How do we prevent a looming global famine?

The climate is

Deserts are expanding and sea levels are rising.

Our arable land is being degraded

Rainforests are dying, destroying biodiversity.

Freshwater is becoming scarce and soils are rendered less fertile.

Industrial exploitation poisons our seas and rivers.

Fish stocks are on the verge of collapse.

So how can our research help?

We help breeders select beneficial traits

We advance agriculture through genomics and phenomics.

This informs farming practices and helps monitor crops in real-time.
and the health of our most important livestock.

Across fields, oceans and deserts, we explore the breadth of life on earth

We are the Earlham Institute.
