Cómo ganarse a la gente

Las relaciones son el epicentro de todas las experiencias positivas en los seres humanos. Desde el momento en que nacemos, las relaciones nos marcan, en nuestras familias, en el campo de juegos, en la escuela y en nuestros trabajos. Maxwell, un comunicador maestro y experto en estudio relacional, hace que el aprendizaje sobre las relaciones sea algo accesible para todos. Los líderes más sofisticados y los vendedores podrán asirse de habilidades que los harán progresar y los novatos en relaciones aprenderán técnicas que los transformarán en unos verdaderos dínamos de sus relaciones.

Developing the Leader Within You

Developing the Leader Within You is Dr. Maxwell's first and most enduring leadership book, having sold more than one million copies. In this Christian Leaders Series edition of this Maxwell classic, you will discover the biblical foundation for leadership that John Maxwell has used as a pastor and business leader for more than forty years. These same principles and practices are available for everyday leaders in every walk of life. It is a lofty calling to lead a group—a family, a church, a nonprofit, a business—and the timeless principles in this book will bring positive change in your life and in the lives of those around you. You will learn: The True Definition of Leader. "Leadership is influence. That's it. Nothing more; nothing less." The Traits of Leadership. "Leadership is not an exclusive club for those who were 'born with it.' The traits that are the raw materials of leadership can be acquired. Link them up with desire, and nothing can keep you from becoming a leader." The Difference Between Management and Leadership. "Making sure the work is done by others is the accomplishment of a manager. Inspiring others to do better work is the accomplishment of a leader." God has called every believer to influence others, to be salt and light. Developing the Leader Within You will equip you to improve your leadership and inspire others.

25 maneras de ganarse a la gente

Si ha leído el éxito de librería de John Maxwell *Cómo ganarse a la gente* y está listo para tomar pasos concretos que le ayuden a desarrollar lo que ha aprendido, ¡25 maneras de ganarse a la gente es el libro que andaba buscando! Este material de acompañamiento es ideal como un curso rápido sobre las relaciones interpersonales. Una pequeña muestra sobre las veinticinco áreas de acción para crear relaciones positivas y saludables: Elogie a las personas en público Construya un recuerdo y vaya a él con frecuencia Anime a los otros a soñar

Talent is Never Enough Workbook

A blueprint to maximize your potential, this workbook companion to an essential John Maxwell guide is filled with action-oriented business wisdom and examples of professionals from all walks of life to light your path to becoming a talent-plus person. New York Times best-selling author Dr. John C. Maxwell has a message for you, and for today's corporate culture fixated on talent above all else: TALENT IS NEVER ENOUGH. Some talented people reach their full potential, while others self-destruct or remain trapped in mediocrity. What makes the difference? Maxwell, the go-to guru for business professionals across the globe, insists that the choices people make—not merely the skills they inherit—propel them onto greatness. Among other truths, successful people know that: Belief lifts your talent. Initiative activates your talent. Focus directs your talent. Preparation positions your talent. Practice sharpens your talent. Perseverance sustains your talent. Character protects your talent. . . . and more!! In this companion Workbook, Maxwell outlines the thirteen crucial things you can do to maximize your natural talents and become a "Talent-plus" person.

El poder de las relaciones

El experto en liderazgo más respetado del mundo ofrece cinco principios y cinco prácticas para sacar a la luz y romper la barrera invisible que se opone al liderazgo y al éxito personal. Usted tiene una buena idea pero no puede convencer a sus compañeros de sus ventajas. Diseñó una estrategia innovadora, pero el equipo camina arrastrándose de la misma manera antigua de siempre. Cierta gente parece avanzar en sus carreras mientras que usted parece que se ha estancado. Si esto lo describe a usted o a alguien a quien conoce, el problema no es la calidad de lo que tiene para ofrecer. El problema es cómo se conecta con la gente para crear los resultados que desea. En *El poder de las relaciones*, John Maxwell explica a los lectores paso a paso los Cinco Principios y Prácticas para establecer relaciones de los mejores conquistadores de metas. La capacidad de una persona de crear cambio y resultados en cualquier organización está directamente relacionada con su capacidad de usar las enseñanzas de este libro.

Desarrolle el líder que está en usted

Explore y mejore las destrezas de liderazgo dentro de usted. En este renovado éxito de librerías, John Maxwell examinalas diferencias entre los estilos de liderazgo y bosqueja los principios paramotivar e influir en los demás. Estos principios pueden usarse en cualquier organización para fomentar la integridad y autodisciplina y producir un cambiopositivo. Desarrolle el líder que está en usted también permite que los lectores examinen cómo ser efectivos en sullamado supremo al liderazgo entendiendo las cinco características que separana los "gerentes líderes" de los "gerentes comunes y corrientes". En esta obra clásica, Maxwell muestra a loslectores cómo desarrollar la visión, los valores, la influencia y la motivaciónnecesarios para ser líderes exitosos.

Understanding the Brain: The Birth of a Learning Science

This book provides new insights about learning by synthesising existing and emerging findings from cognitive and brain science.

Ghosts of Colonies Past and Present

Ghosts of Colonies Past and Present is the first comprehensive examination of how the literary production of Benito Pýrez Galdýs, widely considered Spain's greatest nineteenth-century novelist, addresses the impact of imperial loss on the citizens of Spain. Well before the events that would lead inexorably toward 1898, Galdýs's texts question the nature of Spanish imperialism and the effect of colonial history on the lives of metropolitan citizens. Methodologically framed by trauma studies, affect studies and the concept of the imperial turn, a close reading of the texts reveals Galdýs's preoccupation with explaining not only how Spain lost its vast territories in the Americas in the early part of the century

but also how Spanish citizens could manage the trauma of that loss through a reconfiguration of national identity. His novels reveal the deeply entwined nature of colonial relations and how Spain attempted to process the trauma of imperial loss. Moreover, by recognizing that this process extended across the nineteenth century, it becomes clear that Spain's engagement with European cultural and literary movements was, contrary to the assumptions of European imperialism, neither slow nor imitative but rather illustrative of the nation's unique position on the cusp of the historical shift to the postcolonial present.

Practice Makes Perfect: Spanish Vocabulary

Building on the success of her prior book, *Practice Makes Perfect: Spanish Verb Tenses*, author Dorothy Devney Richmond helps learners attain a strong working vocabulary, no matter if they are absolute beginners or intermediate students of the language. She combines her proven instruction techniques and clear explanations with a plethora of engaging exercises, so students are motivated and hardly notice that they are absorbing so much Spanish. *Practice Makes Perfect: Spanish Vocabulary* also includes basic grammar and structures of the language to complement learners' newly acquired words. "Vocabulary Builders" help students add to their Spanish repertoire by using cognates, roots, suffixes, prefixes, and other "word-building" tools.

The Craftsman

Why do people work hard, and take pride in what they do? This book, a philosophically-minded enquiry into practical activity of many different kinds past and present, is about what happens when people try to do a good job. It asks us to think about the true meaning of skill in the 'skills society' and argues that pure competition is a poor way to achieve quality work. Sennett suggests, instead, that there is a craftsman in every human being, which can sometimes be enormously motivating and inspiring - and can also in other circumstances make individuals obsessive and frustrated. *The Craftsman* shows how history has drawn fault-lines between craftsman and artist, maker and user, technique and expression, practice and theory, and that individuals' pride in their work, as well as modern society in general, suffers from these historical divisions. But the past lives of crafts and craftsmen show us ways of working (using tools, acquiring skills, thinking about materials) which provide rewarding alternative ways for people to utilise their talents. We need to recognise this if motivations are to be understood and lives made as fulfilling as possible.

The Man Who Mistook His Wife for a Hat

Celebrating Fifty Years of Picador Books If a man has lost a leg or an eye, he knows he has lost a leg or an eye; but if he has lost a self – himself – he cannot know it, because he is no longer there to know it. In this extraordinary book, Dr. Oliver Sacks recounts the stories of patients struggling to adapt to often bizarre worlds of neurological disorder. Here are people who can no longer recognize everyday objects or those they love; who are stricken with violent tics or shout involuntary obscenities, and yet are gifted with unusually acute artistic or mathematical talents. If sometimes beyond our surface comprehension, these brilliant tales illuminate what it means to be human. A provocative exploration of the mysteries of the human mind, *The Man Who Mistook His Wife for a Hat* is a million-copy bestseller by the twentieth century's greatest neurologist. Part of the Picador Collection, a series showcasing the best of modern literature.

The Spanish American Reader

People are seeking the answer to the confusion, the moral sickness, the spiritual emptiness that oppresses the world. We are all crying out for guidance. For comfort. For peace. Is there a way out of our dilemma? Can we really find personal peace with God? Yes! But only if we look in the right place. *The Key to Personal Peace* not only includes trusted Biblical insights from renowned evangelist Dr. Billy Graham, but also includes the full gospel of John, making the book a perfect gift for evangelism or outreach. *The Key to Personal Peace* offers a look into how to live life in the fullness of God. Sections include: The Great Quest Our Dilemma What is God Like What Did Jesus Do for Us? Finding the Way Back Peace at Last Heaven, Our Hope Note: Must be ordered in multiples of 50.

The Key to Personal Peace

Breastfeeding is a biocultural phenomenon: not only is it a biological process, but it is also a culturally determined behavior. As such, it has important implications for understanding the past, present, and future condition of our species. In general, scholars have emphasized either the biological or the cultural aspects of breastfeeding, but not both. As biological anthropologists the editors of this volume feel that an evolutionary approach combining both aspects is essential. One of the goals of their book is to incorporate data from diverse fields to present a more holistic view of breastfeeding, through the inclusion of research from a number of different disciplines, including biological and social/cultural anthropology, nutrition, and medicine. The resulting book, presenting the complexity of the issues surrounding very basic decisions about infant nutrition, will fill a void in the existing literature on breastfeeding.

Breastfeeding

The first, foundational book on blockchain technology, from the bestselling author of *Wikinomics*, Don Tapscott and blockchain expert Alex Tapscott, now in paperback with a new preface and chapter explaining recent developments in the world of blockchain, including cryptoassets, ICOs, smart contracts, and more. "This book has had an enormous impact on the evolution of blockchain in the world." —Satya Nadella, CEO, Microsoft Corporation In this revelatory book, Don and Alex Tapscott bring us a brilliantly researched, highly readable, and essential book about the technology driving the future of the economy. Blockchain is the ingeniously simple, revolution-ary protocol that allows transactions to be simultaneously anonymous and secure by maintaining a tamperproof public ledger of value. Though it's best known as the technology that drives bitcoin and other digital currencies, it also has the potential to go far beyond currency, to record virtually everything of value to humankind, from birth and death certificates to insurance claims, land titles, and even votes. As with major paradigm shifts that preceded it, blockchain technology will create winners and losers. This book shines a light on where it can lead us in the next decade and beyond.

Blockchain Revolution

This edited book contributes to the growing field of self-translation studies by exploring the diversity of roles the practice has in Spanish-speaking contexts of production on both sides of the Atlantic. Part I surveys the presence of self-translation in contemporary Indigenous literatures in Spanish America, with a focus on Mexico and the Mapuche poetry of Chile and Argentina. Part II proposes to incorporate self-translation into the history of Spanish-American literatures- including its relation with colonial multilingual-translation practices, the transfers it allowed between the French and Spanish-American avant-gardes, and the insertion it offered for exiled Republicans in Mexico. Part III develops new reflections on the Iberian realm: on the choice between self and allograph translation Basque writers must face, a new category in Xosé Dasilva's typology, based on the Galician context, and the need to expand the analysis of directionality in Catalan self-translations. This book brings together contributions from some of the leading international experts in translation and self-translation, and it will be of interest to scholars and students in the fields of Translation Studies, Cultural Studies, Comparative Literature, Spanish Literature, Spanish American and Latin American Literature, and Amerindian Literatures.

Literary Self-Translation in Hispanophone Contexts - La autotraducción literaria en contextos de habla hispana

This publication contains a number of papers which consider the public health role of vaccines in improving the health of the world's populations, and looks at the challenges of using immunisation to combat emerging and re-emerging diseases. Issues discussed include the innovative use of vaccines against diseases such as meningococcal infection in Africa, *Haemophilus influenza* type b, varicella, and hepatitis, efforts to develop a new generation of vaccines against cholera and typhoid, shigella and *Helicobacter pylori*, as well as developments in the quest for vaccines against tuberculosis, HIV/AIDS, dengue, malaria, and hookworm. It also deals with the use of vaccines to fight bioterrorism attacks; regulatory and safety issues; financing issues, impact of health sector reform and the sustainability of immunisation programmes.

Vaccines

Margin is the space that once existed between ourselves and our limits. Today we use margin just to get by. This book is for anyone who yearns for relief from the pressure of overload. Reevaluate your priorities, determine the value of rest and simplicity in your life, and see where your identity really

comes from. The benefits can be good health, financial stability, fulfilling relationships, and availability for God's purpose.

Margin

This volume presents an integrated epidemiologic, social, and economic analysis of the global epidemics of HIV among sex workers in low- and middle-income countries. The book provides a comprehensive review and synthesis of the available public health and social science data to characterize the nature, scope, and complexities of these epidemics. A community empowerment-based approach to HIV prevention, treatment, and care is outlined and demonstrated to be cost-effective across multiple settings, with a significant projected impact on HIV incidence among sex workers and transmission dynamics overall. The *Global HIV Epidemics among Sex Workers* seeks to assist governments, public health implementing agencies, donors, and sex worker communities to better understand and respond to the epidemics among a population facing heightened social and structural vulnerabilities to HIV. The book combines a systematic review of the global epidemiology of HIV among sex workers and in-depth case studies of the epidemiology, policy and programmatic responses and surrounding social contexts for HIV prevention, care and treatment in eight countries. The authors employ mathematical modeling and cost-effectiveness analysis to assess the potential country-level impact of a community empowerment-based approach to HIV prevention, treatment, and care among sex workers when taken to scale in four countries representing diverse sociopolitical contexts and HIV epidemics: Brazil, Kenya, Thailand, and Ukraine. In each setting, greater investment in prevention, treatment, and care for sex workers is shown to significantly reduce HIV. Together these findings underline the urgency of further global investment in comprehensive, human rights-based responses to HIV among sex workers.

Cronopios and Famas

The task of the United Nations Conference on the Law of the Sea (1967-82) was to create a new ocean regime. Participants negotiated every major issue of ocean use: jurisdiction in the coastal and contiguous zones, the territorial sea, and the new two-hundred-mile exclusive economic zone (EEZ); transit and overflight through straits and archipelagos; fisheries management in the EEZs and high seas; ocean environmental obligations; the right to conduct ocean science; and the management of deep seabed mineral exploitation. Negotiating the treaty required more than fifteen years and the consent of more than one hundred and fifty nations. The resulting treaty, composed of three hundred and twenty articles plus seven major annexes, represents the final product of the largest, longest, and most complex formal negotiation in modern times. *Negotiating the New Ocean Regime* analyzes both the substance of the problems at hand - what should be done about the oceans - and the process of the bargaining and negotiating. With law and history as a background, Robert Friedheim uses regime theory and resource economics to analyze ocean problems and bargaining/cooperation theory of negotiation. To evaluate the treaty through the eyes of the stakeholders, the author employs a multi-attribute utility model. Finally, he assesses the bargaining system - parliamentary diplomacy with consensus as the decisive rule - for its usefulness, limitations, and applicability to other current global problems.

Negotiating the New Ocean Regime

Latin American theology is associated with liberation, basic Christian communities, primacy of praxis and option for the poor. The present volume shows that Latin American theologians added new themes to the previous ones: religious pluralism, inter-religious dialogue and macro-ecumenism. It is the fruit of a program of the Theological Commission of the Ecumenical Association of Third World Theologians (EATWOT) in Latin America, to work out a liberating theology of religions.

Along the Many Paths of God

Transcribed from the original Mayan hieroglyphs, the *Popol Vuh* relates the mythology and history of the Kiché people of the Guatemalan Highlands of Central America. As is often the case with ancient texts, the *Popol Vuh*'s significance lies in the scarcity of early accounts of Mesoamerican cultures, largely due to the purging of documents by the Spanish conquistadors. Today there remains no document of greater importance to the study of pre-Columbian mythology. This text of the *Popol Vuh* — which is translated variously as "Book of the Community," "Book of Counsel," or, more literally, "Book of the People" — begins as pure mythology and gradually develops into pure history, progressing from heroic legends to the deeds of authentic historical figures. It tells of the gods who created mankind, as well

as a great flood and other stories with intriguing parallels to the myths of different cultures. This edition features the classic translation by the distinguished folklorist Lewis Spence.

Essentials of Negotiation

Smitten by the modernity of Cervantes and Borges at an early age, Carlos Fuentes has written extensively on the cultures of the Americas and elsewhere. His work includes over a dozen novels, among them *The Death of Artemio Cruz*, *Christopher Unborn*, *The Old Gringo*, and *Terra Nostra*, several volumes of short stories, numerous essays on literary, cultural, and political topics, and some theater. In this book, Raymond Leslie Williams traces the themes of history, culture, and identity in Fuentes' work, particularly in his complex, major novel *Terra Nostra*. He opens with a biography of Fuentes that links his works to his intellectual life. The heart of the study is Williams' extensive reading of the novel *Terra Nostra*, in which Fuentes explores the presence of Spanish culture and history in Latin America. Williams concludes with a look at how Fuentes' other fiction relates to *Terra Nostra*, including Fuentes' own division of his work into fourteen cycles that he calls "La Edad del Tiempo," and with an interview in which Fuentes discusses his concept of this cyclical division.

Drug Addiction Research and the Health of Women

This Hebrew alphabet book features three siblings and their parents in their everyday family life at home.

The Popol Vuh

This groundbreaking collection provokes a major reassessment of the significance of tragedy and the tragic in late modernity. A distinguished group of scholars and theorists extends the discussion of tragedy beyond its usual parameters to include film, popular culture, and contemporary politics. Seven new essays—as well as eight essays originally published in a *New Literary History* special issue on tragedy—address important, previously neglected areas of tragedy and postcolonial criticism. The new material explores the tragic dimensions of popular culture, the relationship between tragedy and pity, and feminism's avoidance of the tragic, and includes an incisive history of tragic theory. Classic and cutting-edge, this collection offers a provocative, accessible, and comprehensive treatment of tragedy and tragic theory. Contributors: Elisabeth Bronfen, University of Zurich; Stanley Corngold, Princeton University; Simon Critchley, University of Essex; Joshua Foa Dienstag, University of California, Los Angeles; Wai Chee Dimock, Yale University; Page duBois, University of California, San Diego; Terry Eagleton, University of Manchester; Rita Felski, University of Virginia; Simon Goldhill, Cambridge University; Heather K. Love, University of Pennsylvania; Michel Maffesoli, University of Paris (V); Martha C. Nussbaum, University of Chicago; Timothy J. Reiss, New York University; Kathleen M. Sands, University of Massachusetts, Boston; David Scott, Columbia University; George Steiner, University of Geneva; Olga Taxidou, University of Edinburgh

Grant's dissector

In this volume, a distinguished Maya scholar seeks to correlate data from colonial writings and observations of the modern Indian with archaeological information in order to extend and clarify the panorama of Maya culture.

The Writings of Carlos Fuentes

Describes geography and natural history of the peninsula, gives brief history of Mayan life, discusses Spanish conquest, and provides a long summary of Maya civilization. 4 maps, and over 120 illustrations.

Consumer Behavior

Angus Gowland investigates the theory of melancholy and its many applications in the Renaissance by means of a wide-ranging contextual analysis of Robert Burton's encyclopaedic *Anatomy of Melancholy* (first published in 1621). Approaching the *Anatomy* as the culmination of early modern medical, philosophical and spiritual inquiry about melancholy, Gowland examines the ways in which Burton exploited the moral psychology central to the Renaissance understanding of the condition to construct a critical vision of his intellectual and political environment. In the first sustained analysis of the evolving relationship of the *Anatomy* (in the various versions issued between 1621 and 1651) to late Renaissance humanist learning and early seventeenth-century England and Europe, Gowland corrects

the prevailing view of the work as an unreflective digest of other authors' opinions, and reveals the Anatomy's character as a polemical literary engagement with the live intellectual, religious and political issues of its day.

World Capitals

A new look at performance management that goes beyond discipline approaches and explores how we might integrate thinking through inter-disciplinary research, informed by management practice. This impartial review traces the evolution of how performance is understood and comes from experts of over a dozen disciplines and sectors.

Rethinking Tragedy

This text provides a unique view of global inequities in health status and health systems. Emphasizing socioeconomic conditions, it combines chapters on conceptual and measurement issues with case studies from around the world.

Maya History and Religion

These guidelines have been prepared by the International Labour Office in order to assist employers and national organisations with practical advice on implementing and improving occupational safety and health (OSH) management systems, in order to reduce work-related injuries, occupational ill health and diseases and unsafe working conditions. The guidelines may be applied on two levels: they provide a national OSH framework for legal and voluntary regulatory standards; and encourage the integration of OSH management principles with overall policy management at the organisational level.

Yucatan Before and After the Conquest

Provides the requisite knowledge and practical guidelines for some of the most common counseling situations. Today's rabbis, in addition to being spiritual leaders of their congregations, are also expected to be competent counselors to members of their community. Yet rabbis often feel inadequately prepared for the difficult challenges of their counseling role. To many, rabbinic counseling appears deceptively simple, requiring no more than good intuition, fair judgment and sincere empathy. Good counseling, in reality, is a complex process requiring a combination of knowledge, skill, self-awareness and an understanding of human dynamics. This groundbreaking book—written specifically for community rabbis and religious counselors—reflects the wisdom of seasoned professionals, who provide clear guidelines and sensible strategies for effective rabbinic counseling.

The Worlds of Renaissance Melancholy

A series of essays to challenge and stimulate, examining the links between gender, domesticity and architecture from a number of different perspectives and disciplines.

Performance Management

The hormone cortisol, activated by the fight-or-flight (stress) response, is emerging as a major culprit in a variety of health problems. The Cortisol Connection explores the documented relationship between elevated levels of this hormone, chronic stress, and such health conditions as obesity, depression, suppressed immune system, osteoporosis, and hypertension. This new edition describes the results of the latest research about the connection between cortisol and HSD, and cortisol and testosterone.

Challenging Inequities in Health

In the ongoing quest to improve our psychiatric diagnostic system, we are now searching for new approaches to understanding the etiological and pathophysiological mechanisms that can improve the validity of our diagnoses and the consequent power of our preventive and treatment interventions -- venturing beyond the current DSM paradigm and DSM-IV framework. This thought-provoking volume -- produced as a partnership between the American Psychiatric Association, the National Institute of Mental Health, the National Institute on Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse -- represents a far-reaching attempt to stimulate research and discussion in the field in preparation for the eventual start of the DSM-V process, still several years hence. The book Explores a variety of basic nomenclature issues, including the desirability of rating the quality and quantity of

information available to support the different disorders in the DSM in order to indicate the disparity of empirical support across the diagnostic system. Offers a neuroscience research agenda to guide development of a pathophysiologically based classification for DSM-V, which reviews genetic, brain imaging, postmortem, and animal model research and includes strategic insights for a new research agenda. Presents highlights of recent progress in developmental neuroscience, genetics, psychology, psychopathology, and epidemiology, using a bioecological perspective to focus on the first two decades of life, when rapid changes in behavior, emotion and cognition occur. Discusses how to address two important gaps in the current DSM-IV: (1) the categorical method of diagnosing personality disorders and their relationship with Axis I disorders, and (2) the limited provision for the diagnosis of relational disorders -- suggesting a research agenda for personality disorders that considers replacing the current categorical approach with a dimensional classification of personality. Reevaluates the relationship between mental disorders and disability, asserting that research into disability and impairment would benefit from the diagnosis of mental disorders be uncoupled from a requirement for impairment or disability to foster a more vigorous research agenda on the etiologies, courses, and treatment of mental disorders as well as disabilities and to avert unintended consequences of delayed diagnosis and treatment. Examines the importance of culture in psychopathology and the main cultural variables at play in the diagnostic process, stating that training present and future professionals in the need to include cultural factors in the diagnostic process is a logical step in any attempt to develop comprehensive research programs in psychology, psychiatry, and related disciplines. This fascinating work, with contributions from an international group of research investigators, reaches into the core of psychiatry, providing invaluable background and insights for all psychology and psychiatry professionals -- food for thought and further research that will be relevant for years to come.

Guidelines on Occupational Safety and Health Management Systems

This book introduces readers to the concepts of political philosophy. It starts by explaining why the subject is important and how it tackles basic ethical questions such as 'how should we live together in society?' It looks at political authority, the reasons why we need politics at all, the limitations of politics, and whether there are areas of life that shouldn't be governed by politics. It explores the connections between political authority and justice, a constant theme in political philosophy, and the ways in which social justice can be used to regulate rather than destroy a market economy. David Miller discusses why nations are the natural units of government and whether the rise of multiculturalism and transnational co-operation will change this: will we ever see the formation of a world government? ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

A Practical Guide to Rabbinic Counseling

Negotiating Domesticity
