The Search for Delicious

Gaylen, the King's messenger, a skinny boy of twelve, is off to poll the kingdom, traveling from town to farmstead to town on his horse, Marrow. At first it is merely a question of disagreement at the royal castle over which food should stand for Delicious in the new dictionary. But soon it seems that the search for Delicious had better succeed if civil war is to be avoided. Gaylen's quest leads him to the woldweller, a wise, 900-year-old creature who lives alone at the precise center of the forest; to Canto, the minstrel who sings him an old song about a mermaid child and who gives him a peculiar good-luck charm; to the underground domain of the dwarfs; and finally to Ardis who might save the kingdom from havoc. The Search for Delicious is a 1969 New York Times Book Review Notable Children's Book of the Year.

Guided Math Made Easy, Grade 3

The best way to nurture your child's reading and writing abilities is to provide rich literary experiences and find frequent and varied opportunities to work and play with language. By the end of second grade, children have developed a reading vocabulary of familiar words and can decode the letter-sound patterns of many unfamiliar one- and two- syllable words. During third grade, as they increase their knowledge about words (including the concepts of syllables, prefixes, and suffixes), they put that knowledge to work, decoding unfamiliar multisyllabic words. If a child has not mastered the skill of decoding simple words, that practice should continue. By third grade, the mental process of turning letters into sounds should be nearly automatic. This year, children focus more on meaning as they read. Their reading vocabulary expands tremendously, as does their ability to read longer and more complex literature. They read for information and begin to use nonfiction reference books like children's dictionaries and encyclopedias. They learn the distinction between fiction and nonfiction, and they read and enjoy longer and more complicated "chapter books." In third grade, children continue to learn about language as they write it: identifying parts of speech, properly using punctuation, and recognizing sentence types. They begin to shape their own writing, understanding how paragraphs relate in a larger whole and exerting more control over vocabulary and structure.
