To Raise and Discipline an Army

Major General Enoch Crowder served as the Judge Advocate General of the United States Army from 1911 to 1923. In 1915, Crowder convinced Congress to increase the size of the Judge Advocate General's Office—the legal arm of the United States Army—from thirteen uniformed attorneys to more than four hundred. Crowder's recruitment of some of the nation's leading legal scholars, as well as former congressmen and state supreme court judges, helped legitimize President Woodrow Wilson's wartime military and legal policies. As the United States entered World War I in 1917, the army numbered about 120,000 soldiers. The Judge Advocate General's Office was instrumental in extending the military's reach into the everyday lives of citizens to enable the construction of an army of more than four million soldiers by the end of the war. Under Crowder's leadership, the office was responsible for the creation and administration of the Selective Service Act, under which thousands of men were drafted into military service, as well as enforcement of the Espionage Act and wartime prohibition. In this first published history of the Judge Advocate General's Office between the years of 1914 and 1922, Joshua Kastenberg examines not only courts-martial, but also the development of the laws of war and the changing nature of civil-military relations. The Judge Advocate General's Office influenced the legislative and judicial branches of the government to permit unparalleled assertions of power, such as control over local policing functions and the economy. Judge advocates also altered the nature of laws to recognize a person's diminished mental health as a defense in criminal trials, influenced the assertion of US law overseas, and affected the evolving nature of the law of war. This groundbreaking study will appeal to scholars, students, and general readers of US history, as well as military, legal, and political historians.

The Perfection of Military Discipline After the Newest Method, as Practised in England and Ireland ... Or the Industrious Souldiers Golden Treasury of Knowledge in the Art of Making War. ... To which is Added ... the Art of Gunnery, Or the Compleat Engineer, Etc

The British army was almost unique among the European armies of the Great War in that it did not suffer from a serious breakdown of discipline or collapse of morale. It did, however, inevitably suffer from disciplinary problems. While attention has hitherto focused on the 312 notorious 'shot at dawn' cases, many thousands of British soldiers were tried by court martial during the Great War. This book provides the first comprehensive study of discipline and morale in the British Army during the Great War by using a case study of the Irish regular and Special Reserve batallions. In doing so, Timothy Bowman demonstrates that breaches of discipline did occur in the Irish regiments but in most cases these were of a minor nature. Controversially, he suggests that where executions did take place, they were militarily necessary and served the purpose of restoring discipline in failing units. Bowman also shows that there was very little support for the emerging Sinn Fein movement within the Irish regiments. This book will be essential reading for military and Irish historians and their students, and will interest any general reader concerned with how units maintain discipline and morale under the most trying conditions.

A New System of Military Discipline, Founded Upon Principle

Why, despite the appalling conditions in the trenches of the Western Front, was the British army almost untouched by major mutiny during the First World War? Drawing upon an extensive range of sources, including much previously unpublished archival material, G. D. Sheffield seeks to answer this question by examining a crucial but previously neglected factor in the maintenance of the British army's morale in the First World War: the relationship between the regimental officer and the ordinary soldier.
