Petty Officer Bacon, a navy SEAL and ace sharpshooter, has been on the front lines of more than his fair share of dangerous ops. Yet when a minor injury relegates him to the beta team, he's tasked with what may be his riskiest assignment yet: the silver fox journalist he's babysitting is the hottest, most charismatic man he's ever encountered. Award-winning journalist Spencer Bryant may have been named one of *Pride* magazine's most eligible bachelors of the year, but he's not looking to change his relationship status. He's a consummate professional who won't risk his ethics or impeccable reputation by getting involved with a source. Even a sexy-as-hell military man. But while Spencer can resist his physical attraction to Bacon, he has less control over his emotions—especially when the mission goes sideways and the two men are trapped alone. Getting out of the jungle alive turns out to be easy compared to facing the truth about their feelings for one another back in the real world. And whether or not they can build a future is a different story altogether. This book is approximately 82,000 words. One-click with confidence. This title is part of the Carina Press Romance Promise: all the romance you're looking for with an HEA/HFN. It's a promise!

Princeton. New Jersey. 14th March 1954 'Albert Einstein speaking.' 'Who?' asks the girl on the telephone. 'I'm sorry,' she says. 'I have the wrong number.' 'You have the right number,' Albert says. From a wrong number to a friendship that would impact both their lives, *Albert Einstein Speaking* begins with two unlikely friends - the world's most respected scientist and a schoolgirl from New Jersey. From their first conversation Mimi Beaufort had a profound effect on Einstein and brought him, in his final years, back to life. In turn he let her into his world. *Albert Einstein Speaking* is the story of an incredible friendship, and of a remarkable life. The son of an electrician in nineteenth-century Germany, Albert Einstein went on to become one of the twentieth century's most influential scientists and the most famous face in the world. This riotous, charming and moving novel spans almost a century of European history and shines a light on the real man behind the myth.
