Optimization Problems - Calculus - Optimization Problems - Calculus by The Organic Chemistry Tutor 1,061,543 views 2 years ago 1 hour, 4 minutes - This **calculus**, video explains how to solve optimization problems. It explains how to solve the fence along the river problem, how to ...

maximize the area of a plot of land

identify the maximum and the minimum values of a function

isolate y in the constraint equation

find the first derivative of p

find the value of the minimum product

objective is to minimize the product

replace y with 40 plus x in the objective function

find the first derivative of the objective function

try a value of 20 for x

divide both sides by x

move the x variable to the top

find the dimensions of a rectangle with a perimeter of 200 feet

replace w in the objective

find the first derivative

calculate the area

replace x in the objective function

calculate the maximum area

take the square root of both sides

calculate the minimum perimeter or the minimum amount of fencing

draw a rough sketch

draw a right triangle

minimize the distance

convert this back into a radical

need to find the y coordinate of the point

draw a line connecting these two points

set the numerator to zero

find the point on the curve

calculate the maximum value of the slope

plug in an x value of 2 into this function

find the first derivative of the area function

convert it back into its radical form

determine the dimensions of the rectangle

find the maximum area of the rectangle
