The present work addresses itself to the question of the nature of appraisive concepts such as were the subject of investigation in *The Concepts of Value*\* and *The Concepts of Criticism*. \*\* Many problems of prime importance in the theory of value could not be adequately treated there without diminishing the basic purpose of those studies which was above all to identify, classify and provide a general theoretical framework for the host of concepts with which we characterize and commend subjects of appraisal in all of the principal areas of human interest. The author might have forestalled the disappointment of some of his critics had he then explicitly promised to consider those problems at a later time. But his reluctance to promise what he might not be in a position to produce outweighed a keen awareness of what the problems are and of their evident seriousness. Although my treatment of such problems has only now been undertaken, in point of time my concern with them antedates by far the empirical explorations of the two texts mentioned. Anyone who undertakes such a study is likely to have come under the influence of Professor Frank Sibley's 'Aesthetic Concepts' and of later developments in his analysis of certain appraisive concepts. What do such concepts mean and how do they mean? These are the questions he treated in such a stimulating fashion.

God's servant offers you convenient commentary books, which are practical, concise, and relevant. The Giver of Truth Biblical Commentary books are intellectually stimulating and include all that expensive multivolume commentaries have to offer. The Giver of Truth Biblical Commentary books present each book of the Bible, chapter by chapter, with consideration of the King James Bible as the standard and credit given to references within the text, which allows you to examine your Bible within its historical background and customs. The Giver of Truth Biblical Commentary illuminates the Bible within its time and place, which affords doctrinal penetrating insight into the practical application of truth for everyday living. God's servant, former entrepreneur and educator, has devoted years of study to religious theology after completing graduate degrees from community college, business college, state college, state university, Christian college, Seminary Studies, and Christian Growth Plans. God's servant has written monographs for various churches, planned seminary classes, taught Bible classes, and serviced in the Church for years, and now writes in an easy to read manner for those who want to complement their religious conscience with a solid foundation of Christianity, which offers a real relationship with God.

This book is empirically grounded on Zimbabwe and looks at hate speech as a bad omen for any society, family, nation and organisation. Hate speech divides and kills any peace, unity, tolerance, inclusivity, philosophy, race and geographical area, sacred places of worship, freedoms, identities, culture, unity and development in any space. It is not a good recipe for both animate and inanimate. It is never a solution to be applied in any geographical location. Hate speech, conflict and violence usually go together. The book clearly shows that, hate speech must never be tolerated in any religion, space (both private and public spaces), scriptures, society and nation. It is poisonous and manifests in different forms such as language (verbal or electronic), discriminations, beliefs, practices, laws, censorship, graffiti and even physical assault.

Poetics, the "science" of literature, makes us aware of how texts achieve their meaning. Poetics aids interpretation. If we know how texts mean, we are in a better position to discover what a particular text means. This is a book which offers fundamental guidelines for the sensitive reading and understanding of biblical stories. - Back cover.

Nearly all scholars divide Genesis into primeval and patriarchal history, though they debate the precise point of division. One reason advanced to justify the division is a thematic shift. In primeval history, the narrator focuses on the origin and spread of sin, as well as God's consequent curse and judgment on humanity. In patriarchal history, however, the spread of sin theme falls off the radar of most scholars. But these analyses of the primeval and patriarchal narratives are simplistic and inaccurate. In fact, the theme of human sin and the divine curse not only serve as the main themes of the Fall narrative, but they also continue to function as major themes in both the primeval and patriarchal narratives that follow. More particularly, human sin appears to increase at both individual and societal levels. Moreover, just as the primordial sin threatened to derail the advance of God's kingdom and fulfillment of the creation mandate, so the spread of human sin in postlapsarian history threatens to thwart God's redemptive plan, which consists in the restoration of his original creational intentions for divine and human eschatological fullness. This proves true even in the patriarchal narratives where the sins of God's chosen often threaten the very promise intended for their ultimate good. These facts, which the author attempts to demonstrate in the monograph, not only have important ramifications for the unity of the Genesis corpus, but they also have important implications for the doctrines of sin, justification, and sanctification.

The task of presenting for explicit view the store of appraisive terms our language affords has been undertaken in the conviction that it will be of interest not only to ethics and other philosophical studies but also to various areas of social science and linguistics. I have principally sought to do justice to the complexities of this vocabulary, the uses to which it is put, and the capacities its use reflects. I have given little thought to whether the inquiry was philosophical and whether it was being conducted in a philosophical manner. Foremost in my thoughts were the tasks that appeared to need doing,

among them these: explicit attention was to be given to the vocabulary by means of which we say we commend, judge, appraise, or evaluate subjects and subject matters in our experience; it was to be segregated from other language at least for the purpose of study; the types of appraisive resources that are at hand in a language such as English were to be classified in some convincing and not too artificial manner; and an empirical standpoint was to be developed for a better view of appraisal, evaluation, and judging within the framework of other ways we have of responding to our surroundings such as appetite and emotion on one side and factual registering and theorizing about states of affairs on the other. Such an inquiry has never been undertaken in quite this manner before.

Shakespeare's plays were written some four hundred years ago, and while his characters are enduring, they are also alien. In grappling with the text of his plays, the modern actor must bring Shakespeare's Renaissance characters to life for a modern audience. And while it is difficult enough for twentieth-century spectators to make sense of the plays, it is also hard for modern actors to understand the Elizabethan world that created the personalities so vividly sketched in Shakespeare's texts. This reference is a convenient and practical guide for actors faced with the task of playing Shakespeare's characters. The volume begins with an overview of Elizabethan theatrical conventions, including the training of actors. It then looks at the dramatic tradition of personification, which Shakespeare's world inherited from the medieval stage. Later chapters give special attention to how language reveals character and to the social and cultural contexts of the Renaissance. Throughout, the emphasis is on how to translate Shakespeare's text into action on the stage. While the volume contains much useful information, that information is presented to meet the special needs of theater professionals.

Biologists and anthropologists in Japan have played a crucial role in the development of primatology as a scientific discipline. Publication of *Primate Origins of Human Cognition and Behavior* under the editorship of Tetsuro Matsuzawa reaffirms the pervasive and creative role played by the intellectual descendants of Kinji Imanishi and Junichiro Itani in the fields of behavioral ecology, psychology, and cognitive science. Matsuzawa and his colleagues—humans and other primate partners—explore a broad range of issues including the phylogeny of perception and cognition; the origin of human speech; learning and memory; recognition of self, others, and species; society and social interaction; and culture. With data from field and laboratory studies of more than 90 primate species and of more than 50 years of long-term research, the intellectual breadth represented in this volume makes it a major contribution to comparative cognitive science and to current views on the origin of the mind and behavior of humans.

This book is an examination of characters in the books of Kings; showing how understanding and interpretation of key characters affects readings of the story. The volume begins with more general pieces addressing how the study of characters can shed light on the composition history of Kings and on how characters and characterization can be considered with respect to ethics, particularly with respect to the moral complexity of biblical characters. Contributors then consider key characters within the Kings narrative in depth, such as Nathan, Bathsheba, Solomon and Jezebel. The contributors use their

own specific expertise to analyze these characters and more, drawing on insights from literary theory and considering such approaches as questioning our view of a particular character with based on the character within the text with whom we identify. Contributors also assess whether or not characters as portrayed in the biblical text necessarily match up to their possible counterparts in history.

The book attempts to provide the essential information that postgraduates throughout India need to capture to effectively address the health problems that our children and youth may face in the times to come. Our objective is to be comprehensive yet concise and reader friendly, embracing both the new advances in science as well as the time-honored art of pediatric practice. Both Indian and international experts in respective fields have provided the details which have been further scrutinized for exposition and usefulness to pediatric postgraduates by a chosen team of eminent academicians. We have liberally included tables, line diagrams, images, clinical photographs, illustrative figures, flowcharts and algorithms in the main text. The book is divided in 10 major Parts and further arranged into 51 Sections to cover all aspects of postgraduate pediatric curriculum. Themes which have major public health relevance for India are extensively covered. It is almost impossible to cover all pediatric problems with the same degree of detail and hence a careful balance has been made in the details of description of diseases and their management to the needs of the students, and to keep the book to a manageable size. Take-home messages are provided at the end of each chapter. Selected recent references, mostly leading articles, reviews and position statements, are provided for more detailed information if desired by the student or the teacher.
