Muscle spindles are proprioceptors that respond to muscle stretch

What scientists and engineers want: A readout of muscle spindle signals during motor behavior

Multiscale mechanisms of muscle spindle afferent signals

Muscle-within-muscle design integrates central & peripheral motor control mechanisms

Complex muscle spindle firing across contexts

Muscle spindle firing history dependence, resembles muscle short-range stiffness

In passive muscle stretch, estimated muscle fiber force and yank explains spindle Ia firing rates

Hypothesis: Muscle spindle firing depends on intrafusal muscle fiber force and yank

Prediction: A continuum of muscle spindle firing phenotypes emerge by varying force & yank sensitivity

Tune to time course of recovery of history-dependent force during stretch Predicted response to stretch

Emergent: initial burst scales linearly with acceleration dynamic response scales nonlinearly with velocity

Emergent: Activating intrafusal muscle fibers by gamma drive increases spindle firing during stretch

Emergent: differential effects during stretch due to bag vs chain activation by gamma drive

Muscle spindle mechanical interactions with muscle-tendon unit

Firing and silencing of simulated spindle depends on intrafusal force and yank

firing in isometric contractions Simulation

Is a muscle spindle a physical internal model of muscle-body-environment interactions?

From intention to action Muscle spindle signals encode interactions between the body and environment

Muscle spindles increase in complexity with environmental dynamics and instability

Introdução

Um aviso

Uma definição do conceito de coração

O que significa ler a mente do outro?

O grande erro de Descartes

Não conseguimos nos comunicar sem estarmos conscientes

A nossa mente inconsciente não é perfeita

Capítulo 2: Como estabelecer um bom relacionamento com qualquer pessoa sem emitir nenhuma palavra

Adaptando-se ao modo de comunicação do outro

Quando a empatia é útil

O que você já sabe

Como usar a linguagem corporal

Copie a outra pessoa ou usando o termo adequado

Não invente interpretações

Linguagem corporal de bloqueio

A destruição da empatia

Transformar estados negativos de amigos e entes queridos

Não faça isso com alguém que tem um problema real

Observe como as pessoas em situação de as seguem e conduzem umas às outras

Se seguir os movimentos e as posições dela, você iniciará humores e processos mentais parecidos em si mesmo

O sentimento artificial é apenas uma questão de adquirir o hábito

Como é a sua voz?

Elementos da fala
