Tribal Development and Welfare Legislation in Orissa

With reference to Uttar Pradesh, India.

Accessions List, South Asia

"India harbours multiple ethnic groups who have distinct socio-cultural identities. It is one of the nation-states in the world, which has provided elaborate preferential arrangements for the tribals. The tribal communities in India are at different levels of socio-economic development. In view of the deep-rooted historic reasons, which have caused the backwardness of these communities, the Indian Union as well as states are committed to ensure the implementation of the constitutional provisions for their development. The book, which is based on an empirical study, has extensively reviewed the impact of various legislations and regulations enacted for tribal development in Orissa in the past. Besides presenting an anthropological understanding of tribal development along with a brief account of tribal development programmes being implemented in the country, it also explains the state of vulnerable tribal population in Orissa. In a nutshell, the book discusses issues such as indebtedness, excise policy, land tenure system, role of welfare agencies etc., which are directly concerned with the tribal people."

Tribal Development in India

Report on the public administration, social integration and development of tribal peoples in India - includes national planning, agrarian reform, forestry, agriculture, handicrafts and small scale industries, community development, the problem of indebtedness, cooperatives, education, health, housing, the impact of industrialization, and training programmes.

Who Cares for Tribal Development

It Studies The Impact Of Economic Development On The Socio-Economic Conditions Of The Tribes. It Describes The Influence On The Life Style Of The Tribes And Suggests Means For Improving Their Socio-Economic Conditions.

Constraints of Tribal Development

This book has been written on the basis of a long this experience of development administration in addition to the review of the relevant literature. The analyse made by the author underscores the viriating atmosphere due to too much of politics that has

Development of Primitive Tribal Groups in India

The present work, although a pioneering effort is a modest study of problem of child labour in India with special reference to Orissa. The study intends to explore the socio-economic perspective of exploitation and abuse inflicted upon the child labourers manifested in Calcutta, Delhi, Bombay, Andhra Pradesh, Uttar Pradesh, Tamil Nadu, Rajasthan and Orissa. Besides making a penetrative survey of the problems, the study presents a comprehensive view of legislative policy measures and useful suggestions. The case studies undertaken in the tribal pockets of Orissa, with the help of sample data, bring into light some hitherto unknown facts and useful findings to formulate policy measures to eradicate the problem. Being a serious research work, the work ensures an attractive reading to the scholars and policy makers. Contents Chapter 1: Introduction; Chapter 2: Genesis of Child Labour in India; Chapter 3: Features of Child Labour in Orissa; Chapter 4: A Profile of the Study Area; Chapter 5: Study of Socio-Economic Problems of Child Labour in Phulbani; Chapter 6: Evaluative Study of Government Policy; Chapter 7: Summary of Conclusions and Policy Implications.

Social Change of Indian Tribes

Papers presented at the Seminar on Tribal Situation in Uttar Pradesh.

Tribal Development in India

Beginning with 1953, entries for Motion pictures and filmstrips, Music and phonorecords form separate parts of the Library of Congress catalogue. Entries for Maps and atlases were issued separately 1953-1955.

Exploitation of Child Labour in Tribal India

This book introduces a sociological understanding of the emergence of modernity in India and its ramifications on society, economy, and polity. It outlines the main features and context of modernity, as described in classical and later texts of modernity. The essays examine the transformation of Indian society as a consequence of the British colonial encounter resulting in social, economic, and political interventions. It also delineates the Indian context by defining the term community, and its close association with caste and religion, and subsequently examines the challenges in building a pan-Indian or national consciousness with a sense of 'we-ness' or common identity. Most importantly, the book also studies the politics of government formation after independence, and the role of dominant castes and classes in gaining power at the Centre. The book concludes with an outline of the definitions and historical practices of social exclusion in India, their contemporary configurations, the image of a socially, economically, and politically exclusive Indian modernity that poses challenges to the Indian state and civil society on account of the exclusion of multiple groups. This book would be useful to the students, researchers and teachers of sociology, women and gender studies, history, economics, political science, and other interdisciplinary courses in social sciences. The book will also be valuable reading for those interested in South Asian studies, especially post-colonial contemporary Indian society.

BEPI

This book critically studies descriptive, normative and ethical aspects of violence to understand the Maoist conflict in India. It studies important but often overlooked issues such as reasons for youth participation in insurgency, the reality and the rhetoric of the urban Maoism debate, rights and entitlements of the local communities and their interactions with the Maoist conflict, and issues of governance and development. The volume, - examines the origins of Maoist insurgency, why it continues, the factions, counterinsurgency, impact of violence on education and other development indicators; - investigates how a conflict with an alternative idea of democracy violently clashes with an established democratic Indian state; - deals with the critical aspects of the Maoist movement in India and the status of Urban Maoism or Urban Naxal; - evaluates state responses to the movement and its impact on the economic status of affected communities; - discusses the gender dimension of armed conflict through a feminist lens and explores how women navigate through varied socio-cultural and gender norms while participating in the conflict. Studying a wide range of critical issues, this volume will be of interest particularly to scholars of political science, development studies, public administration, security studies, peace and conflict studies and human rights.

Perspectives in Tribal Development

This book offers a comprehensive view of the relationship between the Indian tribes and the mainstream. It covers key topics such as health, education, development, livelihood, disability and culture, and presents new insights by focusing on the perspective of the 21st-century tribal youth of the country. The volume explores inclusive education for scheduled tribes children; mainstreaming tribal children; mental health and superstition; ageing and morbidity and psychological distress among elderly tribal population; empowerment via handicraft; livelihoods via non-timber forest produce; the Forest Right Act; the tribal sub-plan approach; tribal cuisine and issues of food; identity; myths and feminism. The book combines fresh research viewpoints with ideas on implementable solutions that would facilitate a more inclusive development for one of the most marginalized communities while highlighting critical issues and concerns. An important intervention, this book will be useful to scholars and researchers of tribal studies, sociology, rural sociology, development studies, social anthropology, political sociology, politics, ethnic studies, sociolinguistics, education and public policy and administration.

Perspectives on Tribal Development

Report brought out by National Social Watch Coalition.

Library of Congress Catalog

This book explores tribal land alienation problems in India and tribal agitation against land encroachment and alienation. It discusses India's tribal land problem and explains how despite legislation to protect tribal lands, the problem has not been resolved since neither the letter nor the spirit of the law has been implemented. Due to continuous land encroachment and alienation by outsiders, the negligence of the revenue administration and the apathy of the central and state government, the situation concerning tribal land in the country have become precarious. In this context, the book highlights the process of land estrangement among the tribes and the related movements, focusing on the Narayanpatna land movement in the Koraput district of Odisha. It argues that land remains a central issue that is extremely important for tribes as it directly affects their life, livelihood, freedom and development, and that the cultural attachment of tribes and their views regarding the idea of 'place' (land) furnishes crucial perspectives in understanding the politics of collective resistance. It also discusses the politicization of group identity and material interest against the outside authority as the basis of the unrest among the tribes, and when the grudges of the people are hardened due to insensitivity and tyranny, the extent of tribal resistance escalates, leading to conflict between the state and its own people. Given its scope, this book is a valuable resource for students and research scholars, as well as for policymakers and anyone interested in Indian democracy and development in general, and tribal problems, issues and politics in particular.

A Handbook on the WTO TRIPS Agreement

This handbook provides a comprehensive and non-technical explanation of the WTO Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS), later legal instruments, current policy issues and the relationship between TRIPS and public health. It is aimed at an audience including government officials and policy-makers, non-governmental organizations, academics and students.

A Handbook on the WTO TRIPS Agreement

This handbook describes the historical and legal background to the TRIPS Agreement, its role in the WTO and its institutional framework and reviews the following areas: general provisions and basic principles; copyright and related rights; trademarks; geographical indications; patents; industrial designs, layout-designs, undisclosed information and anti-competitive practices; enforcement of IPRs; dispute settlement in the context of the TRIPS Agreement; TRIPS and public health; and current TRIPS issues. It contains a guide to TRIPS notifications by WTO members and describes how to access and make use of the official documentation relating to the TRIPS Agreement and related issues. Furthermore, it includes the legal texts of the TRIPS Agreement and the relevant provisions of the WIPO conventions referred to in it, as well as subsequent relevant WTO instruments.

Intellectual Property and International Trade: The TRIPS Agreement

The Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS) is the most far-reaching and comprehensive legal regime ever concluded at the multilateral level in the area of intellectual property rights (IPR). Compared to prior IPR conventions, TRIPS constitutes a major qualitative leap which radically modifies not only the context in which IPR are considered internationally, but also their substantive content and the methods for their enforcement and dispute settlement. This much-welcomed treatise, now in its third edition, thoroughly updates its comprehensive analysis of the substantive provisions of the Agreement and their actual interpretation and application in different jurisdictions, with new material on the burgeoning case law and on major changes in plant variety protection. As in previous editions, the book may be relied upon for in-depth clarification of such matters as the following: • standards established under the agreement; • enforcement measures; • social and legal issues; • legal and policy possibilities offered; • legislative latitude allowed to WTO Member States; • incorporation of TRIPS into domestic law; • protection of integrated circuit design; • protection of innovation and R&D for diseases that disproportionately affect developing countries; • challenges raised by ongoing technological changes; • access to medicines; • protection of confidential (undisclosed) information; and • interface between competition law and intellectual property protection. With fifteen chapters contributed by a distinguished panel of experts representing diverse parties — international organisations, legal practice, government policy, and academia — the third edition offers an incomparable framework for understanding the background, principles, and complex provisions of the TRIPS Agreement. Thoroughly revised and updated, the third edition will be of great value to all professionals and business people concerned with international trade. It stimulates further discussion and analysis in this area of growing importance to international law and international economic relations, particularly regarding the possibilities offered by the Agreement and the loose ends that may need consideration in the future at the national or international level.

Intellectual Property Rights, the WTO and Developing Countries

Review of the Agreement

Resource Book on TRIPS and Development

It is a guide to the WTO's Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS).

The Making of the TRIPS Agreement

A comprehensive account of the establishment of the World Trade Organization, focusing on those who shaped its creation as well as those who have influenced its evolution. The book examines trade negotiations, the WTO's dispute settlement role, the presence of coalitions and groupings within the WTO, the process of joining the organization and many other topics, including what lies ahead for the organization.

A Practical Guide to Working with TRIPS

A brief and accessible guide to the practical workings of the TRIPS agreement, this book offers a unique account of how the international rules of intellectual property function in practice within a broader legal framework that consists of WTO law and dispute resolution procedures.

Research Handbook on the Interpretation and Enforcement of Intellectual Property Under WTO Rules

This concise and detailed Handbook addresses some of the most complex issues raised by the implementation of the TRIPS Agreement globally. Among other themes, the Handbook explores the applicability of GATT jurisprudence for the interpretation of the Agreement's provisions. It also considers key issues relating to the enforcement of intellectual property rights, such as border measures and injunctive relief. Teamed with the first volume - Research Handbook on the Protection of Intellectual Property under WTO Rules - this analysis is supplemented by a thorough review of the most important cases on TRIPS decided under the WTO dispute settlement mechanism.

Resource Book on TRIPS and Development

Nature of obligations, principles and objectives; Substantive obligations; Intellectual property rights and competition; Enforcement, maintenance and acquisition of rights; Interpretation and dispute settlement and prevention; Transitional and institutional arrangements.

Interpreting and Implementing the TRIPS Agreement

The chapters in this volume provide insightful analysis and commentary on TRIPS and, importantly, the TRIPS Plus world that many countries operate in. . . This is a fine contribution to the growing literature of interdisciplinary analyses of the global IP regime. . . there is enough in here that makes the book worth acquiring and reading. Scholars of development more generally will find this book to be useful both for advancing their own understanding of the global IP regime and for integrating IP into broader development studies courses they teach. Kenneth C. Shadlen, *Progress in Development Studies* This book considers whether the WTO agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS) will become a vehicle for promoting greater international equity and engagement with the world economy or a tool for wealthy nations to extract excessive rents from poorer countries. Can TRIPS garner the necessary degree of legitimacy and public trust to deliver economic development? Can it become a key instrument for promoting international health and development? In response to these questions, the book proposes interpretive possibilities for the TRIPS text along with implementation strategies to avoid the threat of its irrelevancy due, amongst other things, to free trade agreements containing TRIPS-plus terms. The book discusses the impact of TRIPS from various perspectives, including those of developing countries. It will be of interest to informed citizens, members of NGOs and students and academics concerned with the debate about the impact of TRIPS on access to medicines at affordable prices, the protection of traditional knowledge, and the alleged neo-colonial effect of net revenue outflows from developing nations to developed nations for copyright and patent royalties.

Resource Book on TRIPS and Development

The Resource Book, conceived as a practical guide to the TRIPS Agreement, provides detailed analysis of each of its provisions, aiming at a sound understanding of WTO Members' rights and obligations. The purpose is to clarify the implications of the Agreement especially highlighting the areas in which the treaty leaves leeway to Members for the pursuit of their own policy objectives, according to their respective levels of development. In doing so, the book does not produce tailor-made prescriptions but gives guidance on the implications of specific issues and on the options available. The book is not limited to the analysis of the TRIPS Agreement but to the consideration of related questions and developments at the national, regional, and international level.

A Handbook on the WTO Dispute Settlement System

The WTO dispute settlement system has become one of the most dynamic, effective and successful international dispute settlement systems in the world over the past twenty years. This second edition of A Handbook on the WTO Dispute Settlement System has been compiled by the dispute settlement lawyers of the WTO Secretariat with a view to providing a practice-oriented account of the system. In addition to describing the existing rules and procedures, this accessibly written handbook explains how those rules and procedures have been interpreted by dispute settlement panels and the Appellate

Body, and how they have evolved over time. The handbook provides practical information to help various audiences understand the day-to-day operation of the WTO dispute settlement system.

Trade Related Aspects of Intellectual Property Rights

The TRIPS Agreement is the most comprehensive and influential international treaty on intellectual property rights. It brings intellectual property rules into the framework of the World Trade Organization, obliging all WTO Member States to meet minimum standards of intellectual property protection and enforcement. This has required massive changes in some national laws, particularly in developing countries. This volume provides a detailed legal analysis of the provisions of the TRIPS Agreement, as well as elements to consider their economic implications in different legal and socio-economic contexts. This book provides an in depth analysis of the principles and of the substantive and enforcement provisions of the TRIPS Agreement, the most influential international treaty on intellectual property currently in force. It discusses the legal context in which the Agreement was negotiated, the objectives of their proponents and the nature of the obligations it created for the members of the World Trade Organization. In particular, it examines the minimum standards that must be implemented with regard to patents, trademarks, industrial designs, geographical indications, copyright and related rights, integrated circuits, trade-secrets and test data for pharmaceutical and agrochemical products. Trade Related Aspects of Intellectual Property Rights: A Commentary on the TRIPS Agreement elaborates on the interpretation of provisions contained in said Agreement, in the light of the customary principles for the interpretation of international law. The analysis -which is supported by a review of the relevant GATT and WTO jurisprudence- identifies the policy space left to such members to implement their obligations in accordance with their own legal systems and public policy objectives, including in respect of complex issues such as patentability criteria, compulsory licenses, exceptions and limitations to copyright, border measures, injunctive relief and the protection of test data under the discipline of unfair competition.

Interpreting and Implementing the Trips Agreement

Publisher's description: Developing countries are increasingly confronted with the need to address trade policy related issues in international agreements, most prominently the World Trade Organization (WTO). New WTO negotiations on a broad range of subjects were launched in November 2001. Determining whether and how international trade agreements can support economic development is a major challenge. Stakeholders in developing countries must be informed on the issues and understand how their interests can be pursued through international cooperation. This handbook offers guidance on the design of trade policy reform, surveys key disciplines and the functioning of the World Trade Organization (WTO), and discusses numerous issues and options that confront developing countries in using international cooperation to improve domestic policy and obtain access to export markets. Many of the issues discussed are also relevant in the context of regional integration agreements. Separate sections of the handbook summarize what constitutes sound trade policy; the major aspects of the WTO from a development perspective; policy issues in the area of merchandise trade and the liberalization of international transactions in services; protection of intellectual property rights and economic development; new regulatory subjects that are emerging in the agenda of trade talks; and enhancing participation of developing countries in the global trading system.

Development, Trade, and the WTO

Now into its second decade, the Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS) continues to meet challenges raised by ongoing technological changes as it affirms an increasing degree of latitude to national authorities in its implementation. Important developments and controversies witnessed in the nine years since the first edition of this much-welcomed treatise include issues of public health, implications of the Agreement on the realization of human rights, and continuous debates on geographic indications and the appropriation of genetic resources. This second edition incorporates the analysis of key provisions of the Agreement resulting from dispute settlement procedures under WTO rules.

Intellectual Property and International Trade

Contains the complete and official texts of the WTO Agreements, collated in one volume.

The WTO Agreements

Matthew Kennedy exposes the challenges created by the integration and independence of TRIPS within the WTO.

WTO Dispute Settlement and the TRIPS Agreement

This book gives an in-depth analysis of the various facets of international trade, and its regulations by the World Trade Organisation. In addition, it discusses the Multilateral Trade Agreements under the Uruguay Round of multilateral trade negotiations. This edition discusses the development and issues relating to globalization of the economy, trade and the expanding role of WTO.

WTO and International Trade, 2nd Edition

The TRIPS Agreement was implemented in the WTO to gain access to a functioning dispute settlement mechanism that could authorize trade sanctions. Yet TRIPS and the WTO Dispute Settlement Understanding are based on systems that developed independently in WIPO and GATT. In this book, Matthew Kennedy exposes the challenges created by the integration and independence of TRIPS within the WTO by examining how this trade organization comes to grips with intellectual property disputes. He contrasts the way intellectual property disputes between governments have been handled before and after the establishment of the WTO. Based on practical experience, this book provides a comprehensive review of the issues that arise under the DSU, TRIPS, GATT 1994 and other WTO agreements in intellectual property matters. These range from procedural pitfalls to substantive treaty interpretation and conflicts as well as remedies, including cross-retaliation.

WTO Dispute Settlement and the TRIPS Agreement

This book examines the impact and shortcomings of the TRIPS Agreement, which was signed in Marrakesh on 15 April 1994. Over the last 20 years, the framework conditions have changed fundamentally. New technologies have emerged, markets have expanded beyond national borders, some developing states have become global players, the terms of international competition have changed, and the intellectual property system faces increasing friction with public policies. The contributions to this book inquire into whether the TRIPS Agreement should still be seen only as part of an international trade regulation, or whether it needs to be understood – or even reconceptualized – as a framework regulation for the international protection of intellectual property. The purpose, therefore, is not to define the terms of an outright revision of the TRIPS Agreement but rather to discuss the framework conditions for an interpretative evolution that could make the Agreement better suited to the expectations and needs of today's global economy.

TRIPS plus 20

The TRIPS Agreement (Agreement on Trade-Related Aspects of Intellectual Property Rights), introduced intellectual property protection into the World Trade Organization's multilateral trading system for the first time. This book examines its interpretation, its impact on the creative environment, and much more.

A Neofederalist Vision of TRIPS

With the launch of the World Trade Organization (WTO) in 1995, its Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS) emerged as a symbol of coercion in international economic relations. In the decade that followed, intellectual property became one of the most contentious topics of global policy debate. This book is the first full-length study of the politics surrounding what developing countries did to implement TRIPS and why. Based on a review of the evidence from 1995 to 2007, this book emphasises that developing countries exhibited considerable variation in their approach to TRIPS implementation. In particular, developing countries took varying degrees of advantage of the legal safeguards and options commonly known as TRIPS 'flexibilities' that the Agreement provides. To explain this variation, this book argues that TRIPS implementation must be understood as a complex political game played out among developing country governments and a range of stakeholders – developed countries, non-governmental organisations (NGOs), intergovernmental organisations (IGOs), and industry groups. The contested nature of the TRIPS bargain spurred competing efforts to revise the terms of TRIPS and to influence global IP regulation more broadly. The intensity of the implementation game was amplified by an awareness among the various stakeholders that the IP reforms developing countries pursued would influence these ongoing international negotiations. The book attributes the

variation in TRIPS implementation to the interplay between these global IP debates, international power pressures, and political dynamics within developing countries. The book includes historical analysis, compilations of evidence, and analysis supported by examples from across the developing world. The Implementation Game will be of interest both to scholars of international relations, law, and international political economy as well as to policymakers, commentators, and activists engaged in debates on the global governance of intellectual property.

The Implementation Game

International trade rules have significant impacts on environmental law and policy, at the domestic, regional and global levels. At the World Trade Organization (WTO), dispute settlement tribunals are increasingly called to decide on environment- and health-related questions. Can governments treat products differently based on environmental considerations? Can they block the import of highly carcinogenic asbestos-containing products or genetically modified crops? Does the WTO allow governments to protect dolphins or endangered sea turtles through the use of import restrictions on certain products? How can civil society participate in WTO dispute settlement? This Guide, authored by five world leaders on international environmental and trade law at the Center for International Environmental Law (CIEL), is an accessible, comprehensive, one-of-a-kind compendium of environment and trade jurisprudence under the WTO. Providing an overview for both experts and non-experts of the major themes relevant to environment and trade, it also analyses how WTO tribunals have approached these themes in concrete disputes and provides selected excerpts of the most significant cases.

Environment and Trade

The book deals with a difficult subject with an assured touch and will be a valuable text for postgraduate students, policy-makers and practitioners. European Intellectual Property Review This is the first ever book that addresses the important issue of the competition law, intellectual property and trade interface in a developing world context. The book's unique contribution is a set of comparative case studies on this complex interface. D. Daniel Sokol, University of Florida Levin College of Law, US The book investigates competition law and international technology transfer in the light of the TRIPS Agreement and the experience of both developed and developing countries. On that basis, it draws relevant implications for developing countries. Tu Thanh Nguyen argues that technology transfer-related competition law should be globalized appropriately for the needs of local contexts, while intellectual property rights (IPR) are globalized. The book reveals that developing countries, according to the TRIPS Agreement, have the right to use domestic competition law to promote access to technology in order to protect national interests and consumer welfare. However, competition law is antitrust. It is neither anti-IPR nor anti-trade. The author finds that developing countries with limited competition law resources should set realistic priorities for the control of technology transfer-related anti-competitive practices. They can reasonably apply and adapt relevant regulations, decisions and judgments from developed country jurisdictions to their own circumstances. Competition Law, Technology Transfer and the TRIPS Agreement is a timely resource for postgraduate students, practitioners, and scholars in international competition law, IPR, and technology transfer. Policymakers in the field of technology transfer-related competition law/policy, especially in developing countries, will also find this book invaluable.

Competition Law, Technology Transfer and the TRIPS Agreement

Produced by the WTO Secretariat, this handbook explains the process whereby governments become Members of the WTO.

A Handbook on Accession to the WTO

This book presents us with an assessment of the economic implications of the TRIPs agreement for developing countries focusing on market-related costs & benefits, as well as direct costs stemming from the implementation of each discipline. It also explores the role international organizations can play in terms of assistance. Detailed results of case studies carried out to envelope countries of different regions & different levels of economic & technological development are also included.

The TRIPS Agreement and Developing Countries

This book analyzes how today's system of international trade law and international economic relations has evolved over the last six decades. Focusing on the major innovations that came with the inception

of the World Trade Organization (WTO) with its various agreements in 1994, it also provides in-depth commentary on the intense debate over important matters that remain unsettled. Topics covered include the WTO dispute settlement mechanism; the General Agreement on Trade in Services (GATS); the Agreement on Trade-Related Investment Measures (TRIMS); intellectual property rights – the Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS); areas still covered by the General Agreement on Tariffs and Trade (GATT) 1947; the Most Favoured Nation (MFN) concept; special provisions relating to agriculture and textiles; sanitary and phytosanitary measures; technical barriers to trade; pre-shipment inspection; and import licensing procedures. The book would be an excellent resource for scholars as well as practitioners working in the field of international arbitration and trade laws.

Guide to the WTO and GATT

This Commentary on the WTO Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS) provides a detailed textual analysis of TRIPS - a pivotal international agreement on intellectual property rights. TRIPS sets minimum standards for national laws on copyright, patents, trademarks and other forms of intellectual property rights. TRIPS profoundly impacts upon the regulation of access to medicines, compulsory licensing of copyright material, geographical indicators and other significant IP-related matters.

The WTO Agreement on Trade-Related Aspects of Intellectual Property Rights

This text examines the history and context of the TRIPS agreement and assesses its likely impact on the future development of the international intellectual property framework.

The TRIPS Agreement

Although it is common knowledge that the compliance of developing countries with the Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS) has become a serious stumbling block in the WTO agenda, the underlying reasons why this is so have not been dispassionately analyzed until the appearance of this book. Here, for the first time, is a thorough and secure foundation on which international trade lawyers and business people can build a global intellectual property regime that is both productive and fair. The implementation of the TRIPS regime with its enormous effect on national and global strategies for healthcare, agriculture, and the environment, among other crucial sectors of the world economy is clearly among the most critical projects currently under way in the field of international relations. As a former TRIPS negotiator for India, Jayashree Watal brings great authority to her account of the benefits and pitfalls of TRIPS compliance for developing countries. She provides a detailed understanding of how TRIPS was negotiated at the Uruguay Round, how various countries have implemented it so far, and how the WTO monitors compliance. She reveals how the WTO dispute settlement process has worked to date in matters involving TRIPS, and how it is likely to deal with new issues that arise. Most importantly, she explains how developing countries can interpret TRIPS to their best advantage, and how to ensure that the 'constructive ambiguity' that characterizes the agreement remains flexible.

Intellectual Property Rights in the WTO and Developing Countries

The TRIPS agreement which was adopted in 1994 is the most comprehensive and influential international treaty on intellectual property rights. This volume provides a detailed legal analysis of its provisions, as well as the jurisprudence already being developed in the context of the World Trade Organisation.

Trade Related Aspects of Intellectual Property Rights

This book examines international trade law and its intersection with states and other aspects of the international system. It covers the economic and institutional context of the world trading system, substantive law of the WTO, dispute settlement, and the interaction between trade and other disciplines in international law.

The Oxford Handbook of International Trade Law

Brazil's insertion into the World Trade Organization (WTO) has stimulated economic growth, as the country has been benefiting from lower trade barriers. The country has accepted the Agreement on

Trade-Related Aspects of Intellectual Property Rights (TRIPS) - Annex 1C of the WTO agreement - which sets out minimum standards of protection for Intellectual Property (IP) rights. Law No. 9,279, of May 14, 1996 was enacted to comply with TRIPS, suppressed restrictions to patentable subject matter, allowing patents in the pharmaceutical field. The granting of compulsory licenses as one of the flexibilities to patent rights provided in TRIPS and in the Brazilian law plays an important role in the governmental program of free distribution of drugs for the treatment of AIDS, evidencing the complex relationship between private and public interests. This study has been conducted with use of bibliographical method, providing for an analysis of the Brazilian patent law within the framework provided by TRIPS. The provisions on patents in the pharmaceutical area and compulsory license have been chosen to serve as the main driver for such analysis. Viviane Yumy Mitsuuchi Kunisawa is a Brazilian attorney specialized in IP Law.

The TRIPS Agreement Implementation in Brazil

Patents, including pharmaceutical patents, enjoy extended protection for twenty years under the TRIPS Agreement. The Agreement has resulted in creating a two-tier system of the World Trade Organisation Member States, and its implementation has seen the price of pharmaceutical products skyrocket, putting essential medicines beyond the reach of the common man. The hardest hit populations come from the developing and least developed countries, which have either a weak healthcare system or no healthcare at all, where access to essential and affordable medicines is extremely difficult to achieve. Pharmaceutical Patent Protection and World Trade Law studies the problems faced by these countries in obtaining access to affordable medicines for their citizens in light of the TRIPS Agreement. It explores the opportunities that are still open for some developing countries to utilise the flexibilities available under the TRIPS Agreement in order to mitigate the damage caused by it. The book also examines the interrelationship between the world governing bodies, and the right to health contained in some of the developing country's national constitutions.

Pharmaceutical Patent Protection and World Trade Law

As the world confronts global warming, there is a growing consensus that the TRIPS Agreement could be a more effective instrument for mitigating climate change. In this innovative work, Wei Zhuang systematically examines the contextual elements that can be used in the interpretation of the TRIPS Agreement with a view to enhancing innovation and transfer of environmentally sound technologies. Zhuang proposes a balanced and pro-competitive interpretation that could be pursued by policy makers and negotiators. This comprehensive, multidisciplinary study will help academics and policymakers improve their understanding of the contemporary international legal regimes governing intellectual property rights and innovation and transfer of environmentally sound technologies. It also offers practical guidance for further developing a legal system capable of responding to the challenges posed by climate change.

Intellectual Property Rights and Climate Change

This book offers a critical examination of the jurisprudence of the World Trade Organization (WTO) as an emancipatory international social contract on trade. The book suggests that the WTO is an international organization built and operating on member states' attribution of authority through consent with legislative, administrative, and adjudicative functions – three functions in one triune personality. With a solid constitutional continuity building on GATT experiences, the WTO has successfully made governments accountable to foreign individuals in various capacities either as traders of goods, providers of services, or holders of intellectual property rights within the global marketplace. With a triune personality, the WTO operates within the reign of state primacy – the force – ultimately for the benefits of individuals – the ends – in the global marketplace, and gains a soul of its own in the institutional evolution – the means – of the global trading regime. Although the tripartite dynamics between states, international institutions, and individuals in the global marketplace are unprecedentedly complex, the WTO's ends of benefiting individuals in the global marketplace has no end. Beyond the critical analysis of WTO's decision-making by consensus, the book critically examines GATT's "common intention" treaty interpretation, Antidumping's NME methodology, TRIPS' public health concerns, and IP-competition trade policy dynamics. A unified WTO jurisprudence looking at the WTO as an international social contract on trade is therefore proposed to allow a fresh look at the force, the means, and the ends of the constitutional evolution of the global trading regime.

WTO Jurisprudence

Analysis of the power of multinational corporations in moulding international law on intellectual property rights.

Private Power, Public Law

This book is the first study to examine the issue of the legality of parallel imports of trademarked goods under the most important legal systems on an international level, namely under GATT/WTO law, EU law and the laws of the ten major trading partners of the European Union. Part I consists of a general approach to the phenomenon of parallel importation and of a presentation of the theories that have been suggested to resolve the above-mentioned issue. The rule of exhaustion of rights, of which there are three types (rule of national, regional and international exhaustion of rights), is proposed as the most effective instrument to deal with the issue in question. Part II examines the question of exhaustion of trademark rights in light of the provisions of GATT/WTO Law. Part III analyzes the elements of the EU provisions on exhaustion of trademark rights (Articles 7 of Directive 2008/95/EC and 13 of Regulation (EC) 207/2009) and some specific issues relating to the application of these provisions. Part IV presents the regimes of exhaustion of trademark rights recognized in the European Union's current ten most significant trading partners. The book is the first legal study to welcome, in light of economic analysis, the approach adopted by GATT/WTO law and EU law to the question of the geographical scope of the exhaustion of the trademark rights rule. It includes all the case law developed on an international level on the issue of the legality of parallel imports of trademarked goods and a comprehensive overview of the scientific literature concerning the phenomenon of parallel imports in general and the legality of parallel imports of trademarked goods. All the views expressed in the book are based on the European Court of Justice's most recent case law and that of the courts of the most important trading partners of the European Union.
