global evangelist Mel Tari. Recounting the incredible story of revival on the island of Timor during 1965 in the midst of political turmoil, the book is an amazing testament to the power of faith and the reality of God's power to work miracles in modern times. The Spirit of God that swept across the island "like a mighty wind" continues today throughout Indonesia although persecution of Christians is all too common. The story of God's powerful revival in this region remains a testament to the truth of God's Word, and serves as a reminder to all believers that the Spirit of God manifests in our world now as it did in the earliest days of the Church.

#### Who Owns the Wind?

William Kamkwamba was born in Malawi, a land withered by drought and hunger, a place where hope and opportunity were hard to find. But William had read about windmills and dreamed of building one that would bring his family electricity and running water, luxuries that only two percent of Malawians could afford. He used scrap metal, tractor parts, and bicycle halves to forge a crude machine that eventually powered four lights, complete with homemade switches and a circuit breaker made from nails and wire. A second windmill turned a water pump that could battle the drought and famine looming with every season. *The Boy Who Harnessed the Wind* will inspire anyone who doubts the power of one individual's ability to change his community and better the lives of those on an entire continent.

#### Beyond the Wind

A beautifully written exploration of the links between cycling, creativity and the landscape. In this deeply personal and lyrical exploration of what it means to ride a bicycle, Paul Maunder explores how our memories have a dialogue with landscape and how cycling and creativity are connected. Taking a journey through the places that have shaped him, we ride across wild moorland, through suburbia and city streets, into quintessentially English pastoral scenes. We see too some of the darker parts of the British countryside, sites of great secrecy that intrigue the imagination. This is a book about how landscape can sustain us, and how even an hour's escape can inspire our creative sides. The bicycle allows us to explore and dream, and return in time for dinner.

#### The Shadow of the Wind

*The Wind Is Not a River* is Brian Payton's gripping tale of survival and an epic love story in which a husband and wife—separated by the only battle of World War II to take place on American soil—fight to reunite in Alaska's starkly beautiful Aleutian Islands. Following the death of his younger brother in Europe, journalist John Easley is determined to find meaning in his loss. Leaving behind his beloved wife, Helen, he heads north to investigate the Japanese invasion of Alaska's Aleutian Islands, a story censored by the U.S. government. While John is accompanying a crew on a bombing run, his plane is shot down over the island of Attu. He survives only to find himself exposed to a harsh and unforgiving wilderness, known as "the birthplace of winds." There, John must battle the elements, starvation, and his own remorse while evading discovery by the Japanese. Alone at home, Helen struggles with the burden of her husband's disappearance. Caught in extraordinary circumstances, in this new world of the missing, she is forced to reimagine who she is—and what she is capable of doing. Somehow, she must find John and bring him home, a quest that takes her into the farthest reaches of the war, beyond the safety of everything she knows.

## The Girl Who Spoke to the Wind

Grace thinks everything about her life is wrong. When the Wind makes a dramatic entry into her life, it forces Grace to question her sense of reality. Despite her initial reluctance, Grace and the Wind gradually develop an intense relationship through a series of extraordinary conversations. The Wind teaches Grace to perceive life through the wisdom conveyed in nature's rhythms—circadian cycles, tidal and lunar sequences and the movements of the seasons—so that nature's intelligence becomes her intelligence. Grace struggles with the teachings, but with the Wind as her guide she discovers how everything creates out of patterns. Could the key to flowing with the rhythms of nature, and not against them, be found in the essence of her name? In *Grace and the Wind*, futurist Kristina Dryža delivers a modern allegorical novel on how the very nature of life itself is expressed and experienced as rhythmic patterns of energy.

## Walking with the Wind

Leading artists, theorists, and writers exhume the dystopian and utopian futures contained within the present “I am the supercommunity, and you are only starting to recognize me. I grew out of something that used to be humanity. Some have compared me to angry crowds in public squares; others compare me to wind and atmosphere, or to software.” Invited to exhibit at the 56th Venice Biennale, e-flux journal produced a single issue over a four-month span, publishing an article a day both online and on site from Venice. In essays, poems, short stories, and plays, artists and theorists trace the negative collective that is the subject of contemporary life, in which art, the internet, and globalization have shed their utopian guises but persist as naked power, in the face of apocalyptic ecological disaster and against the claims of the social commons. “I convert care to cruelty, and cruelty back to care. I convert political desires to economic flows and data, and then I convert them back again. I convert revolutions to revelations. I don't want security, I want to leave, and then disperse myself everywhere and all the time.”
