An Uncommon Education

A young woman tries to save three people she loves in this elegant and remarkably insightful coming-of-age debut. Afraid of losing her parents at a young age—her father with his weak heart, her deeply depressed mother—Naomi Feinstein prepared single-mindedly for a prestigious future as a doctor. An outcast at school, Naomi loses herself in books, and daydreams of Wellesley College. But when Teddy, her confidant and only friend, abruptly departs from her life, it's the first devastating loss from which Naomi is not sure she can ever recover, even after her long-awaited acceptance letter to Wellesley arrives. Naomi soon learns that college isn't the bastion of solidarity and security she had imagined. Amid hundreds of other young women, she is consumed by loneliness—until the day she sees a girl fall into the freezing waters of a lake. The event marks Naomi's introduction to Wellesley's oldest honor society, the mysterious Shakespeare Society, defined by secret rituals and filled with unconventional, passionate students. Naomi finally begins to detach from the past and so much of what defines her, immersing herself in this exciting and liberating new world and learning the value of friendship. But her happiness is soon compromised by a scandal that brings irrevocable consequences. Naomi has always tried to save the ones she loves, but part of growing up is learning that sometimes saving others is a matter of saving yourself. *An Uncommon Education* is a compelling portrait of a quest for greatness and the grace of human limitations. Poignant and wise, it artfully captures the complicated ties of family, the bittersweet inevitability of loss, and the importance of learning to let go.

Love & Literacy

When our students enter middle and high school, the saying goes that they stop learning to read and start reading to learn. Then why is literacy still a struggle for so many of our students? The reality is that elementary school isn't designed to prepare students for Othello and Song of Solomon: so what do we do? Love and Literacy steps into the classrooms of extraordinary teachers who have guided students to the highest levels of literacy. There is magic in their teaching, but that magic is replicable. It starts with a simple premise: kids fall in love with texts when they understand them, and that understanding comes from the right knowledge and/or the right strategy at the right time. Love and Literacy dissects the moves of successful teachers and schools and leaves you with the tools to make these your own: Research-based best practices in facilitating discourse, building curriculum, guiding student comprehension and analysis, creating a class culture where literacy thrives, and more Video clips of middle and high school teachers implementing these practices An online, print-ready Reading and Writing Handbook that places every tool at your fingertips to implement effectively Discussion questions for your own professional learning or book study group Great reading is more than just liking books: it's having the knowledge, skill, and desire to experience any text in all its fullness. Love and Literacy guides you to create environments where students can build the will and wherewithal to truly fall in love with literacy.

Uncommon Education

Uncommon Education traces the evolution of Prescott College. In this compelling work, Samuel Henrie and others reveal what led to the inception of this special institution, the philosophy behind it, and a rare curriculum that includes adventure education, social and ecological justice fieldwork, and other hands-on and unique educational opportunities. "Sam Henrie has made an immense contribution to higher education by chronicling this grand, ongoing adventure in learning. Prescott College's hands-on, feet-in-the-field approach not only makes far more sense than the cattle calls that pass for education at most places, but its amazing resilience and resurrection is one of the most hopeful stories for our times—a true tale of how good ideas really can win if we never give up." -Alan Weisman, Laureate Professor of Journalism, University of Arizona, retired Professor of Writing at Prescott College, author of *The World Without Us*, *Gaviotas: A Village to Reinvent the World*, and other works

The Uncommon Reader

From one of England's most celebrated writers, a funny and superbly observed novella about the Queen of England and the subversive power of reading When her corgis stray into a mobile library parked near Buckingham Palace, the Queen feels duty-bound to borrow a book. Discovering the joy of reading widely (from J. R. Ackerley, Jean Genet, and Ivy Compton-Burnett to the classics) and intelligently, she finds that her view of the world changes dramatically. Abetted in her newfound obsession by Norman, a young man from the royal kitchens, the Queen comes to question the prescribed order of the world and loses patience with the routines of her role as monarch. Her new passion for reading initially alarms the palace staff and soon leads to surprising and very funny consequences for the country at large. With the poignant and mischievous wit of *The History Boys*, England's best-loved author Alan Bennett revels in the power of literature to change even the most uncommon reader's life.

The All True Adventures (and Rare Education) of the Daredevil Daniel Bones

A gloriously moving and entertaining, picaresque debut novel, about a young man's sentimental education in late 19th-Century Europe; inspired by a real historical figure: 'Captain' Paul Boyton – the 'Fearless Frogman'

Uncommon Sense Teaching

Top 10 Pick for Learning Ladders' Best Books for Educators Summer 2021 A groundbreaking guide to improve teaching based on the latest research in neuroscience, from the bestselling author of *A Mind for Numbers*. Neuroscientists and cognitive scientists have made enormous strides in understanding the brain and how we learn, but little of that insight has filtered down to the way teachers teach. *Uncommon Sense Teaching* applies this research to the classroom for teachers, parents, and anyone interested in improving education. Topics include: • keeping students motivated and engaged, especially with online learning • helping students remember information long-term, so it isn't immediately forgotten after a test • how to teach inclusively in a diverse classroom where students have a wide range of abilities

Drawing on research findings as well as the authors' combined decades of experience in the classroom, *Uncommon Sense Teaching* equips readers with the tools to enhance their teaching, whether they're seasoned professionals or parents trying to offer extra support for their children's education.

Reading Reconsidered

TEACH YOUR STUDENTS TO READ WITH PRECISION AND INSIGHT The world we are preparing our students to succeed in is one bound together by words and phrases. Our students learn their literature, history, math, science, or art via a firm foundation of strong reading skills. When we teach students to read with precision, rigor, and insight, we are truly handing over the key to the kingdom. Of all the subjects we teach reading is first among equals. Grounded in advice from effective classrooms nationwide, enhanced with more than 40 video clips, *Reading Reconsidered* takes you into the trenches with actionable guidance from real-life educators and instructional champions. The authors address the anxiety-inducing world of Common Core State Standards, distilling from those standards four key ideas that help hone teaching practices both generally and in preparation for assessments. This 'Core of the Core' comprises the first half of the book and instructs educators on how to teach students to: read harder texts, 'closely read' texts rigorously and intentionally, read nonfiction more effectively, and write more effectively in direct response to texts. The second half of *Reading Reconsidered* reinforces these principles, coupling them with the 'fundamentals' of reading instruction—a host of techniques and subject specific tools to reconsider how teachers approach such essential topics as vocabulary, interactive reading, and student autonomy. *Reading Reconsidered* breaks an overly broad issue into clear, easy-to-implement approaches. Filled with practical tools, including: 44 video clips of exemplar teachers demonstrating the techniques and principles in their classrooms (note: for online access of this content, please visit my.teachlikeachampion.com) Recommended book lists Downloadable tips and templates on key topics like reading nonfiction, vocabulary instruction, and literary terms and definitions. *Reading Reconsidered* provides the framework necessary for teachers to ensure that students forge futures as lifelong readers.

Uncommon Learning

"It is only when we forget our learning that we begin to know," Thoreau wrote. Ideas about education permeate Thoreau's writing. *Uncommon Learning* brings those ideas together in a single volume for the first time.

An UnCommon Theory of School Change

"This is a book for activists and educators who not only think schools need to be improved but are also fiercely committed to their reinvention and hopeful that it can be achieved"--

My School, Our World

This is a truly unique book that explores how children around the world are finding ways of getting an education, despite the most unusual or challenging circumstances. The stories will make you think about school and the world in a whole new way.

Learning to Fly

WITH A NEW EPILOGUE BY THE AUTHOR World-class free climber Steph Davis delivers a "thrilling and infectiously interesting" (San Francisco Book Review) memoir about rediscovering herself through love, loss, and the joy of letting go. The paperback includes a new epilogue in which Davis shares how her husband Mario's tragic accident has affected her relationship to climbing and flying. Steph Davis is a superstar in the climbing community and has ascended some of the world's most challenging and awe-inspiring peaks. But after her first husband makes a controversial climb in a national park, the media fallout escalates rapidly and in one fell swoop leaves her without a partner, a career, a source of income...or a purpose. In the company of only her beloved dog, Fletch, Davis sets off on a search for a new identity and discovers skydiving. Falling out of an airplane is completely antithetical to the climber's control she'd practiced for so long, but she perseveres, turning each daring jump into an opportunity to fly, first as a skydiver, then as a base jumper. As she opens herself to falling, she also finds the strength to open herself to love again, even in the wake of heartbreak. And before too long, she meets someone who shares her passion for living life to the limit. With gorgeous black-and-white photos throughout, *Learning to Fly* is Davis's fascinating account of her transformation. From her early tentative skydives, to

zipping into her first wingsuit, to surviving devastating accidents against the background of breathtaking cliffs, to soaring beyond her past limits, she discovers new hope and joy in letting go.

Uncommon Charm

The Book of Unusual Knowledge is a mammoth 704-page hardcover book crammed with a cornucopia of information--some useful, others not so much--but all of it completely captivating. It's perfect for anyone with a curious mind and a passion for learning. With quirky illustrations and a vast array of articles, anecdotes, lists, and games, this book will provide hours of fascinating reading. It will also expand your knowledge on a range of topics, including the animal kingdom, art, sports, technology, history, politics, the universe, and much, much more. Sample topics include: * Are plastic bags killing sacred cows in India? * Does NASCAR have roots in bootlegging moonshine? * Did Ronald Reagan see not one--but two--UFOs during his lifetime? Gorgeous leatherette binding with gilded accents makes The Book of Unusual Knowledge a handsome addition to your library.

The Book of Unusual Knowledge

Contributors examine the literature that challenges widely held assumptions about the form of the family, familial authority patterns, and the function of courtship, marriage, and family life from the late eighteenth century to the present day. Topics include: the family as a microcosm of the larger political sphere in Charlotte Smith, Jane West, Elizabeth Fenwick, Mrs. Opie, and Mary Shelley, and alternatives to the nuclear patriarchal family in Charlotte Brontë, Harriet Jacobs, Elizabeth Barrett Browning, and Mary Louisa Molesworth.

Family Matters in the British and American Novel

Marisha Pessl's *Special Topics in Calamity Physics* is an unforgettable debut novel that combines the storytelling gifts of Donna Tartt and the suspense of Alfred Hitchcock: a darkly hilarious coming-of-age tale and a richly plotted suspense story, told with dazzling intelligence and wit. 'I wrote this account one year after I'd found Hannah Dead. I thought I'd managed to erase all traces of that night within myself. But I was wrong. Every night when I tried to sleep, I'd close my eyes and see her again, exactly as I found her, hanging from a pine tree by an orange electrical cord, her neck twisted like a tulip stem, her eyes seeing nothing. Or else that was the problem. They'd seen everything.' *Special Topics in Calamity Physics* is a mesmerizing debut. As teenager Blue van Meer tells her story we are hurled into a dizzying world of murder and butterflies, womanizing and wandering, American McCulture, The Western Canon, political radicalism and juvenile crushisms. Structured around a syllabus for a Great Works of Literature class (with hand-drawn Visual Aids), Blue's wickedly funny yet poignant tale reveals how the imagination finds meaning in the most bewildering times, the ways people of all ages strive for connection, and how the darkest of secrets can set us free. 'Beneath the foam of this exuberant debut is a dark, strong drink' Jonathan Franzen, author of, *The Corrections* 'Any [Donna] Tartt fan disappointed that her second novel had little in common with her debut should rush out and buy this book immediately... It's a brilliant debut, guaranteed to join the ranks of *The Secret History* and *The Virgin Suicides* as one of those rare books to become a cult hit and instant classic' *Sunday Telegraph* 'One of the most impressive debut novels I have ever read ... It stops you doing anything apart from reading it' *Independent on Sunday* 'Special Topics in Calamity Physics made me stay up all night reading; in the morning it seemed like one of those parties where everyone is too cool for you but you desperately want to know them anyway . . . I loved this book' Audrey Niffenegger, author of *The Time Traveler's Wife* Marisha Pessl was born in 1977 and lives in New York. This is her first novel.

Special Topics in Calamity Physics

The School Story: Young Adult Narratives in the Age of Neoliberalism examines the work of contemporary writers, filmmakers, and critics who, reflecting on the realm of school experience, help to shape dominant ideas of school. The creations discussed are mostly stories for children and young adults. David Aitchison looks at serious novels for teens including Laurie Halse Anderson's *Speak* and Faiza Guène's *Kiffe Kiffe Tomorrow*, the light-hearted, middle-grade fiction of Andrew Clements and Tommy Greenwald, and Malala Yousafzai's autobiography for young readers, *I Am Malala*. He also responds to stories that take young people as their primary subjects in such novels as Sapphire's *Push* and films including *Battle Royale* and *Cooties*. Though ranging widely in their accounts of young life, such stories betray a mounting sense of crisis in education around the world, especially in terms of equity (the extent to which students from diverse backgrounds have fair chances of receiving quality education)

and empowerment (the extent to which diverse students are encouraged to gain strength, confidence, and selfhood as learners). Drawing particular attention to the influence of neoliberal initiatives on school experience, this book considers what it means when learning and success are measured more and more by entrepreneurship, competitive individualism, and marketplace gains. Attentive to the ways in which power structures, institutional routines, school spaces, and social relations operate in the contemporary school story, *The School Story* offers provocative insights into a genre that speaks profoundly to the increasingly precarious position of education in the twenty-first century.

Uncommon Practice

M. R. James was born in Kent, England in 1862. James came to writing fiction relatively late, not publishing his first collection of short stories – *Ghost Stories of an Antiquary* (1904) – until the age of 42. Modern scholars now see James as having redefined the ghost story for the 20th century and he is seen as the founder of the 'antiquarian ghost story'. We are republishing these classic works in affordable, high quality, modern editions with a brand new introductory biography of the author.

The Uncommon Prayer-Book (Fantasy and Horror Classics)

Excerpt from *The Public Schools From Within: A Collection of Essays on Public School Education, Written Chiefly by Schoolmasters Speaking at Shrewsbury School, on July nth, 1906*, Dr. Warre, lately Headmaster of Eton, made the following observations: - "It was clear that ere long the public schools of England* would once again have to justify, not only their curricula, but, it might be, their very existence. The spirit of the age seemed to be inclined toward utilitarianism, and the trend of public opinion in that direction would necessitate on the part of the schools a period of self-criticism, and, very probably, a re-organisation of curricula, a fresh co-ordination of the different subjects of study, improved methods of teaching, and generally that effort of living growth and energy which would re-inform their intellectual life and economy from within, and not leave the necessary adaptation to the needs of the age to be undertaken by the tender mercies of a Royal Commission, to be improved by the procrustean methods of an Act of Parliament. There was another problem to be faced in the future of the public schools of England. It was that of a new phase of competition. As secondary education expanded and was developed under the care of local authority, there could be no doubt as to the growth of secondary day schools. Teach Like a Champion 2.0

This is a book for managers who know that their organisations are stuck in a mindset that thrives on fashionable business theories that are no more than folk wisdom, and whose so-called strategies that are little more than banal wish lists. It puts forward the notion that the application of uncommon sense - thinking or acting differently from other organisations in a way that makes unusual sense - is the secret to competitive success. For those who want to succeed and stand out from the herd this book is a beacon of uncommon sense and a timely antidote to managerial humbug.

Uncommon Sense, Common Nonsense

At a time when public education and reform agendas are changing the way we approach education, this book critically examines the key issues facing the public with implications for education policy makers, professionals and researchers. Drawing on empirical evidence gathered over 20 years, Helen Gunter confronts current issues about social justice and segregation. She uses Arendtian ideas to help the reader to 'think politically' about education and how and why public services education can be reimagined for the future.

The Social Condition and Education of the People in England (Classic Reprint)

The issues surrounding the comparability of various tests used to assess performance in schools received broad public attention during congressional debate over the Voluntary National Tests proposed by President Clinton in his 1997 State of the Union Address. Proponents of Voluntary National Tests argue that there is no widely understood, challenging benchmark of individual student performance in 4th-grade reading and 8th-grade mathematics, thus the need for a new test. Opponents argue that a statistical linkage among tests already used by states and districts might provide the sort of comparability called for by the president's proposal. Public Law 105-78 requested that the National Research Council study whether an equivalency scale could be developed that would allow test scores from existing commercial tests and state assessments to be compared with each other and with the National Assessment of Education Progress. In this book, the committee reviewed research literature on the statistical and technical aspects of creating valid links between tests and how the content, use, and purposes of education testing in the United States influences the quality and meaning of those links. The book summarizes relevant prior linkage studies and presents a picture of the diversity of state testing programs. It also looks at the unique characteristics of the National Assessment of Educational Progress. *Uncommon Measures* provides an answer to the question posed by Congress in Public Law 105-78, suggests criteria for evaluating the quality of linkages, and calls for further research to determine the level of precision needed to make inferences about linked tests. In arriving at its conclusions, the committee acknowledged that ultimately policymakers and educators must take responsibility for determining the degree of imprecision they are willing to tolerate in testing and linking. This book provides science-based information with which to make those decisions.

The world can be an amazing place if you know the right questions to ask: How did carrots become orange? What's stopping us from having a four-day week? How can we remove all the broken bits of satellite from orbit? If everything is so terrible, why is the global suicide rate falling? The keen minds of the Economist love to look beyond everyday appearances to find out what really makes things tick. In this latest collection of *The Economist Explains*, they have gathered together the juiciest fruits of their never-ending quest for answers. For an uncommonly interesting read, take a peek at some *Uncommon Knowledge* - and pass it on! The world only gets more amazing when discoveries are shared.

The politics of public education

Freesia and its allies have triumphed in the defensive war against the Rajah Empire, but Princess Pride suffered a grievous injury during the fight. Everyone gathers around her once the dust settles, concerned for her safety. As Pride gazes upon the citizens and loved ones she's whisked away from a life of despair, she can't help but think back to the fateful night before the war began. Just what lies in the hearts of the people who adore her, and will they stay steadfast in their support of the would-be wicked queen?

Uncommon Measures

Offers an organizational design model for service organizations, covering such topics as funding mechanisms, employee management systems, and customer management systems.

Deep in the political trenches of the nation's capital, eight-year-old Jamie Douglas mourns his mother's recent death. With a strange and lifelike Teddy Bear as his only companion, Jamie suffers alone from his father's neglect and the harsh ridicule of two cruel classmates. Senator Paul Douglas works all day and night in a desperate attempt to forget the loss of his beloved wife. At his lowest point, Paul becomes the victim of a political tug-of-war. Two powerful rivals want something from him. Each promises retribution if he does not fulfill their wishes. Burdened by a decision that could alter the nation's power structure, Paul finds himself weaker and more fragile than his young son. Enter the Colonel. Theodore Roosevelt returns to Washington with all the fervor, bombast, and humor that marked his previous life. No other character from history possesses the experience, knowledge, and practical sense to help the Douglas men solve their problems and repair their broken relationship. Wielding his big stick for all to see, America's great Bull Moose prepares Paul and Jamie for a final showdown against their respective bullies. If he can just stay out of trouble, Theodore Roosevelt might be the family's best hope . . .

Winner, 2021 AERA Outstanding Book Award Winner, 2021 AERA Division F New Scholar's Book Award Winner, 2020 Mary Kelley Book Prize, given by the Society for Historians of the Early American Republic Winner, 2020 Outstanding Book Award, given by the History of Education Society Uncovers the hidden role of girls and women in the desegregation of American education The story of school desegregation in the United States often begins in the mid-twentieth-century South. Drawing on archival sources and genealogical records, Kabria Baumgartner uncovers the story's origins in the nineteenth-century Northeast and identifies a previously overlooked group of activists: African American girls and women. In their quest for education, African American girls and women faced numerous obstacles—from threats and harassment to violence. For them, education was a daring undertaking that put them in harm's way. Yet bold and brave young women such as Sarah Harris, Sarah Parker Remond, Rosetta Morrison, Susan Paul, and Sarah Mapps Douglass persisted. In *Pursuit of Knowledge* argues that African American girls and women strategized, organized, wrote, and protested for equal school rights—not just for themselves, but for all. Their activism gave rise to a new vision of womanhood: the purposeful woman, who was learned, active, resilient, and forward-thinking. Moreover, these young women set in motion equal-school-rights victories at the local and state level, and laid the groundwork for further action to democratize schools in twentieth-century America. In this thought-provoking book, Baumgartner demonstrates that the confluence of race and gender has shaped the long history of school desegregation in the United States right up to the present.

Good Omens meets The Long Way to a Small, Angry Planet in Ryka Aoki's *Light From Uncommon Stars*, a defiantly joyful adventure set in California's San Gabriel Valley, with cursed violins, Faustian bargains, and queer alien courtship over fresh-made donuts. Hugo Award Finalist A National Bestseller Indie Next Pick New York Public Library Top 10 Book of 2021 A Kirkus Best Book of 2021 A Barnes & Noble Best Science Fiction Book of 2021 2022 Alex Award Winner 2022 Stonewall Book Award Winner Shizuka Satomi made a deal with the devil: to escape damnation, she must entice seven other violin prodigies to trade their souls for success. She has already delivered six. When Katrina Nguyen, a young transgender runaway, catches Shizuka's ear with her wild talent, Shizuka can almost feel the curse lifting. She's found her final candidate. But in a donut shop off a bustling highway in the San Gabriel Valley, Shizuka meets Lan Tran, retired starship captain, interstellar refugee, and mother of four. Shizuka doesn't have time for crushes or coffee dates, what with her very soul on the line, but Lan's kind smile and eyes like stars might just redefine a soul's worth. And maybe something as small as a warm donut is powerful enough to break a curse as vast as the California coastline. As the lives of these three women become entangled by chance and fate, a story of magic, identity, curses, and hope begins, and a family worth crossing the universe for is found. 'Wonderfully illuminated by children's essays, stories, poems, pictures and plans, this ground-breaking book offers a unique snapshot of the perceptions of today's school pupils'. -French bookstore Lavoisier www.lavoisier.fr In 2001, The Guardian launched a ground-breaking competition called 'The School I'd Like', in which young people were asked to imagine their ideal school. This vibrant and compelling book presents material drawn from that competition, offering a unique snapshot of perceptions of schools by those who matter most - the pupils. In 2011, The Guardian re-launched the competition and this updated 2nd edition reflects upon the next generation of reflections and summarises, through the children's insightful commentary, what has changed over the intervening decade. The book is wonderfully illustrated by children's essays, stories, poems, pictures and plans. Placing their views in the centre of the debate, it provides an evaluation of the democratic processes involved in teaching and learning by: - identifying consistencies in children's expressions of how they wish to learn - highlighting particular sites of 'disease' in the education system today - illustrating how the built environment is experienced by today's children - posing questions about the reconstruction of teaching and learning for the twenty-first century. *The School I'd Like: Revisited* offers a powerful perspective on school reform and is essential reading for all those involved in education and childhood studies, including teachers, advisors, policy-makers, academics, and anyone who believes that children's voices should not be ignored.

The New Education

Effective and practical coaching strategies for new educators plus valuable online coaching tools Many teachers are only observed one or two times per year on average—and, even among those who are observed, scarcely any are given feedback as to how they could improve. The bottom line is clear: teachers do not need to be evaluated so much as they need to be developed and coached. In *Get Better Faster: A 90-Day Plan for Coaching New Teachers*, Paul Bambrick-Santoyo shares instructive tools of how school leaders can effectively guide new teachers to success. Over the course of the book, he breaks down the most critical actions leaders and teachers must take to achieve exemplary results. Designed for coaches as well as beginning teachers, *Get Better Faster* is an integral coaching tool for any school leader eager to help their teachers succeed. *Get Better Faster* focuses on what's practical and actionable which makes the book's approach to coaching so effective. By practicing the concrete actions and micro-skills listed in *Get Better Faster*, teachers will markedly improve their ability to lead a class, producing a steady chain reaction of future teaching success. Though focused heavily on the first 90 days of teacher development, it's possible to implement this work at any time. Junior and experienced teachers alike can benefit from the guidance of *Get Better Faster* while at the same time closing existing instructional gaps. Featuring valuable and practical online training tools available at <http://www.wiley.com/go/getbetterfaster>, *Get Better Faster* provides agendas, presentation slides, a

coach's guide, handouts, planning templates, and 35 video clips of real teachers at work to help other educators apply the lessons learned in their own classrooms. Get Better Faster will teach you: The core principles of coaching: Go Granular; Plan, Practice, Follow Up, Repeat; Make Feedback More Frequent Top action steps to launch a teacher's development in an easy-to-read scope and sequence guide It also walks you through the four phases of skill building: Phase 1 (Pre-Teaching): Dress Rehearsal Phase 2: Instant Immersion Phase 3: Getting into Gear Phase 4: The Power of Discourse Perfect for new educators and those who supervise them, Get Better Faster will also earn a place in the libraries of veteran teachers and school administrators seeking a one-stop coaching resource.

Light From Uncommon Stars

Welcome to the 3 Books To Know series, our idea is to help readers learn about fascinating topics through three essential and relevant books. These carefully selected works can be fiction, non-fiction, historical documents or even biographies. We will always select for you three great works to instigate your mind, this time the topic is: Anti-heroes - Barry Lyndon by William Makepeace Thackeray - Crime and Punishment by Fyodor Dostoyevsky - Madame Bovary by Gustave Flaubert The Luck of Barry Lyndon is a picaresque novel by William Makepeace Thackeray, first published as a serial in Fraser's Magazine in 1844, about a member of the Irish gentry trying to become a member of the English aristocracy. Stanley Kubrick adapted the novel into the film Barry Lyndon, released in 1975. Unlike the film, the novel is narrated by Barry himself, who functions as a quintessentially unreliable narrator. Crime and Punishment focuses on the mental anguish and moral dilemmas of an impoverished ex-student in Saint Petersburg who formulates a plan to kill an unscrupulous pawnbroker for her money. Before the killing, Raskolnikov believes that with the money he could liberate himself from poverty and go on to perform great deeds. However, once it is done he finds himself racked with confusion, paranoia, and disgust for what he has done. His moral justifications disintegrate completely as he struggles with guilt and horror and confronts the real-world consequences of his deed. Long established as one of the greatest novels, Madame Bovary has been described as a "perfect" work of fiction. Henry James wrote: "Madame Bovary has a perfection that not only stamps it, but that makes it stand almost alone: it holds itself with such a supreme unapproachable assurance as both excites and defies judgment." The realist movement was, in part, a reaction against romanticism. Emma may be said to be the embodiment of a romantic: in her mental and emotional process, she has no relation to the realities of her world. This is one of many books in the series 3 Books To Know. If you liked this book, look for the other titles in the series, we are sure you will like some of the topics

The Great Indian Novel

A collection of seventeen wonderful short stories showing that the legendary Tom Hanks is as talented a writer as he is an actor. "Reading Tom Hanks's Uncommon Type is like finding out that Alice Munro is also the greatest actress of our time." —Ann Patchett, bestselling, Pulitzer Prize-winning author of The Dutch House A gentle Eastern European immigrant arrives in New York City after his family and his life have been torn apart by his country's civil war. A man who loves to bowl rolls a perfect game--and then another and then another and then many more in a row until he winds up ESPN's newest celebrity, and he must decide if the combination of perfection and celebrity has ruined the thing he loves. An eccentric billionaire and his faithful executive assistant venture into America looking for acquisitions and discover a down and out motel, romance, and a bit of real life. These are just some of the tales Tom Hanks tells in this first collection of his short stories. They are surprising, intelligent, heartwarming, and, for the millions and millions of Tom Hanks fans, an absolute must-have!
