

Joseph Dilemma Honour Killing In The Birth Narrative Of Mathe

[#Joseph's dilemma](#) [#Gospel of Matthew](#) [#Biblical birth narrative](#) [#Honour killing implications](#) [#Mary and Joseph story](#)

Delve into the profound dilemma faced by Joseph, as depicted in the birth narrative of Matthew's Gospel, where the specter of honour killing in ancient society significantly influenced his initial response to Mary's pregnancy. This critical moment explores themes of faith, social pressure, and divine intervention, offering deep insights into the challenges and cultural contexts surrounding the foundational events of Christianity.

Our course materials library includes guides, handouts, and assignments for various subjects.

This document is one of the most sought-after resources in digital libraries across the internet.

You are fortunate to have found it here.

We provide you with the full version of Joseph Dilemma Matthew Narrative completely free of charge.

Jesus and the Gospels, Third Edition

All of Scripture testifies to the person of Jesus, yet the Gospels offer a face-to-face encounter. This newly revised third edition of *Jesus and the Gospels* prepares readers for an in-depth exploration of Matthew, Mark, Luke, and John. Esteemed New Testament scholar Craig Blomberg considers the Gospels' historical context while examining fresh scholarship, critical methods, and contemporary applications for today. Along with updated introductions, maps, and diagrams, Blomberg's linguistic, historical, and theological approach delivers a deep investigation into the Gospels for professors, students, and pastors alike.

The Origin of Consciousness in the Breakdown of the Bicameral Mind

National Book Award Finalist: "This man's ideas may be the most influential, not to say controversial, of the second half of the twentieth century."—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. "Don't be put off by the academic title of Julian Jaynes's *The Origin of Consciousness in the Breakdown of the Bicameral Mind*. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor."—The New York Times "When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis."—John Updike, The New Yorker "He is as startling as Freud

was in *The Interpretation of Dreams*, and Jaynes is equally as adept at forcing a new view of known human behavior.”—*American Journal of Psychiatry*

The Collapse of Complex Societies

Dr Tainter describes nearly two dozen cases of collapse and reviews more than 2000 years of explanations. He then develops a new and far-reaching theory.

Bringing God Up to Date

Religion is an essential part of our humanity. We all follow some form of religion, in the original meaning of the word. But organized religion establishes definitions, boundaries and hierarchies which the founders would be amazed by. This is perhaps more true of Christianity than most other religions, due to the short life of Jesus, his sudden death, the lack of any contemporary records. His teaching about the kingdom of God is great; it could see us through our time on earth. But his followers watered it down and soon lost it altogether. It became a kingdom in heaven for the few, rather than one here and now for everyone. The Church, or Churches, that resulted became increasingly irrelevant, even a hindrance, to seeing it realized. Many will always find security and truth in the traditions that developed, and good for them. But for those who can't, for those who have given up on religion or never thought it worth considering, the original teachings are worth another look. If we could recover them and live by them, we could change ourselves and the world for the better. We could bring God up to date.

The International Standard Bible Encyclopaedia

Choose: A quick death. . . or a slow poison. . . About to be executed for murder, Yelena is offered an extraordinary reprieve. She'll eat the best meals, have rooms in the palace - and risk assassination by anyone trying to kill the Commander of Ixia. And so Yelena chooses to become a food taster. But the chief of security, leaving nothing to chance, deliberately feeds her Butterfly's Dust - and only by appearing for her daily antidote will she delay an agonising death from the poison. As Yelena tries to escape her new dilemma, disasters keep mounting. Rebels plot to seize Ixia and Yelena develops magical powers she can't control. Her life is threatened again and choices must be made. But this time the outcomes aren't so clear. . .

Poison Study

Every year, thousands of girls and women die at the hands of blood relatives. These victims are accused of committing honor violations that bring shame upon their families: such 'transgressions' range from walking with a boy in their neighborhood to seeking to marry a man of their own choosing, to being a victim of rape. *Women in the Crossfire* presents a thorough examination of honor killing, an ages-old social practice through which women are trapped and subjected to terror and deadly violence as consequences of the evolution of dysfunctional patriarchal structures and competition among men for domination. To understand the practice of honor killing, its root causes, and possibilities for protection and prevention, Robert Paul Churchill considers the issues from a variety of perspectives: epistemic, anthropological, sociological, cultural, ethical, historical, and psychological. He makes use of original research by analyzing a database of honor killing cases, published here for the first time. Specifically, *Women in the Crossfire* addresses the salient traits and trends present in honor killing incidents and examines how honor is understood in socio-cultural contexts where these killings occur. The book aims to illuminate causal pathways that combine to produce the tragedy of honor killing. Socialization within honor-shame cultures, factors such as gender construction, child-rearing practices, and adverse experiences prime boys and men to take roles as one-day killers of sisters, daughters, and wives in the name of honor. The book further relies on theories of cultural evolution to explain how honor killing was an adaptation to specific ecological challenges and co-evolved with other patriarchic institutions. The ultimate aim of *Women in the Crossfire* is to convey promising methods of preventing future honor killings, and to protect girls and women from victimization.

Bulletin of the Atomic Scientists

The aim of this volume is to explain the differences between research-level mathematics and the maths taught at school. Most differences are philosophical and the first few chapters are about general aspects of mathematical thought.

Women in the Crossfire

Honor related violence is generally associated with crimes committed by people from the Middle East and adjacent areas. Perpetrators sometimes justify their deeds saying they 'had to' restore their honor. Theorists have argued that men from these populations exclusively correlate honor with the behaviour of their womenfolk, which they use as a pretext to further oppress and dominate women. Due to large-scale migration, western societies have become acquainted with honor related violence and honor killings. In this book, Robert Ermers addresses a number of questions related to honor related violence, including the use of predominantly negative frames regarding the cultural and social background of non-westerners and immigrants. In many publications, including the press, crimes committed by non-western individuals are often attributed to their cultural background rather than specific contexts or circumstances, in contrast to western cases. Vague and insufficiently defined concepts such as 'honor' and 'culture' strongly contribute to this bias. Honor Related Violence deals with honor and honor related violence, their background and contexts, what honor is, and what it is not. It examines stigma in relation to honor and based upon stigma research, reliably explains, analyses, and predicts honor related violence. The book argues that people all over the world can be stigmatized, excluded and ostracized when they commit misbehavior, and therefore find themselves in a state of dishonor which can lead to honor related violence. A timely intervention into the psychology of honor related violence, this is an essential resource for students and researchers in the fields of social psychology, sociology, law, criminology and anthropology.

Mathematics: A Very Short Introduction

Exhaustively annotated and illustrated, this explosive work of history unearths clues that finally demonstrate the truth about one of the world's great religions: that it was born out of the conflict between the Romans and messianic Jews who fought a bitter war with each other during the 1st Century. The Romans employed a tactic they routinely used to conquer and absorb other nations: they grafted their imperial rule onto the religion of the conquered. After 30 years of research, authors James S. Valliant and C.W. Fahy present irrefutable archeological and textual evidence that proves Christianity was created by Roman Caesars in this book that breaks new ground in Christian scholarship and is destined to change the way the world looks at ancient religions forever. Inherited from a long-past era of tyranny, war and deliberate religious fraud, could Christianity have been created for an entirely different purpose than we have been lead to believe? Praised by scholars like Dead Sea Scrolls translator Robert Eisenman (James the Brother of Jesus), this exhaustive synthesis of historical detective work integrates all of the ancient sources about the earliest Christians and reveals new archeological evidence for the first time. And, despite the fable presented in current bestsellers like Bill O'Reilly's Killing Jesus, the evidence presented in Creating Christ is irrefutable: Christianity was invented by Roman Emperors. I have rarely encountered a book so original, exciting, accessible and informed on subjects that are of obvious importance to the world and to which I have myself devoted such a large part of my scholarly career studying. In this book they have rendered a startling new understanding of Christianity with a controversial theory of its Roman provenance that is accessible to the layman in a very powerful way. In the process, they present new and comprehensive archeological and iconographic evidence, as well as utilizing the widest and most cutting edge work of other recent scholars, including myself. This is a work of outstanding and original scholarship. Its arguments are a brilliant, profound and thorough integration of the relevant evidence. When they are done, the conclusion is inescapable and obviously profound. Robert Eisenman, Author of James the Brother of Jesus and The New Testament Code "A fascinating and provocative investigative history of ideas, boldly exploring a problem that previous scholarship has not clearly or credibly addressed: how (and why!) the Flavian dynasty wove Christianity into the very fabric of Western civilization." -Mark Riebling, author of Church of Spies: The Pope's Secret War Against Hitler

Honor Related Violence

The Financial Crisis Inquiry Report, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the

federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world. THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government." News Dissector DANNY SCHECHTER is a journalist, blogger and filmmaker. He has been reporting on economic crises since the 1980's when he was with ABC News. His film *In Debt We Trust* warned of the economic meltdown in 2006. He has since written three books on the subject including *Plunder: Investigating Our Economic Calamity* (Cosimo Books, 2008), and *The Crime Of Our Time: Why Wall Street Is Not Too Big to Jail* (Disinfo Books, 2011), a companion to his latest film *Plunder The Crime Of Our Time*. He can be reached online at www.newsdissector.com.

Echoes and Evidences of the Book of Mormon

The author paints a picture of Christ's calm in what he calls "the second most stressful day in the life of our Savior." He shows the secret of transforming panic into peace, stress into serenity, and chaos into control.

Creating Christ

A shockingly intimate look at the world of honor killings, as seen through the eyes of both the perpetrators and the victims. What drives a person to murder their sister, mother, or daughter? What is life like in a society in which women are imprisoned for their own "protection," while their potential killers walk free? In this powerful and affecting book, writer and journalist Lene Wold offers a rare window into the world of "honor killings"—the controversial practice that sees more than five thousand women murdered at the hands of close relatives each year, all to restore their family's reputation. Wold spent more than five years in Jordan, visiting prisons and mosques, reviewing newspapers and judicial archives, and interviewing imams, village elders, and other locals to understand these violent acts. But she also spoke with the killers themselves, including a man who murdered his mother and daughter and attempted to kill his other daughter. In *Inside an Honor Killing*, Wold shares what she learned, weaving a shocking tale of honor killing told from the perpetrators' perspective as well as the victims'.

The Financial Crisis Inquiry Report

The experience of modernization -- the dizzying social changes that swept millions of people into the capitalist world -- and modernism in art, literature and architecture are brilliantly integrated in this account.

In the Eye of the Storm

"Inflation affects literary occupations and preoccupations quite as much as it does financial scrip." Starting from this premise, Charles Newman ventures forth on an irreverent, wide-ranging discussion of the "Post-Modern" attitude in fiction, culture, and sensibility. Newman questions the "revolutionary" claims of avant-garde novelists and literary theorists, but he is no less critical of the arguments of neoconservatives, neorealists, and advocates of "moral fiction." Newman argues that neither of these groups has confronted the unprecedented break with tradition entailed by an economics and culture of inflation. A combination of cultural critique, literary criticism, economic forecast, and historical jeremiad, *The Post-Modern Aura* is finally a positive statement, celebrating "The Act of Fiction" and suggesting how the forces which have been devaluing it might be overcome.

Inside an Honor Killing

Based on archival sources that have never been examined before, the book discusses the preeminent emigrant mathematicians of the period, including Emmy Noether, John von Neumann, Hermann Weyl, and many others. The author explores the mechanisms of the expulsion of mathematicians from Germany, the emigrants' acculturation to their new host countries, and the fates of those mathematicians

forced to stay behind. The book reveals the alienation and solidarity of the emigrants, and investigates the global development of mathematics as a consequence of their radical migration.

All that is Solid Melts Into Air

A guide to programs currently available on video in the areas of movies/entertainment, general interest/education, sports/recreation, fine arts, health/science, business/industry, children/juvenile, how-to/instruction.

The Post-Modern Aura

The Quest of the Historical Jesus is a review of all prior work on the question of the "historical Jesus" starting with the late 18th century. The author points out how Jesus' image has changed with the times and with the personal proclivities of the various authors. He concludes with his own synopsis and interpretation of what had been learned over the course of the previous century. The author takes the position that the life and thinking of Jesus must be interpreted in the light of Jesus' own convictions, which he characterizes as those of "late Jewish eschatology\

Mathematicians Fleeing from Nazi Germany

This book introduces the basic inferential patterns of formal logic as they are embedded in everyday life, information technology, and science. It is designed to make clear the basic topics of classical and modern logic. The aim is to improve the reader's ability to navigate both everyday and science-based interactions.

Video Source Book

Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

The Quest of the Historical Jesus

How to rewire your brain to improve virtually every aspect of your life-based on the latest research in neuroscience and psychology on neuroplasticity and evidence-based practices Not long ago, it was thought that the brain you were born with was the brain you would die with, and that the brain cells you had at birth were the most you would ever possess. Your brain was thought to be "hardwired" to function in predetermined ways. It turns out that's not true. Your brain is not hardwired, it's "softwired" by experience. This book shows you how you can rewire parts of the brain to feel more positive about your life, remain calm during stressful times, and improve your social relationships. Written by a leader in the field of Brain-Based Therapy, it teaches you how to activate the parts of your brain that have been underactivated and calm down those areas that have been hyperactivated so that you feel positive about your life and remain calm during stressful times. You will also learn to improve your memory, boost your mood, have better relationships, and get a good night sleep. Reveals how cutting-edge developments in neuroscience, and evidence-based practices can be used to improve your everyday life Other titles by Dr. Arden include: Brain-Based Therapy-Adult, Brain-Based Therapy-Child, Improving Your Memory For Dummies and Heal Your Anxiety Workbook Dr. Arden is a leader in integrating the new developments in neuroscience with psychotherapy and Director of Training in Mental Health for Kaiser Permanente for the Northern California Region Explaining exciting new developments in neuroscience

and their applications to daily living, *Rewire Your Brain* will guide you through the process of changing your brain so you can change your life and be free of self-imposed limitations.

An Introduction to Logic

"DLP, Developmental Leadership Program; Australian Aid; Oxfam."

Historical Painting Techniques, Materials, and Studio Practice

Blaise Pascal, the precociously brilliant contemporary of Descartes, was a gifted mathematician and physicist, but it is his unfinished apologia for the Christian religion upon which his reputation now rests. The *Pensees* is a collection of philosophical fragments, notes and essays in which Pascal explores the contradictions of human nature in psychological, social, metaphysical and - above all - theological terms. Mankind emerges from Pascal's analysis as a wretched and desolate creature within an impersonal universe, but who can be transformed through faith in God's grace.

Rewire Your Brain

Included in this volume are "Euthyphro," "Apology," "Crito," and the Death Scene from "Phaedo." Translated by F.J. Church. Revisions and Introduction by Robert D. Cumming.

How Change Happens

What a rare mushroom can teach us about sustaining life on a fragile planet *Matsutake* is the most valuable mushroom in the world—and a weed that grows in human-disturbed forests across the northern hemisphere. Through its ability to nurture trees, matsutake helps forests to grow in daunting places. It is also an edible delicacy in Japan, where it sometimes commands astronomical prices. In all its contradictions, matsutake offers insights into areas far beyond just mushrooms and addresses a crucial question: what manages to live in the ruins we have made? A tale of diversity within our damaged landscapes, *The Mushroom at the End of the World* follows one of the strangest commodity chains of our times to explore the unexpected corners of capitalism. Here, we witness the varied and peculiar worlds of matsutake commerce: the worlds of Japanese gourmets, capitalist traders, Hmong jungle fighters, industrial forests, Yi Chinese goat herders, Finnish nature guides, and more. These companions also lead us into fungal ecologies and forest histories to better understand the promise of cohabitation in a time of massive human destruction. By investigating one of the world's most sought-after fungi, *The Mushroom at the End of the World* presents an original examination into the relation between capitalist destruction and collaborative survival within multispecies landscapes, the prerequisite for continuing life on earth.

Pensees

An introduction to the science of neuroplasticity recounts the case stories of patients with mental limitations or brain damage whose seemingly unalterable conditions were improved through treatments that involved the thought re-alteration of brain structure.

Four Dialogues

Across many parts of the world, violence inflicted in the name of family honor is attracting an increasing amount of attention. Family honor violence, otherwise known as honor-based violence, is physical force inflicted primarily on women for conduct defined as dishonorable. This book explores these conflicts of honor, how they are triggered, how they are handled, and why some lead to death. Drawing on a range of case studies and employing Donald Black's concept of social geometry, *Execution by Family* incorporates and goes beyond patriarchy, culture, and kinship to develop a unified theory of family honor violence. It discusses the "honor belt," a series of countries stretching from north Africa to southeast Asia, in which similar forms of inequality, patriarchy, group authority, and gerontocracy are prevalent and how, within the confines of this inequality, honor violence flourishes. Reviewing survey data and pointing to a multi-pronged, cross-national social movement, the book also discusses the future of honor-based violence. Given the growing awareness of family honor violence, *Execution by Family* will be of interest to anybody concerned with family conflict, violence, crime, and popular morality. It will be invaluable reading for academics and students in the fields of criminology, criminal justice, sociology, social psychology, and anthropology.

The Mushroom at the End of the World

Here is a book as joyous and painful, as mysterious and memorable, as childhood itself. *I Know Why the Caged Bird Sings* captures the longing of lonely children, the brute insult of bigotry, and the wonder of words that can make the world right. Maya Angelou's debut memoir is a modern American classic beloved worldwide. Sent by their mother to live with their devout, self-sufficient grandmother in a small Southern town, Maya and her brother, Bailey, endure the ache of abandonment and the prejudice of the local "powhitetrash." At eight years old and back at her mother's side in St. Louis, Maya is attacked by a man many times her age—and has to live with the consequences for a lifetime. Years later, in San Francisco, Maya learns that love for herself, the kindness of others, her own strong spirit, and the ideas of great authors ("I met and fell in love with William Shakespeare") will allow her to be free instead of imprisoned. Poetic and powerful, *I Know Why the Caged Bird Sings* will touch hearts and change minds for as long as people read. "*I Know Why the Caged Bird Sings* liberates the reader into life simply because Maya Angelou confronts her own life with such a moving wonder, such a luminous dignity."—James Baldwin

The Brain That Changes Itself

"Thou shalt not kill" is arguably the most basic moral and legal principle in any society. Yet while some killers are pilloried and punished, others are absolved and acquitted, and still others are lauded and lionized. Why? The traditional answer is that how killers are treated depends on the nature of their killing, whether it was aggressive or defensive, intentional or accidental. But those factors cannot explain the enormous variation in legal officials' and citizens' responses to real-life homicides. Cooney argues that a radically new style of thought—pure sociology—can. Conceived by the sociologist Donald Black, pure sociology makes no reference to psychology, to any single person's intent, or even to individuals as such. Instead, pure sociology explains behavior in terms of its social geometry—its location and direction in a multidimensional social space. *Is Killing Wrong?* provides the most comprehensive assessment of pure sociology yet attempted. Drawing on data from well over one hundred societies, including the modern-day United States, it represents the most thorough account yet of case-level social control, or the response to conduct defined as wrong. In doing so, it demonstrates that the law and morality of homicide are neither universal nor relative but geometrical, as predicted by Black's theory.

Execution by Family

The *Skeptical Environmentalist* challenges widely held beliefs that the environmental situation is getting worse and worse. The author, himself a former member of Greenpeace, is critical of the way in which many environmental organisations make selective and misleading use of the scientific evidence. Using the best available statistical information from internationally recognised research institutes, Bjørn Lomborg systematically examines a range of major environmental problems that feature prominently in headline news across the world. His arguments are presented in non-technical, accessible language and are carefully backed up by over 2500 footnotes allowing readers to check sources for themselves. Concluding that there are more reasons for optimism than pessimism, Bjørn Lomborg stresses the need for clear-headed prioritisation of resources to tackle real, not imagined problems. The *Skeptical Environmentalist* offers readers a non-partisan stocktaking exercise that serves as a useful corrective to the more alarmist accounts favoured by campaign groups and the media.

I Know Why the Caged Bird Sings

The *Bulletin of the Atomic Scientists* is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

Is Killing Wrong?

The *Bulletin of the Atomic Scientists* is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

The Skeptical Environmentalist

In the last few years, 9/11, a tsunami, Hurricane Katrina, and many other tragedies have shown us that the vision of God in today's churches in relation to evil and suffering is often frivolous. Against the overwhelming weight and seriousness of the Bible, many Christians are choosing to become more shallow, more entertainment-oriented, and therefore irrelevant in the face of massive suffering. In *Suffering and the Sovereignty of God*, contributors John Piper, Joni Eareckson Tada, Steve Saint, Carl Ellis, David Powlison, Dustin Shramek, and Mark Talbot explore the many categories of God's sovereignty as evidenced in his Word. They urge readers to look to Christ, even in suffering, to find the greatest confidence, deepest comfort, and sweetest fellowship they have ever known.

Bulletin of the Atomic Scientists

Ranging from the age of slavery to contemporary injustices, this groundbreaking history of race, gender and class inequality by the radical political activist Angela Davis offers an alternative view of female struggles for liberation. Tracing the intertwined histories of the abolitionist and women's suffrage movements, Davis examines the racism and class prejudice inherent in so much of white feminism, and in doing so brings to light new pioneering heroines, from field slaves to mill workers, who fought back and refused to accept the lives into which they were born. 'The power of her historical insights and the sweetness of her dream cannot be denied' *The New York Times*

Bulletin of the Atomic Scientists

Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

Suffering and the Sovereignty of God

Thomas and Theresa Hammonds believe in tough love and old-fashioned discipline. They do not believe in doctors. When their controversial beliefs lead to personal tragedy, the Hammonds face heartbreaking loss, a crisis of faith—and a charge of negligent homicide by a relentless prosecutor. Defending Thomas and Theresa is freewheeling lawyer Charles Arnold. He believes in grace and mercy, but nothing in his colorful past has prepared him for the challenges of this shocking case, or for the dangerous conspiracy at its heart.

Women, Race & Class

Alexander Madison is part lawyer, part pastor, and part con artist. When a Muslim imam is accused of instigating honor killings, Alex must decide whether to take the case that every other lawyer in town is running away from. He doesn't realize until it's too late that defending the imam may cost him the one thing in life he cares about most. *Fatal Convictions* is the story of a lawyer willing to risk it all and the women who must choose between faith and love.
