Each chapter concludes with a wide range of activities, many in the style of AAT computer based assessments."--Page 1.

Management Accounting: Decision and Control Workbook

The Interactive Accounting Workbook has been rigorously developed to support the revolutionary new Interactive Accounting software.

Workbook/Study Guide for Use with Introduction to Managerial Accounting

Covers each chapter and appendix with reviews of learning objectives, outlines of the chapters, summaries of chapter materials, and additional problems with solutions.

Introduction to Management Accounting

Management Accounting Workbook

Accountability in Extraterritoriality

Nation states are increasingly asserting jurisdiction over criminal offenses that occur extraterritorially. In some instances, this can cause political tension and legal uncertainty, as the principles of jurisdiction under international law do not adequately resolve competing claims. In that context, this book considers principles of jurisdiction and mechanisms by which to achieve jurisdictional restraint under international law, including the possibilities presented by the abuse of rights doctrine.

Cases and Concepts on Extraterritorial Obligations in the Area of Economic, Social and Cultural Rights

From the Foreword by Prof. Olivier De Schutter, United Nations Special Rapporteur on the Right to Food: "This volume is the result of over ten years of research conducted jointly by non-governmental organisations and universities. It presents a range of cases in which the actions or omissions of States have impact on the enjoyment of human rights outside their national territory, raising the question of whether, and under which conditions, such conduct may engage the international responsibility of the States concerned. When the Maastricht Principles on Extraterritorial Obligations of States in the area of Economic, Social and Cultural Rights were adopted on 28 September 2011, it is these cases, among others, that the experts who developed these principles had in mind. As such, the series of case studies presented by Fons Coomans and Rolf K nnemann is at the cutting edge both of human rights activism and of human rights doctrine. This volume provides clear evidence both that the Maastricht Principles are useful and important, and that if we accept to build on the extraterritorial obligations of States, the accountability gap that economic globalization has created can be closed." *** This book is essential reading for academics, students, non-governmental organizations, and other practitioners. The human rights community should start making the analysis of extraterritorial obligations a standard part of its casework. The cases in this book show why this is necessary and how this can be done. (Series: Maastricht Series in Human Rights)

Visual Evidence and the Gaza Flotilla Raid

This book engages with pivotal examples of extraterritoriality-from Antiquity and into the twenty first century-in order to broaden the original judicial and geographical definition and thereby include physical and digitized information, and visual data in particular. By focusing on a critical incident of recent Middle Eastern history-namely,the Gaza Freedom Flotilla of 2010 which sailed against Israel's enduring blockade-it shows how the device of extraterritoriality shapes not only the political situation in Gaza, the legal status of the maritime environment in which the flotilla incident took place, and the judicial actions taken in response but also reveals how the concept of extraterritoriality is key to explaining the State's subsequent efforts to confiscate and monopolize all visual evidence of its alleged violations of international statutes. Through the lens of the missing visual evidence characterizing the Mavi Marmara incident after-effects, it explores how the legal system's ability to evade transparency seems to be a built-in condition for eluding criminal accountability at the international level, with the emphasis on extraterritoriality's fundamental role in fashioning our current legal and political orders.

Towards Shared Accountability in International Human Rights Law

Providing a unique analytical framework to capture a diverse, fragmented and highly evolving practice, the Research Handbook on Unilateral and Extraterritorial Sanctions is the key original reference work covering how sanctions have indisputably become central instruments of foreign policy. This discerning Research Handbook combines a series of case studies and cross-cutting analyses. It reflects the levers and evolution of international law and practice in the field, as well as covering important topics over multiple disciplines, particularly in international law and international relations. Featuring diverse contributions from a selection of esteemed scholars, the Research Handbook's chapters provide an unprecedented analysis of the evolution of diplomatic, legal and business practices and tackle topical legal issues arising from unilateral and extraterritorial sanctions. Offering a unique panorama of contemporary practice, this 360-degree study will be of interest to legal academics and their students as well as practitioners in both the public and private sectors.

Research Handbook on Unilateral and Extraterritorial Sanctions

Explores whether states possess extraterritorial obligations under international law to respect and ensure economic, social and cultural rights.

Global Justice, State Duties

Extraterritorial Human Rights Obligations from An African Perspective addresses the often neglected question of whether African regional human rights instruments impose extraterritorial obligations on State parties, and if so, the extent and scope of these obligations. The prevalence of extraterritorial violations of human and peoples' rights in the African system, due to the actions or omissions of African as well as non-African states, has not gone unnoticed. Strengthening extraterritorial obligations in Africa is an urgent necessity to ensure a rights-based African regional order that seeks to address, among other issues, challenges stemming from globalisation, accountability for human rights violations in Africa where a third state or entity (as well as an intergovernmental organisation) is involved, and to ensure respect and protection of the human rights of future generations. With the increasing quasi-judicial and judicial scrutiny of the extraterritorial reach of human rights and states duties, at both international and regional levels, including from the African Commission, the African region is ripe for extraterritorial analysis. Extraterritoriality is an emerging concept in the context of international human rights law, and has generally not been the focus of many books, and less so in the African context. This book is therefore among the first book of its kind providing the reader with a unique perspective on this important topic.

Extraterritorial Human Rights Obligations from an African Perspective

Extraterritoriality in East Asia examines the approaches of China, Japan and South Korea to exercising legal authority over crimes committed outside their borders, known as 'extraterritorial jurisdiction'. It considers themes of justiciability and approaches to international law, as well as relevant examples of legislation and judicial decision-making, to offer a deeper understanding of the topic from the perspective of this legally, politically and economically significant region.

Extraterritoriality in East Asia

This well-documented work will appeal to corporate leaders interested in understanding the related practicalities of international corporate liability as well as post-graduate students in international business and international policy studies. Policymakers, academics and researchers interested in a unique perspective on the future of the global corporation as an internationally responsible global citizen will find much to interest them in this book.

Transnational Corporations and International Law

Drawing on the best scholars in the field from around the world, this handbook showcases conceptual and normative as well as the empirical approaches in public accountability studies.

The Oxford Handbook Public Accountability

"Whether as a result of the war on terrorism, foreign military intervention, economic globalisation or otherwise, state conduct increasingly affects the human rights of individuals beyond its own borders ... This book focuses on the extraterritorial application of four key human rights treaties: the two UN Covenants on Human Rights and the American and European Conventions on Human Rights. It points out inconsistencies in the practice of the supervisory bodies of these treaties and discusses the pros and cons of both a restrictive and an expansive approach."--Back cover.

Extraterritorial Application of Human Rights Treaties

Today the majority of the armed conflicts around the world are fought between States and armed groups, rather than between States. This changed conflict landscape creates an imperative to clarify the obligations of armed groups under international law. While it is generally accepted that armed groups are bound by international humanitarian law, the question of whether they are also bound by human rights law is controversial. This book brings significant new understanding to the question of whether and when armed groups might be bound by human rights law. Its conclusions will benefit international law academics, legal practitioners and political scientists and anthropologists working on issues related to rebel governance and civil wars. This book addresses the debate on this topic by employing a theoretical, historical, and comparative analysis that spans international humanitarian law, international criminal law, and international human rights law. Embedding these different perspectives in public international law, this book brings several key points of clarification to the legal framework. Firstly, the book draws upon social science literature on armed conflict to present a new viewpoint on the role that human rights law plays vis-a-vis international humanitarian law in non-international

armed conflicts. Secondly, the book sheds light on the circumstances in which armed groups acquire obligations under human rights law. It brings illumination to these topics by combining historical and comparative research on belligerency, insurgency, and international humanitarian law with a theoretical analysis of legal personality under international law. In the final part of the book, the author tests the four most utilised theories of how armed groups are bound by human rights law, examining whether armed groups can be bound by virtue of (i) treaty law (ii) control of territory (iii) international criminal law and (iv) customary international law. In the book's conclusions, the author presents final remarks that are designed to provide concrete guidance on how the issue of armed groups and human rights law can be dealt with more thoroughly in practice.

The Accountability of Armed Groups Under Human Rights Law

The Routledge Handbook on Extraterritorial Human Rights Obligations brings international scholarship on transnational human rights obligations into a comprehensive and wide-ranging volume. Each chapter combines a thorough analysis of a particular issue area and provides a forward-looking perspective of how extraterritorial human rights obligations (ETOs) might come to be more fully recognized, outlining shortcomings but also best state practices. It builds insights gained from state practice to identify gaps in the literature and points to future avenues of inquiry. The Handbook is organized into seven thematic parts: conceptualization and theoretical foundations; enforcement; migration and refugee protection; financial assistance and sanctions; finance, investment and trade; peace and security; and environment. Chapters summarize the cutting edge of current knowledge on key topics as leading experts critically reflect on ETOs, and, where appropriate, engage with the Maastricht Principles to critically evaluate their value 10 years after their adoption. The Routledge Handbook on Extraterritorial Human Rights Obligations is an authoritative and essential reference text for scholars and students of human rights and human rights law, and more broadly, of international law and international relations as well as to those working in international economic law, development studies, peace and conflict studies, environmental law and migration. The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license

The Routledge Handbook on Extraterritorial Human Rights Obligations

By engaging with the ongoing discussion surrounding the scope of cross-border regulation, this expansive Research Handbook provides the reader with key insights into the concept of extraterritoriality. It offers an incisive overview and analysis of one of the most critical components of global governance.

Research Handbook on Extraterritoriality in International Law

This book sheds light into the uneasy relationship between the 'IUU fishing' designation as a governance mechanism, and international law. Building on previous literature, this original study will be of interest to international fisheries governance academics and policymakers alike.

IUU Fishing as a Flag State Accountability Paradigm

This edited volume analyzes recent key developments in EU border management. In light of the refugee crises in the Mediterranean and the responses on the part of EU member states, this volume presents an in-depth reflection on European border practices and their political, social and economic consequences. Approaching borders as concepts in flux, the authors identify three main trends: the rise of security technologies such as the EUROSUR system, the continued externalization of EU security governance such as border mission training in third states, and the unfolding dynamics of accountability. The contributions show that internal security cooperation in Europe is far from consolidated, since both political oversight mechanisms and the definition of borders remain in flux. This edited volume makes a timely and interdisciplinary contribution to the ongoing academic and political debate on the future of open borders and legitimate security governance in Europe. It offers a valuable resource for scholars in the fields of international security and migration studies, as well as for practitioners dealing with border management mechanisms.

EU Borders and Shifting Internal Security

An analytical framework of due diligence obligations to address the increasing prevalence of non-State human rights risks.

Due Diligence Obligations in International Human Rights Law

This Handbook draws together leading and emerging scholars to provide a comprehensive critical analysis of international refugee law. This book provides an account as well as a critique of the status quo, setting the agenda for future research in the field.

Military Self-Interest in Accountability for Core International Crimes

Expanded version of author's thesis (doctoral)--University of Cambridge, 2010.

The Oxford Handbook of International Refugee Law

This book analyses the accountability of European home States for their failure to secure the human rights of victims from host States against transnational enterprises. It argues for a reconfiguration of the relationship between multinational enterprises and individuals, both of which have been profoundly changed by globalisation. Enterprises are now supranational entities with numerous affiliates all over the world. Likewise, individuals are increasingly part of a global community. Despite this, the relationship between the two is deregulated. Addressing this gap, this study proposes an innovative business and human rights litigation strategy. Human rights advocates could file a test case against a European home State, at the European Court of Human Rights, for its failure to secure the rights of victims vis-à-vis European multinational enterprises. The book illustrates why such a strategy is needed, and points to the lack of effective legal remedies against European multinationals. The goal is to empower victims from developing countries against European States which are failing to hold multinational enterprises accountable for human rights abuses.

Extraterritorial Application of Human Rights Treaties

This text offers an original and scholarly introduction to a number of key topics which lie at the heart of modern international law. Based upon the author's highly acclaimed Hague Academy lectures, the book introduces the student to a series of pressing problems which help reveal the complex relationship between legal norms and policy objectives which define contemporary international law.

Business and Human Rights

This book critically evaluates the Ruggie Framework and the Guiding Principles on Business and Human Rights, and investigates the normative foundations as well as the nature, extent and enforcement of corporate obligations for the realisation of human rights.

Problems and Process

This volume identifies a coherent legal principle in order to establish a novel duty of care for corporate human rights violations and environmental damages. It examines whether tort and civil law offer better accountability and remedies for victims of corporate human rights abuses, and carries out an in-depth and critical analysis of the concept of corporate accountability. Moreover, a fundamental part of this book is devoted to examining the extent to which international criminal law influences international human rights law in its use of tort law and civil law remedies. Finally, the book sets out a theoretical mechanism for duty of care, as well as a proposal for the establishment of a 'Hybrid International Transnational Corporation Court' that would have the potential to effectively interpret the concept of the corporate duty of care under tort law.

Human Rights Obligations of Business

This book studies how victims of human rights violations in Latin America, their families, and their advocates work to overcome entrenched impunity and seek legal justice. Their struggles show that legal justice is a multifaceted process, the overarching purpose of which is to restore human dignity and prevent further violence. Uncovering, revealing, and proving the truth are essential elements of legal justice, and are also powerful tools to activate the process. When faced with stubborn impunity at home, victims, families, and advocates can carry on their work for legal justice by bringing cases in courts in other countries or in the Inter-American human rights system. These extra-territorial courts can jumpstart the process of legal justice at home. Seeking Human Rights Justice in Latin America examines the political and legal struggle through the lens of the human story at the heart of these cases.

Accountability and Corporate Human Rights Violations in Tort and International Law

While its importance in domestic law has long been acknowledged, transparency has until now remained largely unexplored in international law. This study of transparency issues in key areas such as international economic law, environmental law, human rights law and humanitarian law brings together new and important insights on this pressing issue. Contributors explore the framing and content of transparency in their respective fields with regard to proceedings, institutions, law-making processes and legal culture, and a selection of cross-cutting essays completes the study by examining transparency in international law-making and adjudication.

Seeking Human Rights Justice in Latin America

The interplay between human rights and investments is a key and complex issue in today's world. To take stock of this importance and to tackle this complexity, this Research Handbook offers a unique multi-faceted approach. It gathers in-depth contributions which focus on the interplay between human rights and investments in various international legal regimes, economic sectors and regions. It also provides thorough analyses of the various types of accountability that may result from the activities of multinational corporations in relation to human rights. This Research Handbook is intended for practitioners, policy-makers, academics and students eager to understand the interaction between human rights and investments in all its dimensions.

Transparency in International Law

Globalization challenges fundamental principles governing international law, especially with respect to state sovereignty and international relations. This transformation has had a significant impact on the practice of trade law, financial regulation, and environmental law but relatively little effect on one area of law and regulation: human rights. Universal Human Rights and Extraterritorial Obligations examines both the international and domestic foundations of human rights law. What other contemporary human rights debates have almost totally ignored is that in an increasingly interdependent world—where public and private international actors have great influence on the lives of individuals everywhere—it is insufficient to assess only the record of domestic governments in human rights. It is equally important to assess the effect of actions taken by intergovernmental organizations, international private entities, and foreign states. From this standpoint, contributors to this book address how states' actions or omissions may affect the prospects of individuals in foreign states and asks important questions: To what extent do agricultural policies of rich countries influence the right to food in poorer countries? How do decisions to screen asylum seekers outside state borders affect refugee rights? How does cooperation among different states in the "war on terror" influence individuals' rights to be free from torture? This volume presents a brief for a more complex and updated approach to the protection of human rights worldwide.

Research Handbook on Human Rights and Investment

Also available as an e-book *Chance, Order, Change: The Course of International Law, General Course on Public International Law* by J. Crawford The course of international law over time needs to be understood if international law is to be understood. This work aims to provide such an understanding. It is directed not at topics or subject headings — sources, treaties, states, human rights and so on — but at some of the key unresolved problems of the discipline. Unresolved, they call into question its status as a discipline. Is international law “law” properly so-called ? In what respects is it systematic ? Does it — can it — respect the rule of law ? These problems can be resolved, or at least reduced, by an imaginative reading of our shared practices and our increasingly shared history, with an emphasis on process. In this sense the practice of the institutions of international law is to be understood as the law itself. They are in a dialectical relationship with the law, shaping it and being shaped by it. This is explained by reference to actual cases and examples, providing a course of international law in some standard sense as well.

Universal Human Rights and Extraterritorial Obligations

The growth of pollution that crosses national borders represents a significant threat to human health and ecological sustainability. Various international agreements exist between countries to reduce risks to their populations, however there is often a mismatch between national territories of state responsibility and transboundary hazards. All too often, state priorities do not correspond to the priorities of the people affected by pollution, who often have little recourse against major polluters, particularly transnational corporations operating across national boundaries. Drawing on case studies,

The New Accountability provides a fresh understanding of democratic accountability for transboundary and global harm and argues that environmental responsibility should be established in open public discussions about harm and risk. Most critically it makes the case that, regardless of nationality, affected parties should be able to demand that polluters and harm producers be held accountable for their actions and if necessary provide reparations.

Chance, Order, Change: The Course of International Law, General Course on Public International Law

This work analyses the legal challenges posed by contemporary practices of extraterritorial immigration control: visas, pre-embarkation checks and the interception of irregular migrants. It examines the international law framework, and provides case-studies from Europe, Australia and the United States.

The New Accountability

Often derided for its asymmetry, this book shows how investors can be held to account in international investment law.

Extraterritorial Immigration Control

In State Accountability for Space Debris Peter Stubbe examines the legal consequences of space debris pollution which he argues is a global environmental concern under the two distinct accountability regimes of responsibility and liability.

Contributory Fault and Investor Misconduct in Investment Arbitration

A PDF version of this book is available for free in open access via the OAPEN Library platform, www.oapen.org. This book presents a new model of accountability which ensures that public-private partnerships don't erode public accountability. It defines concrete accountability standards for different types of partnerships.

State Accountability for Space Debris

This book is the first in a series examining how public law and international law intersect in five thematic areas of global significance: sanctions, global health, environment, movement of people and security. Until recently, international and public law have mainly overlapped in discussions on how international law is implemented domestically. This series explores the complex interactions that occur when legal regimes intersect, merge or collide. Sanctions, Accountability and Governance in a Globalised World discusses legal principles which cross the international law/domestic public law divide. What tensions emerge from efforts to apply and enforce law across diverse jurisdictions? Can we ultimately only fill in or fall between the cracks or is there some greater potential for law in the engagement? This book provides insights into international, constitutional and administrative law, indicating the way these intersect, creating a valuable resource for students, academics and practitioners in the field.

Accountability in Public Policy Partnerships

'State sovereignty' is often referred to as an obstacle to criminal justice for core international crimes by members of the international criminal justice movement. The exercise of State sovereignty is seen as a shield against effective implementation of such crimes. But it is sovereign States that create and become parties to international criminal law treaties and jurisdictions. They are the principal enforcers of criminal responsibility for international crimes, as reaffirmed by the complementarity principle on which the International Criminal Court (ICC) is based. Criminal justice for atrocities depends entirely on the ability of States to act. This volume revisits the relationship between State sovereignty and international criminal law along three main lines of inquiry. First, it considers the immunity of State officials from the exercise of foreign or international criminal jurisdiction. Secondly, with the closing down of the ad hoc international criminal tribunals, attention shifts to the exercise of national jurisdiction over core international crimes, making the scope of universal jurisdiction more relevant to perceptions of State sovereignty. Thirdly, could the amendments to the ICC Statute on the crime of aggression exacerbate tensions between the interests of State sovereignty and accountability? The book contains contributions by prominent international lawyers including Professor Christian Tomuschat, Judge Erkki Kourula, Judge LIU Daqun, Ambassador WANG Houli, Dr. ZHOU Lulu, Professor Claus Kre, Professor MA Chengyuan, Professor JIA Bingbing, Professor ZHU Lijiang and Mr. GUO Yang.

Sanctions, Accountability and Governance in a Globalised World

The Real World of EU Accountability examines how the European Union operates in practice and how and where its various institutions are held to account for the decisions they take and the power they wield.

State Sovereignty and International Criminal Law

Collective Responsibility and Accountability under International Law examines the extent to which the basic principle of individual responsibility accommodates liability for the acts of others. It examines the debates and legal developments surrounding collective responsibility under international law. The philosophical debates on collective responsibility provide an introduction to the examination of whether collective responsibility is ever appropriate or even lawful under international law. As the international criminal justice project begins to flourish, it is of paramount importance that the extent of the potential liability of individuals for the acts of others is clarified and held up to rigorous scrutiny. It is of equal importance that there is a clear understanding of whether the means of responding to ongoing violations of international humanitarian law can include measures based on collective responsibility. Global events have created an impetus for the parameters of responsibility to be clearly defined. The rise of non-State actors within the international legal regime raises complex questions surrounding their status, power and the means for holding them accountable.
