ABC Accounting Solutions

National tax authorities individually determine multinational firms' country-specific tax liabilities by applying one or more sanctioned transfer pricing methodologies. These methodologies are founded on basic assumptions about market structure and firm behavior that are rarely empirically valid. Moreover, for the most part, the transfer pricing methodologies now in vogue were developed before the Internet became a dominant factor in the world economy, and hedge and private equity funds transformed financial and commodities markets. For these reasons, multinational firms are unable to accurately anticipate their tax liabilities in individual countries, and remain at risk of double taxation. Uncertainties in corporate tax liability are extremely costly, both for individual corporations and from an economy-wide perspective. Firms pay exorbitant fees to have tax attorneys, accountants and economists prepare the documentation required by tax authorities to substantiate their intercompany pricing practices

and defend their tax positions on audit. Corporate tax liabilities are also potentially much higher than they would be under a more transparent and predictable transfer pricing regime (due to the potential for double taxation and penalties), and investors' returns are reduced accordingly. The FASB's Interpretation No. 48, Accounting for Uncertainty in Income Taxes (released on July 13, 2006), has motivated multinational firms to increase their reserves substantially (in many cases at the insistence of their auditors), reducing the total funds available for productive investment. 1 The current transfer pricing regimes are embodied in the OECD Guidelines, individual OECD member countries' interpretations thereof, the U. S.

Financial Accounting

This 13th edition introduces learners to general accounting principles and the disclosure requirements of company financial statements. In this comprehensive and up-to-date publication, principles are illustrated through questions and solutions. The learner's understanding of principles is gradually broadened by an increase in the degree of difficulty of the questions that are asked. Self-study is actively encouraged by the inclusion of questions for which the solutions are available to prescribing institutions only. Changes brought about by new accounting standards, issued as a consequence of the South African Institute of Chartered Accountants' Improvement of Accounting Standards Project, have once again been incorporated in this latest edition. "Accounting Standards" is intended to satisfy the specific requirements of learners and to reduce the workload of educators.
