India and Nepal

Papers presented at the Seminar on India and Nepal: Aspects of Interdependent Relations organized by the South Asia Studies Centre, University of Rajasthan.

India

India, long known for its huge population, religious conflicts and its status as not-quite best friend ally of the United States has moved from the backwaters of world attention to centre stage. Afghanistan and Pakistan with whom India is in almost conflict, are neighbours. India has developed a nuclear capability which also has a way of grabbing attention. This book discusses current issues and historical background and provides a thorough index important to a better understanding of this diverse country.

The Materiality of Politics: The technologies of rule

Through a series of historical illustrations, the author investigates violence, law, terror, protection, justice and post-colonial governance. His reading of the materiality of politics is disturbingly 'physical'. Unlike the 'philosophical subject' (a purely theoretical construct), the author's 'political subject' is the real product of particular conflicts and circumstances, violence and bloodshed. The universal immediacy of conflict drives home the futility of vague philosophical speculations and generalizations. Instead, it prompts a rigorous study of control and rebellion, statecraft and autonomy, law and lawlessness. History, claims the author, must be studied in a new way.

The Materiality of Politics: Volume 1

'The Materiality of Politics' uses a series of historical illustrations to reveal the physicality and underlying 'materiality' of political processes. Volume 1, subtitled 'The Technologies of Rule' discusses the techniques of modern rule which form the basis of the post-colonial Indian state. Beginning with the rule of law, the volume analyses the nature and manifestations of constitutional rule, the relation between law and terror and the construction of 'extraordinary' sovereign power. The author also investigates the methods of care, protection, segregation and stabilization by which rule proceeds. In the processes, the material core of the 'cultural' and the 'aesthetic' is exposed.

India's Borderland Disputes

Boundaries are manifestations of national identity. They can be trip-wires of war. This is all the more important if the involved parties are nuclear powers. It threatens to inflame long-standing boundary disputes that India has with China, Pakistan, Nepal and Bangladesh. This book attempts to examine all the major aspects of these disputes. Going deep into their historical legacies, it discusses at length their causes, consequences and the ways to how to solve them.

American Book Publishing Record

The report was written by senior scholars of international studies and Indian Ocean studies and focuses on international relations in the Indian Ocean region and covers many aspects of OBOR policy and South Asia. The report includes both a strategic review and major events, as well as related data in this region. This book also includes the origin, the aims, frameworks, the regional and global impact of India's new development under the Modi administration. The book includes the authors from 5 different institutes in China which provide readers with a full and authentic picture of India's most recent development. This year's Annual Report is the fourth of this kind and the only one which covers exclusively the Indian Ocean region in China.

Annual Report on the Development of the Indian Ocean Region (2017)

Study relates to Nepal and South Asian Association for Regional Cooperation.

The Politics of Balanced Interdependence

Of All The Neighbours Of India, The Smallest, The Least Known And Yet The Friendliest Of All, Is Bhutan. This Book Looks At Its History, Economic And Political Developments In A Detailed Manner.

From Dependency to Interdependence

India-Nepal relationship is wrought by the centuries old social-cultural, historical and geographic connections. India has over the years, consistently responded with a sense of urgency to the needs of the people and Government of Nepal in ensuring the success of the peace process and institutionalization of multi-party democracy through the framing of a new Constitution. It was India who first welcomes the restoration of democracy in Nepal. The book discusses various aspects of India Nepal Relationship as it exists and its future course.

India Nepal Relations

Developments in South Asia in the areas of democracy, political economy and security in the last couple of years are intriguing and raise questions about whether the region is on the road to transformation. The years 2013 and 2014, particularly, have been 'years of transition' in South Asia. Almost all South Asia countries have undergone political transitions with cascading effects. These elections are significant for South Asian countries because the region has witnessed political instability for a long period of time. The elections in South Asia generated the hope that the most un-integrated region may become interdependent after coming up of new sets of political heads. These developments in the region have an influence on India's foreign policy and also mould its domestic politics; and vice-versa. India's policy towards individual countries also has a decisive impact on the pace of on-going political transitions in a number of spheres: civil-military relations, foreign policy of individual countries, socio-political and economic dynamics and nature of governance. These transitions reflect the nature, behaviour and response of the transitory states towards the others. India, as an important stakeholder in the region is keenly observing these transitions in its neighbourhood. This book titled: Transitions and Interdependence: India and Its Neighbours is the outcome of serious deliberations among well known scholars, diplomats and policy makers at the Fifth Asian Relations Conference organised by the Indian

Council of World Affairs in collaboration with the Institute of Peace and Conflict Studies in February 2014. Papers presented in the conference have been thoroughly revised before publication and the editors acknowledge with gratitude these insightful contributions.

Global Dimensions of Indo-Nepal Political Relations

This Volume Is A Modernist Study Of India'S International Relations, Which Traverses Pre-Colonial, Colonial And Postcolonial Perspectives. Its Fourteen Chapters Discuss Varied Subjects Related To South Asia'S Regional And International Relations, Like: (I) The Institutionalization Of British Paramountcy In India And Its Effect On The Region'S External Relations, As Well As Indigenous Responses To Colonial Rule (Ii) The Influence Of Domestic Variables Upon India'S International Relations (Iii) The Interspersing Of Ethnic, Economic And Religious Factors In The Making Of The British Indian Empire, And Later, Of The Indian State (Iv) The Paradigms Of Nature, Culture, State-Making On The One Hand, And Political Ecology And Cultural Politics Of Natural Resources On The Other (V) The Changing Character Of Foreign Corporate Involvement In India (Vi) The Development Of Science And Technology In India And The Activities Of The Armed Forces In India (Vii) The Fostering Of Formal Arrangements Such As Saarc Or Safta In South Asia And Informal Challenges To India'S Security From Non-State Actors (Viii) The Economic, Political And Cultural Consequences Of Globalization For India During The Imperial-Colonial Phases (Ix) The Evolution, In Creative Writing, Of A Discourse On The World Outside India And On India'S Relationship With It. This Volume Will Be Of Interest To Scholars And Students Of South Asian Studies, History, Political Science And International Relations, And Defence Studies.

Transitions and Interdependence: India and its Neighbours

India-Nepal Relations are unique for reasons ranging from geographical contiguity to intense cultural bonding. We share extensive institutional and social relationships. Cultural, economic and geographical factors as well as the common bond of a shared religion have had a great influence on bilateral relations. Despite some turbulence, India-Nepal relations have remained close, stable and mutually beneficial. And yet, as two sovereign nations, both India and Nepal are naturally guided by their national interests in cultural, economic and security issues. In this context a comprehensive analysis of the Indo-Nepal relations with their domestic determinants is of immense importance. The objective of this collection of essays is to provide a detailed analysis of the legal complexities that exist between Nepal and India and to analyse the major problems from an international legal perspective. It is hoped that this volume will fill the significant gap that exists in the literature on this subject, which is devoted more to political and economic issues than to legal ones. There is virtually no work which thoroughly examines the major international legal issues relating to Indo-Nepal relations.

Aspects of India's International Relations, 1700 to 2000

With special attention to linguistic and literary configuration.

China-Nepal-India Triangle

The other areas of Indo-Nepal relations covered in the book include trade and Indian participation in Nepal's development projects. The study concludes with a survey of the historic change in Nepal from the King-dominated Panchayat systems to multiparty democracy under constitutional monarchy. The author finds prospects of Indo-Nepal cooperation promising as a result of recent changes within Nepal and also at the global and regional levels.

Directory of Published Proceedings

Each year, this annual gives readers an in-depth and up-to-date account of India's external and internal threats in a deteriorating global security environment. It shows that while partnerships with some countries have strengthened, anxieties persist with others such as China and Pakistan. Similarly, India has not been able to cope with the challenges of internal security emerging from violence in Kashmir, insurgency in the northeast, to mention a few. A unique series with contributions from academics, political commentators and military personnel.

Annual Report

Contributed articles presented earlier in a seminar.

Political Relations Between India and Nepal, 1877-1923

Nepal's democracy struggle has been continuing for more than six decades. Since it could not sustain a stable democratic framework even after several attempts in the past, many scholars are stating that Nepal is in permanent transition. Once again, however, it has bagged enormous success in the field of political transformation in 2006 through a highly successful but peacefully organised movement with participation of people from all fields in large numbers. But it could not deconstruct the position of the transition as it has failed to institutionalise the recently gained achievements by making a new constitution even after five years. The only positive thing is that Nepali people, along with various political parties, are still trying hard to resolve vital conflicting issues through dialogue, and come up with a new democratic constitution, though they have already missed three deadlines.

Indian Books in Print

Human existence is believed to be incomplete without the enrichment of culture. Some individuals wholeheartedly immerse themselves in their cultural surroundings, while others observe from a distance. The ancient Kirat civilization of Nepal predates any religious texts we have. Unfortunately, their profound cultural wisdom has primarily faded, leading to a disheartening void in our understanding of ancient knowledge. The plight of the indigenous communities in the land nurtured by their toil and sacrifice is a cause for concern. Neglecting the valuable contributions of these indigenous communities in the name of progress leaves us incomplete. Through a thorough anthropological study of the Kirat Limbu community, we've arrived at factual and logical conclusions regarding the questions they've raised. This writer endeavors to share this information, driven purely by academic value and recognition. Recognizing his responsibility, this writer, in the later stages of life, has felt a sense of urgency in preserving the positivity of research. The book is published to document synthesized knowledge based on trustworthy information and data, thereby sharing it with readers. This book is expected to be a valuable resource for those seeking to understand the true essence of Nepali soil, to explore the rich Kirat civilization, its culture, and the intricate tapestry of ethnic issues—best of luck on this enlightening journey.

Indo-Nepal Relations

British India's Relations with the Kingdom of Nepal (1970) uses original documents and confidential papers never before available to examine the relations between Nepal and British India from 1857 to 1947. It shows that Nepal's policies were based on self-interest and was a nation largely independent of British control.

India and Nepal

This edited book is an outcome of the proceedings of the International Conference 'India-Sri Lanka Relations: Strengthening SAARC', organized by Centre for Indian Ocean Studies, Osmania University, Hyderabad, India in November 2012. It deals with different aspects of India-Sri Lanka Economic, Social, Political, Ethnic and Cultural relations, dating back to pre-colonial times, to the 1990s with liberalization of Indian economy. In the post 1990 period, consistent efforts have been made by India and Sri Lanka on a Comprehensive Economic Partnership Agreement which would built on the success of the Free Trade Agreement (FTA).

Indo-Nepalese Relations

This book is an open access book. Many scholars have wondered if a non-Western theory of international politics founded on different premises, be it from Asia or from the "Global South," could release international relations from the grip of a Western, "Westphalian" model. This book argues that a Buddhist approach to international relations could provide a genuine alternative. Because of its distinctive philosophical positions and its unique understanding of reality, human nature and political behavior, a Buddhist theory of IR offers a way out of this dilemma, a means for transcending the Westphalian predicament. The author explains this Buddhist IR model, beginning with its philosophical foundations up through its ideas about politics, economics and statecraft.

India and Nepal

Study of the diplomatic relations between India and Nepal.

Nepal-India Open Border

For India, maintaining friendly relations with its neighbours and projecting its foreign policy interests to the global community has been of primary importance. Over the years, India has reached out not only to its South Asian neighbours but also to countries in East Asia, West Asia, Central Asia, Indian Ocean, Europe, Africa, Latin America, the Caribbean and Oceania. The country has also reinforced its good relations with the US, China, Japan, Russia, the EU and Canada through high-level visits, political interactions, economic engagements and strategic partnerships. The primary objective is to maintain peace and harmony and promote India's economic and other interests, while, at the same time, playing an increasingly important role in the international order. The book addresses the mix of challenges and opportunities that the country has faced and looks into different facets of political, economic and cultural diplomacy at the bilateral and multilateral levels. This work reflects India's policy priorities from both the perspectives of a distinguished former diplomat and an erudite scholar.

South Asian Journal of Socio-political Studies

This book presents a series of essays by I. William Zartman outlining the evolution of the key concepts required for the study of negotiation and conflict management, such as formula, ripeness, pre-negotiation, mediation, power, process, intractability, escalation, and order. Responding to a lack of useful conceptualization for the analysis of international negotiation, Zartman has developed an analytical framework and specific concepts that can serve as a basis for both study and practice. Negotiation is analyzed as a process, and is linked to other major themes in political science such as decision, structure, justice and order. This analysis is then applied to negotiations to manage particular types of conflicts and cooperation, including ethnic conflicts, civil wars and regime-building. It also develops typologies and strategies of mediation, dealing with such aspects as leverage, bias, interest, and roles. Written by the leading exponent of negotiation and mediation, Negotiation and Conflict Management will be of great interest to all students of negotiation, mediation and conflict studies in general.

Economic and Political Weekly

This handbook offers a comprehensive overview of the international relations of South Asia. South Asia as a region is increasingly assuming greater significance in global politics for a host of compelling reasons. This volume offers the most comprehensive collection of perspectives on the international politics of South Asia, and it covers an extensive range of issues spanning from inter-state wars to migration in the region. Each contribution provides a careful discussion of the four major theoretical approaches to the study of international politics: Realism, Constructivism, Liberalism, and Critical Theory. In turn, the chapters discuss the relevance of each approach to the issue area addressed in the book. The volume offers coverage of the key issues under four thematic sections: - Theoretical Approaches to the Study of the International Relations of South Asia - Traditional and Emerging Security Issues in South Asia - The International Relations of South Asia - Cross-cutting Regional Issues Further, every effort has been made in the chapters to discuss the origins, evolution and future direction of each issue. This book will be of much interest to students of South Asian politics, human security, regional security, and International Relations in general.
