The Xenophobe's Guide to the Japanese

A guide to understanding the Japanese which goes beyond the etiquette to uncover the real nature of the people of the rising sun.

Xenophobe's Guide to the Japanese

Surprisingly perhaps, this XENOPHOBE'S GUIDE shows the Japanese as a mutable people. In spite of centuries of history, the Japanese don't always follow tradition, but welcome new ideas that help them attain a goal--in today's world keeping up with the latest technology. The beauty of not holding a grudge, the virtue of going with the flow, the wisdom of knowing that everything is temporary all are advantages the Japanese have over Westerners.

The Xenophobe's Guide to the Japanese

An alternative look at Japanese life, history and culture

A Gaijin's Guide to Japan: An alternative look at Japanese life, history and culture

Combining perspectives from discourse analysis and sociolinguistics, this introduction provides students with a comprehensive, up-to-date and critical overview of the field of intercultural communication. Ingrid Piller explains communication in context using two main approaches. The first treats cultural identity, difference and similarity as discursive constructions. The second, informed by bilingualism studies, highlights the use and prestige of different languages and language varieties as well as the varying access that speakers have to them. Linguistics students will find this book a useful tool for studying language and globalization as well as applied linguistics.

With Respect to the Japanese

Buddhism, often described as an austere religion that condemns desire, promotes denial, and idealizes the contemplative life, actually has a thriving leisure culture in Asia. Creative religious improvisations designed by Buddhists have been produced both within and outside of monasteries across the region—in Nepal, Japan, Korea, Macau, Hong Kong, Singapore, Laos, Thailand, and Vietnam. Justin McDaniel looks at the growth of Asia's culture of Buddhist leisure—what he calls “socially disengaged Buddhism”—through a study of architects responsible for monuments, museums, amusement parks, and other sites. In conversation with noted theorists of material and visual culture and anthropologists of art, McDaniel argues that such sites highlight the importance of public, leisure, and spectacle culture from a Buddhist perspective and illustrate how “secular” and “religious,” “public” and “private,” are in many ways false binaries. Moreover, places like Lek Wiriyaphan's Sanctuary of Truth in Thailand, Suñi Thiên Amusement Park in Saigon, and Shi Fa Zhao's multilevel museum/ritual space/tea house in Singapore reflect a growing Buddhist ecumenism built through repetitive affective encounters instead of didactic sermons and sectarian developments. They present different Buddhist traditions, images, and aesthetic expressions as united but not uniform, collected but not concise: Together they form a gathering, not a movement. Despite the ingenuity of lay and ordained visionaries like Wiriyaphan and Zhao and their colleagues Kenzo Tange, Chan-soo Park, Tadao Ando, and others discussed in this book, creators of Buddhist leisure sites often face problems along the way. Parks and museums are complex adaptive systems that are changed and influenced by budgets, available materials, local and global economic conditions, and visitors. Architects must often compromise and settle at local optima, and no matter what they intend, their buildings will develop lives of their own. Provocative and theoretically innovative, *Architects of Buddhist Leisure* asks readers to question the very category of “religious” architecture. It challenges current methodological approaches in religious studies and speaks to a broad audience interested in modern art, architecture, religion, anthropology, and material culture.

Intercultural Communication: A Critical Introduction

Marco Pellitteri examines the growing influence of Japanese pop culture in European contexts in this comprehensive study of manga, anime, and video games. Looking at the period from 1975 to today, Pellitteri discusses Super Mario, Pokémon, kawaii, Sonic, robots and cyborgs, Astro Boy, and Gundam, among other examples of these popular forms. Pellitteri divides this period into two eras (“the dragon” and “the dazzle”) to better understand this cultural phenomenon and means by which it achieved worldwide distribution.

Architects of Buddhist Leisure

NEW YORK TIMES BESTSELLER Building on the groundwork laid in the New York Times bestseller *White Fragility*, Robin DiAngelo explores how a culture of niceness inadvertently promotes racism. In *White Fragility*, Robin DiAngelo explained how racism is a system into which all white people are socialized and challenged the belief that racism is a simple matter of good people versus bad. DiAngelo also made a provocative claim: white progressives cause the most daily harm to people of color. In *Nice Racism*, her follow-up work, she explains how they do so. Drawing on her background as a sociologist and over 25 years working as an anti-racist educator, she picks up where *White Fragility* left off and moves the conversation forward. Writing directly to white people as a white person, DiAngelo identifies many common white racial patterns and breaks down how well-intentioned white people unknowingly perpetuate racial harm. These patterns include: -rushing to prove that we are “not racist”; -downplaying white advantage; -romanticizing Black, Indigenous and other peoples of color (BIPOC); -pretending white segregation “just happens”; -expecting BIPOC people to teach us about racism; -carefulness; -and feeling immobilized by shame. DiAngelo explains how spiritual white progressives seeking community

by co-opting Indigenous and other groups' rituals create separation, not connection. She challenges the ideology of individualism and explains why it is OK to generalize about white people, and she demonstrates how white people who experience other oppressions still benefit from systemic racism. Writing candidly about her own missteps and struggles, she models a path forward, encouraging white readers to continually face their complicity and embrace courage, lifelong commitment, and accountability. *Nice Racism* is an essential work for any white person who recognizes the existence of systemic racism and white supremacy and wants to take steps to align their values with their actual practice. BIPOC readers may also find the "insiders" perspective useful for navigating whiteness. Includes a study guide.

The Dragon and the Dazzle

"Mid-nineteenth century Russian radicals who witnessed the Meiji Restoration saw it as the most sweeping revolution in recent history and the impetus for future global progress. Acting outside imperial encounters, they initiated underground transnational networks with Japan. Prominent intellectuals and cultural figures, from Peter Kropotkin and Lev Tolstoy to Saigo Takamori and Tokutomi Roka, pursued these unofficial relationships through correspondence, travel, and networking, despite diplomatic and military conflicts between their respective nations. Tracing these non-state networks, *Anarchist Modernity* uncovers a major current in Japanese intellectual and cultural life between 1860 and 1930 that might be described as "cooperatist anarchist modernity"—a commitment to realizing a modern society through mutual aid and voluntary activity, without the intervention of state governance. These efforts later crystallized into such movements as the Nonwar Movement, Esperantism, and the popularization of the natural sciences. Examining cooperatist anarchism as an intellectual foundation of modern Japan, Sho Konishi offers a new approach to Japanese history that fundamentally challenges the "logic" of Western modernity. It looks beyond this foundational construct of modern history writing to understand people, practices, and cultural expressions that have been forgotten or dismissed as products of anti-modern nativist counter urges against the West."

Nice Racism

Andrea Cornwall is Professor of Anthropology and Development in the School of Global Studies at the University of Sussex. --

Anarchist Modernity

This bold collection of essays demonstrates the necessity of understanding fascism in cultural terms rather than only or even primarily in terms of political structures and events. Contributors from history, literature, film, art history, and anthropology describe a culture of fascism in Japan in the decades preceding the end of the Asia-Pacific War. In so doing, they challenge past scholarship, which has generally rejected descriptions of pre-1945 Japan as fascist. The contributors explain how a fascist ideology was diffused throughout Japanese culture via literature, popular culture, film, design, and everyday discourse. Alan Tansman's introduction places the essays in historical context and situates them in relation to previous scholarly inquiries into the existence of fascism in Japan. Several contributors examine how fascism was understood in the 1930s by, for example, influential theorists, an antifascist literary group, and leading intellectuals responding to capitalist modernization. Others explore the idea that fascism's solution to alienation and exploitation lay in efforts to beautify work, the workplace, and everyday life. Still others analyze the realization of and limits to fascist aesthetics in film, memorial design, architecture, animal imagery, a military museum, and a national exposition. Contributors also assess both manifestations of and resistance to fascist ideology in the work of renowned authors including the Nobel-prize-winning novelist and short-story writer Kawabata Yasunari and the mystery writers Edogawa Ranpo and Hamao ShirM. In the work of these final two, the tropes of sexual perversity and paranoia open a new perspective on fascist culture. This volume makes Japanese fascism available as a critical point of comparison for scholars of fascism worldwide. The concluding essay models such work by comparing Spanish and Japanese fascisms. Contributors. Noriko Aso, Michael Baskett, Kim Brandt, Nina Cornyetz, Kevin M. Doak, James Dorsey, Aaron Gerow, Harry Harootunian, Marilyn Ivy, Angus Lockyer, Jim Reichert, Jonathan Reynolds, Ellen Schattschneider, Aaron Skabelund, Akiko Takenaka, Alan Tansman, Richard Torrance, Keith Vincent, Alejandro Yarza

Deconstructing Development Discourse

This comprehensive guide will prepare candidates for the test in all 50 states. It includes four complete practice exams, a real estate refresher course and complete math review, as well as a real estate terms glossary with over 900 terms, and expert test-prep tips.

Blue Nippon

This guide is a collection of engaging and provocative capsule reviews of films across the spectrum of cinema history, from Russian silent movies to American comedies, classic documentaries to Japanese anime, and beyond.

The Culture of Japanese Fascism

The International Bestseller 'With clarity and compassion, DiAngelo allows us to understand racism as a practice not restricted to "bad people." In doing so, she moves our national discussions forward. This is a necessary book for all people invested in societal change' Claudia Rankine Anger. Fear. Guilt. Denial. Silence. These are the ways in which ordinary white people react when it is pointed out to them that they have done or said something that has - unintentionally - caused racial offence or hurt. After, all, a racist is the worst thing a person can be, right? But these reactions only serve to silence people of colour, who cannot give honest feedback to 'liberal' white people lest they provoke a dangerous emotional reaction. Robin DiAngelo coined the term 'White Fragility' in 2011 to describe this process and is here to show us how it serves to uphold the system of white supremacy. Using knowledge and insight gained over decades of running racial awareness workshops and working on this idea as a Professor of Whiteness Studies, she shows us how we can start having more honest conversations, listen to each other better and react to feedback with grace and humility. It is not enough to simply hold abstract progressive views and condemn the obvious racists on social media - change starts with us all at a practical, granular level, and it is time for all white people to take responsibility for relinquishing their own racial supremacy. 'By turns mordant and then inspirational, an argument that powerful forces and tragic histories stack the deck fully against racial justice alongside one that we need only to be clearer, try harder, and do better' David Roediger, Los Angeles Review of Books 'The value in White Fragility lies in its methodical, irrefutable exposure of racism in thought and action, and its call for humility and vigilance' Katy Waldman, New Yorker 'A vital, necessary, and beautiful book' Michael Eric Dyson

Proofreading, Revising & Editing Skills Success in 20 Minutes a Day

During the first half of the twentieth century, Zen Buddhist leaders contributed actively to Japanese imperialism, giving rise to what has been termed "Imperial-Way Zen" (Kodo Zen). Its foremost critic was priest, professor, and activist Ichikawa Hakugen (1902–1986), who spent the decades following Japan's surrender almost single-handedly chronicling Zen's support of Japan's imperialist regime and pressing the issue of Buddhist war responsibility. Ichikawa focused his critique on the Zen approach to religious liberation, the political ramifications of Buddhist metaphysical constructs, the traditional collaboration between Buddhism and governments in East Asia, the philosophical system of Nishida Kitaro (1876–1945), and the vestiges of State Shinto in postwar Japan. Despite the importance of Ichikawa's writings, this volume is the first by any scholar to outline his critique. In addition to detailing the actions and ideology of Imperial-Way Zen and Ichikawa's ripostes to them, Christopher Ives offers his own reflections on Buddhist ethics in light of the phenomenon. He devotes chapters to outlining Buddhist nationalism from the 1868 Meiji Restoration to 1945 and summarizing Ichikawa's arguments about the causes of Imperial-Way Zen. After assessing Brian Victoria's claim that Imperial-Way Zen was caused by the traditional connection between Zen and the samurai, Ives presents his own argument that Imperial-Way Zen can best be understood as a modern instance of Buddhism's traditional role as protector of the realm. Turning to postwar Japan, Ives examines the extent to which Zen leaders have reflected on their wartime political stances and started to construct a critical Zen social ethic. Finally, he considers the resources Zen might offer its contemporary leaders as they pursue what they themselves have identified as a pressing task: ensuring that henceforth Zen will avoid becoming embroiled in international adventurism and instead dedicate itself to the promotion of peace and human rights. Lucid and balanced in its methodology and well grounded in textual analysis, Imperial-Way Zen will attract scholars, students, and others interested in Buddhism, ethics, Zen practice, and the cooptation of religion in the service of violence and imperialism.

Dixon provides the first comprehensive study of African American military and social experiences during the Pacific War.

White Fragility

The Copyeditor's Handbook is a lively, practical manual for newcomers to publishing and for experienced editors who want to fine-tune their skills or broaden their understanding of the craft. Addressed to copyeditors in book publishing and corporate communications, this thoughtful handbook explains what copyeditors do, what they look for when they edit a manuscript, and how they develop the editorial judgment needed to make sound decisions. This revised edition reflects the most recent editions of The Chicago Manual of Style (15th ed.), the Publication Manual of the American Psychological Association (5th ed.), and Merriam-Webster's Collegiate Dictionary (11th ed.).

Imperial-Way Zen

This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Ever since the Industrial Revolution of the late-eighteenth and early-nineteenth centuries, industrialization has been the key to modern economic growth. The fact that modern industry originated in Britain, and spread initially to north-western Europe and North America, implied a dramatic divergence in living standards between the industrial North (or West) and a non-industrial, or even de-industrializing, South (or Rest). This nineteenth-century divergence, which had profound economic, military, and geopolitical implications, has been studied in great detail by many economists and historians. Today, this divergence between the West and the Rest is visibly unraveling, as economies in Asia, Latin America and even sub-Saharan Africa converge on the rich economies of Europe and North America. This phenomenon, which is set to define the twenty-first century, both economically and politically, has also been the subject of a considerable amount of research. Less appreciated, however, are the deep historical roots of this convergence process, and in particular of the spread of modern industry to the global periphery. This volume fills this gap by providing a systematic, comparative, historical account of the spread of modern manufacturing beyond its traditional heartland, to Southern and Eastern Europe, the Middle East, Asia, Africa, and Latin America, or what we call the poor periphery. It identifies the timing of this convergence, finding that this was fastest in the interwar and post-World War II years, not the more recent miracle growth years. It also identifies which driving forces were common to all periphery countries, and which were not.

African Americans and the Pacific War, 1941–1945

Human rights offer a vision of international justice that today's idealistic millions hold dear. Yet the very concept on which the movement is based became familiar only a few decades ago when it profoundly reshaped our hopes for an improved humanity. In this pioneering book, Samuel Moyn elevates that extraordinary transformation to center stage and asks what it reveals about the ideal's troubled present and uncertain future. For some, human rights stretch back to the dawn of Western civilization, the age of the American and French Revolutions, or the post-World War II moment when the Universal Declaration of Human Rights was framed. Revisiting these episodes in a dramatic tour of humanity's moral history, *The Last Utopia* shows that it was in the decade after 1968 that human rights began to make sense to broad communities of people as the proper cause of justice. Across eastern and western Europe, as well as throughout the United States and Latin America, human rights crystallized in a few short years as social activism and political rhetoric moved it from the hallways of the United Nations to the global forefront. It was on the ruins of earlier political utopias, Moyn argues, that human rights achieved contemporary prominence. The morality of individual rights substituted for the soiled political dreams of revolutionary communism and nationalism as international law became an alternative to popular struggle and bloody violence. But as the ideal of human rights enters into rival political agendas, it requires more vigilance and scrutiny than when it became the watchword of our hopes.

Time Out Film Guide

How has South Korea's development influenced and been influenced by world events? What light can it shed on the way that international struggles for hegemony affect local environments? Phoebe Moore seeks to address these questions critically, from the perspective of International Political Economics, and so provides important insight into one of the fastest growing Asian economies. She examines the neo-Gramscian school theories – that world history reveals specific periods of hegemonic stability, such

as during the post World War II period of 'Pax Americana' – and refutes this position through an original account of Korean development. Instead, she observes that all economic development in this country has been carried out through 'passive revolution' driven by an elite, frequently supported by external forces, against the will of a large part of the population, namely the working classes. Moore draws out the relationships between socio-economic change, passive revolution, hegemony struggles and global politics, making this a key resource for Asian political economics, labour relations and international politics.

Resources in Education

This book presents an unforgettably honest account of the effects of World War II and the ensuing American occupation in Japan's Oita prefecture, from the perspective of the Japanese citizens who experienced it. Through harrowing firsthand accounts from more than forty Japanese men and women who lived in the region, we get a strikingly detailed picture of the dreadful experiences of wartime life in Japan. The interviewees are wide-ranging and include students, housewives, nurses, teachers, journalists, soldiers, sailors, Kamikaze pilots, and munitions factory workers. And their collective stories range from early, spirited support for the war on to more reflective later views in the wake of the devastating losses of friends and family members to air raids, and finally into periods of hunger and fear of the American occupiers. Detailed archival materials buttress the personal accounts, and the result is an unprecedented picture of the war as felt in a single region of Japan.

The Copyeditor's Handbook

A Young People's History of the United States brings to US history the viewpoints of workers, slaves, immigrants, women, Native Americans, and others whose stories, and their impact, are rarely included in books for young people. A Young People's History of the United States is also a companion volume to The People Speak, the film adapted from A People's History of the United States and Voices of a People's History of the United States. Beginning with a look at Christopher Columbus's arrival through the eyes of the Arawak Indians, then leading the reader through the struggles for workers' rights, women's rights, and civil rights during the nineteenth and twentieth centuries, and ending with the current protests against continued American imperialism, Zinn in the volumes of A Young People's History of the United States presents a radical new way of understanding America's history. In so doing, he reminds readers that America's true greatness is shaped by our dissident voices, not our military generals.

The Spread of Modern Industry to the Periphery Since 1871

This authoritative work provides an essential perspective on terrorism by offering a rare opportunity for analysis and reflection at a time of ongoing violence, threats, and reprisals. Some of the best international specialists on the subject examine terrorism's complex history from antiquity to the present day and find that terror, long the weapon of the weak against the strong, is a tactic as old as warfare itself. Beginning with the Zealots of the first century CE, contributors go on to discuss the Assassins of the Middle Ages, the 1789 Terror movement in Europe, Bolshevik terrorism during the Russian Revolution, Stalinism, "resistance" terrorism during World War II, and Latin American revolutionary movements of the late 1960s. Finally, they consider the emergence of modern transnational terrorism, focusing on the roots of Islamic terrorism, al Qaeda, and the contemporary suicide martyr. Along the way, they provide a groundbreaking analysis of how terrorism has been perceived throughout history. What becomes powerfully clear is that only through deeper understanding can we fully grasp the present dangers of a phenomenon whose repercussions are far from over. This updated edition includes a new chapter analyzing the rise of ISIS and key events such as the 2015 Paris attacks.

The Last Utopia

Acclaimed National Book Award-winning author George Packer diagnoses America's descent into a failed state, and envisions a path toward overcoming injustices, paralyses, and divides. How, in a few decades, did the United States transform from a broadly prosperous middle-class country, with relatively healthy institutions and competent leaders, to a nation defined by discredited elites, hollowed-out institutions, and blatant inequalities feared and pitied by our friends, mocked and sabotaged by our adversaries, first in the world in Covid cases and deaths, and led in recent years by an incompetent authoritarian bigot? Last Best Hope is a bracing account of our current crisis and of how a new era of civic revitalization may bring it to an end. Combining reportage with historical narrative, autobiography,

and political analysis, Packer depicts and assesses the four inadequate narratives that dominate American public life: Libertarian America, which imagines a nation of individuals responsible for their own fate, and serves the interests of corporations and the wealthy; Cosmopolitan America, the ideology of Silicon Valley and the professional elite, which celebrates globalization and leaves many American communities behind; Diverse America, which defines citizens as members of large identity groups that have inflicted or suffered oppression; and White America, a shallow nationalism that fears the contamination of non-whites and treachery of coastal elites, and poses the greatest threat to democracy in our lifetime. At a time when many fear that the American experiment in self-government may collapse, or, in Abraham Lincoln's words, "die by suicide"

Globalisation and Labour Struggle in Asia

This authoritative catalogue of the Corcoran Gallery of Art's renowned collection of pre-1945 American paintings will greatly enhance scholarly and public understanding of one of the finest and most important collections of historic American art in the world. Composed of more than 600 objects dating from 1740 to 1945.

Japanese Reflections on World War II and the American Occupation

Who is not captivated by tales of Islanders earnestly scanning their watery horizons for great fleets of cargo ships bringing rice, radios and refrigerators - ships that will never arrive? Of all the stories spun about the island peoples of Melanesia, tales of cargo cult are among the most fascinating. The term cargo cult, Lamont Lindstrom contends, is one of anthropology's most successful conceptual offspring. Like culture, worldview and ethnicity, its usage has steadily proliferated, migrating into popular culture where today it is used to describe an astonishing roll-call of people. Its history makes for lively and compelling reading. The cargo cult story, Lindstrom shows, is more significant than it at first appears, for it recapitulates in summary form three generations of anthropological theory and Pacific studies. Although anthropologists' enthusiasm for the notion of cargo cult has waned, it now colors outsiders' understanding of Melanesian culture, and even Melanesians' perceptions of themselves. The repercussions for contemporary Islanders are significant: leaders of more than one political movement have felt the need to deny that they are any kind of cargo cultist. Of particular interest to this history is Lindstrom's argument that accounts of cargo cult are at heart tragedies of thwarted desire, melancholy anticipation and crazy unrequited love. He makes a convincing case that these stories expose powerful Western scenarios of desire itself—giving cargo cult its combined titillation of the fascinating exotic and the comfortably familiar.

A Young People's History of the United States

Contested Terrain provides a cutting-edge, comprehensive and innovative approach to critically analysing the multidimensional and contested nature of security narratives, justified by different ideological, political, cultural and economic rationales. This is important in a complex and ever-changing situation involving a dynamic interplay between local, regional and global factors. Security narratives are constructed in multiple ways and are used to frame our responses to the challenges and threats to our sense of safety, wellbeing, identity and survival but how the narratives are constructed is a matter of intellectual and political contestation. Using three case studies from the Pacific (Fiji, Tonga and Solomon Islands), Contested Terrain shows the different security challenges facing each country, which result from their unique historical, political and socio-cultural circumstances. Contrary to the view that the Pacific is a generic entity with common security issues, this book argues for more localised and nuanced approaches to security framing and analysis.

The History of Terrorism

"Slow violence" from climate change, toxic drift, deforestation, oil spills, and the environmental aftermath of war occurs gradually and often invisibly. Rob Nixon focuses on the inattention we have paid to the lethality of many environmental crises, in contrast with the sensational, spectacle-driven messaging that impels public activism today.

Last Best Hope

A major statement from one of the foremost legal theorists of our day, this book offers a penetrating look into the political nature of legal, and especially judicial, decision making. It is also the first sustained

attempt to integrate the American approach to law, an uneasy balance of deep commitment and intense skepticism, with the Continental tradition in social theory, philosophy, and psychology. At the center of this work is the question of how politics affects judicial activity-and how, in turn, lawmaking by judges affects American politics. Duncan Kennedy considers opposing views about whether law is political in character and, if so, how. He puts forward an original, distinctive, and remarkably lucid theory of adjudication that includes accounts of both judicial rhetoric and the experience of judging. With an eye to the current state of theory, legal or otherwise, he also includes a provocative discussion of postmodernism. Ultimately concerned with the practical consequences of ideas about the law, *A Critique of Adjudication* explores the aspects and implications of adjudication as few books have in this century. As a comprehensive and powerfully argued statement of a critical position in modern American legal thought, it will be essential to any balanced picture of the legal, political, and cultural life of our nation.

Corcoran Gallery of Art

"Investigating Iwo encourages us to explore the connection between American visual culture and World War II, particularly how the image inspired Marines, servicemembers, and civilians to carry on with the war and to remember those who made the ultimate sacrifice to ensure victory over the Axis Powers. Chapters shed light on the processes through which history becomes memory and gains meaning over time. The contributors ask only that we be willing to take a closer look, to remain open to new perspectives that can deepen our understanding of familiar topics related to the flag raising, including Rosenthal's famous picture, that continue to mean so much to us today"--

Cargo Cult

In *The Whites Are Enemies of Heaven* Mark W. Driscoll examines nineteenth-century Western imperialism in Asia and the devastating effects of "climate caucasianism"—the white West's pursuit of rapacious extraction at the expense of natural environments and people of color conflated with them. Drawing on an array of primary sources in Chinese, Japanese, and French, Driscoll reframes the Opium Wars as "wars for drugs" and demonstrates that these wars to unleash narco- and human traffickers kickstarted the most important event of the Anthropocene: the military substitution of Qing China's world-leading carbon-neutral economy for an unsustainable Anglo-American capitalism powered by coal. Driscoll also reveals how subaltern actors, including outlaw societies and dispossessed samurai groups, became ecological protectors, defending their locales while driving decolonization in Japan and overthrowing a millennia of dynastic rule in China. Driscoll contends that the methods of these protectors resonate with contemporary Indigenous-led movements for environmental justice.

Contested Terrain

In *Intercultural Communication*, the authors draw on their deep intercultural experience to show us how to build successful communication bridges across diverse cultures. The book explores various theoretical positions on global communication ethics and norms by providing an overview of the contemporary socio-cultural situation and seeking ways in which common ground may be found between these different positions. The authors raise points of critical reflection on intercultural events and issues in various areas of communication including health, work, environment and education. The book also covers a range of issues, from the interactions of various cultures to the expansion of social organizations and the growing global infrastructure.

Slow Violence and the Environmentalism of the Poor

While Americans are generally aware of China's ambitions as a global economic and military superpower, few understand just how deeply and assertively that country has already sought to influence American society. As the authors of this volume write, it is time for a wake-up call. In documenting the extent of Beijing's expanding influence operations inside the United States, they aim to raise awareness of China's efforts to penetrate and sway a range of American institutions: state and local governments, academic institutions, think tanks, media, and businesses. And they highlight other aspects of the propagandistic "discourse war" waged by the Chinese government and Communist Party leaders that are less expected and more alarming, such as their view of Chinese Americans as members of a worldwide Chinese diaspora that owes undefined allegiance to the so-called Motherland. Featuring ideas and policy proposals from leading China specialists, *China's Influence and American Interests* argues that a successful future relationship requires a rebalancing toward greater transparency,

reciprocity, and fairness. Throughout, the authors also strongly state the importance of avoiding casting aspersions on Chinese and on Chinese Americans, who constitute a vital portion of American society. But if the United States is to fare well in this increasingly adversarial relationship with China, Americans must have a far better sense of that country's ambitions and methods than they do now.

A Critique of Adjudication [fin de Si•cle]

Analysis of the present foreign policy of the United States by the Chairman of the Senate Committee on Foreign Relations.

Investigating Iwo

In 1996 physicist Alan Sokal published an essay in *Social Text*--an influential academic journal of cultural studies--touting the deep similarities between quantum gravitational theory and postmodern philosophy. Soon thereafter, the essay was revealed as a brilliant parody, a catalog of nonsense written in the cutting-edge but impenetrable lingo of postmodern theorists. The event sparked a furious debate in academic circles and made the headlines of newspapers in the U.S. and abroad. Now in *Fashionable Nonsense: Postmodern Intellectuals' Abuse of Science*, Sokal and his fellow physicist Jean Bricmont expand from where the hoax left off. In a delightfully witty and clear voice, the two thoughtfully and thoroughly dismantle the pseudo-scientific writings of some of the most fashionable French and American intellectuals. More generally, they challenge the widespread notion that scientific theories are mere "narrations" or social constructions.

Is the South racist? We asked South Carolinians | AJ+ - Is the South racist? We asked South Carolinians | AJ+ by AJ+ 12,042,499 views 8 years ago 3 minutes, 15 seconds - AJ+ wanted to explore the stereotype that the South is more racist than the North. So we hit the road in South Carolina and asked.

where the Confederate flag is flying

Is the South more racist?

So if you ask black people, "How often do you think about race?"

So we've reached Lexington.

Is there a problem with racism out here?

Is there a lot of racism in Lexington and South Carolina?
