The WISC Test (Wechsler Intelligence Scale for Children) is an IQ test administered to children between ages 6 and 16.

The objective of the exam is to understand whether a child is gifted and to determine a student's cognitive strengths and

Because an IQ test is so different from a skills or achievement test, it is harder to study for.

During the test, students can have up to 10 different types of questions.

The types of questions include similarities, vocabulary, block design, matrix reasoning, figure weights, digit span, coding, visual puzzles, picture span, and symbol search.

The skills assessed by these 10 question types include verbal comprehension, visual spatial reasoning, fluid reasoning, working memory, and processing speed.
