Introduction

Regarding pollen substitutes, what are your thoughts on Hive Alive Pollen Patties this time of year?

You said you are only going to use Apimaye Deeps in the future, can you elaborate?

With your QMP uses, would there be a queen present in the cluster of bees that gather on that?

In your pollen trap comparison you mentioned sending your pollen off for testing, did you receive the results?

I'm trying to figure out when to have splits done so they can build up and have a large honey crop.

Any pointers?

You mentioned about no longer using Queen Excluders. I would like to explore not using a Queen Excluder.
