Preventing Reading Difficulties in Young Children

While most children learn to read fairly well, there remain many young Americans whose futures are imperiled because they do not read well enough to meet the demands of our competitive, technology-driven society. This book explores the problem within the context of social, historical, cultural, and biological factors. Recommendations address the identification of groups of children at risk, effective instruction for the preschool and early grades, effective approaches to dialects and bilingualism, the importance of these findings for the professional development of teachers, and gaps that remain in our understanding of how children learn to read. Implications for parents, teachers, schools, communities, the media, and government at all levels are discussed. The book examines the epidemiology of reading problems and introduces the concepts used by experts in the field. In a clear and readable narrative, word identification, comprehension, and other processes in normal reading development are discussed. Against the background of normal progress, *Preventing Reading Difficulties in Young Children* examines factors that put children at risk of poor reading. It explores in detail how literacy can be fostered from birth through kindergarten and the primary grades, including evaluation of philosophies, systems, and materials commonly used to teach reading.

Reading Reconsidered

TEACH YOUR STUDENTS TO READ WITH PRECISION AND INSIGHT The world we are preparing our students to succeed in is one bound together by words and phrases. Our students learn their literature, history, math, science, or art via a firm foundation of strong reading skills. When we teach students to read with precision, rigor, and insight, we are truly handing over the key to the kingdom. Of all the subjects we teach reading is first among equals. Grounded in advice from effective classrooms nationwide, enhanced with more than 40 video clips, *Reading Reconsidered* takes you into the trenches with actionable guidance from real-life educators and instructional champions. The authors address the anxiety-inducing world of Common Core State Standards, distilling from those standards four key ideas that help hone teaching practices both generally and in preparation for assessments. This 'Core of the Core' comprises the first half of the book and instructs educators on how to teach students to: read harder texts, 'closely read' texts rigorously and intentionally, read nonfiction more effectively, and write more effectively in direct response to texts. The second half of *Reading Reconsidered* reinforces these principles, coupling them with the 'fundamentals' of reading instruction—a host of techniques and subject specific tools to reconsider how teachers approach such essential topics as vocabulary, interactive reading, and student autonomy. *Reading Reconsidered* breaks an overly broad issue into clear, easy-to-implement approaches. Filled with practical tools, including: 44 video clips of exemplar teachers demonstrating the techniques and principles in their classrooms (note: for online access of this content, please visit my.teachlikeachampion.com) Recommended book lists Downloadable tips and templates on key topics like reading nonfiction, vocabulary instruction, and literary terms and definitions. *Reading Reconsidered* provides the framework necessary for teachers to ensure that students forge futures as lifelong readers.

Teaching with the Common Core Standards for English Language Arts, PreK-2

Nearly every state has independently adopted the Common Core State Standards (CCSS), making this practical guide an indispensable resource for PreK-2 teachers and teachers-in-training. Leading authorities explain each of the English language arts (ELA) standards and vividly show how to implement them. The book is filled with grade-specific classroom vignettes, instructional strategies and activities, sample lesson plans, and discussion questions. Chapters cover the major ELA strands: reading (literature, informational texts, and foundational skills); writing; speaking and listening; and language. Issues of assessment and technology integration are also explored. An appendix includes thematic units for each grade level demonstrating ways to embed CCSS/ELA standards into content-area instruction. See also *Teaching with the Common Core Standards for English Language Arts, Grades 3-5*.

On Reading Books to Children

On Reading Books to Children: Parents and Teachers brings together in one volume current research on adult book reading to children. The authors, drawn from around the world, are key researchers and eminent scholars from the fields of reading and literacy, child language, speech pathology, and psychology, representing multiple perspectives within these disciplines. Chapters on the effects and limitations of book sharing are integrated with chapters discussing promising programs on storybook research. The reality of reading to children is more complex than it appears on the surface. The authors discuss some effects of and suggestions for reading to children that have emerged from the research. The ideas set forth in this volume will stimulate new lines of research on the effects of storybook reading, as well as refinements of current methods, yielding findings that enrich our understanding of this important arena of literacy development.

Text Complexity

There is a big difference between assigning complex texts and teaching complex texts. No matter what discipline you teach, learn how to use complexity as a dynamic, powerful tool for sliding the right text in front of your students' at just the right time. Updates to this new edition include How-to's for measuring countable features of any written work. A rubric for analyzing the complexity of both literary and informational texts. Classroom scenarios that show the difference between a healthy struggle and frustration. The authors' latest thinking on teacher modeling, close reading, scaffolded small group reading, and independent reading.

Building Communities of Engaged Readers

Reading for pleasure urgently requires a higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. *Building Communities of Engaged Readers* highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy field and illustrated throughout with examples from the project schools, it is essential reading for all those concerned with improving young people's enjoyment of and attainment in reading.

Before Words

In this book, the author challenges reductive views of emergent literacy prevalent in many of today's kindergarten and pre-K classrooms. As an alternative, Lysaker explains how reading wordless books with young children helps them to develop a range of comprehension abilities that are important for understanding narrative texts. Readers will find concrete methods to help them gauge, document, and respond to children as they make meaning of and respond to wordless books. Through description and analysis, the text reveals the undervalued richness of young children's emergent comprehension and the intricate, purposeful nature of their specific early thinking activities. *Before Words* encourages readers to think about young children's comprehension as complex meaning-making and suggests new ways of responding to the unique sense-making tools young children use during wordless book reading. **Book Features:** Demonstrates how young children develop reading comprehension abilities even before learning to read print. Expands on reading as more than just a technical skill. Engages the whole child and scaffolds their formation of relationships with other people, including peers, teachers, families, and communities. Nurtures students' creativity, positive relationships with storytelling, and social-emotional growth. Offers guidance for building a wordless book library, including a selected list of books. "A breakthrough work. Prepare to have your mind opened to completely new terrain in children's literate development." —From the Foreword by Peter Johnston, The University at Albany—SUNY "Before Words is a kidwatcher's delight! Her sensitive descriptions of reading conversations provide concrete strategies that will be welcome additions to both novice and experienced teachers' toolkits!" —Deborah Wells Rowe, Vanderbilt University "Scholars of early childhood literacy development will find much of interest in this book." —Nell K. Duke, University of Michigan

Children's Early Text Construction

For decades, research on children's literacy has been dominated by questions of how children learn to read. Especially among Anglophone scholars, cognitive and psycholinguistic research on reading has been the only approach to studying written language education. Echoing this, debates on methods of teaching children to read have long dominated the educational scene. This book presents an alternative view. In recent years, writing has emerged as a central aspect of becoming literate. Research in cognitive psychology has shown that writing is a highly complex activity involving a degree of planning unknown in everyday conversational uses of language. At the same time, developmental studies

have revealed that when young children are asked to "write," they show a surprisingly sophisticated understanding of the representational constraints of alphabetic writing systems. They show this understanding long before they can read conventional writing on their own. The rich structure of meanings involved in the word text provided the glue that brought together a group of scholars from several disciplines in an international workshop held in Rome. Reflecting the state of the field at the time, the majority of the workshop participants were scholars working in languages other than English, especially the romance languages. Their work mirrors a linguistic and psychological research tradition that Anglophone scholars knew little of until recently. This volume provides English-language readers with updated versions of the papers presented at the meeting. The topics discussed at the workshop are represented in the chapters as follows: * the relationship between acquisition of language and familiarity with written texts; * the reciprocal "permeability" between spoken and written language; * the initial phases of text construction by children; and * the educational conditions that facilitate written language acquisition and writing practice.

Reading for Their Life

"Because African American adolescent males and face their own challenges, they must identify texts that mark their times and their lives. If we create opportunities for this to happen, they will not only begin to trust the texts, they will begin to trust us, too. Then maybe, we'll hear one of them say, Education is on our side, ' or, 'I used to keep it gutter, but now I am all good.' This is my hope." -Alfred Tatum No reading strategy, no literacy program, no remediation will close the achievement gap for adolescent African American males. These efforts will continue to fail our students, says Alfred Tatum, until reading instruction is anchored in meaningful texts that build academic and personal resiliency inside and outside school. In Reading for Their Life Tatum takes a bold step beyond Teaching Reading to Black Adolescent Males. He shows how teachers can encourage adolescent African American males to connect with reading by defining who they are through textual lineages-texts with significance, carefully chosen for instruction because they are useful to young black males and because they matter. With works ranging from Up from Slavery and Souther to the contemporary Handbook for Boys, Tatum helps you: understand what adolescent African American male readers need select enabling texts that have worked in Tatum's own teaching build textual lineages by putting meaningful texts at the core of a challenging curriculum engage readers in the curriculum through essential questions, writing, and self-assessment. Click here to see Alfred talking about this book. "African American males are not engaged in a great conspiracy to fail themselves," writes Tatum. "They continue to underperform in school as they wait for educators to get it right." Join Alfred Tatum, use Reading for Their Life, and strive for "a way to squeeze enabling texts for every ounce of possibility they contain for advancing the literacy development of African American adolescent males." Understanding and Teaching Reading Comprehension

The ultimate aim of reading is not the process but to understand what we read and comprehension can take place at many different levels. There has been an increasing emphasis on the importance of reading comprehension in recent years but despite this there is very little written on this vital topic accessible to trainee and practicing teachers. The *Handbook of Reading Comprehension* presents an overview of recent findings on reading comprehension and comprehension problems in children. It provides a detailed examination of the characteristics of children who have reading comprehension difficulties, and examines ways in which comprehension can be supported and improved. It is accessibly written for students and professionals with no previous background in the psychology of reading or reading problems. This indispensable handbook asks the question 'what is comprehension?' The authors consider comprehension of different units of language: understanding single words, sentences, and connected prose and outline what readers (and listeners) have to do to successfully understand an extended text. This book also considers comprehension for different purposes, in particular reading for pleasure and reading to learn and explores how reader characteristics such as interest and motivation can influence the comprehension process. Different skills contribute to successful reading comprehension. These include word reading ability, vocabulary knowledge, syntactic skills, memory, and discourse level skills such as the ability to make inferences, knowledge about text structure, and metacognitive skills. The authors discuss how each one contributes to the development of reading comprehension skill and how the development of these skills (or their precursors) in pre-readers, provides the foundation for reading comprehension development. Areas covered include:- Word reading and comprehension Development of comprehension skills Comprehension difficulties Assessment Teaching for improvement Throughout the text successful experimental and classroom based interventions will be highlighted, practical tips for teachers and summary boxes detailing key points and explaining technical terms will be included in each chapter

Two Books Are Better Than One!

Today's early literacy programs are more demanding than ever. No longer is it sufficient to teach letters, letter sounds, sight words, and simple texts in kindergarten through second grade. Children are expected to read and comprehend texts in a variety of genres with increasing complexity. Then they must integrate the ideas and concepts from those texts into their own writing. *Two Books are Better Than One: Reading and Writing (and Talking and Drawing) Across Texts in K-2* helps teachers meet those demands. Each chapter contains an anchor lesson focused on a different way of connecting texts, including: by theme, characters, perspective, structure, or genre. The lessons feature research-based and common core aligned strategies: interactive read-alouds; shared reading and writing; scaffolded small group reading; accountable talk; close reading; and opinion, narrative, and explanatory writing. Each anchor lesson features two high-quality children's books, and each chapter is rounded out with a list of other recommended book pairs to support you in creating your own lessons.

How People Learned to Fly

People have taken dangerous risks trying to fly. Some inventors built wings for their arms and flapped them like birds. Some built balloons. Some built machines that glided with the wind. It wasn't easy, though, and it took a long time and much experimentation until people invented the airplane. Read and find out how people learned to fly.

Transformational Literacy

Engage, challenge, and inspire students with work that matters *Transformational Literacy*, written by a team from EL Education, helps teachers leverage the Common Core instructional shifts—building knowledge through content-rich nonfiction, reading for and writing with evidence, and regular practice with complex text—to engage students in work that matters. Worthy texts and worthy tasks help students see the connection between their hard work as readers and writers and their capacity to contribute to stronger communities and a better world. The stories, examples, and resources that permeate *Transformational Literacy* come primarily from the more than 150 EL Education schools around the country that support teachers to select, supplement, customize, and create curriculum, and improve instruction. The book also draws on EL Education's open source Common Core English

Language Arts curriculum—often cited as one of the finest in the country—and professional development offered to thousands of teachers to implement that curriculum effectively. Transformational Literacy combines the best of what EL Education knows works for kids—purposeful, inquiry-based learning—and the new imperative of the Common Core—higher and deeper expectations for all students. Teach standards through a compelling and purposeful curriculum that prioritizes worthy texts and worthy task. Improve students' evidence-based reading, thinking, talking, and writing. Support students to develop a new mindset toward the challenge of reading complex texts. Struggling Readers Can Succeed

In spite of No Child Left Behind and the support provided by Response To Intervention, significant numbers of students continue to struggle with literacy. This text addresses learning-related needs of individual students in addition to interventions for the challenges they face. Struggling readers represent many different ethnicities, socio-economic levels, languages, and dialects in any combination and possess an even wider variety of social, cultural, motivational, literacy, and real world experiences. Through the presentation of case studies, this book considers these factors and their influence on literacy development and suggests ways to adapt research-based instructional strategies and approaches, as well as classroom practices to address them. It also includes related recommended resources. The text appeals to the concerns of classroom teachers, reading specialists, and faculty in teacher education programs, as well as anyone looking for practical, research-based ways to further the literacy development of individuals who struggle to read.

Reading Comprehension Difficulties

Recognizing the characteristics of children with learning disabilities and deciding how to help them is a problem faced by schools all over the world. Although some disorders are fairly easily recognizable (e.g., mental retardation) or very specific to single components of performance and quite rare (e.g., developmental dyscalculia), schools must consider much larger populations of children with learning difficulties who cannot always be readily classified. These children present high-level learning difficulties that affect their performance on a variety of school tasks, but the underlying problem is often their difficulty in understanding written text. In many instances, despite good intellectual abilities and a superficial ability to cope with written texts and to use language appropriately, some children do not seem to grasp the most important elements, or cannot find the pieces of information they are looking for. Sometimes these difficulties are not immediately detected by the teacher in the early school years. They may be hidden because the most obvious early indicators of reading progress in the teacher's eyes do not involve comprehension of written texts or because the first texts a child encounters are quite simple and reflect only the difficulty level of the oral messages (sentences, short stories, etc.) with which the child is already familiar. However, as years go by and texts get more complex, comprehension difficulties will become increasingly apparent and increasingly detrimental to effective school learning. In turn, studying, assimilating new information, and many other situations requiring text comprehension -- from problem solving to reasoning with linguistic contents -- could be affected. Problems with decoding, dyslexia, and language disorders have attracted more interest from researchers than have specific comprehension problems and have occupied more room in specialized journals. Normal reading comprehension has also been a favorite with researchers. However, scarce interest has been paid to subjects who have comprehension difficulties. This book is an attempt to remedy this situation. In so doing, this volume answers the following questions: * Does a reading comprehension problem exist in schools? * How important and widespread is the problem? * Is the problem specific? * How can a reading comprehension difficulty be defined and identified? * Does the "syndrome" have a single pattern or can different subtypes be identified? * What are the main characteristics associated with a reading comprehension difficulty? * When can other well-identified problems add to our understanding of reading comprehension difficulties? * Which educational strategies are effective in preventing and treating reading comprehension difficulties? * What supplementary information can we get from an international perspective?

Reinventing Curriculum

In this book, Linda Laidlaw explores the questions: What happens when children begin to write? Why is it that the teaching and practice of writing seems at times to be difficult in schools? How might teachers work differently to create more inviting spaces for developing literacy? The premise is that written texts and literacy processes are developed within a complex "weave" of particular contexts, or ecologies, and the unique particularity of the learner's experiences, histories, memories and interpretations. Laidlaw offers new information about writing and literacy pedagogy linked to current research in the complexity sciences and cognition, and considers the possibilities that might emerge for pedagogy when alternative metaphors, images, and structures are considered for writing and curriculum. The volume includes qualitative and narrative description of writing and literacy situations, events, and pedagogy, and elaborates the historical, theoretical, and curricular background in which such instruction exists within contemporary schooling. *Reinventing Curriculum: A Complex-Perspective on Literacy and Writing*:

- *addresses literacy through a focus on writing rather than on reading;
- *develops an approach to literacy and writing pedagogy that incorporates recent theories and research on learning and the complexity sciences;
- *examines perspectives on writing from both a teaching perspective and that of the work of writers;
- *makes connections between the acquisition of literacy to research in other domains;
- *examines both the benefits and the "costs" of literacy; and
- *challenges "commonsense" understandings within instruction, for example, that literacy teaching and learning can occur apart from other aspects of children's learning, context, and subjectivity, or that learning occurs individually rather than collectively.

This book is important reading for researchers, professionals, teacher educators, and students involved in literacy education and writing instruction, and an excellent text for courses in these areas.

Raising Kids Who Read

How parents and educators can teach kids to love reading in the digital age Everyone agrees that reading is important, but kids today tend to lose interest in reading before adolescence. In *Raising Kids Who Read*, bestselling author and psychology professor Daniel T. Willingham explains this phenomenon and provides practical solutions for engendering a love of reading that lasts into adulthood. Like Willingham's much-lauded previous work, *Why Don't Students Like School?*, this new book combines evidence-based analysis with engaging, insightful recommendations for the future. Intellectually rich argumentation is woven seamlessly with entertaining current cultural references, examples, and steps for taking action to encourage reading. The three key elements for reading enthusiasm—decoding, comprehension, and motivation—are explained in depth in *Raising Kids Who Read*. Teachers and parents alike will appreciate the practical orientation toward supporting these three elements from birth through adolescence. Most books on the topic focus on early childhood, but Willingham understands that kids' needs change as they grow older, and the science-based approach in *Raising Kids Who Read* applies to kids of all ages. Guided Reading Comprehension Passages and Questions

Guided Reading Comprehension Pre K Passages and Questions : Levels A - L Guided Reading Awards and Parent Handouts for Text for PreK, Kindergarten, 1st, 2nd Grade : This pack is designed to celebrate when a child transitions to a new Guided Reading Comprehension Pre K level, and to let their parents know how to best help at home at each level. (Celebrate and Educate!) The awards in this pack help celebrate the student's growth in reading comprehension and skills grade 2. These awards are provided on 3 different backgrounds. Two of the backgrounds utilize color, but also print well on black and white. The third background is a subtle ink-sparing black and white swirl. Awards are included for Guided Reading Levels A - Q. On the last award, the reading level is blank so you can fill in higher levels as desired. (The awards are on pages 3 - 29) The parent handouts educate parents about the best ways to help their child at the specific level he/she is reading at. This packet includes a separate Parent Handout for each Guided reading comprehension passages grade 2 Level from A - L. (The handouts are on pages 30 - 71.) I find that sending a handout home in my guided reading bags each time a child transitions to a new reading level helps parents more effectively support their child's learning. Includes ideas for helping students: - Develop voice to print match - Use a combination of initial sounds, picture clues and meaning - Develop sight word knowledge - Engage in shared writing at home - Learn to monitor their own reading - Make connections to stories - Work with cut-up sentences - Read smoothly and with expression - Find interesting details - Recognize and use word chunks - Think deeply about informational and literary texts - Develop a fluent reading style - Flexibly use word chunks with both long and short vowels - Go on a "Long Vowel Scavenger Hunt" - Reading comprehension pre kindergarten - Work with compound words - Become familiar with more complex text layouts - Work with contractions - Break words into syllables - Ask and answer text-based questions - Participate in rich discussions about books - Use closed captioning to develop reading skills - Much more I also use many of these ideas in guided reading groups and literacy centers on a regular basis. I hope you find these helpful! - Reading Comprehension Workbook Grade 2 Passages and Questions Education

Because the ability levels of students in any one grade level vary, each book spans a broad range of skills. Both teachers and parents can use the books to introduce new concepts, to assess learning and skill development, and to reinforce familiar knowledge. The versatile activities can be used for individual practice, test preparation, or homework assignments. Complete answer keys are provided.

As a teacher of eleven years and mother of four children, I've been where you are and am where you want to be. I started teaching fresh out of college, and I loved it. Having my first child was wonderful too, but it was completely different. Toddlerhood was newer yet. Preschool brought new challenges. I thought I had this "schooling" thing licked, but then we reached the Kindergarten stage, and everything changed again. Now your time has come. Your child has reached Kindergarten -- a turning-point in life. You've been teaching your toddler and preschooler all his life, making learning important and readying him for this point. You've asked yourself and answered many questions: Should I send him to public school, private school, a charter school, or just keep him home? Did I teach him the right things? Did I teach him enough? Is he ready to leave me? Am I ready to let him go? Now things are changing. His style of learning is changing. His skills, the way he comprehends, how much he can absorb and recall later has changed. Now that he's officially a "big kid\

Based on our creation we wrote a workbook (Simplified Phonics), which is very easy and teaches reading and writing of all the three letter words and many short sentences in several weeks. The book has some other advantages, which make the learning material much easier. Here are some: 1) We delay teaching the ABC and the uppercase letters, because at this stage children don't need to use them. 2) All the words in the book are three letter words with short vowels. 3) Each letter has only its basic sound in different words. 4) The words are written with both animal/letters and the regular black letters. 5) Reading and writing are based on phonics: [k, a, t] = cat, cat = [k, a, t] 6) Exercises of the workbook are full of pictures, very easy and fun.
