This is a health education manual with a difference! First, it is clearly written, in a friendly and easy to follow manner that will make it invaluable for the layman who does not have a full understanding of how the human body functions, to come to grips with the essential causes of diseases and medical cures. The writer, himself a medical doctor, often writes from the perspective of his own early background in a rural village in Ghana, and, indeed, for anyone growing up in an African context, this book will be a wonderful guide to better health. Then again, this book is unique in so far as it is addressed largely to the Christian reader. The writer's explanation of the nature of disease makes abundant sense, tracing, as he does, its origin to the fall of man in Eden, where the Creator made everything perfect and saw that "all was good." From a medical and Christian point of view this book will advocate a lifestyle that will best serve the reader to prevent disease, for prevention is always better than cure! And where a cure is needed, the right mental attitude, not forgetting the unlimited power of prayer, is probably the most important resource.

"Christian Medical and Dental Associations (CMDA) works on 242 medical and dental school campuses with over ten thousand students. I wish I could give each one of them this book! It contains the secrets of having contentment, academic success, a balanced life, and most importantly, a focus on Christ during your challenging days of training. Its insights and advice are invaluable. If you are a future or present med student, it should be at the top of your reading list—or you can just learn what it contains the hard way! I'm an overachiever and highly competitive like you—I wish I'd had this book when I was in medical school. In an atmosphere of pressure to master seemingly unlimited knowledge, that often becomes the recipe for depression, cynicism, spiritual stagnation, a radically unbalanced life, and, ultimately, burnout. Beyond Studying contains the secrets for avoiding those traps. If you apply them, you will not just survive but flourish!" —David Stevens MD, MA, Chief Executive Officer, Christian Medical and Dental Associations Discover how compelling truths from God's Word can transform your approach to studying medicine! Beyond Studying

Perhaps you've seen several doctors and not found a solution to your health challenges. Now, you're ready to take greater responsibility for your health, and you're looking for some answers. The trouble is, embracing a natural, and holistic lifestyle can be rewarding, and overwhelming at the same time. There's plenty of information out there, but whom do you trust? Many experts claim to be "holistic." However, when it comes to matters of the mind and the spirit, most resources come up short. Using Biblical

truths, *The Christian's Guide to Holistic Health* helps you navigate the complexities of whole-person health. A genuinely holistic health model addresses not only the physical but the mental/emotional and the spiritual aspects of the human condition. If we want to reach our full health potential, we must address the whole person—body, mind, and spirit effectively. David uses his gift for teaching and brings a balanced view of science and scripture. He avoids extremes in theology, tackles complicated subjects, and makes them easy to read and understand. Whether you have a serious condition and need a breakthrough, or simply want to maintain your health, you'll find this information useful. This book puts you on the fast track to vibrant health, and vitality.

The Christian's Guide to Holistic Health

Your body is by God. God preprogrammed you to look great, have outrageous health, and experience incredible happiness. In the human body, God created a perfect design, equipped with all the organs, tissues, and cells necessary for health, production, and reproduction. The problem, asserts Dr. Ben Lerner, is when we as humans interfere with God's design for our bodies. Junk food, high-stress living, and neglecting exercise are just a few of the things we do to hinder our bodies' performance. In *Body by God*, Dr. Lerner offers a comprehensive plan for getting in touch with our bodies in four areas: nutrition, exercise, stress management, and time management. His "5-in-5" plan is designed to instill the good habits that will lead to optimum health benefits. Readers will learn how to get in shape with 10-minute workouts, reprogram the way they react to stress, and more. "Owner's Manual Tips" give specific ways to apply the material to real life. Our bodies are "fearfully and wonderfully made." With the help of *Body by God*, readers will learn how to achieve the highest level of performance from God's handiwork.

The Healthy Churches' Handbook

This book is a Handbook designed to aid you in dealing with the most difficult issues of the heart. The Handbook is divided into two parts for the Christian counselor, or leader. The first section defines tools and principles for dealing with the most difficult of Issues. The second section sets for Need Oriented Behavior as a primary cause - effect for difficult destructive systems of behavior. Using a conservative Biblical foundation, Dr. Bob adds his expertise from his field of Psychology to provide an effective counseling model called "Christ-O-Therapy." Within this model you will be guided through "soul mapping" and the use of other tools, so as to discover the "cause and effect" of your own "issues." Understanding does not remove the problem, but it is frequently the first step along the journey to wholeness. The focus of Bob & Laura's work for the past 12 years has been in local church consultation and pastor's conferences. They help local churches navigate crisis situations through "Life Coaching" and "Intensives" (a 6-month program for local pastors dealing with Personal Growth, Ministry Skill Development, & Ministry Strategy Development). Consulting with a team of other professionals and leaders, they work in developing strategies, problem solving, leadership training, and counseling development. Religion: A Clinical Guide for Nurses

Living in an era of highly technical medicine is comforting and sometimes confusing. How should Christians make life and death decisions? How do we move from an ancient text like the Bible to twenty-first-century questions about organ transplantation, stem-cell research, and human cloning? What kind of care do we owe one another at the end of life? Is euthanasia a Christian option? Using a dialogue format, an ethicist and physician talk about how to think about thorny ethical issues. Combining their backgrounds in medicine and theology, they deal with real-life moral questions in an accessible way. C. Ben Mitchell and D. Joy Riley let readers eavesdrop on their conversation about the training of doctors, the interpretation of the Bible, and controversial issues like abortion, assisted-suicide, genetic

engineering, and in vitro fertilization. The book examines these topics under three general headings: the taking of life, the making of life, and the faking of life. Christian Bioethics is a guidebook for pastors, health care professionals and families—anyone facing difficult decisions about health care.

DO THE NEXT THING is a book of encouragement and a manual of how to regain control over your life when you get the diagnosis of Cancer. Everything in your life seems to be spinning out of control even as you try to reel it back in. It is a guide for caregivers and those who want to reach out to someone

suffering from the disease but aren't quite sure how they can best minister to the person who is in the battle. **DO THE NEXT THING** is written through the view of a husband's eyes on how to walk his wife through the fears and the unknown. This book is a how-to and a love story of his love for her and the love shown by others. Most of all it is a book about God's love and faithfulness in our darkest hour. I knew Glen for years, and he practiced what he preached- Especially when it came to loving his wife. He is a great model for any man who is walking his wife through difficult times. -Francis Chan When it comes to growing in the faith, we often know what the right thing to do is. Actually doing it is another matter. In this excellent little book by Glen, he does more than encourage us; he pushes us to do the next, right thing that invariably leads to real maturity. I highly recommend it! -Joni Eareckson Tada
Joni and Friends International Disability Center
Do the Next Thing is a practical manual for both the cancer patient and the caregiver. By emphasizing the spiritual, Pastor Jackson turns the trial of battling cancer into a means for spiritual elevation. This book addresses and answers questions that every patient asks but often not to medical professionals. Too frequently, the health care provider glosses over the emotional component of a patient's fight against cancer. **Do the Next Thing** provides an intimate look at this dynamic from the perspective of a loving husband and a man of faith. I truly feel that individuals with cancer, their caregivers, and medical professionals will all benefit greatly from the anecdotes and advice so wittily and accurately shared in this work. In Live Not By Lies, blogger and author Rod Dreher attempts to awaken the slumbering American church to fight against the totalitarianism that he sees rising in the US. Progressives seek to turn America away from its religious values, and Christians must be prepared to resist the dismantling of their faith. What does this SNAP Summary Include? - Synopsis of the original book - Key takeaways from each chapter - The pro-totalitarian signs Christians should watch out for - How Christians can resist and survive tyranny - Editorial Review - Background on Rod Dreher
About the Original Book: Are American Christians ready to live under a totalitarian regime? This is the question that Rod Dreher wants his fellow believers to ask themselves. They have allowed materialism and comfort to infiltrate the church, even as their religious freedoms and values are being threatened by the radical Progressive agenda. In his book, **Live Not By Lies**, Dreher recounts his conversations with Christian dissidents who lived through communism in the Soviet Union. These survivors warn that socialism will spell the end of America if people don't wake up. This is an insightful manual that Christians can use to form a strong resistance against totalitarianism in America. **DISCLAIMER:** This book is intended as a companion to, not a replacement for, **Live Not By Lies**. A Hospital Visitation Manual

When one investigates the literal landscape in search of a manual that discusses how spirituality and medicine can be translated in the ministry and medical professions, not much is found. Drs. Hodges and Betton have breached this chasm and produced a manuscript devoted to the Christian perspective of translating these two important cultural paradigms. Over the past 10 years, these authors have convened several of this nation's leaders in the spirituality and medicine disciplines, through the annual Howard University Hospital Spirituality and Medicine Seminar Series. In June of 2009, they identified

11 persons who represent both medicine and ministry (pastors/preachers and physicians) and spent an entire day discussing ways to inform the public of the outcome of their discussions. The result is this wonderful, pocket-sized manual entitled, *Translating Spirituality and Medicine in the Healing Professions*. It is filled with cutting-edge, bed-side tips to help the physician, academician, pastoral care counselor, community minister/pastor and lay person when they extend their care to those in need, whether these persons are hospitalized, in an extended care facility, hospice environment, or in their personal homes. The manual is divided into four, thought provoking chapters, each ending with a section devoted to translating the topic into practice. Chapter one discusses the healthcare practitioner and his/her call to the ministry. It places particular emphasis on the primacy of one over the other. Chapter two provides resources available to both the pastoral care professional and the healthcare practitioner-clergy person when tackling general health issues and end-of-life care. Examples of living wills, advance directives, and Internet resources are provided. Chapter three discusses the important topic of avoiding burnout (both healthcare professional and clergy) and Chapter four discusses the health-faith paradigm, devoting its emphasis on engaging the parishioner. A special section, thinking outside of the box is also included. It highlights daunting neighborhood issues and explains how the church employed very effective techniques to create positive change! A concluding section contains a wealth of resources that are particularly useful examples for the professional or laity when translating these two important disciplines in the healing professions. Reverend Mark J. Wade, MD, Associate Pastor, True Vine Christian Center, Fair Lawn, NJ

When Healthcare Hurts is an evidence-based, critical look at the potential pitfalls and opportunities of global health volunteerism. Greg Seager, Founder, and CEO of Christian Health Service Corps, asks thought-provoking questions about global health projects that can illuminate areas of needed improvement and uncover some of our own harmful biases. Mr. Seager draws from scholarly research, WHO, UNICEF, and other authoritative sources to compose six best practice guidelines in global health. The combination of real-world case studies and the author's wealth of experience makes this book a must-read for anyone serving in short or long-term global health initiatives.

Summary & Analysis of Live Not By Lies

This book is written for committed Christians. It is intended to help those people who would call themselves "born-again" Christian believers and who, partly because of their personal spiritual experiences, have difficulty understanding or accepting the facts of mental illness or emotional disorders. Many have believed that somehow their newfound relationship with God should necessarily protect them from emotional illness, which is regarded as sin or a punishment for sin. Many have also believed that prayer,

repentance, and Bible study, without human help, can cure all such problems. Very often they can, but not always. Sometimes God uses human means to aid His healing process. - Preface.
