## Open Boundaries

Open Boundaries provides a new perspective on Jainism, one of the oldest yet least-studied of the world's living religions. Ten closely-focused studies investigate the interactions between Jains and non-Jains in South Asian society, with detailed studies of yoga, tantra, aesthetic theory, erotic poetry, theories of kingship, goddess worship, temple ritual, polemical poetry, religious women, and historiography. Viewing the Jains within a South Asian context results in a strikingly different portrait from the standard models represented in both traditional Western and Indian scholarship.

## Chakshudana or Opening the Eyes

Chakshudana or rituals of opening the eyes are practiced across multiple South Asian communities by artists, sculptors, and priests. The ritual offers gods access to the mortal world. This practice, applied to the study of material and visual culture, offers a distinctive perspective to interrogate the complex engagements with paintings, sculptures, found objects, fragments, built environments, and ecologies. This volume takes the process of seeing as its focus—to look closely, remaining true to the object, but also to see widely—from multiple subjective stances and diverse bodily engagements such as walking to dreaming, glancing to looking askance, hypnotic stares, and to see beyond the visible. It examines art history through nuanced considerations of materiality, aesthetics, and regional specificities. The essays emerge from current research that builds on the contributions of Michael W. Meister, W. Norman Brown Distinguished Professor of History of Art and South Asia Studies at the University of Pennsylvania, whose works laid the foundations for the study of South Asian visual and material culture. The essays in this book underscore methodological resonances rather than privileging conventional categories of media or chronology, exploring artistic media including temples and paintings as well as Bengali-quilted textiles, manuscript 'lozenges,' and metal repousse. This volume, part of the Visual Media and Histories Series, will be of interest to students and researchers of history of art, religious studies, and history as well as the allied disciplines of anthropology and folklore studies. ## Nagabharana: Recent Trends in Jainism Studies

The last ten years have seen interest in Jainism increasing, with this previously little-known Indian religion assuming a significant place in religious studies. *Studies in Jaina History and Culture* breaks new ground by investigating the doctrinal differences and debates amongst the Jains rather than presenting Jainism as a seamless whole whose doctrinal core has remained virtually unchanged throughout its long history. The focus of the book is the discourse concerning orthodoxy and heresy in the Jaina tradition, the question of omniscience and Jaina logic, role models for women and female

identity, Jaina schools and sects, religious property, law and ethics. The internal diversity of the Jaina tradition and Jain techniques of living with diversity are explored from an interdisciplinary point of view by fifteen leading scholars in Jaina studies. The contributors focus on the principal social units of the tradition: the schools, movements, sects and orders, rather than Jain religious culture in abstract. Peter Flügel provides a representative snapshot of the current state of Jaina studies that will interest students and academics involved in the study of religion or South Asian cultures.

### Studies in Jaina History and Culture

Jaina Studies is a relatively new and rapidly expanding field of inquiry for scholars of Indian religion and philosophy. In Jainism, "yoga" carries many meanings, and this book explores the definitions, nuances, and applications of the term in relation to Jainism from early times to the present. Yoga in Jainism begins by discussing how the use of the term yoga in the earliest Jaina texts described the mechanics of mundane action or karma. From the time of the later Upanisads, the word Yoga became associated in all Indian religions with spiritual practices of ethical restraint, prayer, and meditation. In the medieval period, Jaina authors such as Haribhadra, Subhacandra, and Hemacandra used the term Yoga in reference to Jaina spiritual practice. In the modern period, a Jaina form of Yoga emerged, known as Preksa Dhyana. This practice includes the physical postures and breathing exercises well known through the globalization of Yoga. By exploring how Yoga is understood and practiced within Jainism, this book makes an important contribution to the fields of Yoga Studies, Religious Studies, Philosophy, and South Asian Studies.

### Yoga in Jainism

With nearly 1 billion citizens, India is the second most populous nation in the world. Its conflict with Pakistan over Kashmir and tensions between the many ethnic groups that populate India today find frequent mention in Weste.

### A Brief History of India

This volume breaks new ground by conceptualizing landscape as a dynamic cultural complex in which the natural world and human practice are inextricably linked and are constantly interacting. It examines the social and cultural construction of space in the early medieval period in South Asia, as manifest in society, religious architecture and as shaped through trade and economic transactions.

### Negotiating Cultural Identity

This study argues that, in early medieval south India, it was in the literary arena that religious ideals and values were publicly contested.

### Imagining a Place for Buddhism

Scholars of popular Hindu religion in India have always been fascinated by oral texts and rituals, but surprisingly only few attempts have as yet been made to analyse the relationship between rituals and texts systematically. This book contributes to the filling of this gap. Focusing on the dynamics of a local (non-Brahmanical) ritual, its modular organisation and inner logic, the interaction between narrative text and ritual, and the significance of the local versus translocal nature of the text in the ritual context, the study provides a broad range of issues for comparison. It demonstrates that examining texts in their context helps to understand better the complexity of religious traditions and the way in which ritual and text are programmatically employed. The author offers a vivid description of a hitherto unnoticed ritual system, along with the first translation of a text called the Icakkiamman-Katai (IK). Composed in the Tamil language, the IK represents a substantially longer and embellished form of a core versio which probably goes as far back as the seventh century C.E. Unlike the classical source, this text has been incorporated into a living tradition, and is being constantly refashioned. A range of text versions have been encapsulated in the form of a conspectus, which will shed light on the text's variability or fixity and will add to our knowledge of bardic creativity. Includes a film by the author on DVD.

### Of Death and Birth

Recent years have seen the emergence of a virulent version of Hindu nationalism and fundamentalism in India under the banner of Hindutva. This xenophobic movement has obfuscated and mystified the notion of Hindu identity and reinforced its stereotypes. Its arguments range from the patently unscientific

- humankind was created in India, as was the first civilisation - to historical whitewash: Hinduism has continued in one, unchanged form for 5000 years; Hinduism has always been a tolerant faith. 'Rethinking Hindu Identity' offers a corrective based on a deep and detailed reading of Indian history. Written in a riveting style, this study provides a fresh history of Hinduism - its practices, its beliefs, its differences and inconsistencies, and its own myths about itself. Along the way, the book systematically demolishes the arguments of Hindu fundamentalism and nationalism, revealing how the real history of Hinduism is much more complex.

### Rethinking Hindu Identity

The Indian religion of Jainism, is one of the world's oldest and least-understood faiths. This revised and expanded edition takes account of new research into Jainism.

### The Jains

In this text, leading scholars from around the world take stock of two centuries of international intellectual investment in Hinduism. Since the early 19th century, when the scholarly investigation of Hinduism began to take shape as a modern academic discipline, Hindu studies has evolved from its concentration on description and analysis to an emphasis on understanding Hindu traditions in the context of the religion's own values, concepts and history. Offering an assessment of the current state of Hindu studies, the contributors to this volume identify past achievements and chart the course for what remains to be accomplished in the field.

### The Study of Hinduism

The popular perception of yoga in the West remains for the most part that of a physical fitness program, largely divorced from its historical and spiritual roots. The essays collected here provide a sense of the historical emergence of the classical system presented by Patañjali, a careful examination of the key elements, overall character and contemporary relevance of that system (as found in the Yoga Sutra) and a glimpse of some of the tradition's many important ramifications in later Indian religious history.

### Yoga

Jainism is Buddhism's often overlooked cousin. As the only surviving examples of ancient India's non-Vedic religious traditions, the two religions are often grouped together as heterodoxies, but this is to ignore deep differences between Jain and Buddhist beliefs and practices. Unlike Buddhism, Jainism has hardly spread beyond the Indian subcontinent but Jainism survives in India where it is a prominent element in the mix of Indian religions today. As an introduction to Jainism as a religious tradition and way of life, this book pays due attention to Jainism's history and doctrinal basics. However the author emphasises the ways in which formal Jain teachings are manifested in the practices of both laity and the monastic elite; explores the distinctive Jain systems of cosmographic and biological knowledge and describes how Jainism is woven into the social identities of Jain communities in modern India.

### Understanding Jainism

Taking a comparative approach which considers characters that are shared across the narrative traditions of early Indian religions (Brahmanical Hinduism, Jainism and Buddhism) *Shared Characters in Jain, Buddhist and Hindu Narrative* explores key religious and social ideals, as well as points of contact, dialogue and contention between different worldviews. The book focuses on three types of character - gods, heroes and kings - that are of particular importance to early South Asian narrative traditions because of their relevance to the concerns of the day, such as the role of deities, the qualities of a true hero or good ruler and the tension between worldly responsibilities and the pursuit of liberation. Characters (including character roles and lineages of characters) that are shared between traditions reveal both a common narrative heritage and important differences in worldview and ideology that are developed in interaction with other worldviews and ideologies of the day. As such, this study sheds light on an important period of Indian religious history, and will be essential reading for scholars and postgraduate students working on early South Asian religious or narrative traditions (Jain, Buddhist and Hindu) as well as being of interest more widely in the fields of Religious Studies, Classical Indology, Asian Studies and Literary Studies.

### Shared Characters in Jain, Buddhist and Hindu Narrative

"This book takes a pioneering approach to understanding the origins of the V+rasaiva / Ling yata tradition by considering for the first time in English-language scholarship a major collection of hagiographies about the twelfth-century devotees, which was produced very soon after their purported activities. The tradition, which developed over the last eight centuries in the Kannada-speaking region of the Deccan plateau in India, holds a unique place in Hindu society. Its members do not adhere to the hierarchical structures of Brahminical-centered society, and they practice a distinct set of rituals, such as carrying a personal linga (an emblem of the Hindu god Siva) on their body and worshiping it individually (as well as in groups), burying and not cremating their dead, and more"--

"There is no doubt that the wealth of new data and ideas offered in this exquisite book provides the deepest insights yet into the contemporary religious world of Jain laity. It will serve for some time as a paradigmatic monograph for future empirical studies of Jain religious life." --Bulletin of the School of Oriental and African Studies "Jains in the World is a significant and welcome ethnography of contemporary Jains in western India by the most prominent scholar of Jainism in North America. This book is a must for scholars of South Asian religions and will provide scholars of Hindu traditions fine grounding both in a central dialectic of Jain thought and in contemporary Jain praxis." --International Journal of Hindu Studies "A valuable addition to the literature on Jainism as a living faith. Since it has the additional merits of being clearly written, attractively illustrated, and free of unnecessary theoretical baggage, it should serve as a good introduction to this tradition for college students." --Journal of the American Oriental Society "A must-read for understanding, by and large, the ritual world of the Jains. He has succeeded in proving that the concept of well-being is as central to the Jains' moral universe

as their more entrenched pursuit of the goal of liberation of soul from karmic bondage."--History of Religions "An essential read for students and scholars of Jainism. . . . it identifies and defines a realm of value in Jainism strongly alluded to by recent scholarship, but which, until now, had not been explicitly stated. For this reason Jains in the World will doubtless prove to be a fundamental turning point in the development of Jaina studies."-- The Journal of Religion This book presents a detailed fieldwork-based study of the ancient Indian religion of Jainism. Drawing on field research in northern Gujarat and on the study of both ancient Sanskrit and Prakrit and modern vernacular Jain religious literature, John Cort provides a rounded portrait of the religion as it is practiced today.

### Jains in the World

A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program. Visit [www.luminosoa.org](http://www.luminosoa.org) to learn more. Winner of the 2022 Joseph W. Elder Prize in the Indian Social Sciences Merchants of Virtue explores the question of what it meant to be Hindu in precolonial South Asia. Divya Cherian presents a fine-grained study of everyday life and local politics in the kingdom of Marwar in eighteenth-century western India to uncover how merchants enforced their caste ideals of vegetarianism and bodily austerity as universal markers of Hindu identity. Using legal strategies and alliances with elites, these merchants successfully remade the category of "Hindu," setting it in contrast to "Untouchable" in a process that reconfigured Hinduism in caste terms. In a history pertinent to understanding India today, Cherian establishes the centrality of caste to the early-modern Hindu self and to its imagination of inadmissible others.

### Merchants of Virtue

This book deals with the confrontation of Buddhism and Brahmanism in India. Both depended on support from the royal court, but Buddhism had less to offer in return than Brahmanism. Buddhism developed in a manner to make up for this.

### Buddhism in the Shadow of Brahmanism

Ann Grodzins Gold weaves together an integrated series of ethnographic sketches depicting the distinctive nature of non-urban, non-rural places; the impact locality has on belonging; the negotiations of difference required in a pluralistic society; and the ways a changing environment permeates experiences of self and place.

### Shiptown

Presenting cutting-edge scholarship dedicated to exploring the emergence and articulation of modernity in colonial South Asia, this book builds upon and extends recent insights into the constitutive and multiple projects of colonial modernity. Eschewing the fashionable binaries of resistance and collaboration, the contributors seek to re-conceptualize modernity as a local and transitive practice of cultural conjunction. Whether through a close reading of Anglo-Indian poetry, Urdu rhyming dictionaries, Persian Bible translations, Jain court records, or Bengali polemical literature, the contributors interpret South Asian modernity as emerging from localized, partial and continuously negotiated efforts among a variety of South Asian and European elites. Surveying a range of individuals, regions, and movements, this book supports reflection on the ways traditional scholars and other colonial agents actively appropriated and re-purposed elements of European knowledge, colonial administration, ruling ideology, and material technologies. The book conjures a trans-colonial and trans-national context in which ideas of history, religion, language, science, and nation are defined across disparate religious, ethnic, and linguistic boundaries. Providing new insights into the negotiation and re-interpretation of Western knowledge and modernity, this book is of interest to students and scholars of South Asian Studies, as well as of intellectual and colonial history, comparative literature, and religious studies.

### Trans-Colonial Modernities in South Asia

This book provides information on the two main sectarian traditions of Jainism, the Svetambaras and Digambaras, from their early history to the present. It also includes information on various reform movements within these two traditions. The dictionary section contains more than 450 individual entries with technical terms, mendicant lineages, mendicant and lay practices and vows, biographies of influential mendicant leaders and scholars in the mendicant and lay communities, as well as entries on various Tirthankaras, ancillary deities, and pilgrimage sites. This comprehensive dictionary will be

a valuable reference for anyone interested in South Asian religions or the study of nonviolence and conflict resolution. --from back cover.

Examining materials from early modern and contemporary North India and Pakistan, Tellings and Texts brings together seventeen first-rate papers on the relations between written and oral texts, their performance, and the musical traditions these performances have entailed. The contributions from some of the best scholars in the field cover a wide range of literary genres and social and cultural contexts across the region. The texts and practices are contextualized in relation to the broader social and political background in which they emerged, showing how religious affiliations, caste dynamics and political concerns played a role in shaping social identities as well as aesthetic sensibilities. By doing so this book sheds light into theoretical issues of more general significance, such as textual versus oral norms; the features of oral performance and improvisation; the role of the text in performance; the aesthetics and social dimension of performance; the significance of space in performance history and important considerations on repertoires of story-telling. The book also contains links to audio files of some of the works discussed in the text. Tellings and Texts is essential reading for anyone with an interest in South Asian culture and, more generally, in the theory and practice of oral literature, performance and story-telling.

### Tellings and Texts

In this companion volume to *Singing the Body of God* (Oxford 2002), Steven P. Hopkins has translated into contemporary American English verse poems written by the South Indian Srivaishnava philosopher and saint-poet Venkatesa (c. 1268-1369). These poems, in three different languages - Sanskrit, Tamil, and Maharastri Prakrit -- composed for one particular Hindu god, Vishnu Devanayaka, the "Lord of Gods" at Tiruvahindrapuram, form a microcosm of the saint-poet's work. They encompass major themes of Venkatesa's devotional poetics, from the play of divine absence and presence in the world of religious emotions; the "telescoping" of time past and future in the eternal "present" of the poem; love, human vulnerability and the impassible perfected body of god; to the devotional experience of a "beauty that saves" and to what Hopkins terms the paradoxical coexistence of asymmetry and intimacy of lover and beloved at the heart of the divine-human encounter. Moreover, these poems form not only a thematic microcosm, but a linguistic one embracing all three of the poet's working languages. Like the remembered world of Proust's Combray in the taste of madeleine dipped in tea, or Blake's World in a Grain of Sand, we taste and see, in this one particular place, and in this one particular form of Vishnu, various protean forms and powers of the divine, and trace a veritable summa of theological, philosophical, and literary designs. Each translated poem forms a chapter in itself, has its own individual short Afterword, along with detailed linguistic and thematic notes and commentary. The volume concludes, for comparative reasons, with a translation of Tirumankaiyalvar's luminous cycle of verses for Devanayaka from the Periyatirumoli. As much an argument as an anthology, this book will be of interest to students and scholars of South Asian studies, comparative religion, and Indian literatures.

### An Ornament for Jewels

This volume focuses on the religious shrine in western India as an institution of cultural integration in the period spanning 200 BCE to 800 CE. It presents an analysis of religious architecture at multiple levels, both temporal and spatial, and distinguishes it as a ritual instrument that integrates individuals and communities into a cultural fabric. The work shows how these structures emphasise on communication with a host of audiences such as the lay worshipper, the ritual specialist, the royalty and the elite as well as the artisan and the sculptor. It also examines religious imagery, inscriptions, traditional lore and Sanskrit literature. The book will be of special interest to researchers and scholars of ancient Indian history, Hinduism, religious studies, architecture and South Asian studies.

### The Archaeology of Sacred Spaces

Objects of worship are an aspect of the material dimension of lived religion in South Asia. The omnipresence of these objects and their use is a theme which cuts across the religious traditions in the pluralistic religious culture of the region. Divine power becomes manifest in the objects and for the devotees they may represent power regardless of religious identity. This book looks at how objects of worship dominate the religious landscape of South Asia, and in what ways they are of significance not just from religious perspectives but also for the social life of the region. The contributions to the book show how these objects are shaped by traditions of religious aesthetics and have become conceptual devices woven into webs of religious and social meaning. They demonstrate how the objects have a social relationship with those who use them, sometimes even treated as being alive. The book discusses how devotees relate to such objects in a number of ways, and even if the objects belong to various traditions they may attract people from different communities and can also be contested in various ways. By analysing the specific qualities that make objects eligible for a status and identity as living objects of worship, the book contributes to an understanding of the central significance of these objects in the religious and social life of South Asia. It will be of interest to students and scholars of Religious Studies and South Asian Religion, Culture and Society.

### Objects of Worship in South Asian Religions

The book offers a number of new insights in the history of yoga powers in the South Asian religious traditions, analyzes the position of the powers in the salvific process and in conceptions of divinity, and explores the rational explanations of the powers provided by the traditions.

### Yoga Powers

This volume offers insights into the current 'public-square' debates on Indian Christianity. Drawing on ethnographic fieldwork as well as rigorous analyses, it discusses the myriad histories of Christianity in India, its everyday practice and contestations and the process of its indigenisation. It addresses complex and pertinent themes such as Dalit Indian Christianity, diasporic nationalism and conversion. The work will interest scholars and researchers of religious studies, Dalit and subaltern studies, modern Indian history, and politics.

### Constructing Indian Christianities

Winner of the 2009 Ananda Kentish Coomaraswamy Book Prize, sponsored by the Association for Asian Studies The medieval Rajput queen Padmini - believed to have been pursued by Alauddin Khalji, the Sultan of Delhi - has been the focus of numerous South Asian narratives, ranging from a Sufi mystical romance in the sixteenth century to nationalist histories in the late nineteenth century. *The Many Lives of a Rajput Queen* explores how early modern regional elites, caste groups, and mystical and monastic communities shaped their distinctive versions of the past through the repeated refashioning of the legend of Padmini. Ramya Sreenivasan investigates these legends and traces their subsequent appropriation by colonial administrators and nationalist intellectuals, for varying different political ends. Using Padmini as a means of illustrating the power of gender norms in constructing heroic memory, she shows how such narratives about virtuous women changed as they circulated across particular communities in South Asia between the sixteenth and early twentieth centuries. This book will interest historians of memory, gender, community, culture, and historywriting in South Asia. Illustrating how enduring legends emerged out of particular precolonial repositories of "tradition," the book also addresses the nature of colonial transitions and precolonial historical consciousness.

*Garland of Visions* explores the generative relationships between artistic intelligence and tantric vision practices in the construction and circulation of visual knowledge in medieval South Asia. Shifting away from the traditional connoisseur approach, Jinah Kim instead focuses on the materiality of painting: its mediums, its visions, and especially its colors. She argues that the adoption of a special type of manuscript called pothi enabled the material translation of a private and internal experience of "seeing" into a portable device. These mobile and intimate objects then became important conveyors of many forms of knowledge—ritual, artistic, social, scientific, and religious—and spurred the spread of visual knowledge of Indic Buddhism to distant lands. By taking color as the material link between a vision and its artistic output, *Garland of Visions* presents a fresh approach to the history of Indian painting.
