Intro

Competitive analysis - The process of studying the strengths and weaknesses of competitors in order
to identify opportunities and threats in the market.

Corporate Strategy The long-term plan of a company that outlines its goals and objectives and the
actions it will take to achieve them

Talent management The process of attracting, developing, and retaining highly skilled employees in
an organization.

A joint venture A business partnership in which two or more companies collaborate on a specific
project or business activity.

Restructuring The process of reorganizing a company's operations, management, or ownership in
order to improve efficiency or profitability.

Outsourcing The practice of hiring a third party to perform a task or service that is normally done
in-house.

Supply chain management The process of coordinating and optimising the flow of materials, infor-

mation, and resources from raw material suppliers to end customers

Business development The process of identifying and pursuing new opportunities for growth and expansion within a company

Assets Something valuable that a company owns, such as property, equipment, or intellectual property.

Liability Something a company owes, such as a debt or an obligation.

Equity The value of a company's assets minus its liabilities.

Customer retention The act of keeping existing customers loyal to a company or product.

Innovation The introduction of new ideas, products, or processes that add value to a business or industry.

Synergy The combined effect of two or more things working together that is greater than the sum of their individual effects.

AP Physics 1 review of Forces and Newton's Laws | Physics | Khan Academy - AP Physics 1 review of Forces and Newton's Laws | Physics | Khan Academy by Khan Academy Physics 234,435 views 7 years ago 17 minutes - In this video David quickly explains each concept behind **Forces**, and Newton's Laws and does a sample problem for each ...

continue moving with a constant velocity

moving upward with constant velocity

determine the acceleration in the horizontal direction

find the force of gravity on objects near the earth

analyze the forces in the vertical direction

insert the tension as an unknown variable

tension forces

balanced in every direction

increase the initial speed of the car

reducing the coefficient of friction

find the maximum possible static frictional force

exceed the maximum possible static frictional force

break them into forces perpendicular to the surface

finding the force of friction on an incline

rank the magnitudes of the net force on the box

find the acceleration of the system by looking at only the external forces

pulled across a rough horizontal table

analyzing the forces on each mass

write the force of kinetic friction in terms of the coefficient

7 Ways to get addicted to studies
Create a study schedule and stick to it
Break up your study sessions into smaller more manageable chunks
Use positive affirmations and visualization techniques to help you stay focused
Take breaks and engage in physical activity to help you stay energized and focused.
Create a study space that is clean, organized, and free from distractions.

General ...

Intro

What is the difference between a physical change and a chemical change, and how can you distinguish between them?

What is the structure of an atom, and how do the properties of atoms determine the behavior of matter?

What are the three states of matter, and how do they differ in terms of their physical properties and behavior?

What is the law of conservation of energy, and how does it apply to different forms of energy, such as potential energy and kinetic energy?

What is the process of photosynthesis, and how does it convert light energy into chemical energy for plants and other organisms?

What is the difference between a virus and a bacteria, and how do they interact with living organisms?

What is the difference between a dominant gene and a recessive gene, and how do they determine traits in offspring?

What is the process of mitosis, and how does it enable cells to divide and replicate?

What is the difference between a plant cell and an animal cell, and how do their structures and functions differ?

What is the process of digestion, and how do different organs in the digestive system work together to break down food and extract nutrients?

What is the difference between a renewable resource and a non-renewable resource, and what are some examples of each?

What is the role of enzymes in biochemical reactions, and how do they catalyze chemical reactions in living organisms?

What is the difference between an acid and a base, and how do their properties affect the pH of a solution?

What is the difference between a food chain and a food web, and how do they illustrate the relationships between organisms in an ecosystem?

What is the greenhouse effect, and how does it contribute to global climate change?

What is the difference between a predator and a prey, and how do they interact in a biological community?

What is the difference between a genotype and a phenotype, and how do they relate to the expression of traits in an organism?

What is the process of osmosis, and how does it enable water to move through cell membranes?

What is the difference between a herbivore, a carnivore, and an omnivore, and how do their diets differ?

What is the process of meiosis, and how does it enable cells to divide and produce gametes for sexual reproduction?

What is the difference between a gene and an allele, and how do they determine traits in offspring?

What is the difference between a prokaryotic cell and a eukaryotic cell, and how do their structures and functions differ?

What is the process of respiration, and how do different organs in the respiratory system work together to exchange gases?

What is the difference between an autotroph and a heterotroph, and how do they obtain energy?

What is the process of evaporation, and how does it contribute to the water cycle and weather patterns?

20 What is the difference between a habitat and a niche, and how do they relate to the ecological

roles of organisms in a community?

What is the difference between an exothermic reaction and an endothermic reaction, and how do they differ in terms of energy transfer?

What is the difference between a parasite and a host, and how do they interact in a biological system?

What is the process of fermentation, and how does it enable organisms to generate energy in the absence of oxygen?

What is the difference between a physical property and a chemical property, and how do they relate to the behavior of matter?

What is the difference between a renewable and non-renewable energy source, and how do they impact the environment?

What is the difference between a prokaryotic and eukaryotic organism, and how does their cellular structure differ?

What is the process of diffusion, and how does it allow particles to move from areas of high concentration to areas of low concentration?

What is the difference between a dominant and recessive trait, and how do they determine the inheritance of traits in offspring?

What is the difference between a chemical reaction and a physical change, and how can you tell the difference between them?

What is the difference between an acid and a base, and how do they react with each other?

What is the difference between a molecule and a compound, and how are they related to the behavior of matter?

30 What is the difference between a genotype and a phenotype, and how do they determine the traits of an organism?

What is the process of photosynthesis, and how do plants convert light energy into chemical energy?

What is the difference between an ionic bond and a covalent bond, and how do they form between atoms?

All physics explained in 15 minutes (worth remembering) - All physics explained in 15 minutes (worth remembering) by Arvin Ash 4,888,784 views 3 years ago 17 minutes - The second equation is the law of universal gravitation. it allows us to determine the motion of heavenly bodies. It says that the ...

Intro

Classical mechanics

Knowing the change in velocity, you can make predictions

Buoyant Force

About 1 Newton

Newton's Law of Universal Gravitation

Energy and thermodynamics

Energy is not a vector

20 mph (32 km/h) faster almost doubles the energy of a car

Total energy is kinetic plus potential

Gasoline has chemical potential energy

Thermodynamic Systems Thermal Energy

Kinetic energy of car converted to thermal energy from friction of the brakes

Entropy is a measure of "disorder," or the information required to describe microstates

2nd law of thermodynamics: Entropy of an isolated system can never decrease

Gasoline more useful for work than heat from exhaust

Exhaust will not rearrange itself to become gasoline

but gasoline can be converted to heat and exhaust

One way flow of entropy appears to be the only reason there is a forward flow of time

Electromagnetism: Study of interaction between electrically charged particles

Moving charges create magnetic fields

Moving magnetic field affects charges

Magnets always have two poles

Faraday's law

Moving magnetic field creates an electrical field

Laws of physics on moving train is same as laws of physics standing still

Energy is not continuous, but is quantized

Heisenberg's Uncertainty Principle uncertainty in momentum

Note: central cluster of electrons exaggerated for illustration. Only a probability cloud exists

Model of hydrogen atom with electron at lowest energy state

A quantum system can be elementary particles
