

Europe Between The Wars

[#Europe between wars](#) [#interwar period history](#) [#rise of fascism Europe](#) [#Great Depression Europe](#) [#Versailles Treaty aftermath](#)

Explore the pivotal era of Europe between the two World Wars, from 1918 to 1939. This period witnessed immense political upheaval, the rise of totalitarian regimes like fascism, profound economic crises including the Great Depression, and significant cultural shifts that collectively shaped the continent's destiny and led to the outbreak of World War II.

Europe Between the Wars

It had seemed 'the war to end wars', yet within twenty-one years the unthinkable had become the inevitable and Europe was burning again. How did it happen? In this sober yet compelling account of Europe between the wars, Martin Kitchen traces the course of the deepening crisis in Europe by looking first at the peace settlement itself, and then at the economic and social problems of the interwar years.

Europe Between the Wars

It had seemed 'the war to end wars', yet within twenty-one years the unthinkable had become the inevitable and Europe was burning again. How did it happen? In this sober yet compelling account of Europe between the wars, Martin Kitchen traces the course of the deepening crisis in Europe by looking first at the peace settlement itself, and then at the economic and social problems of the interwar years.

Europe Between the Wars

Martin Kitchen's compelling account of Europe between the wars sets the twenty-year crisis within the context of the profound sense of cultural malaise shared by many philosophers and artists, the economic crises that plagued a Europe ruined by war and the social upheavals caused by widespread unemployment and grinding poverty amid a noticeable improvement of living standards. This thoroughly revised edition, with completely new sections on intellectual, cultural and social history is richly illustrated with contemporary photographs. It is an up-to-date and lively account of a critical period of European history when the old world collapsed, the dictators offered seemingly exciting alternatives, and democracies were put to the supreme test. Written for undergraduate students studying 20th century European history, this new edition of a classic will challenge and provoke a deeper understanding of the interwar years.

Women in Europe between the Wars

The central aim of this interdisciplinary book is to make visible the intentionality behind the 'forgetting' of European women's contributions during the period between the two world wars in the context of politics, culture and society. It also seeks to record and analyse women's agency in the construction and reconstruction of Europe and its nation states after the First World War, and thus to articulate ways in which the writing of women's history necessarily entails the rewriting of everyone's history. By showing that the erasure of women's texts from literary and cultural history was not accidental but was ideologically motivated, the essays explicitly and implicitly contribute to debates surrounding canon formation. Other important topics are women's political activism during the period, antifascism, the contributions made by female journalists, the politics of literary production, genre, women's relationship with and contributions to the avant-garde, women's professional lives, and women's involvement in voluntary associations. In bringing together the work of scholars whose fields of expertise are diverse but whose interests converge on the inter-war period, the volume invites readers to make connections and comparisons across the whole spectrum of women's political, social, and cultural activities throughout Europe.

The European Economy Between the Wars

The European Economy Between the Wars provides a full and up-to-date economic history of Europe in the inter-war period. The authors place the Great Depression of 1929-33 and the associated financial crisis at the centre of the narrative, and present these as both the culmination of the economic consequences of the First World War, the post-war peace treaties, and the policies and practices of the 1920s, and as a powerful influence on the subsequent economic history of the 1930s. Indescribing and explaining these developments, the authors show that errors in international economic policy, especially the commitment to the gold standard, were a principal cause of both the deep crisis and the partial recovery. The overall theme is illustrated at every point by a discussion of similarities and contrasts in the economic history and policies of individual countries, large and small. The basic approach is chronological, the style is clear and straightforward, and the book is accessible to students in a range of disciplines. The work takes full account of recent research, and there is an annotated guide to further reading with a substantial bibliography.

Eastern Europe Between the Wars, 1918-1941

The region between the Baltic and the Black Sea was marked by a set of crises and conflicts in the 1920s and 1930s, demonstrating the diplomatic, military, economic or cultural engagement of France, Germany, Russia, Britain, Italy and Japan in this highly volatile region, and critically damaging the fragile post-Versailles political arrangement. The editors, in naming this region as "Middle Europe" seek to revive the symbolic geography of the time and accentuate its position, situated between Big Powers and two World Wars. The ten case studies in this book combine traditional diplomatic history with a broader emphasis on the geopolitical aspects of Big-Power rivalry to understand the interwar period. The essays claim that the European Big Powers played a key role in regional affairs by keeping the local conflicts and national movements under control and by exploiting the region's natural resources and military dependencies, while at the same time strengthening their prestige through cultural penetration and the cultivation of client networks. The authors, however, want to avoid the simplistic view that the Big Powers fully dominated the lesser players on the European stage. The relationship was indeed hierarchical, but the essays also reveal how the "small states" manipulated Big-Power disagreements, highlighting the limits of the latter's leverage throughout the 1920s and the 1930s.

Wars and Betweenness

East Central Europe Between The Two World Wars is a sophisticated political history of East Central Europe in the interwar years. Written by an eminent scholar in the field, it is an original contribution to the literature on the political cultures of Poland, Czechoslovakia, Hungary, Yugoslavia, Romania, Bulgaria, Albania, and the Baltic states.

Knaves, Fools and Heroes in Europe Between the Wars

The US invasion of Iraq in 2003 was done mainly, if one is to believe US policy at the time, to liberate the people of Iraq from an oppressive dictator. However, the many protests in London, New York, and other cities imply that the policy of "making the world safe for democracy" was not shared by millions of

people in many Western countries. Thinking about this controversy inspired the present volume, which takes a closer look at how society responded to the outbreaks and conclusions of the First and Second World Wars. In order to examine this relationship between the conduct of wars and public opinion, leading scholars trace the moods and attitudes of the people of four Western countries (Great Britain, France, Germany and Italy) before, during and after the crucial moments of the two major conflicts of the twentieth century. Focusing less on politics and more on how people experienced the wars, this volume shows how the distinction between enthusiasm for war and concern about its consequences is rarely clear-cut.

East Central Europe between the Two World Wars

First published over thirty years ago, *War in European History* is a brilliantly written survey of the changing ways that war has been waged in Europe, from the Norse invasions to the present day. Far more than a simple military history, the book serves as a succinct and enlightening overview of the development of European society as a whole over the last millennium. From the Norsemen and the world of the medieval knights, through to the industrialized mass warfare of the twentieth century, Michael Howard illuminates the way in which warfare has shaped the history of the Continent, its effect on social and political institutions, and the ways in which technological and social change have in turn shaped the way in which wars are fought. This new edition includes a fully updated further reading and a new final chapter bringing the story into the twenty-first century, including the invasion of Iraq and the so-called 'War against Terror'.

The Legacies of Two World Wars

Europe.

War in European History

The hotel that I love like a fatherland is situated in one of the great port cities of Europe, and the heavy gold Antiqua letters in which its banal name is spelled out shining across the roofs of the gently banked houses are in my eye metal flags, metal bannerets that instead of fluttering shine out their greeting. In the 1920s and 30s, Joseph Roth travelled extensively in Europe, leading a peripatetic life living in hotels and writing about the towns through which he passed. Incisive, nostalgic, curious and sharply observed - and collected together here for the first time - his pieces paint a picture of a continent racked by change yet clinging to tradition. From the 'compulsive' exercise regime of the Albanian army, the rickety industry of the new oil capital of Galicia, and 'split and scalped' houses of Tirana forced into modernity, to the individual and idiosyncratic characters that Roth encounters in his hotel stays, these tender and quietly dazzling vignettes form a series of literary postcards written from a bygone world, creeping towards world war.

Europe in the Era of Two World Wars

Gale Researcher Guide for: *Europe between the Wars: From Peace Settlement to the Brink of War* is selected from Gale's academic platform Gale Researcher. These study guides provide peer-reviewed articles that allow students early success in finding scholarly materials and to gain the confidence and vocabulary needed to pursue deeper research.

The Hotel Years

At the end of 1918 one prescient American historian began to write a history of the Great War. "What will you call it?" he was asked. "The First World War," was his bleak response. In *Between the Wars* Philip Ziegler examines the major international turning points - cultural and social as well as political and military - that led the world from one war to another. His approach is panoramic, touching on all parts of the world where history was being made, examining Gandhi's March to the Sea and the Chaco War in South America alongside Hitler's rise to power. It is the tragic story of a world determined that the horrors of the First World War would never be repeated, yet committed to a path which in hindsight was inevitably destined to end in a second, even more devastating conflict. Each chapter bears the unmistakable stamp of Ziegler's scholarship: a keen eye for the telling anecdote, elegant and fluid prose, and calm and fair judgments. In a world that grows ever more uncertain, its perspective on how hopes of peace can dissolve into the promise of war becomes more relevant with each passing day.

Gale Researcher Guide for: Europe between the Wars: From Peace Settlement to the Brink of War

The European Economy between the Wars, (OUP, 1997) has become the definitive economic history of Europe in the inter-war period. Placing the Great Depression of 1929-33 and the associated financial crisis at the center of the narrative, the authors comprehensively examined the lead-up to and consequences of the depression and recovery. The authors now expand their scope to include the entire world economy, and have created a new edition: The World Economy between the Wars. New material focuses on the structure of the world economy in the 1920s, including a special focus on the United States, Japan, and Latin America.

Between the Wars

A look at Europe and America after The Great War and the conditions that spawned World War II. Columns written by a small-town southern Editor writing for the folks back home in 1923 and 1924.

The World Economy between the Wars

The period spanning the two World Wars was unquestionably the most catastrophic in Europe's history. Despite such undeniably progressive developments as the radical expansion of women's suffrage and rising health standards, the era was dominated by political violence and chronic instability. Its symbols were Verdun, Guernica, and Auschwitz. By the end of this dark period, tens of millions of Europeans had been killed and more still had been displaced and permanently traumatized. If the nineteenth century gave Europeans cause to regard the future with a sense of optimism, the early twentieth century had them anticipating the destruction of civilization. The fact that so many revolutions, regime changes, dictatorships, mass killings, and civil wars took place within such a compressed time frame suggests that Europe experienced a general crisis. Indeed in the early 1940s both Charles de Gaulle and Winston Churchill referred to a 'thirty years war'. Why did so many crises rage across the continent from 1914 until the end of the Second World War? Why did the winds of destruction affect some regions more than others? The Oxford Handbook of European History, 1914-1945 reconsiders the most significant features of this calamitous age from a transnational perspective. It demonstrates the degree to which national experiences were intertwined with those of other nations, and how each crisis was implicated in wider regional, continental, and global developments. Readers will find innovative and stimulating chapters on various political, social, and economic subjects by some of the leading scholars working on modern European history today.

A.B. Jordan - A Southern Editor's View of Europe Between the Wars

The Second World War left Europe in chaos. Landscapes had been ravaged, entire cities razed and more than 35 million people killed. Across most of the continent, the institutions that we now take for granted - such as the police, the media, transport, local and national government - were either entirely absent or hopelessly compromised. Crime rates soared, economies collapsed, and the European population hovered on the brink of starvation. In this groundbreaking study of the years that followed the war, Keith Lowe describes a continent still racked by violence, where large sections of the population had yet to accept that the war was over. He outlines the warped morality and the insatiable urge for vengeance that were the legacy of the conflict. He describes the ethnic cleansing and civil wars that tore apart the lives of ordinary people from the Baltic Sea to the Mediterranean, and the establishment of a new world order that finally brought stability to a shattered continent. These were themes, he shows, that existed across the whole of Europe - east and west. Based on original documents, interviews and scholarly literature in eight different languages, *Savage Continent* is a window on the brief, chaotic period between the end of World War II and the beginning of the Cold War. It is the first major history of the period in any language.

The Oxford Handbook of European History, 1914-1945

By the time the First World War ended in 1918, eight million people had died in what had been perhaps the most apocalyptic episode the world had known. This Very Short Introduction provides a concise and insightful history of the 'Great War', focusing on why it happened, how it was fought, and why it had the consequences it did. It examines the state of Europe in 1914 and the outbreak of war; the onset of attrition and crisis; the role of the US; the collapse of Russia; and the weakening and eventual surrender of the Central Powers. Looking at the historical controversies surrounding the causes and conduct of war, Michael Howard also describes how peace was ultimately made, and the potent legacy

of resentment left to Germany. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

European Democracy Between the Wars

This volume examines conflicts over food and their implications for European societies in the first half of the Twentieth century. Food shortages and famines, fears of deprivation, and food regulations and controls were a shared European experience in this period. Conflicts over food, however, developed differently in different regions, under different regimes, and within different social groups. These developments had stark consequences for social solidarity and physical survival. Ranging across Europe, from Scandinavia and Britain to Germany, Italy and the Soviet Union, this volume explores the political, economic and cultural dynamics that shaped conflicts over food and their legacies.

Savage Continent

'This war is not the end but the beginning of violence. It is the forge in which the world will be hammered into new borders and new communities. New molds want to be filled with blood, and power will be wielded with a hard fist.' Ernst Jünger (1918) For the Western allies 11 November 1918 has always been a solemn date - the end of fighting which had destroyed a generation, and also a vindication of a terrible sacrifice with the total collapse of their principal enemies: the German Empire, Austria-Hungary and the Ottoman Empire. But for much of the rest of Europe this was a day with no meaning, as a continuing, nightmarish series of conflicts engulfed country after country. In this highly original, gripping book Robert Gerwarth asks us to think again about the true legacy of the First World War. In large part it was not the fighting on the Western front which proved so ruinous to Europe's future, but the devastating aftermath, as countries on both sides of the original conflict were wrecked by revolution, pogroms, mass expulsions and further major military clashes. If the War itself had in most places been a struggle purely between state-backed soldiers, these new conflicts were mainly about civilians and paramilitaries, and millions of people died across central, eastern, and south-eastern Europe before the USSR and a series of rickety and exhausted small new states came into being. Everywhere there were vengeful people, their lives racked by a murderous sense of injustice, and looking for the opportunity to take retribution against enemies real and imaginary. Only a decade later, the rise of the Third Reich and other totalitarian states provided them with the opportunity they had been looking for.

The First World War: A Very Short Introduction

This book examines how rural Europe as a hybrid social and natural environment emerged as a key site of local, national and international governance in the interwar years. The post-war need to secure and intensify food production, to protect contested border areas, to improve rural infrastructure and the economic viability of rural regions and to politically integrate rural populations, gave rise to a variety of schemes aimed at modernizing agriculture and remaking rural society. The volume examines discourses, institutions and practices of rural governance from a transnational perspective, revealing striking commonalities across national and political boundaries. From the village town hall to the headquarters of international organizations, local authorities, government officials and politicians, scientific experts and farmers engaged in debates about the social, political and economic future of rural communities. They sought to respond to both real and imagined concerns over poverty and decline, backwardness and insufficient control, by conceptualizing planning and engineering models that would help foster an ideal rural community and develop an efficient agricultural sector. By examining some of these local, national and international schemes and policies, this volume highlights the hitherto under-researched interaction between policymakers, experts and rural inhabitants in the European countryside of the 1920s and '30s.

Food and Conflict in Europe in the Age of the Two World Wars

Europe's second Thirty Years' War—an epoch of blood and ashes Fire and Blood looks at the European crisis of the two world wars as a single historical sequence: the age of the European Civil War (1914–1945). Its overture was played out in the trenches of the Great War; its coda on a ruined continent. It opened with conventional declarations of war and finished with “unconditional surrender.” Proclamations of national unity led to eventual devastation, with entire countries torn to pieces. During these three decades of deepening conflicts, a classical interstate conflict morphed into a global civil war,

abandoning rules of engagement and fought by irreducible enemies rather than legitimate adversaries, each seeking the annihilation of its opponents. It was a time of both unchained passions and industrial, rationalized massacre. Utilizing multiple sources, Enzo Traverso depicts the dialectic of this era of wars, revolutions and genocides. Rejecting commonplace notions of "totalitarian evil," he rediscovers the feelings and reinterprets the ideas of an age of intellectual and political commitment when Europe shaped world history with its own collapse.

The Vanquished

This book provides an accessible study of the neglected but highly important series of wars fought for control of the Baltic and Northeastern Europe during the period 1558-1721. It is the first comprehensive history which considers the revolution in military strategy which took place in the battlefields of Eastern Europe. Robert Frost examines the impact of war on the very different social and political systems of Sweden, Denmark, Poland-Lithuania and Russia and he explains why it was Russia that emerged victorious from these wars. Based on extensive primary and secondary research (including much material that is unfamiliar in English) this book makes an important contribution to the debate on military change and political development in early modern Europe.

Governing the Rural in Interwar Europe

The region between the Baltic and the Black Sea was marked by a set of crises and conflicts in the 1920s and 1930s, demonstrating the diplomatic, military, economic or cultural engagement of France, Germany, Russia, Britain, Italy and Japan in this highly volatile region, and critically damaging the fragile post-Versailles political arrangement. The editors, in naming this region as "Middle Europe" seek to revive the symbolic geography of the time and accentuate its position, situated between Big Powers and two World Wars. The ten case studies in this book combine traditional diplomatic history with a broader emphasis on the geopolitical aspects of Big-Power rivalry to understand the interwar period. The essays claim that the European Big Powers played a key role in regional affairs by keeping the local conflicts and national movements under control and by exploiting the region's natural resources and military dependencies, while at the same time strengthening their prestige through cultural penetration and the cultivation of client networks. The authors, however, want to avoid the simplistic view that the Big Powers fully dominated the lesser players on the European stage. The relationship was indeed hierarchical, but the essays also reveal how the "small states" manipulated Big-Power disagreements, highlighting the limits of the latter's leverage throughout the 1920s and the 1930s.

Fire and Blood

"... a carefully crafted and important book... a first-class contribution to the literature on modern Europe." --American Historical Review "... valuable... the first historical work to attempt a 'synthetic sketch' of the problems indicated in the title." --Journal of Polish Jewish Studies An illuminating study of the demographic, cultural, and socioeconomic condition of East Central European Jewry, the book focuses on the internal life of Jewish communities in the region and on the relationships between Jews and gentiles in a nationalist environment.

Eastern Europe Between the Wars 1918-1941. By Hugh Seton-Watson. (2. Ed.)

This collection shows the importance of a comparative European framework for understanding developments in the popular press and journalism between the wars. This was, it argues, a formative and vital period in the making of the modern press. A great deal of fine scholarship on the development of modern forms of journalism and newspapers in the nineteenth and twentieth centuries has emerged within discrete national histories. Yet in bringing together essays on Britain, France, Germany, Italy and Poland, this book discerns points of convergence and divergence, and the importance of the European context in shaping how news was defined, produced and consumed. Challenging the tendency of histories of the press to foreground processes of 'Americanisation' and the displacement of older notions of the 'fourth estate' by new forms of human interest journalism, the chapters draw attention to the complex ways in which the popular press continued to be politicized throughout the interwar period. Building on this analysis, the book examines the forms, processes and networks through which newspapers were produced for public consumption. In a period of massive social, political and economic upheaval and conflict, the popular press provided a forum in which Europe's meanings and nature could be constructed and contested. The interpersonal, material and technological links between newspapers, news corporations and news agencies in different countries served to define the outlines

of Europe. Europe was called into being through the circulation of news and the practices and networks of the modern mass press traced in this volume. This publication is highly relevant to scholars of the history of journalism and cultural historians of interwar Britain and Europe. This book was originally published as a special issue of *Journalism Studies*.

The Northern Wars

Economic historians have perennially addressed the intriguing question of comparative development, asking why some countries develop much faster and further than others. Focusing primarily on Europe between 1914 and 1939, this present volume explores the development of thirteen countries that could be said to be categorised as economically backward during this period: Albania, Bulgaria, Estonia, Greece, Hungary, Latvia, Lithuania, Poland, Portugal, Romania, Spain, Turkey and Yugoslavia. These countries are linked, not only in being geographically on Europe's periphery, but all shared high agrarian components and income levels much lower than those enjoyed in western European countries. The study shows that by 1918 many of these countries had structural characteristics which either relegated them to a low level of development or reflected their economic backwardness, characteristics that were not helped by the hostile economic climate of the interwar period. It explores, region by region, how their progress was checked by war and depression, and how the effects of political and social factors could also be a major impediment to sustained progress and modernisation. For example, in many cases political corruption and instability, deficient administrations, ethnic and religious diversity, agrarian structures and backwardness, population pressures, as well as international friction, were retarding factors. In all this study offers a fascinating insight into many areas of Europe that are often ignored by economists and historians. It demonstrates that these countries were by no means a lost cause, and that their post-war performances show the latent economic potential that most harboured. By providing an insight into the development of Europe's 'periphery' a much more rounded and complete picture of the continent as a whole is achieved.

Wars and Betweenness

This book studies "armchair" travel writers who journeyed to Europe during the interwar period of 1919-1939. It focuses on travel conversations writers experienced as they sought the real Europe stripped of press reports and government propaganda. They encountered a continent where a cherished past was colliding with an ominous future.

The Jews of East Central Europe Between the World Wars

A fresh and suggestive interpretation of the relationship between veterans of the Great War and fascism in interwar Europe.

The Press and Popular Culture in Interwar Europe

Future War and the Defence of Europe offers a major new analysis of how peace and security can be maintained in Europe: a continent that has suffered two cataclysmic conflicts since 1914. Taking as its starting point the COVID-19 pandemic and way it will inevitably accelerate some key global dynamics already in play, the book goes on to weave history, strategy, policy, and technology into a compelling analytical narrative. It lays out in forensic detail the scale of the challenge Europeans and their allies face if Europe's peace is to be upheld in a transformative century. The book upends foundational assumptions about how Europe's defence is organised, the role of a fast-changing transatlantic relationship, NATO, the EU, and their constituent nation-states. At the heart of the book is a radical vision of a technology-enabling future European defence, built around a new kind of Atlantic Alliance, an innovative strategic public-private partnership, and the future hyper-electronic European force, E-Force, it must spawn. Europeans should be under no illusion: unless they do far more for their own defence, and very differently, all that they now take for granted could be lost in the maze of hybrid war, cyber war, and hyper war they must face.

Europe's Third World

This volume of essays examines one of the crucial periods in the evolution of the European rural economy and society, assessing the effects of the Second World War on the European countryside, and the impact of food and agricultural problems on the outcome of the war.

Traveling Europe Between the World Wars

The city of Trieste stands as a symbol of the Italian-Yugoslav border dispute in the first decade after the Second World War. The problem included a much larger territory which covers the wider area of Trieste: ranging from the Julian Alps in the north to the base of the Istrian peninsula in the south; in the area where the Italians meet the South Slavs. Moreover, after the Second World War it was an area of confrontation for two ideologies: western democracy and communism. It was the place where the Iron Curtain lay between the two worlds for many decades of the Cold War. Often discussed from the socio-economic point of view, military aspects of the Trieste Crisis remain remarkably under-reported - and not only in the English language. One of the primary reasons is the relative unavailability of relevant Italian and Yugoslav documentation, but also the general focus on political and ethnic issues instead. The Trieste Crisis focusses on military-related affairs in this part of the world from the 'race to Trieste' of May 1945 until the creation of the Free Territory of Trieste and the culmination of tensions between Italy and former Yugoslavia, in October 1953. By the later date, the crisis had reached a point where it resulted in the largest deployment of military forces from both countries. Correspondingly, this work provides a detailed account of the Allied, Italian and Yugoslav military presence in the area before, and their build-up during this near-war. Paying special attention to the description of the troops involved, their armament and equipment, the heavy weaponry deployed, and aerial and naval forces, The Trieste Crisis is illustrated by more than 150 photographs - most of them never published before - colour profiles and maps, and thus closing a gap in the history of the early Cold War in Europe of the mid-20th Century.

War Veterans and Fascism in Interwar Europe

Włodzimierz Borodziej and Maciej Górny set out to salvage the historical memory of the experience of war in the lands between Riga and Skopje, beginning with the two Balkan conflicts of 1912-1913 and ending with the death of Emperor Franz Joseph in 1916. The First World War in the East and South-East of Europe was fought by people from a multitude of different nationalities, most of them dressed in the uniforms of three imperial armies: Russian, German, and Austro-Hungarian. In this first volume of *Forgotten Wars*, the authors chart the origins and outbreak of the First World War, the early battles, and the war's impact on ordinary soldiers and civilians through to the end of the Romanian campaign in December 1916, by which point the Central Powers controlled all of the Balkans except for the Peloponnese. Combining military and social history, the authors make extensive use of eyewitness accounts to describe the traumatic experience that established a region stretching between the Baltic, Adriatic, and Black Seas.

Future War and the Defence of Europe

This is a book about economics and racism: During World War I, the liberal global economic system, based on principles of free trade and most-favored nation treatment and negotiated in gold parities, collapsed for good. The disintegration and collapse of commerce eventually led to racist cleansing, expulsion and mass murder. Against this background, this book offers new perspectives on the racist fault-lines that appeared and deepened in European economies after the end of what was regarded as the Great War. At what point did people start to ostracize their neighbors economically because they thought they were of a different ethnic group? Who decided who was to be excluded? Where did the fault-lines open? Where did the boundaries lie? How were they defined - by law, or by common practice? How much extra time and money were people prepared to spend in order to ostracize their neighbors? And what did that mean for the economy and society as such?

War, Agriculture, and Food

A new interpretation of the Cold War from the perspective of the smaller and middle powers in Asia, the Middle East and Europe.

Trieste Crisis 1953

Combining the history of ideas and the history of emotions, this work explores the convergence between political and cultural ideas of Europe and the idea of love in the period between the two world wars. It investigates European unity from a political viewpoint, but also from cultural and symbolic ones, taking a critical stand towards Euro-centrism.
