Globalization and its relation to poverty reduction and development is not well understood. The book identifies the ways in which globalization can overcome poverty or make it worse. The book defines the big historical trends, identifies main global flows - trade, finance, aid, migration, and ideas - and examines how each can contribute to undermine economic development. By considering what helps and what does not, the book presents policy recommendations to make globalization more effective as a vehicle for shared growth and prosperity. It will be of interest to students, researchers and anyone interested in the effects of globalization in today's economy and in international development issues.

Globalization for Development

THE IMPORTANT THINGS is the tale of Christopher, who lives with his mother. Christopher's mother does everything, as his father has faded from their lives. When they give away a box of his father's old things, a series of events takes place that reveal the different ways in which Christopher and his mother deal with the absent father. Peter Carnavas always been fascinated by the stories behind things, the reasons particular things are important to us. An old typewriter might not work anymore but it may have once belonged to a favourite author, or was passed down through generations in the family. The importance of things, and why they are important, is what led me to write this story. It's about remembering. It's about parents. It's about absence. It's about the joy of understanding between a mother and a son. And, most importantly, it's about slippers.

The Seduction of Modern Spain

This book, first published in 1945, is a fascinating personal account of the late U.S. Ambassador to Spain Carlton J. H. Hayes' diplomatic mission in Spain during World War II, from May 1942 to January 1945. Whilst briefly touching on Spain's internal affairs, the principal focus is firmly on American policy toward Spain during those three wartime years, and Spain's response thereto. Hayes provides the reader with a candid and factual record of this period, gleaned from firsthand eyewitness accounts and sensitive information he was privy to during his tenure. He draws in detail on excerpts from his personal diary kept for those three years, as well as various conversations, documents and correspondence from and with President Roosevelt and others. A fantastic historical record.

The Children Who Loved Books

Winner of the Independent Foreign Fiction Prize 2011 *Red April* evokes Holy Week during a cruel, bloody, and terrifying time in Peru's history, shocking for its corrosive mix of assassination, bribery, intrigue, torture, and enforced disappearance - a war between grim, ideologically driven terrorism and morally bankrupt government counterinsurgency. Mother-haunted, wife-abandoned, literature-loving, quietly eccentric Felix Chacaltana Saldivar is a hapless, by-the-book, unambitious prosecutor living in Lima. Until now he has lived a life in which nothing exceptionally good or bad has ever happened to him. But, inexplicably, he has been put in charge of a bizarre and horrible murder investigation. As it unfolds by propulsive twists and turns - full of paradoxes and surprises - Saldivar is compelled to confront what happens to a man and society when death becomes the only certainty. Remarkable for its self-assured and nimble clarity of style, *Red April* is at once riveting and profound.

A child's introduction to art history through the centuries and across the globe. A Journey Through Art is a global history of art with a time-travel twist, taking young readers on an expedition from the Paleolithic period to the present day, voyaging to thirty locations around the world. At every location readers encounter stories of artworks and the cultures that surrounded them. The journey is chronological with three sections: prehistoric and ancient; medieval and early modern; and modern and contemporary. Two beautifully illustrated spreads showcase each destination, allowing children to engage with the art, artifacts, and culture of a unique place in time as Aaron Rosen tells the story of how art developed across the world.

Celebration in the Northwest

In this groundbreaking work, Carlo Sini, one of Italy's leading contemporary philosophers, brings American pragmatism to the Milan school of phenomenology. Appearing in English for the first time, this book explores the constitutive role of alphabetic writing in the emergence of dominant forms of knowledge in the Western world (philosophy, mathematics, science, and historiography). Taking stock of the contingent nature of what are held as logical truths, he offers an ethical framework for considering different ways of thinking about writing, focusing on possibilities involving "practice" as a basis for a renewal of theoretical philosophy. Such a framework, Sini argues, opens the door for more productive and ethical communication with non-Western cultures, and indeed for a reconsideration of forms of knowledge beyond mere writing.
