Running The World

'Superb - a great book to fuel your wanderlust.' Mark Beaumont 'The ultimate running book, showcasing the ultimate running adventure.' Sean Conway --- In 2019, Nick Butter became the first person to run a marathon in every country on Earth. This is Nick's story of his world record-breaking adventure and the extraordinary people who joined him along the way. On January 6th 2018, Nick Butter tied his laces and stepped out on to an icy pavement in Toronto, where he began to take the first steps of an epic journey that would see him run 196 marathons in every one of the world's 196 countries. Spending almost two years on the road and relying on the kindness of strangers to keep him moving, Nick's odyssey allowed him to travel slowly, on foot, immersing himself in the diverse cultures and customs of his host nations. Running through capital cities and deserts, around islands and through spectacular landscapes, Nick dodges bullets in Guinea-Bissau, crosses battlefields in Syria, survives a wild dog attack in Tunisia and runs around an erupting volcano in Guatemala. Along the way, he is often joined by local supporters and fellow runners, curious children and bemused passers-by. Telling their stories alongside his own, Nick captures the unique spirit of each place he visits and forges a new relationship with the world around him. Running the World captures Nick's journey as he sets three world records and covers over five thousand miles. As he recounts his adventures, he shares his unique perspective on our glorious planet, celebrates the diversity of human experience, and reflects on the overwhelming power of running.

Run the World

From elite marathoner and Olympic hopeful Becky Wade comes the story of her year-long exploration of diverse global running communities from England to Ethiopia—9 countries, 72 host families, and over 3,500 miles of running—investigating unique cultural approaches to the sport and revealing the secrets to the success of runners all over the world. Fresh off a successful collegiate running career—with multiple NCAA All-American honors and two Olympic Trials qualifying marks to her name—Becky Wade was no stranger to international competition. But after years spent safely sticking to the training methods she knew, Becky was curious about how her counterparts in other countries approached the

sport to which she'd dedicated over half of her life. So in 2012, as a recipient of the Watson Fellowship, she packed four pairs of running shoes, cleared her schedule for the year, and took off on a journey to infiltrate diverse running communities around the world. What she encountered far exceeded her expectations and changed her outlook into the sport she loved. Over the next twelve months—visiting 9 countries with unique and storied running histories, logging over 3,500 miles running over trails, tracks, sidewalks, and dirt roads—Becky explored the varied approaches of runners across the globe. Whether riding shotgun around the streets of London with Olympic champion sprinter Usain Bolt, climbing for an hour at daybreak to the top of Ethiopia's Mount Entoto just to start her daily run, or getting lost jogging through the bustling streets of Tokyo, Becky's unexpected adventures, keen insights, and landscape descriptions take the reader into the heartbeat of distance running around the world. Upon her return to the United States, she incorporated elements of the training styles she'd sampled into her own program, and her competitive career skyrocketed. When she made her marathon debut in 2013, winning the race in a blazing 2:30, she became the third-fastest woman marathoner under the age of 25 in U.S. history, qualifying for the 2016 Olympic Trials and landing a professional sponsorship from Asics. From the feel-based approach to running that she learned from the Kenyans, to the grueling uphill workouts she adopted from the Swiss, to the injury-recovery methods she learned from the Japanese, Becky shares the secrets to success from runners and coaches around the world. The story of one athlete's fascinating journey, *Run the World* is also a call to change the way we approach the world's most natural and inclusive sport.

How to Run the World

Here is a stunning and provocative guide to the future of international relations—a system for managing global problems beyond the stalemates of business versus government, East versus West, rich versus poor, democracy versus authoritarianism, free markets versus state capitalism. Written by the most esteemed and innovative adventurer-scholar of his generation, Parag Khanna's *How to Run the World* posits a chaotic modern era that resembles the Middle Ages, with Asian empires, Western militaries, Middle Eastern sheikhdoms, magnetic city-states, wealthy multinational corporations, elite clans, religious zealots, tribal hordes, and potent media seething in an ever more unpredictable and dangerous storm. But just as that initial “dark age” ended with the Renaissance, Khanna believes that our time can become a great and enlightened age as well—only, though, if we harness our technology and connectedness to forge new networks among governments, businesses, and civic interest groups to tackle the crises of today and avert those of tomorrow. With his trademark energy, intellect, and wit, Khanna reveals how a new “mega-diplomacy” consisting of coalitions among motivated technocrats, influential executives, super-philanthropists, cause-mopolitan activists, and everyday churchgoers can assemble the talent, pool the money, and deploy the resources to make the global economy fairer, rebuild failed states, combat terrorism, promote good governance, deliver food, water, health care, and education to those in need, and prevent environmental collapse. With examples taken from the smartest capital cities, most progressive boardrooms, and frontline NGOs, Khanna shows how mega-diplomacy is more than an ad hoc approach to running a world where no one is in charge—it is the playbook for creating a stable and self-correcting world for future generations. *How to Run the World* is the cutting-edge manifesto for diplomacy in a borderless world.

Who Really Runs the World?

The world is a mess. It's constantly at war, things cost too much, and the average person struggles to survive against powers they can barely see, let alone control. It appears so at odds with common sense, in fact, that it begs a fundamental question: Who runs the world? This book looks at the conspiracies in everyday life, both hidden and not-so-hidden. It examines actual people, businesses, social networks, corporate alliances, and the dark forces of conspiracy and secret history that hold them together. The conclusions reached may shock and scandalize some people—especially those who fervently believe in democracy—but will fascinate everyone.

Who Runs the World?

Welcome to the Matriarchy. Sixty years after a virus has wiped out almost all the men on the planet, things are pretty much just as you would imagine a world run by women might be: war has ended; greed is not tolerated; the ecological needs of the planet are always put first. In two generations, the female population has grieved, pulled together and moved on, and life really is pretty good - if you're a girl. It's not so great if you're a boy, but fourteen-year-old River wouldn't know that. Until she met Mason, she thought they were extinct.

Born to Run

A New York Times bestseller 'A sensation ... a rollicking tale well told' - The Times At the heart of Born to Run lies a mysterious tribe of Mexican Indians, the Tarahumara, who live quietly in canyons and are reputed to be the best distance runners in the world; in 1993, one of them, aged 57, came first in a prestigious 100-mile race wearing a toga and sandals. A small group of the world's top ultra-runners (and the awe-inspiring author) make the treacherous journey into the canyons to try to learn the tribe's secrets and then take them on over a course 50 miles long. With incredible energy and smart observation, McDougall tells this story while asking what the secrets are to being an incredible runner. Travelling to labs at Harvard, Nike, and elsewhere, he comes across an incredible cast of characters, including the woman who recently broke the world record for 100 miles and for her encore ran a 2:50 marathon in a bikini, pausing to down a beer at the 20 mile mark.

Quiet Girls Can Run the World

What does success look like? 5AM conference calls and late nights in the office? Winning every argument in the office and always getting your own way? What does a successful woman look like? The shoulder-pad wearing Alpha? The dogmatist who rules with an iron fist? The reality is far more nuanced. Yet women are still reduced to Alpha boss, or the Beta secretary or assistant but when 47% of the workforce are reduced to two unhelpful stereotypes, how can you embrace your inner Beta and be a success on your own terms? It's an important question because the world is changing, fast. Successful companies need people who can lead with emotional intelligence, be flexible to new ideas and adapt their plans when required, leaving their ego at the door. The Beta woman's time is now. Beta celebrates the collaborators, the pragmatists, and the people who believe that being nice works and getting your own way isn't always the most important thing. It explores the unsung workforce of Beta women who are being great bosses, great leaders and are still living their own lives: having relationships, making time for friends, having families. Fully researched and rich with interviews, anecdotes and case studies, Beta will be a smart and entertaining read that really explores the role of women in the workplace today.

Just a Little Run Around the World

"Heartbroken when she lost her husband to cancer, Rosie set off from Wales with nothing but a small cart of food and equipment, funded by the rent from her little cottage. So began a five-year solo journey that would take Rosie 20,000 miles around the world in memory of the man she loved. Followed by wolves, knocked down by a bus, confronted by bears, chased by a naked man with a gun and stranded with severe frostbite, Rosie's gripping story is a rollercoaster adventure of epic proportions." -- Back cover.

Running the World

Never before in the history of mankind have so few people had so much power over so many. The people at the top of the American national security establishment, the President and his principal advisors, the core team at the helm of the National Security Council, are without question the most powerful committee in the history of the world. Yet, in many respects, they are among the least understood. A former senior official in the Clinton Administration himself, David Rothkopf served with and knows personally many of the NSC's key players of the past twenty-five years. In *Running the World* he pulls back the curtain on this shadowy world to explore its inner workings, its people, their relationships, their contributions and the occasions when they have gone wrong. He traces the group's evolution from the final days of the Second World War to the post-Cold War realities of global terror -- exploring its triumphs, its human dramas and most recently, what many consider to be its breakdown at a time when we needed it most. Drawing on an extraordinary series of insider interviews with policy makers including Condoleezza Rice, Colin Powell, Henry Kissinger, senior officials of the Bush Administration, and over 130 others, the book offers unprecedented insights into what must change if America is to maintain its unprecedented worldwide leadership in the decades ahead.

Finally, runners at all levels can improve their race times while training less, with the revolutionary Furman Institute of Running and Scientific Training (FIRST) program. Hailed by the Wall Street Journal and featured twice in six months in cover stories in *Runner's World* magazine, FIRST's unique training philosophy makes running easier and more accessible, limits overtraining and burnout, and substantially cuts the risk of injury, while producing faster race times. The key feature is the "3 plus 2" program, which each week consists of: -3 quality runs, including track repeats, the tempo run, and the long run, which are designed to work together to improve endurance, lactate-threshold running pace, and leg speed -2 aerobic cross-training workouts, such as swimming, rowing, or pedaling a stationary bike, which are designed to improve endurance while helping to avoid burnout. With detailed training plans for 5K, 10K, half marathon, and marathon, plus tips for goal-setting, rest, recovery, injury rehab and prevention, strength training, and nutrition, this program will change the way runners think about and train for competitive races. Amby Burfoot, *Runner's World* executive editor and Boston Marathon winner, calls the FIRST training program "the most detailed, well-organized, and scientific training program for runners that I have ever seen."

Runner's World Running on Air

From the authors of the bestselling *The Big Shift*, a provocative argument that the global population will soon begin to decline, dramatically reshaping the social, political, and economic landscape. For half a century, statisticians, pundits, and politicians have warned that a burgeoning planetary population will soon overwhelm the earth's resources. But a growing number of experts are sounding a different kind of alarm. Rather than growing exponentially, they argue, the global population is headed for a steep decline. Throughout history, depopulation was the product of catastrophe: ice ages, plagues, the collapse of civilizations. This time, however, we're thinning ourselves deliberately, by choosing to have fewer babies than we need to replace ourselves. In much of the developed and developing world, that decline is already underway, as urbanization, women's empowerment, and waning religiosity lead to smaller and smaller families. In *Empty Planet*, Ibbitson and Bricker travel from South Florida to Sao Paulo, Seoul to Nairobi, Brussels to Delhi to Beijing, drawing on a wealth of research and firsthand reporting to illustrate the dramatic consequences of this population decline--and to show us why the rest of the developing world will soon join in. They find that a smaller global population will bring with it a number of benefits: fewer workers will command higher wages; good jobs will prompt innovation; the environment will improve; the risk of famine will wane; and falling birthrates in the developing world will bring greater affluence and autonomy for women. But enormous disruption lies ahead, too. We can already see the effects in Europe and parts of Asia, as aging populations and worker shortages weaken the economy and impose crippling demands on healthcare and social security. The United States is well-positioned to successfully navigate these coming demographic shifts--that is, unless growing isolationism and anti-immigrant backlash lead us to close ourselves off just as openness becomes more critical to our survival than ever before. Rigorously researched and deeply compelling, *Empty Planet* offers a vision of a future that we can no longer prevent--but one that we can shape, if we choose.

With reports that their marriage was crumbling before the world's eyes on their 2014 joint tour, On The Run, it pieces together the split rumours that plagued them at every turn and documents exactly how they coped with such intense public scrutiny. The book also analyses Beyoncé's role as a mother to young daughter Blue Ivy and explores the hidden heartbreaks of her past, including a tragic miscarriage, a lengthy battle with depression and an agonising rift with her manager father Mathew. While celebrating Beyoncé's greatest triumphs Beyoncé: Running The World uncovers the truth behind the headlines, finding out exactly who 'Queen Bey' is and what really goes on behind the scenes... Contains an extra chapter with the most up-to-date information on the world's biggest star.

Beyoncé: Running the World

"A sparkling, thought-provoking account of sexual differences. Whether you're a man or a woman, you'll find his conclusions gripping."—Jared Diamond There is a human genetic fluke that is surprisingly common, due to a change in a key pair of chromosomes. In the normal condition the two look the same, but in this disorder one is malformed and shrunk beyond recognition. The result is a shortened life span, higher mortality at all ages, an inability to reproduce, premature hair loss, and brain defects variously resulting in attention deficit, hyperactivity, conduct disorder, hypersexuality, and an enormous excess of both outward and self-directed aggression. It is called maleness. Melvin Konner traces the arc of evolution to explain the relationships between women and men. With patience and wit he explores the knotty question of whether men are necessary in the biological destiny of the human race. He draws on multiple, colorful examples from the natural world—such as the mating habits of the octopus, black widow, angler fish, and jacana—and argues that maleness in humans is hardly necessary to the survival of the species. In characteristically humorous and engaging prose, Konner sheds light on our biologically different identities, while noting the poignant exceptions that challenge the male/female divide. We meet hunter-gatherers such as those in Botswana, whose culture gave women a prominent place, invented the working mother, and respected women's voices around the fire. Recent human history has upset this balance, as a dense world of war fostered extreme male dominance. But our species has been recovering over the past two centuries, and an unstoppable move toward equality is afoot. It will not be the end of men, but it will be the end of male supremacy and a better, wiser world for women and men alike.

Women After All: Sex, Evolution, and the End of Male Supremacy

"I have long believed that women who dream big, work hard, and get back up after they get knocked down can do anything; Stephanie Schriock is one of those women. I'm so glad her thoughtful guidance is now available for women everywhere."—Hillary Rodham Clinton "Stephanie Schriock leads the leaders."—Michelle Lujan Grisham, governor of New Mexico "Run to Win is an antidote to anxiety and a welcome call to action. I encourage every woman (and a few good men) to dive into Run to Win and take your turn at saving the world."—Stacey Abrams From the president of EMILY's List, a playbook for women changing the world in politics, business, or any arena, with a foreword from Vice President Elect Kamala Harris. For the past thirty-five years EMILY's List has helped the campaigns of thousands of pro-choice Democratic women, but the hardest part has always been convincing more women to run. Then Donald Trump was elected, and something shifted into place. American women who were furious and frustrated were looking for a way to channel their outrage into action, united in proclaiming, "If that guy can get elected, why not me?" The day after the 2016 election, dozens of women searched out an old sign-up link buried on the EMILY's List website. By Thanksgiving, those dozens had grown to a few thousand. And that was only the beginning. By the end of 2018, there were nearly fifty thousand women signed up to run for office, with scores more signing up each day. Run to Win is for all women who are looking to lead. Organized around the steps that EMILY's List coaches its candidates through (from deciding to run through celebrating victory), this book is full of essential lessons for any woman trying to succeed in a male-dominated field. Their arena is politics but their message is universal. And Stephanie Schriock is the most qualified person to share these lessons. Not only is she a powerful figure in politics but she's also a woman who commands respect for her astounding success as president of EMILY's List and a longtime Democratic operative. Her message is uplifting and actionable, her voice is that of your best girlfriend walking you through what you need to consider as you make your plan, and her experience coaching the biggest female candidates in recent elections (including all of the female 2020 Democratic presidential candidates) makes her the de facto authority on the strategies women can employ to run, fight, and win, whatever their field or goal.

This is not just a book about running. It's a book about cupcakes. It's a book about suffering. It's a book about gluttony, vanity, bliss, electrical storms, ranch dressing, and Godzilla. It's a book about all the terrible and wonderful reasons we wake up each day and propel our bodies through rain, shine, heaven, and hell. From #1 New York Times best-selling author, Matthew Inman, AKA The Oatmeal, comes this hilarious, beautiful, poignant collection of comics and stories about running, eating, and one cartoonist's reasons for jogging across mountains until his toenails fall off. Containing over 70 pages of never-before-seen material, including "A Lazy Cartoonist's Guide to Becoming a Runner" and "The Blerch's Guide to Dieting," this book also comes with Blerch race stickers.

Run to Win

"a provocative new book" — The New York Times AI-centric organizations exhibit a new operating architecture, redefining how they create, capture, share, and deliver value. Now with a new preface that explores how the coronavirus crisis compelled organizations such as Massachusetts General Hospital, Verizon, and IKEA to transform themselves with remarkable speed, Marco Iansiti and Karim R. Lakhani show how reinventing the firm around data, analytics, and AI removes traditional constraints on scale, scope, and learning that have restricted business growth for hundreds of years. From Airbnb to Ant Financial, Microsoft to Amazon, research shows how AI-driven processes are vastly more scalable than traditional processes, allow massive scope increase, enabling companies to straddle industry boundaries, and create powerful opportunities for learning—to drive ever more accurate, complex, and sophisticated predictions. When traditional operating constraints are removed, strategy becomes a whole new game, one whose rules and likely outcomes this book will make clear. Iansiti and Lakhani: Present a framework for rethinking business and operating models Explain how "collisions" between AI-driven/digital and traditional/analog firms are reshaping competition, altering the structure of our economy, and forcing traditional companies to rearchitect their operating models Explain the opportunities and risks created by digital firms Describe the new challenges and responsibilities for the leaders of both digital and traditional firms Packed with examples—including many from the most powerful and innovative global, AI-driven competitors—and based on research in hundreds of firms across many sectors, this is your essential guide for rethinking how your firm competes and operates in the era of AI.

Running Beyond

A devastating examination of how collapsing insect populations worldwide threaten everything from wild birds to the food on our plate. From ants scurrying under leaf litter to bees able to fly higher than Mount Kilimanjaro, insects are everywhere. Three out of every four of our planet's known animal species are insects. In The Insect Crisis, acclaimed journalist Oliver Milman dives into the torrent of recent evidence that suggests this kaleidoscopic group of creatures is suffering the greatest existential crisis in its remarkable 400-million-year history. What is causing the collapse of the insect world? Why does this alarming decline pose such a threat to us? And what can be done to stem the loss of the miniature empires that hold aloft life as we know it? With urgency and great clarity, Milman explores this hidden emergency, arguing that its consequences could even rival climate change. He joins the scientists tracking the decline of insect populations across the globe, including the soaring mountains of Mexico that host an epic, yet dwindling, migration of monarch butterflies; the verdant countryside of England that has been emptied of insect life; the gargantuan fields of U.S. agriculture that have proved a killing ground for bees; and an offbeat experiment in Denmark that shows there aren't that many bugs splattering into your car windshield these days. These losses not only further tear at the tapestry of life on our degraded planet; they imperil everything we hold dear, from the food on our supermarket shelves to the medicines in our cabinets to the riot of nature that thrills and enlivens us. Even insects we may dread, including the hated cockroach, or the stinging wasp, play crucial ecological roles, and their decline would profoundly shape our own story. By connecting butterfly and bee, moth and beetle from across the globe, the full scope of loss renders a portrait of a crisis that threatens to upend the workings of our collective history. Part warning, part celebration of the incredible variety of insects, The Insect Crisis is a wake-up call for us all.

Logan's World

Tyranny, war, corruption, and terrorism follow oil and other natural resources - because of the same law that once allowed the slave trade and genocide, conquest, and apartheid. Political philosopher Leif Wenar shows how the West can lead the world beyond blood oil and conflict minerals to a more united, enlightened future.

The Insect Crisis: The Fall of the Tiny Empires That Run the World

A desperate man attempts to win a reality TV game where the only objective is to stay alive in this #1 national bestseller from Stephen King, writing as Richard Bachman. "Tomorrow at noon, the hunt begins. Remember his face!" Ben Richards is a desperate man. With no job, no money, no way out, and a young daughter in need of proper medical attention, he must turn to the only possibility of striking it rich in this near-future dystopian America: participating in the ultraviolent TV programming of the government-sanctioned Games Network. Ben soon finds himself selected as a contestant on the biggest and the best that the Games Network has to offer: The Running Man, a no-holds-barred thirty-day struggle to stay alive as public enemy number one, relentlessly hunted by an elite strike force bent on killing him as quickly as possible in front of an audience all too eager to see that happen. It means a billion dollars in prize money if he can live for the next month. No one has ever survived longer than eight days. But desperation can push a person do things they never thought possible—and Ben Richards is willing to go the distance in this ultimate game of life and death....
