Law Express Question and Answer: Family Law

From the BESTSELLING Law Express revision series. Law Express Question and Answer: Family Law is designed to ensure you get the most marks for every answer you write by improving your understanding of what examiners are looking for, helping you to focus in on the question being asked and showing you how to make even a strong answer stand out.

Family Law Q&A

The new edition of Q&A Family Law contains fifty exam type questions and answers which incorporate the most recent decisions and statute law on a whole range of family law topics. Each chapter contains an overview or summary on the law concerning a particular topic, which is then explored through the use of problem and essay questions. This new edition has been updated to keep pace with the rapid changes taking place in family law in the UK. The status of the Family Law Act divorce proposals is critically examined, with an examination of the existing divorce law, and how it might change if the Family Law Act is fully implemented. Important recent court decisions on family financial matters and under the Children Act 1989 are highlighted, as are the changes to the child support legislation. The Human Rights Act 1999 and its likely to impact on Family Law matters is a new addition to this volume.

Questions & Answers

The Concentrate Q&A series is the result of a collaboration involving hundreds of law students and lecturers from universities across the UK. ANSWERING ALL YOUR QUESTIONS - EVEN THE ONES YOU'RE AFRAID TO ASK! What will this process cost me? What exactly is a retainer anyway? How do I find a lawyer? Will they keep my secrets? Can we avoid going to court? What do all these terms mean: motion, order, applicant, financial disclosure, valuation date? How long will all this take to settle? Is there a difference between mediation, arbitration and collaborative divorce? When do I go to court? When do I sign an agreement? How many steps are there in this process? You'll find the answers to these questions - and more - in Everything You Always Wanted to Know About Divorce. It goes without saying that family law is complicated. As an experienced divorce lawyer, Russell Alexander saw a need for a comprehensive, but easy-to-read synopsis of the ins and outs of the Ontario family law process. With its Q&A lists, real-life cases and commentary, this book aims to give Ontario readers a simple-to-understand resource for answering their family law questions.

The fourth edition of Blackstone's Questions and Answers Family Law shows students how to make the most of their examination and coursework potential in this perennially popular and important subject. Students are given the opportunity to practise their exam techniques and evaluate and assess their progress. The fourth edition of this popular student text builds upon its past successes in showing undergraduates how to translate their knowledge of family and child law into a successful and confident approach to coursework and exams. It demonstrates, by example, how to attack problem and essay questions in family and child law. All aspects of family law are covered, including marriage and cohabitation, children, money and property - and the authors explain how a well-directed knowledge of the relevant public and private law can be employed to achieve better results. They also cover recent developments in such key areas as civil partnerships, domestic violence, gender recognition, assisted reproduction, and pre-marital contracts. Online Resource Centre The new edition is accompanied by an Online Resource Centre offering links to key sites, and a subject specific glossary.

This comprehensive new Family Law casebook examines the conflict between respect for family privacy and deference to state authority. Using timely and well-chosen materials, authors Appleton and Weisberg convey an acute awareness of the impact of legal rules on people's lives. MODERN FAMILY LAW balances theory, practice, and history as it raises questions about the actual and appropriate role of the state in family decision-making. The authors concentrate on issues particular to family law, keeping their book well-focused and concise. After an introductory chapter on the constitutional right to privacy, The discussion progresses to: legal regulation of marriage definition of 'family' and nontraditional families with respect to housing, zoning, government benefits, torts, contracts, employment, and health the state's role in the regulation of divorce child custody adoption and new reproductive technologies Structured for maximum effectiveness as a teaching and learning tool, MODERN FAMILY LAW offers: heightened sensitivity to issues of gender, class, race, disability, and sexual orientation interdisciplinary perspectives from history, psychology, social work, medicine, and philosophy realistic questions and problems, derived mainly from actual cases and current events a preview of where the law is heading Instructors will appreciate the casebook's flexibility for use in courses of varying lengths and emphasis. A superior Teacher's Manual provides answers to all problems, suggests how much time to devote to each area, and contains sample syllabi. If you want your students to carefully consider what set of personal relationships qualify for legal protection and for what purposes, adopt MODERN FAMILY LAW for your next course.

Q&A Family Law 2011-2012

Family Breakdown: A Legal Guide is a fully revised edition of Divorce In Ireland, first published in 1997, with a second edition in 2003. In Ireland, family law has witnessed immense changes in the last decade with, for example, the introduction of civil partnership in 2011, amendments to the in camera rules and developing European jurisprudence. The book has been expanded to include new family law issues, such as civil partnership and changed rules for common law spouses. The new Court of Appeal, civil legal aid, and alternatives to court are covered, as well as the latest, comprehensive case law from Ireland's Supreme Court and High Court, on everything from divorce and judicial separation to annulment and prenuptial agreements. Additionally, the book includes pension and tax advice, the potential pitfalls when making a will, up-to-date marriage regulations, practical advice on appearing in court, and real-life questions and answers. It also contains a summary of all Irish family law legislation, legal forms, a glossary of legal terms, and a list of useful websites and contacts.

The pillar of OOPs concept includes encapsulation, inheritance, polymorphism, and abstraction.

This subpart explains encapsulation, inheritance, and polymorphism in Java.

Dynamic polymorphism allows multiple implementations of the inventory service

Overriding static and private methods is not allowed

Using default methods in Java interfaces for flexible implementation

Accessing parent property and overriding default methods

The finalize method is not called if the system GC is done.

Proper implementation of equals and hashCode methods is necessary to avoid duplicates in collections.

Compile time exceptions can be handled at compile time

FileNotFoundException is a checked exception and not a compile time exception.

Delegating exception handling to next method caller

Understanding the order of exception hierarchy is important while handling exceptions in Java.

finally block can be stopped from executing

String objects can be created using the new keyword or string literal

String is immutable

String class is immutable in Java

String buffer and StringBuilder are mutable, while String is immutable.

Creating an immutable class: Setter method write only getter method

Demonstrating how to avoid modifying a Date object in Java

Handling mutability in Java objects

Using the clone method to create a separate copy of an object.

It is recommended to use char array instead of String for storing passwords.

Writing custom marker interfaces in Java

The difference between AR list and linked list

Using generics with lists helps in avoiding type cast issues.

Creating a custom AR list to disallow duplicates

Set implementation allows duplicate objects if equals and hashCode methods are not overridden for custom objects.

The contract between equals and hashCode methods determines if duplicate objects are allowed

Sorting objects based on ID and name using Comparable and Comparator

Creating Comparators in Java for sorting objects based on different attributes.

Explanation of custom sorting using comparator

Fail-fast and fail-safe iterators in Java

ConcurrentHashMap is used when parallel thread access and modification is required.

ConcurrentHashMap does not allow adding null keys or values and throws a null pointer exception immediately.

ConcurrentHashMap uses segment locking or bucket locking

ConcurrentHashMap is preferred over Hashtable due to its locking mechanism.

Hing Collision

Hash map internally uses linked list nodes.

Understanding TreeMap in Java

The compareTo() method compares two objects and returns -1, 0, or 1 based on the comparison result.

Physics 15 Years' Solved Papers For Jee Main & Advanced

Our experts have created Mathematics: 15 Years Solved Papers for JEE Main and Advanced keeping in mind a distinct pattern emerging 2000 onwards and have covered all previous years' questions from 2004. We have chosen solved questions from the year 2004 in order to apprise students of at least two years' of 'subjective type' (numerical value) questions asked in the IIT entrance exam.

Entrepreneurship in South America

This book reveals a variety of issues facing entrepreneurs, SMEs, and entrepreneurship development across South America. The authors recognize that when it comes to entrepreneurship, not one size fits all. Therefore, this book has been designed to help business students understand the context of the enterprise. It highlights how countries differ in their scope of entrepreneurship, and how entrepreneurs are impacted by these differences. Each chapter is dedicated to a respective country and describes the status quo, challenges and prospects for entrepreneurship there. Specifically, the book helps students understand the nature of entrepreneurship in Argentina, Bolivia, Chile, Colombia, Ecuador, French Guiana, Guyana, Paraguay, Peru, Surinam, Uruguay and Venezuela.

Hexaflexagons and Other Mathematical Diversions

Martin Gardner's Mathematical Games columns in Scientific American inspired and entertained several generations of mathematicians and scientists. Gardner in his crystal-clear prose illuminated corners of mathematics, especially recreational mathematics, that most people had no idea existed. His playful spirit and inquisitive nature invite the reader into an exploration of beautiful mathematical ideas along with him. These columns were both a revelation and a gift when he wrote them; no one--before Gardner--had written about mathematics like this. They continue to be a marvel. This volume, originally published in 1959, contains the first sixteen columns published in the magazine from 1956-1958. They were reviewed and briefly updated by Gardner for this 1988 edition.

Dynamics in Action

What is the difference between a wink and a blink? The answer is important not only to philosophers of mind, for significant moral and legal consequences rest on the distinction between voluntary and involuntary behavior. However, "action theory"—the branch of philosophy that has traditionally articulated the boundaries between action and non-action, and between voluntary and involuntary behavior—has been unable to account for the difference. Alicia Juarrero argues that a mistaken, 350-year-old model of cause and explanation—one that takes all causes to be of the push-pull, efficient cause sort, and all explanation to be prooflike—underlies contemporary theories of action. Juarrero then proposes a new framework for conceptualizing causes based on complex adaptive systems. Thinking of causes as dynamical constraints makes bottom-up and top-down causal relations, including those involving intentional causes, suddenly tractable. A different logic for explaining actions—as historical narrative, not inference—follows if one adopts this novel approach to long-standing questions of action and responsibility.

Supply Chain Disruptions

One of the most critical issues facing supply chain managers in today's globalized and highly uncertain business environments is how to deal proactively with disruptions that might affect the complicated supply networks characterizing modern enterprises. *Supply Chain Disruptions: Theory and Practice of Managing Risk* presents a state-of-the-art perspective on this particular issue. *Supply Chain Disruptions: Theory and Practice of Managing Risk* demonstrates that effective management of supply disruptions necessitates both strategic and tactical measures – the former involving optimal design of supply networks; the latter involving inventory, finance and demand management. It shows that managers ought to use all available levers at their disposal throughout the supply network – like sourcing and pricing strategies, providing financial subsidies, encouraging information sharing and incentive alignment between supply chain partners – in order to tackle supply disruptions. The editors combine up-to-date academic research with the latest operational risk management practices used in industry to demonstrate how theoreticians and practitioners can learn from each other. As well as providing a wealth of knowledge for students and professors who are interested in pursuing research or teaching courses in the rapidly growing area of supply chain risk management, *Supply Chain Disruptions: Theory and Practice of Managing Risk* also acts as a ready reference for practitioners who are interested in understanding the theoretical underpinnings of effective supply disruption management techniques.

Social Monitoring for Public Health

Public health thrives on high-quality evidence, yet acquiring meaningful data on a population remains a central challenge of public health research and practice. Social monitoring, the analysis of social media and other user-generated web data, has brought advances in the way we leverage population data to understand health. Social media offers advantages over traditional data sources, including real-time data availability, ease of access, and reduced cost. Social media allows us to ask, and answer, questions we never thought possible. This book presents an overview of the progress on uses of social monitoring to study public health over the past decade. We explain available data sources, common methods, and survey research on social monitoring in a wide range of public health areas. Our examples come from topics such as disease surveillance, behavioral medicine, and mental health, among others. We explore the limitations and concerns of these methods. Our survey of this exciting new field of data-driven research lays out future research directions.

The Sunday School Journal

Winner of the Montreal Jewish Public Library's J. I. Segal Prize Originally published in 1991. In the eighteenth century, more than half of the world's Jewish population lived in Polish private villages and towns owned by magnate-aristocrats. Furthermore, roughly half of Poland's entire urban population was Jewish. Thus, the study of Jews in private Polish towns is central to both Jewish history and to the history of Poland-Lithuania. *The Jews in a Polish Private Town* seeks to investigate the social, economic, and political history of Jews in Opatów, a private Polish town, in the context of an increasing power and influence of private towns at the expense of the Polish crown and gentry in the eighteenth century. Hundert recovers an important community from historical obscurity by providing a balanced perspective on the Jewish experience in the Polish Commonwealth and by describing the special dimensions of Jewish life in a private town.

Official Verbatim Report of the Parliamentary Debates

This work is written during his resting periods at Lake Ochrid (1921) in poetic-prose style, similar in spirituality to the Psalms of David. Can those who are themselves homeless really build the temple for the Teacher of all builders? (...) When you build the best for Him, you are setting an example for your soul, showing her what she should be building within herself (...) You build Him expensive edifices, in order to remind your soul that she was intended for, a royal palace, and not for hovels of clay (...) But what will become of your temples (...) If the domes of your temples are forever higher than your souls? (...) If the width of your temples is forever wider than the narrowness of your souls? (...) If your altars are forever shining more brightly than the shrines of your souls? (...) They will become the dead monuments of dead souls. Meet one of the greatest Orthodox bishops of the 20th century, an theological writer and

a highly gifted orator, known as "The New Chrysostom." Saint Nikolai Velimirovich of Ohrid and Zhicha (1880 - 1956) was bishop in the Serbian Orthodox Church and the author of many Orthodox books.

The Colloquies of Erasmus

Life by Death By: BARD Ryan Butler is a young man in his mid-thirties progressing through a developing career working for an American Steel Corporation. He and several other managers are assigned to work on a due diligence project to determine if the corporation should take an interest in participating in the privatization of the Serbian Steel Industry. Unfortunately, their assignment begins in the late 1990 and the tensions in Yugoslavia are rising, eventually leading to civil wars following the declared independence of Slovenia, Croatia, and Bosnia from Yugoslavia. As their assignment progresses through the second quarter of 1991 they hear more frequently of the upcoming risk and are convinced the corporation will be extracting them from the Serbian assignment. Ryan was the one American who took a sincere interest in the Serbian people, culture, and religion. He developed many friendships and close relationships with many of the Serbians he met, both at work and in Belgrade where he lived. He wanted to see some more of the Serbian history and took time off in the middle of a week in June to take some of his friends on what was to be a trip to see some famous locations in Serbia. While on this trip, he and two of his friends witness something they were not supposed to see. This accident puts their lives in grave danger. Ryan's friends eventually figure out a way to get him back safely to the United States. He is still in danger and ends up with a new identity and had become an international consultant in the Steel Industry. He finds himself hired by the Minister of Steel in Moscow to help improve the productivity of the Steel Industry in Russia and the X USSR Satellite countries. After another terrible incident, he flees his second assignment and escapes traveling through Romania and ultimately finds himself back with his friends in Serbia at the height of the Yugoslav wars. This leads to the demise of many people. The story is fiction, entwined with actual historical events, people, and places. It also includes many of the real experiences of the writer while on assignment working at a steel mill in Serbia from 2006 to 2008.

Many applications within natural language processing involve performing text-to-text transformations, i.e., given a text in natural language as input, systems are required to produce a version of this text (e.g., a translation), also in natural language, as output. Automatically evaluating the output of such systems is an important component in developing text-to-text applications. Two approaches have been proposed for this problem: (i) to compare the system outputs against one or more reference outputs using string matching-based evaluation metrics and (ii) to build models based on human feedback to predict the quality of system outputs without reference texts. Despite their popularity, reference-based evaluation metrics are faced with the challenge that multiple good (and bad) quality outputs can be produced by text-to-text approaches for the same input. This variation is very hard to capture, even with

multiple reference texts. In addition, reference-based metrics cannot be used in production (e.g., online machine translation systems), when systems are expected to produce outputs for any unseen input. In this book, we focus on the second set of metrics, so-called Quality Estimation (QE) metrics, where the goal is to provide an estimate on how good or reliable the texts produced by an application are without access to gold-standard outputs. QE enables different types of evaluation that can target different types of users and applications. Machine learning techniques are used to build QE models with various types of quality labels and explicit features or learnt representations, which can then predict the quality of unseen system outputs. This book describes the topic of QE for text-to-text applications, covering quality labels, features, algorithms, evaluation, uses, and state-of-the-art approaches. It focuses on machine translation as application, since this represents most of the QE work done to date. It also briefly describes QE for several other applications, including text simplification, text summarization, grammatical error correction, and natural language generation.

Quality Estimation for Machine Translation

When the wicked have traveled a course of sin, and discover they have reason to fear the God;s judgement and wrath for their sins, they begin to wish there is no God to punish them, then by degrees they persuade themselves there is no God, and then they set themselves to study the arguments to support their opinion. This excellent book by John Bunyan covers the subject matter of the existence of heaven and hell as well as studies and dispells the arguments presented by sinners who argue there is no heaven and hell. Most do not know that Bunyan wrote some 60 books, and poetry too. And also almost a well-kept secret is that his doctrine was so biblically laced that many good men would call him too severe. He believed in, and taught, ALL the doctrines of grace, including double-predestination, or reprobation. Why then is he not smeared with the name of hyper-Calvinist like Goodwin, Gill, and others? I guess the same people ought to call Luther a hyper-Lutheran, for he believed and taught it, too. Why begin a review of Bunyan's writings with such a view of his doctrine? It is to show that a Pilgrim's Progress can come only from someone who believes and teaches ALL the counsel of God, without flinching, yea, with loving-kindness. Illegally, He sat in a jail cell over a river for 12 years with his Bible, Galatians by Luther, and another book or two. He had the choice of feeling miserable and murmuring, or of filling his time, thoughts, and energies with studying that Bible, and seeking a way to be of help to his more comfortable, but less dedicated, brothers and sisters. Listen, dear saints, you can't do any better than reading Bunyan. Like Gurnall, he covers everything here and there, and with

a sweetness that can come only from God. What a shame that his large heart should be encased in such small print. But, like digging gold, it is worth the time and trouble to dig spiritual gold. Bunyan (1628-1688) rose from an humble beginning to being a preacher to a little house church, to 12 years in jail because he would not agree to quit preaching, to a huge church in London. He wrote 66 books, nearly all while in jail.

The Book of Happy

From New York to New Delhi, COVID-19 has had a devastating impact on our urban world, turning the physical proximity which is central to the creative energy of the city into a potentially deadly threat to our health and well being. Yet most of us live or work in cities. They are a vital part of both local and global economies and shape the lives we lead and our interactions with others. How can we adjust to this new reality and what lessons can we learn from the past? In this urgently relevant book, leading experts Edward Glaeser and David Cutler, examine the history and future of the global city. They argue the biggest threats are those we have created ourselves - inequalities in housing, health, work and education - and that we need to address these as a matter of urgency if our cities are to continue to thrive and drive economic growth and prosperity. They conclude by proposing some practical measures that governments and citizens need to act on to ensure the survival of the city around the world. .

"Jugaad Innovation is the most comprehensive book yet to appear on the subject [of frugal innovation]." —The Economist A frugal and flexible approach to innovation for the 21st century Innovation is a key directive at companies worldwide. But in these tough times, we can't rely on the old formula that has sustained innovation efforts for decades—expensive R&D projects and highly-structured innovation processes. Jugaad Innovation argues the West must look to places like India, Brazil, and China for a new approach to frugal and flexible innovation. The authors show how in these emerging markets, jugaad (a Hindi word meaning an improvised solution born from ingenuity and cleverness) is leading to dramatic growth and how Western companies can adopt jugaad innovation to succeed in our hypercompetitive world. Outlines the six principles of jugaad innovation: Seek opportunity in adversity, do more with less, think and act flexibly, keep it simple, include the margin, and follow your heart Features twenty case studies on large corporations from around the world—Google, Facebook, 3M, Apple, Best Buy, GE, IBM, Nokia, Procter & Gamble, PepsiCo, Tata Group, and more—that are actively practicing jugaad innovation The authors blog regularly at Harvard Business Review; their work has been profiled in BusinessWeek, MIT Sloan Management Review, The Financial Times, The Economist, and more Filled with previously untold and engaging stories of resourceful jugaad innovators and entrepreneurs in emerging markets and the United States This groundbreaking book shows leaders everywhere why the time is right for jugaad to emerge as a powerful business tool in the West—and how to bring jugaad practices to their organizations.

Survival of the City

Village studies have dominated anthropological writing on India for a long time, though more recently, much has been written on the big cities. This study is original in focusing on a small-town bourgeoisie. Udupi, in South Kanara (north of Mangalore), was just a famous pilgrimage centre, then an administrative unit, until the Gauda Saraswat Brahmins arrived there in the 1890s. They were instrumental in creating a flourishing market and town, and their businesses still form the core of the local economy. Written like a piece of local history, this book tells the story of the town from the perspective of these 'Business Brahmins', but it also presents an analysis of kinship, religion and community in a Brahmin caste which, in some ways, does not correspond to the received ideas of Brahmin orthodoxy. As Konkani speakers from Goa, they constitute an ethnic minority as well as the main part of the local bourgeoisie. This blend of caste, class and ethnicity nevertheless merges into a strong and integrated identity, while its various aspects lead the author to take a critical attitude to those who would reduce the complexity of social stratification in India to a single model of the 'caste system'. Udupi is a small town and easily identified, so no attempt has been made to mask the main actors by using fictitious names. The author feels that any criticism that may emerge of them is amply compensated for by documenting their important role in building and developing the lively urban community that Udupi is today.

In the tradition of Kabul Beauty School and Start Something That Matters comes an inspiring story of social entrepreneurship from the co-founder of Kiva, the first online microlending platform for the working poor. Featuring lessons learned from successful businesses in the world's poorest countries, Jessica Jackley's Clay Water Brick will motivate readers to more deeply appreciate the incredible entrepreneurial potential that exists in every human being on this planet—especially themselves. "The heart of entrepreneurship is never about what we have. It's about what we do." Meet Patrick, who had next to nothing and started a thriving business using just the ground beneath his feet . . . Blessing, who built her shop right in the middle of the road, refusing to take the chance that her customers might pass her by . . . Constance, who cornered the banana market in her African village with her big personality and sense of mission. Patrick, Blessing, Constance, and many others are among the poorest of the world's poor. And yet they each had crucial lessons to teach Jessica Jackley—lessons about resilience, creativity, perseverance, and, above all, entrepreneurship. For as long as she could remember, Jackley, the co-founder of the revolutionary microlending site Kiva, had a singular and urgent ambition: to help alleviate global poverty. While in her twenties, she set off for Africa to finally meet the people she had long dreamed of helping. The insights of those she met changed her understanding.

Today she believes that many of the most inspiring entrepreneurs in the world are not focused on high-tech ventures or making a lot of money; instead, they wake up every day and build better lives for themselves, their families, and their communities, regardless of the things they lack or the obstacles they encounter. As Jackley puts it, "The greatest entrepreneurs succeed not because of what they possess but because of what they are determined to do." In *Clay Water Brick*, Jackley challenges readers to embrace entrepreneurship as a powerful force for change in the world. She shares her own story of founding Kiva with little more than a laptop and a dream, and the stories and the lessons she has learned from those across the globe who are doing the most with the least. Praise for *Clay Water Brick* "Jessica Jackley didn't wait for permission to change the world—she just did it. It turns out that you can too."—Seth Godin, author of *What to Do When It's Your Turn* "Fascinating . . . gripping . . . bursting with lessons . . . Jessica Jackley has written a remarkable book . . . so thoroughly well meaning and engagingly put it is too magnetic to put down."—*Financial Times* "Clay Water Brick is a tremendously inspiring read. Jessica Jackley, the virtuoso co-founder of the revolutionary microlending platform Kiva, shares uplifting stories and compelling lessons on entrepreneurship, resilience, and character."—Adam Grant, author of *Give and Take* "A blueprint for anyone who wants to make the world a better place and find fulfillment in the process, no matter how scarce their resources or how steep the challenge."—Arianna Huffington "This book is inspirational. And honest and practical. . . . Well written, thoughtful: a selfless account of how to succeed by doing right and following your heart."—Booklist

Cakavian dialects, the westernmost dialects of the South Slavic language area, have long attracted the attention of investigators, largely owing to the complexity of their prosodic systems. These prosodic systems are interesting not only from a typological point of view, but also contain material of great importance for the study of Slavic historical accentology. The description of a Cakavian dialect in Istria (Croatia) presented in this volume contributes data for South Slavic historical dialectology, and for historical accentology. The book includes an introduction on Cakavian and other South Slavic dialects, particularly those spoken in Istria, and chapters, based on fieldwork by the author, on the phonology, morphology and some syntactic phenomena of the dialect of Orbanici. In the chapters on morphology, special attention is paid to accentuation types. The book also contains dialect texts (70 pp.) and a lexicon, in which all attested forms are listed.

A suspenseful tale of witches, family, and magic from internationally bestselling author Stefan Bachmann. When a twelve-year-old orphan unexpectedly becomes the mistress of a seemingly abandoned castle, she is thrust into a mysterious plot involving murderous spells, false identity, and a magical battle of wills between the living and the dead. Readers of Kate Milford's *Greenglass House*, Victoria Schwab's *City of Ghosts*, and Diana Wynne Jones will be riveted. Twelve-year-old Zita, an orphan and a housemaid, has resigned herself to a life of drudgery when a strange letter arrives, naming her the only living heir to the Brydgeboren fortune. Now the mistress of the castle, Zita soon realizes foul play led to the death of her family. And as she is guided through lessons in the art of witchcraft by the somewhat mysterious Mrs. Cantanker, Zita begins to wonder who is friend and who is foe. Unforgettable and utterly enchanting, this stand-alone tale about family, belonging, and friendship will bewitch readers of Tahereh Mafi's *Whichwood*, Katherine Arden's *Small Spaces*, and Diana Wynne Jones's *Howl's Moving Castle*. *Cinders & Sparrows* is a magical page-turner by the author of *The Peculiar*, the acclaimed international bestseller.
