raise one exponent to another exponent
solving linear equations
write the answer in interval notation
write the answer from 3 to infinity in interval notation
begin by dividing both sides by negative 3
graph linear equations in slope intercept form slope intercept
plot the y-intercept
use the intercept method
begin by finding the x intercept
plot the x and y intercepts
start with the absolute value of x
reflect over the x-axis
shift three units to the right
change the parent function into a quadratic function

solve quadratic equations
set each factor equal to 0
get the answer using the quadratic equation
get these two answers using the quadratic equation
use the quadratic equation
set each factor equal to zero
you can use the quadratic formula
solving systems of equations
use the elimination method
replace x with 1 in the first equation
find the value of x
find the value of f of g
find the points of an inverse function
start with f of g
