

A Critique Of Moral Knowledge

[#moral knowledge critique](#) [#ethics epistemology](#) [#moral philosophy](#) [#ethical reasoning](#) [#sources of morality](#)

This critical analysis delves into the foundations of moral knowledge, questioning how individuals and societies establish ethical truths. It explores various philosophical perspectives on ethics epistemology and the sources of morality, offering an insightful critique of moral knowledge and the processes of ethical reasoning that shape our understanding of right and wrong.

Educators can use these resources to enhance their classroom content.

We sincerely thank you for visiting our website.

The document Critique Moral Knowledge is now available for you.

Downloading it is free, quick, and simple.

All of our documents are provided in their original form.

You don't need to worry about quality or authenticity.

We always maintain integrity in our information sources.

We hope this document brings you great benefit.

Thank you for your trust.

Across countless online repositories, this document is in high demand.

You are fortunate to find it with us today.

We offer the entire version Critique Moral Knowledge at no cost.

A Critique of Moral Knowledge

This long-awaited book is the first English-language edition of Simon's first book, *Critique de la connaissance morale* (1934). Not only does this work clarify the first stages of Simon's intellectual career, it is also a major contribution to moral philosophy. *A Critique of Moral Knowledge* addresses fundamental issues. How does moral knowledge differ from other practical knowledge? What is the relationship between the moral sense, moral philosophy, and cognition in action? Is politics moral philosophy or simply a neutral technique? This elegant translation will be an important contribution to the conversation on philosophy, politics, religion, and ethics.

A Critique of a Priori Moral Knowledge

As its title indicates, this book is concerned with two different fields of philosophy, ethics and epistemology. The bulk of the argument is devoted to epistemological questions, as these arise within the context of morality. Hence, the conclusions I reach could probably best be described as prolegomena to the elaboration of a theory of ethics. I have plans, which I hope will be realized in the next few years, of elaborating such a theory. I started work on *Moral Knowledge* in the summer of 1958 with the help of a University Faculty Fellowship, for which I am most grateful. of the research for the book, as well as a good bit of its writing, Much was done in two libraries, The University Library, Berkeley, and the Bodleian Library, Oxford. Members of the staffs of both libraries, by their courtesy and helpfulness, lightened immeasurably the task of my research. I owe a special debt of gratitude to four people-to Mr.

Moral Knowledge

How do we know right from wrong? Do we even have moral knowledge? Moral epistemology studies these and related questions about our understanding of virtue and vice. It is one of philosophy's perennial problems, reaching back to Plato, Aristotle, Aquinas, Locke, Hume and Kant, and has recently been the subject of intense debate as a result of findings in developmental and social psychology. In this outstanding introduction to the subject Aaron Zimmerman covers the following key topics: What is moral epistemology? What are its methods? Including a discussion of Socrates, Gettier and

contemporary theories of knowledge skepticism about moral knowledge based on the anthropological record of deep and persistent moral disagreement, including contextualism moral nihilism, including debates concerning God and morality and the relation between moral knowledge and our motives and reasons to act morally epistemic moral scepticism, intuitionism and the possibility of inferring 'ought' from 'is,' discussing the views of Locke, Hume, Kant, Ross, Audi, Thomson, Harman, Sturgeon and many others how children acquire moral concepts and become more reliable judges criticisms of those who would reduce moral knowledge to value-neutral knowledge or attempt to replace moral belief with emotion. Throughout the book Zimmerman argues that our belief in moral knowledge can survive sceptical challenges. He also draws on a rich range of examples from Plato's Meno and Dickens' David Copperfield to Bernard Madoff and Saddam Hussein. Including chapter summaries and annotated further reading at the end of each chapter, Moral Epistemology is essential reading for all students of ethics, epistemology and moral psychology.

Moral Epistemology

Originally published in 1979, this book shows that a recognition of the rationality of moral judgment and moral action in no way involves us in diminishing our respect for liberty, authenticity, sincerity or integrity. It maintains that the resolution of these issues lies in recognising that the necessary involvement of the emotions in moral judgments and moral choices need not give rise to any hesitation or reluctance to treat moral questions as needing and permitting the use of the resources of human understanding.

Moral Scepticism and Moral Knowledge

This volume discusses the nature of moral knowledge and whether it exists.

Moral Knowledge: Volume 18, Part 2

Based on an unfinished manuscript by the late philosopher Dallas Willard, this book makes the case that the 20th century saw a massive shift in Western beliefs and attitudes concerning the possibility of moral knowledge, such that knowledge of the moral life and of its conduct is no longer routinely available from the social institutions long thought to be responsible for it. In this sense, moral knowledge—as a publicly available resource for living—has disappeared. Via a detailed survey of main developments in ethical theory from the late 19th through the late 20th centuries, Willard explains philosophy's role in this shift. In pointing out the shortcomings of these developments, he shows that the shift was not the result of rational argument or discovery, but largely of arational social forces—in other words, there was no good reason for moral knowledge to have disappeared. The Disappearance of Moral Knowledge is a unique contribution to the literature on the history of ethics and social morality. Its review of historical work on moral knowledge covers a wide range of thinkers including T.H Green, G.E Moore, Charles L. Stevenson, John Rawls, and Alasdair MacIntyre. But, most importantly, it concludes with a novel proposal for how we might reclaim moral knowledge that is inspired by the phenomenological approach of Knud Logstrup and Emmanuel Levinas. Edited and eventually completed by three of Willard's former graduate students, this book marks the culmination of Willard's project to find a secure basis in knowledge for the moral life.

The Disappearance of Moral Knowledge

When this work was first published in 1960, it immediately filled a void in Kantian scholarship. It was the first study entirely devoted to Kant's Critique of Practical Reason and by far the most substantial commentary on it ever written. This landmark in Western philosophical literature remains an indispensable aid to a complete understanding of Kant's philosophy for students and scholars alike. This Critique is the only writing in which Kant weaves his thoughts on practical reason into a unified argument. Lewis White Beck offers a classic examination of this argument and expertly places it in the context of Kant's philosophy and of the moral philosophy of the eighteenth century.

A Commentary on Kant's Critique of Practical Reason

By the time of his death in 2003, Bernard Williams was one of the greatest philosophers of his generation. Ethics and the Limits of Philosophy is not only widely acknowledged to be his most important book, but also hailed a contemporary classic of moral philosophy. Presenting a sustained critique of moral theory from Kant onwards, Williams reorients ethical theory towards 'truth, truthfulness and the meaning of an individual life'. He explores and reflects upon the most difficult problems in

contemporary philosophy and identifies new ideas about central issues such as relativism, objectivity and the possibility of ethical knowledge. This edition also includes a new commentary on the text by A.W.Moore and a foreword by Jonathan Lear.

Ethics and the Limits of Philosophy

Iris Murdoch has long been known as one of the most deeply insightful and morally passionate novelists of our time. This attention has often eclipsed Murdoch's sophisticated and influential work as a philosopher, which has had a wide-ranging impact on thinkers in moral philosophy as well as religious ethics and political theory. Yet it has never been the subject of a book-length study in its own right. *Picturing the Human* seeks to fill this gap. In this groundbreaking book, author Maria Antonaccio presents the first systematic and comprehensive treatment of Murdoch's moral philosophy. Unlike literary critical studies of her novels, it offers a general philosophical framework for assessing Murdoch's thought as a whole. Antonaccio also suggests a new interpretive method for reading Murdoch's philosophy and outlines the significance of her thought in the context of current debates in ethics. This vital study will appeal to those interested in moral philosophy, religious ethics, and literary criticism, and grants those who have long loved Murdoch's novels a closer look at her remarkable philosophy.

Picturing the Human

This book begins with a critique of moral relativism and proceeds to develop a realist account of practical wisdom. The central claims are that there are objective moral facts and that knowledge of these facts can be action-guiding. The justification for these claims involves explaining the role of imagination in moral judgment and action and also showing how a realist approach to morality enables us to better account for immorality, revealing it to involve ignorance, error or falsification. The book concludes with an analysis of how the character of social relations is crucial to the formation of self-conceptions and the development of moral knowledge and moral imagination.

Being True to the World

First published in 1962. Kant's philosophical works, and especially the *Critique of Pure Reason*, have had some influence on recent British philosophy. But the complexities of Kant's arguments, and the unfamiliarity of his vocabulary, inhibit understanding of his point of view. In *Kant's Theory of Knowledge* an attempt is made to relate Kant's arguments in the *Critique of Pure Reason* to contemporary issues by expressing them in a more modern idiom. The selection of issues discussed is intended to present a continuous argument, of an epistemological kind, which runs centrally through the *Critique*. The argument deals with essentially with the problems, raised in the *Transcendental Analytic*, about the status of categories. It deals with certain preliminary assumptions made in setting these problems, and discusses the way in which the various sections of the *Analytic* contribute to their solution. It also deals with Kant's criticisms of traditional metaphysics, and ends with an account of his effort in the *Third Antinomy* to resolve the conflict between freedom and causality, and so to effect a transition of knowledge to moral philosophy.

Kant's Theory of Knowledge

Metaethics from a First Person Standpoint addresses in a novel format the major topics and themes of contemporary metaethics, the study of the analysis of moral thought and judgement. Metaethics is less concerned with what practices are right or wrong than with what we mean by 'right' and 'wrong.' Looking at a wide spectrum of topics including moral language, realism and anti-realism, reasons and motives, relativism, and moral progress, this book engages students and general readers in order to enhance their understanding of morality and moral discourse as cultural practices. Catherine Wilson innovatively employs a first-person narrator to report step-by-step an individual's reflections, beginning from a position of radical scepticism, on the possibility of objective moral knowledge. The reader is invited to follow along with this reasoning, and to challenge or agree with each major point. Incrementally, the narrator is led to certain definite conclusions about 'oughts' and norms in connection with self-interest, prudence, social norms, and finally morality. Scepticism is overcome, and the narrator arrives at a good understanding of how moral knowledge and moral progress are possible, though frequently long in coming. Accessibly written, *Metaethics from a First Person Standpoint* presupposes no prior training in philosophy and is a must-read for philosophers, students and general readers interested in gaining a better understanding of morality as a personal philosophical quest.

Metaethics from a First Person Standpoint

This is a book on metaethics and moral epistemology. It asks two fundamental questions: (i) Is there any such thing as (non-relative) moral truth?; and (ii) If there is such truth, how do we come into epistemic contact with it? Roughly the first half of the book is aimed at answering the first question. Its animating idea is that we should take our ordinary, tutored moral judgments seriously—judgments typified by our conviction that it is clearly true that some acts, policies, social norms et al. are morally right or wrong, permissible or impermissible, praiseworthy or condemnable, etc., no matter when, where, or by whom they are performed. In order to provide a firm conceptual basis for such judgments, the book develops a theory of moral truth, based on a theory of moral facts. The account of moral truth and moral facts is further grounded on a theory of moral properties. In short, the book develops a theory of moral realism, roughly, the view that there are indeed non-relative, first-order moral truths. The second half of the book is aimed at answering the second question above. Building squarely on the metaethical theories developed earlier, the book argues for a non-empiricist theory of justified moral belief and knowledge. Pivotal to this project is a careful analysis of various forms of moral skepticism, by which I mean any conception of morality substantially at odds with the general contours of our ordinary moral thinking. All such skepticisms are rejected, and in their place a broadly intuitionist, epistemically fallibilist theory of moral knowledge is advanced. The conclusion reached is that we have very strong reason to believe that our ordinary moral thinking, although certainly liable to error, is fundamentally sound. Moral knowledge is ubiquitous.

Knowing Moral Truth

"Metaethics from a First Person Standpoint addresses in a novel format the major topics and themes of contemporary metaethics, the study of the analysis of moral thought and judgement. Metaethics is less concerned with what practices are right or wrong than with what we mean by 'right' and 'wrong.' Looking at a wide spectrum of topics including moral language, realism and anti-realism, reasons and motives, relativism, and moral progress, this book engages students and general readers in order to enhance their understanding of morality and moral discourse as cultural practices. Catherine Wilson innovatively employs a first-person narrator to report step-by-step an individual's reflections, beginning from a position of radical scepticism, on the possibility of objective moral knowledge. The reader is invited to follow along with this reasoning, and to challenge or agree with each major point. Incrementally, the narrator is led to certain definite conclusions about 'oughts' and norms in connection with self-interest, prudence, social norms, and finally morality. Scepticism is overcome, and the narrator arrives at a good understanding of how moral knowledge and moral progress are possible, though frequently long in coming. Accessibly written, Metaethics from a First Person Standpoint presupposes no prior training in philosophy and is a must-read for philosophers, students and general readers interested in gaining a better understanding of morality as a personal philosophical quest."--Publisher's website.

Metaethics from a First Person Standpoint

Originally published in 1988, this book discusses if moral knowledge exists, and if so, if it is similar to other forms of knowledge. This book approaches the issues from both historical and contemporary perspectives and in order to determine whether there is a real property of rightness, looks to the ethical theories of Hobbes, Hume and Kant. This historical analysis leads to a systematic comparison of three theories of the nature of ethics: realism, emotivism and coherentism. The nature of coherence is explained using legal reasoning as a model. Moral reasoning is compared and contrasted with reasoning both in science and law, showing how ethics differs from science and empirical disciplines.

Moral Knowledge

"This translation will be of value to all who are interested in tracking the work of this influential thinker, and will be an important contribution to the twentieth-century conversation on philosophy, politics, religion, and ethics."--BOOK JACKET.

A Critique of Moral Knowledge

11 Rethinking the concept of care -- Afterword: care, giving: an ethical critique -- Index

The Ethics of Care

Bernard Williams is one of the most influential figures in ethical theory, where he has set a considerable part of the current agenda. In this collection a distinguished international team of philosophers who have been stimulated by Williams's work give responses to it. The topics covered include equality; consistency; comparisons between science and ethics; integrity; moral reasons; the moral system; and moral knowledge. Williams himself provides a substantial reply, which shows both the directions of his own thought and also his present view of earlier work of his which has been extensively discussed for twenty years (such as that on utilitarianism). This volume will be indispensable reading for all those interested in ethical theory.

World, Mind, and Ethics

Alan Thomas presents an original study of the status of value and its relation to the contexts in which evaluative claims are justified. He articulates and defends the view that human beings do possess moral and political knowledge, but that it is historically and culturally contextual knowledge in ways that, say, mathematical or chemical knowledge is not. His exposition of a 'cognitivist contextualism' in ethics and politics builds upon contemporary work in epistemology, moral philosophy, and political theory to fashion an argument that is relevant to current debates about culture, modernity, and relativism.

Value and Context: The Nature of Moral and Political Knowledge

Moral philosophy and poststructuralism have long been considered two antithetical enterprises. Moral philosophy is invested in securing norms, whereas poststructuralism attempts to unclench the grip of norms on our lives. Moreover, poststructuralism is often suspected of undoing the possibility of ethical knowledge by emphasizing the unstable, socially constructed nature of our practices and knowledge. In *Unbecoming Subjects*, Annika Thiem argues that Judith Butler's work makes possible a productive encounter between moral philosophy and poststructuralism, rethinking responsibility and critique as key concepts at the juncture of ethics and politics. Putting into conversation Butler's earlier and most recent work, *Unbecoming Subjects* begins by examining how Butler's critique of the subject as nontransparent to itself, formed thoroughly through relations of power and in subjection to norms and social practices, poses a challenge to ethics and ethical agency. The book argues, in conversation with Butler, Levinas, and Laplanche, that responsibility becomes possible only when we do not know what to do or how to respond, yet find ourselves under a demand to respond, and even more, to respond well to others. Drawing on the work of Butler, Adorno, and Foucault, *Unbecoming Subjects* examines critique as a central practice for moral philosophy. It interrogates the limits of moral and political knowledge and probes methods of social criticism to uncover and oppose injustices.

Unbecoming Subjects

Arguing against recent attempts to return to the virtue-centered perspective of ancient Greek ethics, these essays explore the problem of the relation between moral philosophy and modernity by studying the differences between ancient and modern ethics.

The Morals of Modernity

Dialogical reason requires dialogue among the members of a community. Thinkers like Habermas and Apel have proposed that judgments of both fact and value become objects of public debate. The debate should determine whether these judgments can earn the assent of the community. If so, they attain a degree of intersubjective validity. Javier Muguerza's *Ethics and Perplexity* makes a highly original contribution to the debate over dialogical reason. The work opens with a letter that establishes a parallel between *Ethics and Perplexity* and Maimonides's classic *Guide of the Perplexed*. It concludes with an interview that repeatedly strikes sparks on Spanish philosophy's emergence from its "long quarantine," as Muguerza puts it. These informal pieces—witty, informative, conversational—orbit the nucleus of the work: a formidable critique of dialogical reason. The result is a volume by turns vivid and profound. Muguerza insists that the experience of perplexity is inseparable from the exercise of philosophy. Perplexity is linked to aporia and wonder, which the ancients identified as the origin of their activity. The only solidarity among philosophers is that of searching, and philosophy is hardly more than a set of questions unceasingly posed and posed again, of forever open problems, of perplexities that assail us over and over again. Perplexity avoids both the certainty of dogmatism and the ignorance of skepticism. In fact, it is the only philosophical ailment capable of immunizing us against both. Philosophy is always a guide to the perplexed. The series *Philosophy in Spain*, founded to bring Spanish

philosophy to the attention of English-speaking philosophers, seeks outstanding works by classic and contemporary Spanish thinkers as well as books on Spanish philosophy.

Ethics and Perplexity

Fundamental Principles of the Metaphysic of Morals Immanuel Kant - How should human beings behave toward one another? How must we behave? One of the most influential thinkers of the Western civilization, a man who profoundly shaped the mind-set of the modern world, Immanuel Kant developed his "Categorical Imperative" as a philosophical proof of the "Golden Rule," and in this 1783 essay, he elaborates upon and defends his understanding of the logical underpinnings of all human morality. Essential reading for anyone seeking an appreciation of modern philosophy, this is an intriguing and provocative work exploring the intersection of morality and reason. German metaphysician IMMANUEL KANT (1724-1804) served as a librarian of the Royal Library, a prestigious government position, and as a professor at Königsberg University. His other works include *Observations on the Feeling of the Beautiful and Sublime* (1764), *Critique of Pure Reason* (1781), and *Groundwork of the Metaphysics of Morals* (1785).

Fundamental Principles of the Metaphysic of Morals

For most of the church's history, people have seen Christian ethics as normative and universally applicable. Recently, however, this view has been lost, thanks to naturalism and relativism. R. Scott Smith argues that Christians need to overcome Kant's fact-value dichotomy and recover the possibility of genuine moral and theological knowledge.

In Search of Moral Knowledge

The Critique of Pure Reason (German: Kritik der reinen Vernunft, KrV, in original: Kritik der reinen Vernunft) by Immanuel Kant, first published in 1781, second edition 1787, is one of the most influential works in the history of philosophy. Also referred to as Kant's "first critique," it was followed in 1788 by the Critique of Practical Reason and in 1790 by the Critique of Judgment. In the preface to the first edition Kant explains what he means by a critique of pure reason: "I do not mean by this a critique of books and systems, but of the faculty of reason in general, in respect of all knowledge after which it may strive independently of all experience." Before Kant, it was generally held that truths of reason must be analytic, meaning that what is stated in the predicate must already be present in the subject (for example, "An intelligent man is intelligent" or "An intelligent man is a man"). In either case, the judgment is analytic because it is ascertained by analyzing the subject. It was thought that all truths of reason, or necessary truths, are of this kind: that in all of them there is a predicate that is only part of the subject of which it is asserted. If this were so, attempting to deny anything that could be known a priori (for example, "An intelligent man is not intelligent" or "An intelligent man is not a man") would involve a contradiction. It was therefore thought that the law of contradiction is sufficient to establish all a priori knowledge.

Critique of Pure Reason

This book presents Robert S. Hartman's formal theory of value and critically examines many other twentieth century value theorists in its light, including A.J. Ayer, Kurt Baier, Brand Blanshard, Paul Edwards, Albert Einstein, William K. Frankena, R.M. Hare, Nicolai Hartmann, Martin Heidegger, G.E. Moore, P.H. Nowell-Smith, Jose Ortega y Gasset, Charles Stevenson, Paul W. Taylor, Stephen E. Toulmin, and J.O. Urmson. Open Access funding for this volume has been provided by the Robert S. Hartman Institute.

The Knowledge of Good

One of the most influential Enlightenment thinkers, German philosopher Immanuel Kant takes his place among Locke, Hume, and Berkeley as one of the intellectuals most commonly credited with ushering modernity into existence. In *The Metaphysical Elements of Ethics*, Kant takes on some of the most complex and engaging ideas about how humans can discern the right way to live. Recommended for philosophy buffs -- and anyone interested in expanding their intellectual horizons!

The Metaphysical Elements of Ethics

Groundwork of the Metaphysics of Morals is the first of Immanuel Kant's mature works on moral philosophy and remains one of the most influential in the field. Kant conceives his investigation as a work of foundational ethics—one that clears the ground for future research by explaining the core concepts and principles of moral theory and showing that they are normative for rational agents.

Groundwork of the Metaphysics of Morals

The second of Kant's three critiques, Critique of Practical Reason forms the center of Kantian philosophy; published in 1788, it is bookended by his Critique of Pure Reason and Critique of Judgement. With this work Kant establishes his role as a vindicator of the truth of Christianity; he approaches his proof by presenting positive affirmation of the immortality of the soul and the existence of God. The philosopher offers an argument concerning the summum bonum of life: people should not simply search after happiness, but follow the moral law and seek to become worthy of the happiness that God can bestow. This Critique comprises three sections: the Analytic, the Dialectic, and the Doctrine of Method. The Analytic defines the ultimate moral principle, the categorical imperative, and argues that to obey it is to exercise a freedom. The Dialectic makes the assumption that immortality and God exist, arguing that pure practical reason falls into error when it expects perfection in this world; we should anticipate finding perfection in the next world, with God's help. The final section, the Doctrine of Method, offers suggestions in educating people in the use of pure practical reason. A seminal text in the history of moral philosophy, this volume offers the most complete statement of Kant's theory of free will and a full development of his practical metaphysics.

Critique of Practical Reason

Compared to other kinds of knowledge, how fragile is our knowledge of morality? Does knowledge of the difference between right and wrong fundamentally differ from knowledge of other kinds, in that it cannot be forgotten? What makes reliable evidence in fundamental moral convictions? And what are the associated problems of using testimony as a source of moral knowledge? Sarah McGrath provides novel answers to these questions and many others, as she investigates the possibilities, sources, and characteristic vulnerabilities of moral knowledge. She also considers whether there is anything wrong with simply outsourcing moral questions to a moral expert and evaluates the strengths and weaknesses of the method of equilibrium as an account of how we make up our mind about moral questions. Ultimately, McGrath concludes that moral knowledge can be acquired in any of the ways in which we acquire ordinary empirical knowledge. Our efforts to acquire and preserve such knowledge, she argues, are subject to frustration in all of the same ways that our efforts to acquire and preserve ordinary empirical knowledge are.

Moral Knowledge

Over the past two decades, applied ethics has turned increasingly toward theories that explore ethical questions faced by a variety of professions and away from classic moral concerns. Abraham Edel, Elizabeth Flower, and Finbarr O'Connor utilize examples of professional, public policy, and personal decision making to illustrate the strengths and limitations of the application of ethics in a rapidly changing world. They first discuss the emergence of applied ethics and how it functions within a philosophical tradition. They are not concerned, however, with solving the problems they expose, but with employing them as a means to critique applied ethics. Using human rights and health and welfare issues, the authors examine the subsequent ethical stumbling blocks that surround the "moral order" of these social concerns. Through a historical discussion of the abundant ethical theories posited since the Enlightenment, they suggest ways to decide which can serve as intellectual tools for applied ethics and consider how knowledge and experience enter into any moral decision. Turning to the factors pertinent in the analysis and solution of moral problems, they dissect the underlying influences on the practice of ethics, the way in which a moral problem is diagnosed and its relevant contexts established, the ensuing conflicts between the concerns of the individual and of society, and the degree of inventiveness in issues of morality. The authors suggest that, instead of viewing theory as a set consequence derived from prior applications, relating theory to practice will engage a process of mutual aid, from which each element will learn, refining and improving the other. Author note: Abraham Edel is Research Professor, University of Pennsylvania, and Distinguished Professor of Philosophy Emeritus, City University of New York. Elizabeth Flower is Professor of Philosophy, University of Pennsylvania. Finbarr O'Connor is Professor of Philosophy, Beaver College. The three collaboratively edited *Morality, Philosophy, and Practice: Historical and Contemporary Readings and Studies*.

Critique of Applied Ethics

The first focused study of Nietzsche's *Dawn*, offering a close reading of the text by two of the leading scholars on the philosophy of Nietzsche. Published in 1881, *Dawn: Thoughts on the Presumptions of Morality* represents a significant moment in the development of Nietzsche's philosophy and his break with German philosophic thought. Though groundbreaking in many ways, *Dawn* remains the least studied of Nietzsche's work. In *Nietzsche's Dawn: Philosophy, Ethics, and the Passion of Knowledge*, authors Keith Ansell-Pearson and Rebecca Bamford present a thorough treatment of the second of Nietzsche's so-called "free spirit" trilogy. This unique book explores Nietzsche's philosophy at the time of *Dawn*'s writing and discusses the modern relevance of themes such as fear, superstition, terror, and moral and religious fanaticism. The authors highlight *Dawn*'s links with key areas of philosophical inquiry, such as "the art of living well," skepticism, and naturalism. The book begins by introducing *Dawn* and discussing how to read Nietzsche, his literary and philosophical influences, his relation to German philosophy, and his efforts to advance his "free spirit" philosophy. Subsequent discussions address a wide range of topics relevant to *Dawn*, including presumptions of customary morality, hatred of the self, free-minded thinking, and embracing science and the passion of knowledge. Providing a lively and imaginative engagement with Nietzsche's text, this book: Highlights the importance of an often-neglected text from Nietzsche's middle writings Examines Nietzsche's campaign against customary morality Discusses Nietzsche's responsiveness to key Enlightenment ideas Offers insights on Nietzsche's philosophical practice and influences Contextualizes a long-overlooked work by Nietzsche within the philosopher's life of writing Like no other book on the subject, *Nietzsche's Dawn: Philosophy, Ethics, and the Passion of Knowledge* is a must-read for advanced undergraduate and graduate students, instructors, and scholars in philosophy, as well as general readers with interest in Nietzsche, particularly his middle writings.

Critique of Practical Reason and Other Works on the Theory of Ethics

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Nietzsche's Dawn

Contemporary philosophers have grown increasingly skeptical toward both morality and moral theory. Some argue that moral theory is a radically misguided enterprise that does not illuminate moral practice, while others simply deny the value of morality in human life. In this important new book, Loudon responds to the arguments of both "anti-morality" and "anti-theory" skeptics. In Part One, he develops and defends an alternative conception of morality, which, he argues, captures more of the central features of both Aristotelian and Kantian ethics than do other contemporary models, and enables the central importance of morality to be convincingly reaffirmed. In Loudon's model, morality is primarily a matter of what one does to oneself, rather than what one does or does not do to others. This model eliminates the gulf that many anti-morality critics say exists between morality's demands and the personal point of view. Loudon further argues that morality's primary focus should be on agents and their lives, rather than on right actions, and that it is always better to be morally better--i.e. it is impossible to be "too moral." Part Two presents Loudon's alternative conception of moral theory. Here again he draws on the work of Aristotle and Kant, showing that their moral theories have far more in common than is usually thought, and that those features that they share can be the basis for a viable moral theory that is immune to the standard anti-theory objections. Loudon reaffirms the necessity and importance of moral theory in human life, and shows that moral theories fulfill a variety of genuine and indispensable human needs.

A Commentary to Kant's Critique of Pure Reason

This study is an introduction to the problems of moral philosophy designed particularly for students of theology and religious studies. It offers an account of the nature and subject matter of moral reasoning and of the major types of moral theory current in contemporary moral philosophy. The account aims to bring out the major issues in moral theory, to present a clear, non-technical articulation of the structure of moral knowledge and to explore the relation between religious belief and morality.

Morality and Moral Theory

Mrinal Miri has been one of the most influential philosophers in recent times, apart from also being a teacher, writer and academic administrator. He has written on a variety of topics in the areas of tribal identity and ethics, and has substantial contributions in the areas of analytical philosophy, political philosophy and Gandhian thought. The essays in this volume seek to enhance and restate these themes, especially in moral and Gandhian philosophy, ethics and questions of identity, and offer a fresh perspective on secularism, religion and politics. Miri himself comments on these essays, locating them within contemporary debates as well as within specific intellectual traditions, thus expanding their salience and contemporaneity. The book will be of interest to academics and students of philosophy, politics, religion, sociology, history, ethics and literature, as also to any interested general reader. Mrinal Miri has contributed to philosophy for the past four decades, over and above his roles of teacher, writer and academic administrator. His influence has been substantial and decisive within the formal disciplinary boundaries of academic philosophy, but also in any serious study concerning the humanities and the social sciences. This volume honours Miri's remarkable mind and outstanding qualities as an individual: not only do the contributors engage with and enhance themes in moral, political and Gandhian philosophy --- questions Miri has concerned himself with --- but Miri himself comments on the essays, locating them within specific intellectual traditions as well as contemporary debates. Miri's other areas of interest: issues of identity, politics, science and its critiques, multiculturalism, violence, human rights, memory and history, are also restated in new ways by the contributors in their essays. In the process of this conversation, the book offers a fresh perspective on topics such as secularism, religion and politics.

The Philosophical and Theological Foundations of Ethics

The Critique of Practical Reason Immanuel Kant - The second of Kant's three critiques, Critique of Practical Reason forms the center of Kantian philosophy; published in 1788, it is bookended by his Critique of Pure Reason and Critique of Judgement. With this work Kant establishes his role as a vindicator of the truth of Christianity; he approaches his proof by presenting positive affirmation of the immortality of the soul and the existence of God. The philosopher offers an argument concerning the summum bonum of life: people should not simply search after happiness, but follow the moral law and seek to become worthy of the happiness that God can bestow. This Critique comprises three sections: the Analytic, the Dialectic, and the Doctrine of Method. The Analytic defines the ultimate moral principle, the categorical imperative, and argues that to obey it is to exercise a freedom. The Dialectic makes the assumption that immortality and God exist, arguing that pure practical reason falls into error when it expects perfection in this world; we should anticipate finding perfection in the next world, with God's help. The final section, the Doctrine of Method, offers suggestions in educating people in the use of pure practical reason. A seminal text in the history of moral philosophy, this volume offers the most complete statement of Kant's theory of free will and a full development of his practical metaphysics.

Grounding Morality

What is morality? How do we define what is right and wrong? How does moral theory help us deal with ethical issues in the world around us? This second edition provides an engaging and stimulating introduction to philosophical thinking about morality. Christopher Bennett provides the reader with accessible examples of contemporary and relevant ethical problems, before looking at the main theoretical approaches and key philosophers associated with them. Topics covered include: life and death issues such as abortion and global poverty; the meaning of life; whether life is sacred and which lives matter; major moral theories such as utilitarianism, Kantian ethics and virtue ethics; critiques of morality from Marx and Nietzsche. What is this Thing Called Ethics? has been thoroughly revised and updated throughout, with a new final chapter on meta-ethics. With boxed case studies, discussion questions and further reading included within each chapter this textbook is the ideal introduction to ethics for philosophy students coming to the subject for the first time.

What is this thing called Ethics?

Escaping the Illusion: Bernardo Kastrup Exposes Reality - Escaping the Illusion: Bernardo Kastrup Exposes Reality by Theories of Everything with Curt Jaimungal 325,156 views 3 years ago 4 hours, 41 minutes - Bernardo Kastrup has been leading the modern renaissance of metaphysical idealism, the notion that reality is essentially mental.

Introduction

Bernardo's journey from materialism to idealism

Materialism vs Analytical idealism

Dissociative identity disorder (multiple personality disorder) and consciousness

Why does life has a separate consciousness and not, say, a rock?

What does it mean to "explain" without reductionism?

Why not start with "nothing"? What would a theory like that look like?

What does it mean to "exist"? Do abstractions exist?

Theories of "truth" other than correspondence

Randomness doesn't exist fundamentally

If the mind is deceptive then what do we trust?

Is "Mind At Large" God? Can you pray to it?

Morality and purpose

On disagreements with Joscha Bach
On disagreements with Daniel Dennett
On disagreements with Dawkins
On disagreements with Douglas Hofstadter
If everything is "in the mind" then why are objects independently verified and exert an influence when I'm gone?
On disagreements with Donald Hoffman and Thomas Campbell
The distinction between "in your head" and "in your mind" is crucial
On disagreements with Carl Jung
On disagreements with Roger Penrose
Why parsimony in assumptions? Why not many assumptions?
Curt says Bernardo's theory isn't better than the Flying Spaghetti Monster
On Schopenhauer
How to properly read Jung
Bernardo and Curt speak about the "new age" and "woo"
On Deepak Chopra
Does Bernardo fear death? (a story about ego death)
If this reality is a "dream", how much can we control it?
Choice, free will, and becoming a slave voluntarily
The intellect is a bouncer of the heart
The East vs the West have different answers to the suffering of life
The "self" is an illusion worth saving
Bernardo almost killed himself twice, and later found meaning in the suffering
On the pain of writing
Should you ever regret? (Buddhism vs Christianity)
If consciousness is all there is, and the self is an illusion, why did the East get that and not the West?
Can you have morality / ethics within materialism?
What's the weakest point of Bernardo's model?
Is there anything special about biological life?
Logic
What beats rationality? What's the "game of all games"?
How does Bernardo write? What's the process look like?
Bernardo gives Curt advice
Don't feel like "others have it worse." Honor your suffering.
Don't take yourself seriously but take life seriously
Disagreements with Tony Robbins and self-help
Brain as a radio tuner (Plastic Pears)
How to falsify Bernardo's theory? What predictions does his model make?
Other audience questions
The relationship between universal consciousness and the Platonic Realm (Sessaly)
These metaphysical questions are dangerous questions
