Targets of Opportunity

The title of this book echoes a phrase used by the Washington Post to describe the American attempt to kill Saddam Hussein at the start of the war against Iraq. Its theme is the notion of targeting (skopos) as the name of an intentional structure in which the subject tries to confirm its invulnerability by aiming to destroy a target. At the center of the first chapter is Odysseus's killing of the suitors; the second concerns Carl Schmitt's Roman Catholicism and Political Form; the third and fourth treat Freud's "Thoughts for the Times on War and Death" and "The Man Moses and Monotheistic Religion." Weber then traces the emergence of an alternative to targeting, first within military and strategic thinking itself ("Network Centered Warfare"), and then in Walter Benjamin's readings of "Capitalism as Religion" and "Two Poems of Friedrich Hölderlin."

Targets of Opportunity

"Whisked from his Manhattan town house to a gabled CIA safe house in Virginia, [CIA agent Jordan] Sandor faces off with a top terrorist agent from Iran's Revolutionary Guard. In exchange for protection from his own side, Ahmad Jaber is offering the CIA explosive information: word of a secret, unholy alliance forged among operatives in the Middle East, a ruthless South American, and Kim Jong-Il's North Korea. Jaber claims not to know specific details, only that the strike will target the heart of America"--Publisher description.

Devlin Lancaster-a retired U.S. Navy SEAL-is currently the number one assassin for the C.I.A.'s highly covert "The Human Being Organization." Whenever there is a crime committed of such severity that it is labeled a crime against humanity, and then, for whatever reason, the criminal escapes justice, Devlin is dispatched to render ultimate justice. This is the story of his final targets: targets from out of his past, targets that bring him back to the little town he grew up in-where he went to high school, and where he now meets and falls in love with his future wife. It is the covert war against terrorism, fought from the streets of Norfolk, Virginia, all the way to high in the mountains of central Colorado.

The world of wireless and mobile devices is evolving day-to-day, with many individuals relying solely on their wireless devices in the workplace and in the home. The growing use of mobile devices demands that organizations become more educated in securing this growing technology and determining how to best protect their assets. Written by an industry expert, *Wireless and Mobile Device Security* explores the evolution of wired networks to wireless networking and its impact on the corporate world. Using case studies and real-world events, it goes on to discuss risk assessments, threats, and vulnerabilities of wireless networks, as well as the security measures that should be put in place to mitigate breaches. The text closes with a look at the policies and procedures in place and a glimpse ahead at the future of wireless and mobile device security.

"This Research Product provides a detailed description of fire support as accomplished by a Corps. It is one in a series that describes the tasks performers, and outcomes for the combat function of Coordinate, Synchronize, and Integrate Fire Support. Assessment criteria are provided for reports in this series except for the one at Brigade level. Reports focus on fire support at the echelons of Brigade, Division, and Corps and to related functions at Corps as a Joint Task Force. This series of Research Products provides resource documents for military and civilian trainers to assist in the design and evaluation of single service and joint training. Doctrinal writers may use these descriptions as a basis for modifying current doctrine or for the formulation of future doctrine."--DTIC.

Analysis of the Function to Coordinate, Synchronize, and Integrate Fire Support as Accomplished by a Corps

This book deals with contemporary epistemological questions, connecting Educational Philosophy with the field of Science- and Technology Studies. It can be understood as a draft of a general theory of world-disclosure, which is in its core a distinction between two forms of world-disclosure: experiment and exploration. These two forms have never been clearly distinguished before. The focus lies on the experimental form of world-disclosure, which is described in detail and in contrast to the explorational form along the line of twenty-one characteristics, which are mainly derived from empirical studies of experimental work in the field of natural sciences. It can also be understood as an attempt to integrate elements of the Anglo-Saxon Philosophy of Science with elements of the German tradition of Educational Philosophy. This is also reflected in the style of writing. In accordance to the content-level of the book, the argument for experimental forms of world-disclosure is written in an essayistic, readable style, which can be understood as an experimental form of writing. This book is a translation of the doctoral thesis 'Experiment und Exploration. Bildung als experimentelle Form der Welterschließung' (summa cum laude). The thesis was published in German in 2010 by Transcript (Bielefeld) in the series called 'Theorie Bilden', edited by Prof. Dr. Hannelore Faulstich-Wieland, Prof. Dr. Hans-Christoph Koller, Prof. Dr. Karl-Josef Pazzini and Prof. Dr. Michael Wimmer.

AIR WAR PACIFIC: Chronology America's Air War Against Japan in East Asia and the Pacific 1941 – 1945 Eric Hammel THE GREAT AMERICAN AERIAL CRUSADE OF WORLD WAR II: There was never a military campaign like it, and there never will be another. Here is an opportunity to follow the great crusade as it unfolded in the air over the Japan's ill-gotten empire in East Asia and the Pacific. This exhaustive chronology sheds a fascinating light on the course of America's air war against Japan in all the active theaters. * The Air War Pacific Chronology is a day-by-day accounting of all the major combat aviation missions undertaken by United States Army Air Forces, United States Navy, United States Marine Corps, and American Volunteer Group units and commands in China, Burma, India, and throughout the Pacific during World War II. * All Army Air Forces, Navy, Marine, and Flying Tiger theater fighter aces are covered including unit affiliation, date and time ace status was attained, and date and time of highest victory tally (over ten). * Information pertaining to the arrival, activation, transfer, departure, and decommissioning of air commands, combat units, and special units. Comings and goings of the commanders of major aviation units are also covered. * Provides a rich contextual framework pertaining to related ground campaigns; international and high-command conferences and decisions influencing air strategies and campaigns; and breakthroughs in the development of special techniques and equipment. * Includes a bibliography, guide to abbreviations, maps, and two indexes. Eric Hammel is the author of more than forty military history books, including Pacifica Military History's Air War Europa Chronology; Fire In the Streets; Six Days in June; Aces Against Japan, and Guadalcanal: Starvation Island.

The Effectiveness of Current Nuclear Weapons Procedures Against Targets of Opportunity

This book is the first publication that combines the principles of business process management with strategic IT planning; the result being a groundbreaking work on strategic IT and process planning. While Breakthrough Strategic IT and Process Planning focuses on the real world of organizations, extensive treatment is also devoted to the politics of strategic planning. As such, a project management approach that combines process improvement, IT, and change management is employed. Other important aspects of process planning are discussed in detail: the strategic allocation of resources, short and long term implementation of the strategic plan, marketing of the plan to gain support for implementation, and development of strategic IT and process plans for business units and departments.

"Dr. Miller's Counseling Crime Victims is extremely effective...and it will occupy a central spot on my bookshelf...It is really a golden find." --Society for Police and Criminal Psychology "Here is the gold standard - the book for mental health clinicians helping crime victims sort through one of life's most difficult and traumatic experiences.--Richard L. Levenson, Jr., Psy.D., CTS Licensed Psychologist, New York State As more and more mental health professionals are becoming involved in the criminal

justice system - as social service providers, victim advocates, court liaisons, expert witnesses, and clinical therapists - there has not been a commensurate improvement in the quality of text material to address this expanding and diverse field. Until now, students and practicing professionals have had to content themselves with either overly broad texts on criminology or trauma theory, or exceeding narrow tracts on one or another sub-area of victim services. Counseling Crime Victims provides a unique approach to helping victims of crime. By distilling and combining the best insights and lessons from the fields of criminology, victimology, trauma psychology, law enforcement, and psychotherapy, this book presents an integrated model of intervention for students and working mental health professionals in the criminal justice system. The book blends solid empirical research scholarship with practical, hit-the-ground-running recommendations that mental health professionals can begin using immediately in their daily work with victims. Counseling Crime Victims is a practical guide and reference book that working mental health clinicians will consult again and again in their daily practices. This book will also be of use to attorneys, judges, law enforcement officers, social service providers and others who work with crime victims in the criminal justice system. It can also serve as a college- and graduate-level text for courses in Psychology and Criminal Justice. Key Features of this Book: Victim assistance is becoming a full-fledged field for social workers and counselors A practical, hands-on guide which offers counselors techniques for dealing with victims of a wide variety of crimes Shows counselors how to guide their clients through the legal and judicial system

In U.S. Military Operations: Law, Policy, and Practice, a distinguished group of military experts comprehensively analyze how the law is applied during military operations on and off the battlefield. Subject matter experts offer a unique insiders perspective on how the law is actually implemented in a wide swath of military activities, such as how the law of war applies in the context of multi-state coalition forces, and whether non-governmental organizations involved in quasi-military operations are subject to the same law. The book goes on to consider whether U.S. Constitutional 4th Amendment protections apply to the military's cyber-defense measures, how the law guides targeting decisions, and whether United Nations mandates constitute binding rules of international humanitarian law. Other areas of focus include how the United States interacts with the International Committee of the Red Cross

regarding its international legal obligations, and how courts should approach civil claims based on war-related torts. This book also answers questions regarding how the law of armed conflict applies to such extra-conflict acts as intercepting pirates and providing humanitarian relief to civilians in occupied territory.
