The Anatomy and Physiology Exam Success Guide is an awesome tool to use before a course of study as it will help you develop a strong working Insider's Language before you even begin your review. Learn the Secret to Success on the Anatomy and Physiology Course and Exams. After nearly 20 years of teaching we discovered a startling fact: Most students didn't struggle with the subject, they struggled with the language. It was never about brains or ability. His students simply didn't have the knowledge of the specific language needed to succeed. Through experimentation and research, he discovered that for any subject there was a list of essential words, that, when mastered, unlocked a student's ability to progress in the subject. We called this set of vocabulary the "Insider's Words". When he applied these "Insider's Words" the results were incredible. His students began to learn with ease. He was on his way to developing the landmark series of Books and applications to teach this "Insider's Language" to students around the world. Our books and applications are helpful to any student. They are especially helpful to struggling students, English language learners, and students beginning a course of study. The strongest students will also enjoy the puzzle and game aspect of the books. In all cases, the books

provide an enjoyable break from the tedious and mundane experience of traditional test preparation. Get your copy today!

Just because A&P is complicated, doesn't mean learning it has to be. Anatomy & Physiology, 10th Edition uses reader-friendly writing, visually engaging content, and a wide range of teaching and learning support to ensure classroom success. Focusing on the unifying themes of structure and function and homeostasis, author Kevin Patton uses a very conversational and easy-to-follow narrative to guide you through difficult A&P material. The new edition of this two-semester text has been updated to ensure you have a better understanding of how the entire body works together. In addition, you can connect with the textbook through a number of free electronic resources, including Netter's 3D Interactive Anatomy, A&P Online, an electronic coloring book, 3D animations, and more! Conversational writing style at a 11.7 reading level (the lowest available for 2-semester A&P books) makes text engaging and easy to understand. Updated Genetics chapter includes important advancements in that field. Updated content on osmosis revised to make it more simple and accurate. More than 1,400 full-color photographs and drawings illustrate the most current scientific knowledge and bring difficult concepts to life. Includes a unique color key to show color scheme that is used consistently throughout the book (for example, bones are off white, enzymes are lime green, nucleus is purple). Free 1-year access to Netter's 3D Interactive Anatomy, powered by Cyber Anatomy, a state-of-the-art software program that uses advanced gaming technology and interactive 3D anatomy models to learn and review anatomy. UNIQUE! Consistent unifying themes, such as the Big Picture and Cycle of Life sections in each chapter, help you comprehend the interrelation of body systems and how the structure and function of these change in relation to age and development. Numerous feature boxes including: Language of Science and Language of Medicine, Mechanisms of Disease, Health Matters, Diagnostic Study, FYI, Sport and Fitness, and Career Choices provide interesting and important sidebars to the main content. Quick Check Questions reinforce learning by prompting you to review what you've just read. Chapter outlines, chapter objectives and study tips begin each chapter. NEW! Integrative Unit Closers ties together content with integrative critical thinking questions. NEW! Additional and updated Connect It! boxes (renamed from A&P Connect) provide relevant "bonus" information for you to explore. NEW! All-new animations in the text and on Evolve companion site help you understand the reasoning and knowledge behind each answer and assist with recalling correct answers.

Human Anatomy and Physiology

There has been a marked change in examination strategy over the last five years; EMQs (extended matching questions) are popular with tutors and students alike as they present a more realistic view of a student's ability to apply his or her knowledge in a clinical situation. The new edition of MCQs in Physiology has been subject to a complete overhaul to become MCQs and EMQs in Physiology. This reflects the current methods of examination techniques and will provide the student with a complete revision resource book. Packed with MCQs and EMQs along with clear and simple explanations of each answer, this book covers all the main physiological systems. The questions stretch from basic to applied and interpretative and are written with the modern integrated syllabus firmly in mind. Presented alongside other core revision books such as EMQs in Clinical Medicine this book will soon be seen as a must-have for any medic's shelf.

It contains all the mechanics that students need to know for AS-level Mathematics, or for the first year of an A-level.

International A2 Level Mathematics for Oxford International AQA Examinations

Based on extensive feedback from teachers, these popular A Level titles have been written by the experienced team that produced SMP Interact for GCSE. These are clear, user-friendly texts that both teacher and student will enjoy using. Each chapter's objectives are clearly set out and new concepts are carefully developed in a way that involves the student. Worked examples are designed to clarify ideas and techniques, and there is plenty of well-graded practice and revision, including past exam questions that show the standard required. Key points are highlighted as they arise and are gathered

in a summary at the end of the chapter, where there is also a self-assessment section. Each book contains a detailed contents analysis and the chapters are structured so that you can easily tell what part of the specification you are covering. Opportunities for classroom discussion are marked, and starred questions provide extra challenge where needed.

Advanced Maths for AQA: Mechanics M1

COSMETOLOGY WRITTEN STUDY GUIDE #1 PROPERTIES OF HAIR & SCALP

Structure of the hair shaft. 1. Hair cuticle- is the outermost layer of the hair; it consists of a single, overlapping layer of transparent, scale like cells that overlap like shingles on a roof. 2. Cortex- is the middle layer of hair, it is a fibrous protein core formed by elongated cells containing melanin pigment. 3. Medulla- is the innermost layer. It is composed of round cells.

Side Bonds of the cortex. 1. Hydrogen Bond 2. Salt Bond

Hair Pigment All natural hair color is the result of pigment located within the cortex. Melanin are tiny grains of pigment in the cortex that give natural color to the hair. a. Eumelanin provides dark brown and black color to hair. b. Pheomelanin provides natural hair colors from red and ginger to yellow blond tones.

Wave pattern Refers to the shape of the hair strand, It is described as straight, wavy, curly, or extremely curly. 1. Natural wave patterns are the result of genetics. a. Straight, wavy, curly and extremely curly hair. b. The wave pattern may also vary from strand to strand. c. Curly hair is oval in shape.

The truth about hair growth 1. Vellus hair also known as lanugo, is short, fine , downy, unpigmented hair covering most of the body except the palms and soles of the feet. 2. Terminal hair is long, thick, pigmented hair found on the scalp, legs, arms. It is coarser than vellus hair and with the exception of gray hair , it is pigmented and it usually has a medulla.

Types of Abnormal Hair loss 1. Androgenic alopecia is a genetic condition that can affect both men and women. Men with this condition, called male pattern baldness, can begin suffering hair loss as

early as their teens or early 20s. It's characterized by a receding hairline and gradual disappearance of hair from the crown and frontal scalp. 2. Alopecia areata is an autoimmune disorder that causes the affected hair follicles to be mistakenly attacked by a person's own immune system. White blood cells stop the hair growth during the anagen phase

Recognize Disorders of the Scalp. A. Dandruff Pityriasis is the technical term for dandruff, characterized by excessive flaking. Pityriasis steatoides is a more severe case of dandruff. B. Fungal infections Tinea is the technical term for ringworm. Itching, scales and sometimes painful circular lesions. Tinea Capitis is ringworm of the scalp. Red papules or spots at the opening of hair follicles, cause hair to break. Tinea Favosa characterized by dry, sulfur yellow, cup like crusts on the scalp called scutula.

Parasitic infections Scabies a highly contagious skin disease caused by a parasite called a mite that burrows under the skin. Pediculosis capitis is a contagious condition caused by head lice infesting the hair and scalp. Bacterial Infections

What is decontamination ? Explain the three levels of decontamination -Decontamination is the removal of pathogens and other substances from tools and surfaces. The three levels are: • Sterilization, High level, completely destroy every organism on a surface, usually by the use of an Autoclave. • Disinfection, second level does not kill bacterial spores but controls microorganism on hard nonporous surfaces such as cuticle nippers/extracting tools and other salon implements. By the use of an approved disinfectant. Sanitation / Cleaning, third lowest level, reduce the number of pathogens or disease producing organism found on a surface by scrubbing with a brush and washing with soap and water.

What is efficacy and why is it important? -Efficacy, the power to produce an effect, means the effectiveness of a product against bacteria, fungi and viruses. An efficacy standard on a product label tells you which bacteria will be effectively destroyed by the product being used.

List at least six precautions to follow when using disinfectants. 1. Wear gloves and safety glasses 2. Add disinfectant to water, never add water to the disinfectant 3. Keep away from children 4. Use tongs, gloves or draining baskets when removing implements from disinfectants. 5. Dont pour quats, phenols and others like over hands 6. Never place in unmarked container

What are Universal precautions? A set of guidelines and controls, published by the Centers of Diseases Control and Prevention (cdc) that requires the employer and the employee to assume that all human blood and specified human body fluids are infectious for HIV, HBV and other blood borne pathogens. Universal precautions include hand washing, gloving, personal protective equipment, injury prevention, proper handling and disposal of needles, other sharp instruments and products that have been contaminated by blood or other body fluids.

List and describe the functions of the five types of tissue found in the human body. Connective tissue : supports, protects, and binds together other tissues of the body, examples are bone, cartilage, ligament, tendon, fascia which separate muscles and fat or adipose tissue. - Epithelial tissue protective covering on body surface such as the skin, mucous membranes, linings of the heart, digestive and respiratory organs and glands Liquid tissue carries food, waste products and hormones by means of the blood and lymph. - Muscular tissue: Contracts and moves various parts of the body. -Nerve tissue: Carries messages to and from the brain, and controls and coordinates all body functions.

List and describe the functions of the main organs found in the body. Brain: controls the body Eyes: control vision - Heart: circulates the blood -Kidneys: excrete water and waste products Lungs: supply oxygen to the blood - Liver: removes toxic products of digestion - Skin: forms external protective covering of the body - Stomach and Intestines: aid in digestion of food

Name and describe the three types of nerves found in the body. - Sensory nerves: carry impulses or messages from the sense organs to the brain, where sensations such as touch, cold, experienced; called receptors and are located at the surface of the skin. - Motor Nerves: carry impulses from the brain to the muscles

Name and discuss the two types of glands found in the human body. - Exocrine or duct glands: produce a substance that travels through small tube like ducts; include sweat and oil glands of the skin and intestinal glands. - Edocrine or ductless glands: release secretions called hormones directly into the bloodstream, which in turn influence the welfare of the entire body.

What is chemistry? Chemistry is the science of the structure and properties of matter and its changes.

What are atoms? Atoms are the structural units of the elements that make up all matter. An atom is

the smallest particle of an element that retains the properties of that element.

What are elements? Elements are substances that cannot be separated into simpler substances by ordinary chemical means.

What are Physical and Chemical properties of matter? Physical properties are those characteristics that can be determined without a chemical reaction and without a chemical change in the identity of the substance. Physical properties and hardness.

Define pH and the pH scale. pH refers to the relative degree of acidity and alkalinity of a substance. The pH values range from 0 to 14. A pH of 7 indicates a neutral solution, a pH below 7 indicates an acidic solution, and a pH above 7 indicates an alkaline solution.

Describe the two types of electric current. - Direct current: constant, even flow current that travels in one direction only and produces a chemical reaction. (Ex. Flashlights, cameras, remotes) - Alternating current: rapid and interrupted current, flowing first in one direction and then in the opposite direction. (Ex. Hairdryers, refrigerators, curling irons.)

List the four main types of electrical measurements. What do they measure? - Volt : Measures the pressure or force that pushes the flow of electrons forward through a conductor - amp: Measures the strength of an electric current - ohm: Measures the resistance of an electric current - Watt: Measures how much electric energy is being used in one second
