Africa: A Modern History

A magisterial and sweeping history of modern Africa. The end of the Second World War signalled the rapid end of the European African empires. In 1945, only four African countries were independent; by 1963, thirty African states created the Organization of African Unity. Despite formidable problems, the 1960s were a time of optimism as Africans enjoyed their new independence, witnessed increases in prosperity and prepared to tackle their political and economic problems in their own way. By the 1990s, however, the high hopes of the 1960s had been dashed. Dictatorship by strongmen, corruption, civil wars and genocide, widespread poverty and the interventions and manipulations of the major powers had all relegated Africa to the position of an aid 'basket case', with some of the world's poorest and least-developed nations. By exploring developments over the last fifteen years, including the impact of China, new IT technology and the Arab Spring, the rise of Nigeria as Africa's leading country and the recent refugee crisis, Guy Arnold brings his landmark history of modern Africa up to date and provides a fresh and insightful perspective on this troubled and misunderstood continent.

Africa

The end of the Second World War signalled the rapid end of the European African empires. In 1945, only four African countries were independent; by 1963, thirty African states created the Organization of African Unity. The 1960s were a time of optimism as Africans witnessed increases in prosperity and prepared to tackle their political and economic problems in their own way. By the 1990s, however, these hopes had been dashed and Africa had been relegated to the position of an aid 'basket case', the world's poorest and least-developed continent. In *Africa: A Modern History* Guy Arnold brings a lifetime's thought and experience to his examination of the continent during these momentous years. It will stand for many years as the standard account of what happened in Africa over this period.

Africa in Modern History

A survey of the whole of South African history from pre-colonial times to 1999, suitable for serious students of the subject. It handles all major topics, with special focus on the dramatic changes that have occurred since 1990.

Updated and revised to emphasise long-term perspectives on current issues facing the continent, the new 2nd Edition of *A History of Modern Africa* recounts the full breadth of Africa's political, economic, and social history over the past two centuries. Adopts a long-term approach to current issues, stressing the importance of nineteenth-century and deeper indigenous dynamics in explaining Africa's later twentieth-century challenges. Places a greater focus on African agency, especially during the colonial encounter. Includes more in-depth coverage of non-Anglophone Africa. Offers expanded coverage of the post-colonial era to take account of recent developments, including the conflict in Darfur and the political unrest of 2011 in Egypt, Tunisia, and Libya.

Africa Since 1875

W. E. B. Du Bois was a public intellectual, sociologist, and activist on behalf of the African American community. He profoundly shaped black political culture in the United States through his founding role in the NAACP, as well as internationally through the Pan-African movement. Du Bois's sociological and historical research on African-American communities and culture broke ground in many areas, including the history of the post-Civil War Reconstruction period. Du Bois was also a prolific author of novels, autobiographical accounts, innumerable editorials and journalistic pieces, and several works of history. Written in very accessible prose, these two booklets, originally published in 1930, allowed W. E. B. Du Bois to reach a wide audience with an interest in Africa. What is so incredible about the two Africa booklets is their lasting relevance and value to the study of Africa today. Coupling Du Bois's breadth of scholarship with his passion for the subjects, the analyses in these booklets are integral to the study of Africa. Many of his arguments foreshadowed the issues and debates regarding Africa in the twentieth century. Expertly synthesized in an introduction by Emmanuel Akyeampong, this edition of the two Africa booklets is essential for anyone interested in African history.

A History of Modern Africa

Over the last century, the social and economic roles played by African women have evolved dramatically. Long confined to home and field, overlooked by their menfolk and missionaries alike, African women worked, thought, dreamed, and struggled. They migrated to the cities, invented new jobs, and activated the so-called informal economy to become Africa's economic and social focal point. As a result, despite their lack of education and relatively low status, women are now Africa's best hope for the future. This sweeping and innovative book is the first to reconstruct the full history of women in sub-Saharan Africa. Tracing the lot of African women from the eve of the colonial period to the present, Catherine Coquery-Vidrovitch explores the stages and forms of women's collective roles as well as their individual emancipation through revolts, urban migrations, economic impacts, social claims, political strength, and creativity. Comparing case studies drawn from throughout the region, she sheds light on issues ranging from gender to economy, politics, society, and culture. Utilizing an impressive array of sources, she highlights broad general patterns without overlooking crucial local variations. With its breadth of coverage and clear analysis of complex questions, this book is destined to become a standard text for scholars and students alike.

Africa, Its Geography, People and Products and Africa-Its Place in Modern History (The Oxford W. E. B. Du Bois)

The new, fully-updated edition of the acclaimed textbook covering 200 years of African history. *A History of Modern Africa* explores two centuries of the continent's political, economic, and social history. This thorough yet accessible text helps readers to understand key concepts, recognize significant themes, and identify the processes that shaped the modern history of Africa. Emphasis is placed on the consequences of colonial rule, and the links between the precolonial and postcolonial eras. Author Richard Reid, a prominent scholar and historian on the subject, argues that Africa's struggle for

economic and political stability in the nineteenth century escalated and intensified through the twentieth century, the effects of which are still felt in the present day. The new third edition offers substantial updates and revisions that consider recent events and historiography. Greater emphasis is placed on African agency, particularly during the colonial period, and the importance of the long-term militarization of African political culture. Discussions of the postcolonial period have been updated to reflect recent developments, including those in North Africa. Adopting a long-term approach to current African issues, this text: Explores the legacies of the nineteenth century and the colonial period in the context of the contemporary era Highlights the role of nineteenth century and long-term internal dynamics in Africa's modern challenges Combines recent scholarship with concise and effective narrative Features maps, illustrations, expanded references, and comprehensive endnotes A History of Modern Africa: 1800 to the Present, 3rd Edition is an excellent introduction to the subject for undergraduate students in relevant courses, and for general readers with interest in modern African history and current affairs.

A Modern History of Tanganyika

This latest edition of A Modern History of the Somali brings I. M. Lewis's definitive history up to date and shows the amazing continuity of Somali forms of social organization. Lewis's history portrays the ingeniousness with which the Somali way of life has been adapted to all forms of modernity.

African Women

General history embracing the continent of Africa and adjoining islands from remote times to 1875, discussing African societies and politics, Indigenous developments, foreign incursions and influences, and manifestations of change region by region and underlines the differences between and among the regions that make generalizations about Africa absurd.

A History of Modern Africa

Presents the important issues in the study of modern Africa such as: Decolonization and the End of Empire; Democracy and the Nation-State; Epidemics in Africa: The Human and Financial Costs; Development: Failure or Success; The African Environment: Origins of a Crisis; and, Return of the Empires.

A Modern History of the Somali

Basil Davidson's famous book -- now updated in a welcome Third Edition -- reviews the social and political history of Africa in the twentieth century. It takes the reader from the colonial era through the liberation movements to independence and beyond. It faces squarely the disappointments and breakdowns that have dulled the early successes of the post-colonial era; yet, for all the sorrows and uncertainties of Africa today, Basil Davidson shows how much has been achieved since decolonization, and the mood of his new final chapter is hopeful and buoyant.

Problems in the History of Modern Africa

A book that could not be written until now because of limitations imposed by Britain's Official Secrets Act, *Let Freedom Come* presents the history of sub-Saharan Africa in this century, from the death throes of European imperialism to the birth pangs and often bloody adolescences of the newly independent African nations. The author draws upon his unexcelled command of modern African history, society, and culture, at the same time reemphasizing that Africa had evolved her own cities, civilizations, indeed empires, as great as any in Western Europe before the first Europeans ever ventured onto the continent. Writing from the belief that the new history of Africa flows organically out of the old, Davidson envisions a purely African revolution in the near future, from whose outcome will emerge a new African consciousness and wholly new institutions rooted in African history. - Back cover.

Modern Africa

Revealing the central yet intentionally obliterated role of Africa in the creation of modernity, *Born in Blackness* vitally reframes our understanding of world history. Traditional accounts of the making of the modern world afford a place of primacy to European history. Some credit the fifteenth-century Age of Discovery and the maritime connection it established between West and East; others the accidental unearthing of the "New World." Still others point to the development of the scientific method, or the spread of Judeo-Christian beliefs; and so on, ad infinitum. The history of Africa, by contrast, has long been relegated to the remote outskirts of our global story. What if, instead, we put Africa and Africans at the very center of our thinking about the origins of modernity? In a sweeping narrative spanning more than six centuries, Howard W. French does just that, for *Born in Blackness* vitally reframes the story of medieval and emerging Africa, demonstrating how the economic ascendancy of Europe, the anchoring of democracy in the West, and the fulfillment of so-called Enlightenment ideals all grew out of Europe's dehumanizing engagement with the "dark" continent. In fact, French reveals, the first impetus for the Age of Discovery was not—as we are so often told, even today—Europe's yearning for ties with Asia, but rather its centuries-old desire to forge a trade in gold with legendarily rich Black societies sequestered away in the heart of West Africa. Creating a historical narrative that begins with the commencement of commercial relations between Portugal and Africa in the fifteenth century and ends with the onset of World War II, *Born in Blackness* interweaves precise historical detail with poignant, personal reportage. In so doing, it dramatically retrieves the lives of major African historical figures, from the unimaginably rich medieval emperors who traded with the Near East and beyond, to the Kongo sovereigns who heroically battled seventeenth-century European powers, to the ex-slaves who liberated Haitians from bondage and profoundly altered the course of American history. While French cogently demonstrates the centrality of Africa to the rise of the modern world, *Born in Blackness* becomes, at the same time, a far more significant narrative, one that reveals a long-concealed history of trivialization and, more often, elision in depictions of African history throughout the last five hundred years. As French shows, the achievements of sovereign African nations and their now-far-flung peoples have time and again been etiolated and deliberately erased from modern history. As the West ascended, their stories—siloed and piecemeal—were swept into secluded corners, thus setting the stage for the hagiographic "rise of the West" theories that have endured to this day. "Capacious and compelling" (Laurent Dubois), *Born in Blackness* is epic history on the grand scale. In the lofty tradition of bold, revisionist narratives, it reframes the story of gold and tobacco, sugar and cotton—and of the greatest "commodity" of them all, the twelve million people who were brought in chains from Africa to the "New World," whose reclaimed lives shed a harsh light on our present world.

The Mind of Buganda

In a vast and all-embracing study of Africa, from the origins of mankind to the AIDS epidemic, John Iliffe refocuses its history on the peopling of an environmentally hostile continent. Africans have been pioneers struggling against disease and nature, and their social, economic and political institutions have been designed to ensure their survival. In the context of medical progress and other twentieth-century innovations, however, the same institutions have bred the most rapid population growth the world has ever seen. *Africans: The History of a Continent* is thus a single story binding living Africans to their earliest human ancestors.

A History of Modern Africa

The nineteenth century in Africa was a time of revolution and tumultuous change in virtually all spheres. Violent dry spells, the staggered abolition of the slave trade, mass migrations and an influx of new settlers characterized the century. Regional trade links grew stronger and spread further. The century also saw the beginnings of the ruthless and bloody quest for foreign dominion.

Let Freedom Come

David Birmingham begins this short history of Angola in 1820 with the Portuguese attempt to create a third, African, empire after the virtual loss of Asia and America. In the 19th century the most valuable resource extracted from Angola was agricultural labour. The colony was managed by a few marine officers, white political convicts and black Angolans who had adopted Portuguese language and culture. The hub was the harbour city of Luanda which grew to be a dynamic metropolis of several million people. The export of labour was gradually replaced when an agrarian revolution enabled white Portuguese immigrants to drive black Angolan labourers to produce sugar-cane, cotton, maize and above all coffee. During the 20th century this wealth was supplemented by Congo copper, by gem-quality diamonds, and by off-shore oil. The generation of warfare finally ended in 2002 when national reconstruction could begin on Portuguese colonial foundations.

Introduction to Modern African History

An all-African overview of events, movements, ideas, dates and personalities between 1914 and 1990.

The Modern History of Ethiopia and the Horn of Africa

The study of intellectual history in Africa is in its infancy. We know very little about what Africa's thinkers made of their times. Recasting the Past brings one field of intellectual endeavor into view. The book takes its place alongside a small but growing literature that highlights how, in autobiographies, historical writing, fiction, and other literary genres, African writers intervened creatively in their political world. The past has already been worked over by the African interpreters that the present volume brings into view. African brokers—pastors, journalists, kingmakers, religious dissidents, politicians, entrepreneurs all—have been doing research, conducting interviews, reading archives, and presenting their results to critical audiences. Their scholarly work makes it impossible to think of African history as an inert entity awaiting the attention of professional historians. Professionals take their place in a broader field of interpretation, where Africans are already reifying, editing, and representing the past. The essays collected in Recasting the Past study the warp and weft of Africa's homespun historical work. Contributors trace the strands of discourse from which historical entrepreneurs drew, highlighting the sources of inspiration and reference that enlivened their work. By illuminating the conventions of the past, Africa's history writers set their contemporary constituents on a path toward a particular future. History writing was a means by which entrepreneurs conjured up constituencies, claimed legitimate authority, and mobilized people around a cause. By illuminating the spheres of debate in which Africa's own scholars participated, Recasting the Past repositions the practice of modern history.

Uganda: A Modern History (1981) provides a comprehensive political, social and economic history of Uganda from the beginnings of colonial rule in 1888. It focuses particularly on economic development as well as the political and social tendencies which shaped Ugandan society in the colonial and postcolonial period.

A Modern Economic History of Africa: The nineteenth century

The eighth and final volume of The Cambridge History of Africa covers the period 1940-75. It begins with a discussion of the role of the Second World War in the political decolonisation of Africa. Its terminal date of 1975 coincides with the retreat of Portugal, the last European colonial power in Africa, from its possessions and their accession to independence. The fifteen chapters which make up this volume examine on both a continental and regional scale the extent to which formal transfer of political power by the European colonial rulers also involved economic, social and cultural decolonisation. A major theme of the volume is the way the African successors to the colonial rulers dealt with their inheritance and how far they benefited particular economic groups and disadvantaged others. The contributors to this volume represent different disciplinary traditions and do not share a single theoretical perspective on the recent history of the continent, a subject that is still the occasion for passionate debate.

Major Events in African History

This book assesses South African history within imperial and global networks of power, trade and communication. South African modernity is understood in terms of the interplay between internal and external forces. Key historical themes, including the emergence of an industrialised economy, the development of systematic racial discrimination and popular resistance against racial power, and the influence of national and ethnic identities on political and social organisation, are set out in relation to imperial and global influences. This book is central to our understanding of South Africa in the context of world history.

Doing Conceptual History in Africa

The Oxford Handbook of Modern African History represents an invaluable tool for historians and others in the field of African studies. This collection of essays, produced by some of the finest scholars currently working in the field, provides the latest insights into, and interpretations of, the history of Africa - a continent with a rich and complex past. An understanding of this past is essential to gain perspective on Africa's current challenges, and this accessible and comprehensive volume will allow readers to explore various aspects - political, economic, social, and cultural - of the continent's history over the last two hundred years. Since African history first emerged as a serious academic endeavour in the 1950s and 1960s, it has undergone numerous shifts in terms of emphasis and approach, changes brought

about by political and economic exigencies and by ideological debates. This multi-faceted Handbook is essential reading for anyone with an interest in those debates, and in Africa and its peoples. While the focus is determinedly historical, anthropology, geography, literary criticism, political science and sociology are all employed in this ground-breaking study of Africa's past.
