Using a Writer's Notebook, Grades 5-6

Every theology student has to write a research paper, but many do not know how to go about doing theological research. In this brief guide, Michael Kibbe introduces students to the basics of academic research, including how to gather and engage different sources, use online databases and bibliography software, and avoid common mistakes.

A+ Guide to Persuasive Essays

Contains a collection of specific classroom strategies & suggestions for teaching writing to elementary school students according to an eight-stage process. Specific techniques for teaching each stage of the writing process & descriptions of proven approaches for using these techniques are also included. "A wonderful resource, a labor of love from a large & talented group of educators." Had its beginnings in the California Writing Project at the Univ. of California, Irvine. Best Seller! Illustrated.

From Topic to Thesis

Using the voyage as a theme for writing, this process-oriented text guide provides students with an integrated writing experience. Each unit takes the student through the complete essay-creating progress, progressively increasing the level of sophistication through each of the text's six units. Skill-building exercises, as well as selected readings by such authors as Maxine Hong Kingston, Margaret Atwood, Anne Tyler, and David Borofka, give students the writing and revision strategies they need to communicate effectively.

Practical Ideas for Teaching Writing as a Process

"Though life occurs in events, it must be written about in moments." Today's youth are growing up in an age of stress and trauma, and nowhere is that more apparent than in the classroom. Absenteeism, emotional distraction, passivity, and unresponsiveness are all signs of children in need. Thankfully, it turns out that the workshop classroom, with limited but essential tuning, can be just the environment students in the grip of trauma need to become comfortable in themselves and break through into active learning. In *The Mindful Writing Workshop: Teaching in the Age of Stress and Trauma*, Professor Richard Koch offers clear, comprehensive, guided lessons that help teachers gain the insight necessary to adapt their instruction of writing to incorporate restorative and healing practices—practices that can improve the quality of learning and writing for all learners. Accessible, straightforward, and empowering, the approaches presented in *The Mindful Writing Workshop* will help previously indifferent or distracted

students become engaged, increase their effort, deepen their resilience, and soon raise the quality of their writing, all while guiding teachers in creating a positive, collaborative, “doing” classroom.

Writing Voyage

Avoiding the technical jargon for which English professors are known and admired, this down-to-earth textbook presents argumentative writing in everyday language so that non-majors are more likely to understand these ideas and put them to good use.

CliffsTestPrep NYSTCE: Multi-Subject Content Specialty Test (CST)

This book is a major breakthrough for developers of writing assessment programs who must certify the writing competency of undergraduate students. Legislators and accreditation boards across the nation have called for and implemented large scale projects to measure educational outcomes. This single source provides comprehensive information on the history, underlying concepts, and process of conducting a large scale writing assessment program at a specific institution of higher education. The handbook opens with an analysis of the rationale for the assessment of writing during the junior year of the undergraduate curriculum. The authors then turn to a case study of the success of their own institutional wide assessment program. A history is provided of 20th century writing assessment practices; as well, attention is given to defining levels of literacy. After describing an assessment process model, discussion turns to the design of questions, the administration of the assessment, the rating of papers, and the statistical analysis of data. Attention is also given to the design of a course for those who are unsuccessful on the assessment. The study closes with directions for further research and over 200 references in the bibliography.

Journal Buddies

In this guide to presenting, the author counsels how to calm a thumping heart and reveals techniques on preparation, delivery, and visual aids as he offers stories and advice. And he does more than simply ease dread, he inspires with historical accounts and incisive observations on the power and purpose of speaking well. From advice on the pitch and pace of your speaking voice to admonishments against squirrel paw hands and data crammed PowerPoint slides, the author's pointers will give you the focus and confidence to stand up straight, lean forward, and tell your story well.
