Academic Writing in Context

The definitive research paper guide, Writing Research Papers combines a traditional and practical approach to the research process with the latest information on electronic research and presentation. This market-leading text provides students with step-by-step guidance through the research writing process, from selecting and narrowing a topic to formatting the finished document. Writing Research Papers backs up its instruction with the most complete array of samples of any writing guide of this nature. The text continues its extremely thorough and accurate coverage of citation styles for a wide variety of disciplines. The fourteenth edition maintains Lester's successful approach while bringing new writing and documentation updates to assist the student researcher in keeping pace with electronic sources.

Turning Learning Into Action

"Learning transfer is the missing link in training. Using conventional approaches to training, an average of just 10-20% of learning makes it back into the workplace and contributes to better business outcomes. With the current increased emphasis on efficiency and cost-effectiveness, such a dismal record is no longer acceptable. To improve these statistics and to make training truly valuable we must recognise that successful learning is not just about good content and well executed programmes but about finding ways to facilitate genuine behavioural change and accountability back in the workplace. This book provides the necessary tools to enable trainers, buyers of training and L & D professionals to do just this. It presents the new, proven TLA methodology, which acknowledges the important role of ADDIE in the instructional design process but takes learning a step further. TLA focuses on the fact that to generate significant behavioural change, consistent, systematic follow-up after the training event is critical"--

Transfer Of Training

Author is an alumna of Evanston Township High School, class of 1944.

Improving Learning Transfer in Organizations

Improving Learning Transfer in Organizations features contributions from leading experts in the field learning transfer, and offers the most current information, ideas, and theories on the topic and aptly illustrates how to put transfer systems into action. In this book, the authors move beyond explanation to intervention by contributing their most recent thinking on how best to intervene in organizational contexts to influence the transfer of learning. Written for chief learning officers, training and development practitioners, management development professionals, and human resource management practitioners, this important volume shows how to create systems that ensure employees are getting and retaining the information, skills, and knowledge necessary to accomplish tasks on the job. Improving Learning Transfer in Organizations addresses learning transfer on both the individual and organizational level. This volume shows how to diagnose learning transfer systems, create a transfer-ready profile, and assess and place employees to maximize transfer. The book includes information on how to determine what process should be followed to design an organization-specific learning transfer system intervention. The authors focus on the actual learning process and show how to use front-end analysis to avoid transfer problems. In addition, they outline the issues associated with such popular work-based learning initiatives as action learning and communities of practice, and they also present applications on learning transfer within e-learning and team training contexts.

Understanding Action Learning

As much as adult learners can absorb in a classroom, they learn and retain a lot more on the job. Action Learning, or AL, can be based on any of several different schools of thought, and there is much debate as to which is ideal. The authors advocate tailoring the best attributes of each approach to the specific purpose and the learning environment. Drawing on theory from Self-Directed Learning, Learning from Experience, and Transformative Learning, Understanding Action Learning enables the reader to make an informed decision about which approach or combination to use in his or her organization, and provides: * a theoretical model that explains the different approaches to AL, and a framework for identifying which approach to use * a focus on co-design in creating Action Learning programs * practical tools, assessments, and exercises * illuminating stories and case studies from the field Combining top-shelf research with real-world experience, Understanding Action Learning is a crucial resource for adult educators everywhere.

Transferring Learning to the Workplace

Training is ineffective any time employees cannot transfer what they've learned to their jobs. Transferring Learning to the Workplace features HRD professionals providing transferrable training with remarkable results! Case studies include examples of: Troubleshooting coaching skills Career development leading to eligibility for promotion Developing communication and problem-solving skills Organization-wide culture change...and more! Case studies fall within the public and private sector -- everywhere from the Central Intelligence Agency to Honda of America.

ROI at Work

Interest in measuring the return-on-investment (ROI) of performance improvement interventions has grown exponentially since the 1994 publication of ASTD's In Action: Measuring Return on Investment, Volume 1. The success of that book prompted the release of two more ROI in Action volumes in 1997 and 2001, which greatly contributed to a growing body of knowledge on the subject. ROI at Work builds on the foundation of those well-received volumes and introduces even more examples of ROI application in the government sector as well as a variety of industries, including the telecommunications, financial services, technology, and automotive industries. Training, human resources development (HRD), human resources, and performance improvement professionals will learn valuable lessons from these detailed real-world case studies as they work to contribute to the strategic goals of their organizations. College instructors and students also will find value in this book as a supplement to standard HRD textbooks. Researchers and consultants will find that this book provides solid evidence of the validity of ROI measurement and evaluation practices.

The Missing Link in Learning: Transfer

Providing training is only half the job—talent development professionals also need to make a real difference in the workplace. They can do this by facilitating the leap to effective learning transfer. In “The Missing Link in Learning: Transfer,” Emma Weber details: · the learning transfer challenges facing

businesses around the world · the best learning transfer solutions · ways businesses can make learning transfer happen.

The Virtual University

"This book examines the growing potential of interactive training and learning materials at the workplace. It looks at how in-company internet and intranet infrastructures can enable staff training and management development on a world-wide scale."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. HRD Trends Worldwide

Meet the demands of a competitive worldwide competitive economy. Discover the relevance of these 16 global HRD trends to your organization: * Strategy and training * Needs assessment and analysis * Performance improvement * Corporate universities * Training and delivery * Shared responsibilities * Systematic evaluation * Measuring the return on investment (ROI) * Training costs * Profit centers * Budgeting * Learning objectives * Management partnerships * Technology * Global training programs * Outsourcing Jack Phillips noticed something while consulting for organizations all over the world. He discovered that training and development departments - even though they are in different countries - experience many of the same issues and challenges. He recognized and then researched, sixteen critical global HRD trends. These sixteen noteworthy trends were formulated by surveying thirty-five organizations in various industrialized countries, as well as actually working with training and development departments across the globe. This firsthand global HRD experience verified and brought to life the trends. As a result of the author's investigation, 'HRD Trends Worldwide' outlines each HRD trend and helps you thoroughly understand them all and, more importantly, put them to good use. This text presents the survey results and explains each trend through examples and evidence. To help you work with the trends, the text provides an examination of each trend's potential impact on your training and performance improvement functions. Every HRD and training and development professional interested in meeting the demands of a competitive worldwide economy should make reading this book a priority.

Improving Learning Transfer

In today's constantly changing business environment, capable people are crucial to an organization's success, and developing their capabilities through training, learning and development initiatives is a major investment. While measuring the return on that investment is important, attempts to do so are much less valuable if they are not accompanied by a clear understanding of all of the factors that can affect the application of new skills and knowledge on the job - in other words, a clear understanding of what affects learning transfer. So, if organisations are to remain competitive, and develop the highly skilled people that will contribute to their future performance, improving learning transfer should be a priority. Cyril Kirwan's book addresses this critical issue at a number of levels. Firstly, it explores what learning transfer actually is (it's about application of learning back at work, as well as maintenance of that learning over time). Secondly, it describes the main factors that affect transfer, in terms of trainee characteristics, training design factors, and work environment characteristics. It also examines how those factors exert their effect, which ones are more important, how they interact with one another, and in doing so constructs a practical learning transfer model for practitioners. The book also describes in some detail what the various factors working for or against learning transfer look like in practice. Finally, using case studies, it points the way towards what can be done before, during and after training to improve the rate of transfer. This highly practical book will help trainers, development specialists and line managers ensure that their training is about real outcomes and not just inputs.

Implementing On-the-Job Learning (In Action Case Study Series)

Do You Want to Make Better Use of Your Organizational Resources and Create More Relevant, More Effective Training? The emergence of the knowledge economy has brought new challenges to most organizations. To succeed, organizations have to respond quickly to this continuum of change. Off-the-job training requires a sizeable investment in organizational resources with sometimes questionable outcomes. This book, *Implementing On-the-Job Learning*, will illustrate how other companies have used and implemented a particular approach to facilitating employee learning in organizations—structured on-the-job learning. Structured on-the-job learning programs have the potential to make better use of your organization's resources and create training that is more relevant and effective. This casebook should interest anyone involved in human resource development, especially those who make decisions regarding the design and delivery of training programs. The primary audience is practitioners who want to implement on-the-job training programs but have been frustrated in their attempts to find solid, real-life examples. Instructors, students in university and seminar settings, and researchers will also find this book to be a useful reference. Another audience is organization managers who want to make sure that trainers are adequately informed about potential training options. No matter how you plan to use this book, you will find it a valuable tool as you decide how to best meet the training, development, and performance goals of your organization. ASTD is proud to present the 27th book in the *IN ACTION* Series offering 13 case studies from a variety of organizations. The case study authors are diligently pursuing accountability in their areas of expertise. Through their writing, they share experiences at the forefront of applying leading-edge principles of on-the-job learning.

Learning in the Workplace (Routledge Revivals)

The nature of the workplace and the workforce has changed rapidly in post-industrial society. Most workers are now facing the need for high levels of preparatory education, retraining for new jobs and the ability to continue learning at work in order to keep up with new developments. The book, first published in 1987, argues that training in the workplace often fails because it is based on conditions that no longer prevail in modern organisations. The mechanistic approach of the behaviourist paradigm, it is argued, views the organisation as a machine and training as the preparation of workers for machine-like work according to their levels in the hierarchy, much as on an assembly line. The humanists' advocacy of collaborative learning has changed but not fundamentally altered this conception. This book will be of interest to students of education and business management.

The Transfer of Learning

The book addresses a crucial issue for all involved in education and training: the transfer of learning to new and different contexts. Educators, employers and learners face the problem of ensuring that what is learnt in the classroom is able to be adapted and used in the workplace. It focuses on adult learners in professional and vocational contexts. The authors provide an accessible book on the transfer of

learning which draws on multi-disciplinary perspectives from education, psychology and management. The Transfer of Learning will be useful both for postgraduate students and for practitioners wanting to deepen their understanding of transfer and for those interested in practical applications. It combines theory and practice from international research and the authors' own case studies of transfer involving learners engaged in professional development and study towards qualifications. Theories of adult learning, change and lifelong learning are discussed in relation to the transfer of learning. The purpose of this book is to emphasise to tertiary educators and trainers the importance of transfer and in doing so highlight the participants' voices as central foci in coming to an understanding of the process. By doing this it balances the literature which has to date emphasized transfer from a trainer's and/or organization's perspective. There has been little if any substantive material on tertiary transfer issues and yet demands are increasing for tertiary education providers to be more accountable and more focused on developing students' ability to use their learning in everyday work situations. The book is unique in that it adopts a phenomenological perspective and underscores the significance of the participants' voices in understanding issues.

The Six Disciplines of Breakthrough Learning

Get real results for your business – maximize your training and development programs Corporate learning and development programs play an undeniable role in successful business endeavors, but only when they're done right. The significant revisions in the third edition of The Six Disciplines of Breakthrough Learning add fresh, timely elements to a resource that has become known globally as a trusted guide for professionals determined to get the most of their companies' training and development programs. All-new examples, tools, guides, and insights combine to make an excellent, all-in-one resource for everyone from workplace professionals and HR managers to training development providers and businesses leaders looking to maximize the return on their enterprise's learning budget. Infused with current research and recent case studies, this resource serves as a practical guide that recommends concrete actions for producing tangible results. Tools, guides, and checklists in every chapter ensure that readers walk away with meaningful strategies that can be implemented right away. The book includes: A complete review of research drawn from thousands of insights, goals, and lessons learned Specific strategies and actions that can be put into effect quickly for immediate results A focus on ROI for business leaders wanting to make a clearer connection between dollars spent and new skills gained Checklists in each chapter to help learning organizations perform quality audits of new and existing learning programs The third edition of The Six Disciplines of Breakthrough Learning contains so many new resources and so much thoroughly-revised content that even those who own previous editions will find its reinvigorated approach highly beneficial. Strengthen the link between your learning efforts and your business goals with this increasingly popular, globally recognized resource.

Action Learning

Much has been written about the challenges of managing change in organisations and the importance of keeping people motivated and positive throughout the process. This practical guide shows how action learning can help change to 'stick'.

Linking Learning and Performance

This book provides a step-by-step approach for developing learning and performance measures and a method for analyzing and reporting results. The easy to use format serves as a quick reference—featuring the necessary checklists to evaluate the situation and tools for immediate application in a number of organizational settings—sales, leadership, and technical. It will prove an invaluable resource for anyone involved in training, HRD, human resource measurement and evaluation, and performance improvement.

The Learning Potential of the Workplace

In our research programme “The Learning Potential of the Workplace” we set the task to analyse, describe and explain the conditions of the workplace as a tool for learning. Learning potential is for some experts an individual asset, others see the learning potential in the external conditions in work and work processes; again others see it in the reflection on action by peers, colleagues and experts.

The Leadership Scorecard

Strong leaders are essential to business success, which makes leadership development a business imperative in today's competitive environment. Leaders are needed that can do more than manage - leaders are needed that can make a business great. In addition, there is increasing pressure on organizations to demonstrate the wise investment of development dollars. This requires the effective use of leadership development methods, as well as the ability to demonstrate the success of those methods. The Leadership Scorecard combines an explanation and discussion on best practice leadership development methods and incorporates ROI measurement & evaluation methodology.

How to Get Your School Moving and Improving

How to Get Your School Moving and Improving is a must-read for education professionals at any stage of their career seeking to improve school performance through teaching and learning.

Emerging Perspectives of Workplace Learning

Comprising 15 chapters the book offers perspectives from Finland, Germany, New Zealand and Australia and across a range of occupations and places of work. Individually and collectively these chapters make important contributions to learning about the self and agency at work and about learning work tasks.

Beyond Transfer of Training

Did you know that an average of only 10%-20% of training resulted in changing or enhancing an employee's performance on the job. So, why train? Picking up where her first book, the landmark Transfer of Training, left off (and retaining some of the most salient sections and strategies), this completely updated take on the topic shows trainers and performance professionals how to: Gain and maintain effective performance in complex systems. Find and engage clients and stakeholders in transfer of learning efforts. Support transfer of learning in E-environments. Evaluate the success transfer of learning interventions. Order your copy of this essential guide today!

Transfer of Learning Pocketbook

Transfer of learning is the application, back at work, of knowledge, skills and attitudes obtained in learning situations. The amount of learning that is transferred back to the workplace after a training event is the key measure of the success of that training. There is, after all, no point carrying out the training if nothing changes as a result of it. But the transfer doesn't only depend on how good the training is. A number of key factors have to be in place. In the Transfer of Learning Pocketbook, authors Dr Paul Donovan and John Townsend identify 17 factors that determine whether or not new learning will be transferred and used to improve job performance. After extensive research within the HR community, the factors were identified and then prioritised according to their impact on return on training investment. The book sets out each of the 17 factors in turn before giving the reader 70 specific action tips, grouped into five sections that follow the five stages of the training process. Donovan and Townsend have collaborated on several other Pocketbooks, including the highly-regarded Training Evaluation and Training Needs Analysis.

Know-How

Turn Your Know-How Into Someone Else's Know-How-To Everyone—whether subject matter experts, proficient performers, managers, coaches, or co-workers—will need to transfer knowledge to others at some point in their life. And, often, that responsibility falls to an occasional trainer, someone with considerable knowledge and experience on how to perform a task, but little expertise to successfully transfer their know-how to another. What they need is a great resource to round out their repertoire of training skills. Enter Know-How. This easy-to-read book lays out a simple-to-follow path to help the trainers and occasional trainers with whom you work improve their impact. Adding to the sustained influence of their previous books, especially Telling Ain't Training, Harold and Erica have written a fun, effective guide on how to make your know-how stick to another's brain. The 12 chapters each focus on a single theme and are sequenced like stepping-stones to help you understand how to best transfer know-how to those who learn from you. Chapters include brief explanations, guidance, tools, activities, tangible and accessible examples of real-world applications, and a summary exercise to reinforce your retention of key points. Discover what you need now to quickly get people learning and up-to-speed. No fumbling, bumblng, rambling, or messing with people's heads—this book delivers know-how.

Building Learning Experiences in a Changing World

Advances in Business Education & Training is a Book Series to foster advancement in the field of Business Education and Training. It serves as an international forum for scholarly and state-of-the-art research and development into all aspects of Business Education and Training. This new volume deals with several aspects of the challenge to design learning in and for a changing world. The first part concerns program development. How to build curricula that are future-proof? Principles to innovate our curricula are identified. It answers the question how we can incorporate the need for change in our thinking about curriculum-development and identify the necessary elements to incorporate in our curricula. The second part focuses on the increasing diversity of students and employees within our schools and organizations, in terms of culture, language, and perception of ability, gifts, and talents. This offers a range of opportunities, but at the same time can possibly jeopardize some processes that are taken for granted. Chapters in this part analyze the processes that play a crucial role in dealing with this diversity and identify educational practices that can help to harvest the potential that lies within this diversity. The third part of this book digs further into the possibilities that are opened up by the implementation of ICT-support in our learning environments. E-learning provides tools to adapt these environments to the needs of an increasingly diverse student-population. In the last part we focus specifically on the workplace and how learning can be designed in such a way that employees are equipped for a shifting workplace. On the one hand it is looked how training can affect performance in the workplace. Does learning transfer to the work environment? On the other hand it is questioned how one can design affordances to trigger learning in the workplace.

Training for a Smart Workforce

A fresh, challenging, international perspective on the issues involved in building a smart workforce. Written by leading analysts and practitioners from Australia, New Zealand, Sweden and the USA, issues of competence and expertise are considered.

Informal and Incidental Learning in the Workplace (Routledge Revivals)

Today, rapid change is a constant challenge in the workplace, and thousands of individuals need to be involved in continuous learning. Traditional training approaches, however, do not emphasise informal and incidental learning. Furthermore, since informal learning is seldom designed, learning outside of a structured experience may lead to mistaken or dysfunctional learning. Strategies for improving informal learning are urgently needed. This book, first published in 1990, responds to this need by taking a challenging look at many assumptions about workplace learning outside of the classroom and by proposing methods to improve it. They develop a theory of informal and incidental workplace learning based on current developments in training and human resource development which they illustrate with readable and illuminating case studies which tell vivid stories of adult education and human resource development practice. Informal and Incidental Learning in the Workplace is essential reading for researchers and practitioners of human resource development, and also for students of education and adult learning.

Work-Related Learning

Work-related learning (WRL) is a topic of steadily increasing interest to today's vocational education institutions as well as organizations in business and industry. This book derives from an international HRD conference held at the University of Twente, The Netherlands. Key papers from the conference have been combined with other high-standard contributions. Together they offer an international collection of leading edge research. The book brings together contributors from various parts of the EU and the USA and includes examples of good practice and recent research on work-related learning. Work-related learning can be broadly seen to be concerned with all forms of education and training closely related to the daily work of (new) employees, and is increasingly playing a central role in the lives of individuals, groups or teams and the agenda's of organizations. However, as this area of study becomes more prominent, debates have opened about the nature of the field, as well as about its configurations and effects. For example, some authors have a broad definition of WRL and define it as learning for work, at work and through work, ranging from formal, through semi-structured to informal learning. Others prefer to use the concept of WRL mainly in connection to informal, incidental learning processes during work, leading to competent workplace learners. Formal and informal learning are distinguished from each other with respect to the level of intention (implicit/non-intentional/incidental versus deliberative/intentional/structured). Another point of discussion originates from the different 'theoretical backgrounds' of the authors: the 'learning theorists' versus the 'organizational theorists'.

The first group is mainly interested in the question of how learning comes about; the second group is predominantly interested in the search for factors affecting learning. This book is essential reading for practitioners, researchers, teachers and students in the HRM and HRD field as well as in the field of VET.

Safety Training That Transfers

The best learning transfer happens when participants have fun! Stop wasting time, money, energy, and resources on lecture-based safety trainings that have been proven ineffective. Set participants up for success with action-based safety training activities that will prevent injuries and incidents. Safety Training That Transfers offers more than 50 activities dedicated to different aspects of workplace safety. Each activity includes an overview, step-by-step instructions, and debriefing questions that reinforce each lesson. The activities are so memorable that participants will be talking about them long after the formal training is complete. Activities range from a newspaper race to a safety scavenger hunt. And your employees will be excited to see what comes next. They increase knowledge, build coworker relationships, and boost morale. All incorporate adult learning theory and principles of knowledge retention.

Current Practices in Workplace and Organizational Learning

The central assumption that guides this book is that research and practice about learning at the workplace has recently lost its critical edge. This book explores what has happened to workplace learning and organizational learning and studies what has replaced it. In addition, the book discusses to what extent there are reasons to revitalize it. Today, themes such as 'innovation', 'co-creation' and 'knowledge sharing' seem to have become preferred and referred to as theoretical fields as well as fields of practice. In several chapters of this book it is argued that the critical power of learning could be regained by starting a new discussion of how these new fields of practice can be substantiated by topics such as learning arrangements, learning mechanisms, and learning strategies. Hence, the aim of this book is to both advance and recapture our knowledge of learning in today's increasingly complex world of work and organizing. The contributions in this work do so by revisiting classic research on workplace and organizational learning and discussing how insights from this body of literature evokes new meaning. It sets the stage for new agendas and rethinks current practices that are entangled in activities such as innovation, co-creation, knowledge sharing or other currently widespread fields of practice.

Return on Investment in Training and Performance Improvement Programs

The second edition of this bestselling book, 'Return on Investment in Training and Performance Improvement Programs,' guides you through a proven, results-based approach to calculating the Return on Investment in training and performance improvement programs. Jack Phillips has composed user-friendly ROI calculations, plus: *ten post-program data collection methods *ten strategies for determining the amount of improvement that is directly linked to training programs *ten techniques for converting both hard and soft data to monetary values 'Return on Investment in Training and Performance Improvement Programs, Second Edition' continues as a primary reference for learning how to utilize ROI to show the contribution of training, education, learning systems, performance improvement, and change initiatives throughout organizations. The book also details implementation issues, provides worksheets, and pinpoints non-monetary program benefits. A case study takes the reader through the ROI process step-by-step.

Customer Service Intelligence

Customer Service Intelligence uses a wide range of management and educational theories to provide different approaches that can be incorporated as part of the customer service trainer's toolkit. Concepts such as: • emotional intelligence • behaviour modification • role modelling • dimensions of procedure and conviviality • expectancy theory • socio-cultural concepts of (service) community • customer service as dynamic 'object' in activity theory • Zen mindfulness all form the basis of training design in different contexts. Some trainers are dealing with new employees in fast food environments, others are retraining engineers in customer service provision as part of a strategic marketing initiative. This book enables the trainer to review the context for training and select the most appropriate approach to take. The training design is thus carefully thought through for maximum impact on the audience. Professionalism

in customer service training is essential for the growth of many industries. This complex and challenging task is assisted by these perspectives, recommendations and case studies.

Learning and Development for Managers

This text describes, analyses and synthesises a wide range of contemporary issues from research and practice in the field of individual and collective workplace learning and development. Enables students and managers of learning and development (L&D) to understand the theory and practice of L&D in organizations. Explores the concept of learning from a variety of perspectives through the use of examples of research and practice from all over the world. Takes a broad view of learning as encompassing both explicit and implicit and individual and collective learning processes. Argues that the practice of L&D should be based upon a rigorous theoretical and empirical base. Each chapter uses synopses of research studies and case studies from businesses to illustrate the most important theories, concepts and models. Lists of key concepts, knowledge outcomes, 'perspectives from practice', 'perspectives from research', discussion points (for individual or class use), and concept checklists to benefit both students and teachers. Is illustrated throughout with diagrams, tables and 'L&D facts and figures'.

Evaluating Training

This second edition of Peter Bramely's popular and practical book shows you how to build evaluation into every stage of the training process from design to delivery. New material covers linking training to employee effectiveness and performing cost-benefit analysis. An entirely new chapter shows you how to collate and present your findings in order to change what needs changing and raise awareness of the value your training is delivering to the organisation.

ATD's Action Guide to Talent Development

Get Started Now. Take Action. Staying ahead of change in the world, your organization, and your profession requires action. You learned a lot to launch your organization's talent development effort. As you position it for the future, what you need to know grows exponentially. As futurist Ray Kurzweil once said, "If I take 30 steps linearly, I get to 30. If I take 30 steps exponentially, I get to a billion." How do you prepare for exponential growth? In ATD's Action Guide to Talent Development: A Practical Approach to Building Organizational Success, industry expert and bestselling author Elaine Biech lays out the steps you can take. The companion volume to ATD's Foundations of Talent Development: Launching, Leveraging, and Leading Your Organization's TD Effort, this book follows an eight-step framework for defining your organization's learning foundation through preparing for the future. You are your organization's trusted advisor, and Biech offers practical questions, organizational assessments, and tips for each step you must guide your organization through. She also presents the newest thinking from university educators and researchers that organizational experts have relied on for years, as well as from industry practitioners and luminaries in leadership and development. Open this book to any page. Jump in where you think it will be most beneficial to you or your organization. Whether you work inside a company or as an external consultant, whether you work for a large organization or a small one, whether you are launching your first talent development effort or fine-tuning a function that's been in action for decades—you are sure to find valuable concepts, designs, and ideas. Get started now. Take action.

Accelerating Leadership Development

Proven strategies and innovative solutions for developing and retaining successful leaders Many organizations today are facing a crisis of leadership. As the Baby Boomer generation exits the workforce, companies are struggling to find qualified leaders to fill critical roles. Accelerating Leadership Development offers solutions for leadership development, management, and retention from award-winning development firm Global Knowledge. Accelerating Leadership Development provides a proven model to help companies develop high-potential employees with the competencies and knowledge capital to assume critical roles successfully. It includes practical and rigorous tools that enable organizations to identify targets and predict those targets' success with six measurable factors. With this proven development system, companies can develop a pipeline of ready leaders with high levels of engagement and retention. Features actionable, effective principles and strategies for leadership development using a results-oriented framework Chapters address communication and delegation strategies, effective feedback models, shifting of responsibility and accountability to direct

reports, and contemporary coaching and development approaches Based on in-depth research and client interactions from one of the most prominent names in workforce development For any business that experiences a leadership failure or a lack of qualified leaders for vital positions, the consequences can be devastating. This practical and effective guide to leadership development offers real solutions for long-term excellence.

Learning Through the Workplace

Practical information on continuous learning in the workplace is supplied in this new text. Readers are given practical advice on such topics as portfolio building, skills building and appraisals.

Designing and Delivering Training

David Simmonds' book focuses on the blend between theory and practice. It will not be (merely) a "how-to" set of checklists for operational practitioners, nor (just) an academic review of the literature for strategic managers. Instead, each chapter will specifically combine the relevant thinking with appropriate real-life evidence, through the use of pedagogical features.

Capable Workplace Learning

Capable Workplace Learning is about Capable people, Capable Organisations and an underlying belief in the applicability of the concept of Capability to Work, Place and Learning. In this book, Cairns and Stephenson present a case for the development of human Capability, in life, in work, and in the lifespace. They trace the development of the Capability concept arguing that it embraces and goes beyond competence. They draw on over 35 years of experience of direct involvement in enhancing adult Capability through education at all levels.

Blended Learning

This essential guide should be on the desk of any library and information professional, records manager, archivist or knowledge manager involved in planning and introducing an ERM system, whether in a public or private sector organization. Information professionals currently face the challenge of providing end-user education and staff training to very large and diverse groups, whilst integrating the use of ICT into their teaching. But there seems to be a tendency within the literature to focus solely on face-to-face learning or on e-learning, and this is a lost opportunity. This book offers a new blended learning approach, combining the two techniques to make best use of the advantages of each while minimizing the disadvantages. It provides information professionals with a practical guide to the design and delivery of such training programmes, illustrated with a range of library-based examples, checklists and case studies. Many organizations establish projects, sometimes using external funding, as a means of developing their education and training provision, and the book provides a practical overview of this subject in the context of blended learning. Key areas covered include: technologies in the classroom virtual communication tools integrated learning environments websites and web tools models of teaching and learning planning and designing learning activities individual and group learning coaching and mentoring engaging with communities of interest and practice managing learning and teaching projects. Readership: This unique book will be of great value to any information professionals involved in establishing and delivering end-user education and staff development, whatever their previous experience. It will also benefit staff developers in school, college and higher education, library and information students, independent consultants and trainers, and information suppliers such as database providers.
