LeMone and Burke's Medical-Surgical Nursing, Volume 1

This book has been designed to emphasise a person-centred philosophy to nursing, foster critical thinking and clinical reasoning, and recognise the nurse's role as an essential member of the interprofessional health care team.

LeMone and Burke's Medical-surgical Nursing

Preceded by: Medical-surgical nursing: critical reasoning in patient care / Priscilla LeMone, Karen Burke, Gerene Bauldoff, Paula Gubrud. Sixth edition. [2015].

LeMone and Burke's Medical-Surgical Nursing

This book has been designed to emphasise a person-centred philosophy to nursing, foster critical thinking and clinical reasoning, and recognise the nurse's role as an essential member of the interprofessional health care team.

Lemone and Burke's Medical-surgical Nursing

Provides a comprehensive, contemporary and consistent systems-based approach that engages students and provides the practical knowledge and skills they need to care for adult patients with a focus on person-centred, holistic nursing care. Designed to: emphasise a person-centred philosophy whereby the person who is the recipient of care is seen as an integral member of the team and consideration of their needs and wishes is paramount foster critical thinking and clinical reasoning skills as the basis for safe clinical practice and nursing excellence recognise the nurse's role as an essential member of the interprofessional healthcare team.

LeMone and Burke's Medical-Surgical Nursing: Critical Thinking for Person-Centred Care

Adapted from: Medical-surgical nursing: critical thinking in client care / [edited by] Priscilla LeMone, Karen Burke. 4th ed. c2008.

Study Guide for Lemone and Burke's Medical-Surgical Nursing

For use in medical surgical nursing courses and appropriate as a quick reference during clinicals. An ideal companion resource to LeMone/Burke's Medical Surgical Nursing, 3/e. This clinical handbook provides vital information centering around medical surgical nursing care. Ideal for quick reference or use during clinical, an accessible writing style presents all the material essential for mastery. Also included are common causes, assessment, medical interventions, key nursing diagnoses, nursing interventions, and home care considerations.

LeMone and Burke's Medical-Surgical Nursing

Medical-Surgical Nursing: Critical Thinking in Patient Care, 5e has been revised and updated to provide the knowledge and skills needed to care for adult patients to promote health, facilitate recovery from illness and injury, and provide support when coping with disability or loss. Throughout the text, the authors make every effort to communicate that both nurses and patients may be male or female and that patients require holistic, individualized care regardless of their age, gender, or racial, cultural, or socioeconomic background. The goal of the fifth edition is to provide the knowledge and resources that ensure a solid base for critical thinking and clinical judgment and that can be applied to provide safe, individualized, and competent clinical nursing care. Multiple learning strategies have been developed to facilitate success—audio, illustrations, teaching tips, and video and animation media. Understandable language and a consistent format are used, and students overwhelmingly report that they actually like reading the text.

LeMone & Burke's Adult Nursing

The focus of this product package is to provide students with a strong knowledge base, an understanding of contemporary practice issues in Australia and the capacity for sound clinical reasoning. You will use these professional attributes in order to provide safe and effective nursing care. This easily understood, straightforward Australian edition integrates the following concepts: epidemiology, pathophysiology, pharmacology, legal and ethical issues, therapeutic communication, interprofessional communication and cultural safety.

Clinical Handbook for Medical-surgical Nursing

Medical-Surgical Nursing, Third Edition, is the best application-based medical-surgical nursing text available today! Students and instructors alike love its organization and clear presentation of patient care, with its consistent format and multiple methodologies for student learners. This textbook is built around a framework of Functional Health Patterns. With a focus on developing decision-making skills, the authors encourage students to think critically, thoughtfully, and realistically through an abundance of case studies and examples. Because nursing care is organized around prioritized diagnoses with interventions and rationales, students quickly understand the rationale of each action. **FEATURES INCLUDE:** New—Expanded coverage of aging adult/end-of-life care, cultural diversity, and diseases specific to bioterrorism. New Chapters—Nursing Care of Clients with Substance Abuse (Chapter 12) and Nursing Care of Clients with Musculoskeletal Disorders (Chapter 39). New Content—Health promotion, home care with resources, and complementary therapies. New Media links refer students to the CD-ROM or website for additional information. Companion Website—www.prenhall.com/lemone—featuring objectives, an audio glossary, additional NCLEX review questions, case studies, care plan activities, Media-link activities, and more! Free Student CD-ROM—Tied chapter-by-chapter to the text, the CD provides additional NCLEX review questions, animations and A&P review and an audio glossary. Ask your Prentice Hall Sales Representative about online courses that accompany Medical-Surgical Nursing, Third Edition.

Medical Surgical Nursing

The Clinical Handbook for Medical-Surgical Nursing: Clinical Reasoning in Patient Care is a handy, pocket-sized reference for the care of patients with health problems often encountered in clinical situations. While primarily developed as a supplement to the Sixth Edition of Medical-Surgical Nursing: Clinical Reasoning in Patient Care, to which it is cross-referenced by chapter, the Clinical Handbook may also be used as a stand-alone reference text. It provides nursing students essential information in an easy-to-follow format, allowing them to respond quickly when a patient's condition changes or when they are assigned to a new patient.

Understandable language and a consistent format are used, and students overwhelmingly report that they actually like reading the text.

Medical-Surgical Nursing

Medical Surgical Nursing Care 3e has an even stronger focus on the professional Practical nursing program and is a key component in the LPN/LVN series at Pearson. It has a clear and readable writing style, it provides a strong foundation for understanding common disorders that affect adults. Opening units of the book focus on concepts, issues, and foundational knowledge. The units that follow focus on common diseases and disorders organized by body system. Each unit begins with review of the system's structure and function, nursing assessment, and commonly used diagnostic tests for disorders of that system. To facilitate learning, disorder-specific content follows a consistent pattern, beginning with discussion about the disorder, its risk factors, causes, effects on the body, manifestations, and possible complications. Because nurses are integral members of the healthcare team, interdisciplinary

care sections include nursing implications for medications, nutritional therapies, surgery and other treatments, including complementary therapies. Each disorder concludes with nursing care, including priorities of care, health promotion, assessment, nursing care measures, and a section addressing continuity of care to home or the community. This text provides more depth in common disease processes, their treatment, and related nursing care. Although organized by body systems for clarity, the book retains a nursing focus throughout. Rationales are provided for nursing interventions to help the student understand the “why,” not just the “what.”

Medical-surgical Nursing

The need for nurses is greater than ever before. There are no short-term solutions to this problem: as currently practicing nurses age and retire, so does the population as a whole, further increasing the need for health care services. Today, more than ever before, we need you, the nursing student, to succeed in your studies. Today, more than ever before, we need you, the nursing student, to enter the nursing profession. Today, more than ever before, we need you, the nursing student, to see nursing as a career, not just a job. This book is dedicated to your success as a student and as a practicing nurse. We believe a strong foundation in understanding the common diseases and disorders that affect adult clients is necessary to provide effective nursing care. We believe that understanding the basis for nursing care activities is vital to providing individualized care for clients. We believe that client teaching is a vital nursing role at all levels and in all settings. Medical-Surgical Nursing Care provides a strong foundation for caring through its emphasis on pathophysiology, nursing care, and client teaching. Understanding comes not through memorization, but through practice and integration of new material into your thinking. Medical-Surgical Nursing Care promotes understanding in several ways. The writing style is clear, with a focus on readability. Its content is streamlined but thorough, focusing on what you need to know and to be able to do. Organization Medical-Surgical Nursing Care is organized to promote learning. Part One, Medical-Surgical Nursing Practice, focuses on concepts, issues, and nursing care applicable to caring for adults in many different situations and settings. Parts Two through Seven focus on diseases and disorders affecting adults. These disorders are organized by functional health patterns (for example, nutritional-metabolic, activity-exercise) and by affected body systems under each functional health pattern (for example, common skin problems, bowel disorders, cardiac disorders). Each chapter begins with a Caring Tip that provides words of wisdom from the lived experience of a practicing nursing or nurse educator. You will be able to use these tips as you move into and through your career in nursing. Learning Outcomes help focus and define your learning as you read and study the material. The structure and function of the affected body system is reviewed at the beginning of the chapter. Disorders affecting that body system are presented in a consistent format: the disorder is defined; its Pathophysiology, signs and symptoms, and complications are explained; and Collaborative Care (including diagnostic tests, pharmacology, surgery, and other treatments) for the disorder is outlined. Nursing Care related to the disorder is presented in a nursing process format. When a disorder is major, very complex, or very common, all of the Nursing Process steps are provided. When it is not, the text provides an abbreviated, more focused discussion, similar to the focused assessment nurses perform. Because teaching is a vital nursing role, discussion of each disorder concludes with Discharge Considerations and teaching for the client and family. Case Studies following many major disorders bring the disorders to life. Clients rarely arrive in a health care setting as a pure medical diagnosis. As humans, clients bring all their roles and responsibilities as individuals, spouses, parents, children, workers, students, friends, and volunteers. They arrive as unique individuals influenced by their ethnicity, culture, and background. They arrive with psychosocial issues such as fear, guilt, or difficulty meeting financial responsibilities. They often arrive with other diseases and disorders complicating the current problem. The case studies in this text emphasize the holistic aspects of nursing care. Critical Thinking Questions conclude each case study. These questions allow you to practice your new found learning and to expand your thinking beyond the immediate focus of the disease or disorder presented. Additional Critical Thinking Self-Check Questions are provided on the CD-ROM throughout nursing care chapters. They provide more case scenarios for you to use to test your knowledge and thinking skills. These self-check questions focus on the nursing roles of collecting assessment data and implementing nursing care. Each case is matched with hints to guide your critical thinking. They will help you learn to individualize your nursing care. Each chapter concludes with features to reinforce and enhance your learning. Key Terms by Topic list the boldfaced key terms in the text by the topic under which they were defined. Key Points provide a summary of chapter content with reminders that you can use throughout your nursing career. For Further Study is a handy listing of cross-references within the chapter and the topics to which they apply. An interactive Critical Thinking Care Map provides

a brief case study, assessment data, and a nursing diagnosis for a specific client. We then ask you, the student, to sort the data and sample interventions, evaluate the results, and chart your findings. Finally, NCLEX-PN Review Questions and a Test-Taking Tip help you review the chapter material and practice your test-taking skills. Features Throughout each chapter, you will find consistent features to facilitate and reinforce your learning. To avoid interrupting your reading by reaching for your medical dictionary, Key Terms are presented in boldface type. They are defined in the text and the glossary at the end of the book. Other important or unfamiliar terms are italicized and defined in the text. Clinical Alerts within the text emphasize information critical to providing effective, safe clinical nursing care. Cultural Care Strategies, including nursing implications and self-reflection questions, prepare students to deliver culturally sensitive adult nursing care. Color-coded boxes organize highlighted information for quick retrieval: red Data Collection boxes for manifestations and risk factors of a disorder; blue Nursing Care boxes for nursing care related to specific tests or procedures; orange boxes highlighting Client Teaching; and green boxes focusing on specific Population Groups and Nutrition information. Nursing Care Checklists quickly summarize nursing care activities for particular procedures or surgeries. Procedure Checklists review key steps in performing previously learned nursing care procedures and provide Sample Documentation. Pharmacology Tables highlight nursing implications and client teaching for drugs used to treat particular disorders.

Medical-Surgical Nursing

From the First Nation caregivers who healed, birthed and nursed for millennia to the untrained and ill-equipped convict men and women who cared for the sick in the fledgling colony of New South Wales, nursing has been practised in Australia since the beginning. It would take the arrival of a group of dedicated Irish nuns, followed by Florence Nightingale-trained nurses - and decades of constant and continuing campaigning - to transform nursing into what it is today: the most trusted profession in Australia. Nurses will recognise their own lived experience in stories about training days, nurses' quarters, changing uniforms, changing roles, the arrival of male nurses and current pathways to nursing. Produced in collaboration with the Australian College of Nursing and the Congress of Aboriginal and Torres Strait Islander Nurses and Midwives, with additional information provided by the Australian Nursing and Midwifery Federation, this is the story of nursing in Australia.

Medical-Surgical Nursing

Supporting person-centred clinical practice. The third Australian edition of Medical-Surgical Nursing: Critical Thinking for Person-Centred Care will help prepare you for your nursing journey. This straightforward Australian edition integrates the following concepts: epidemiology, pathophysiology, pharmacology, legal and ethical issues, therapeutic communication, interprofessional communication and cultural competence. View the online brochure This textbook has been designed to: emphasise a person-centred philosophy whereby the patient is seen as an integral member of the team and consideration of their needs and wishes is paramount foster critical thinking and clinical reasoning skills as the basis for nursing excellence in clinical practice recognise the nurse's role as an essential member of the interprofessional healthcare team Pearson recommends including MyNursingLab with your textbook purchase. MyNursingLab provides students with a personalised, interactive learning experience that integrates homework, hints and feedback. It allows students to practice what they learn combined with a personalised study plan to help them better understand difficult concepts. With MyNursingLab you can create a variety of automatically graded homework and quizzes. Motivate students to learn with videos and develop clinical nursing skills with handover simulations and decision-making case studies to support critical thinking and clinical reasoning.

Practice Exam for Medical Surgical Nursing 1 (75) - Practice Exam for Medical Surgical Nursing 1 (75) by Nursing Practice Exam 2,677 views 2 years ago 51 minutes - Take this free **Medical Surgical Nursing**, Practice Exam to see what types of questions are on the **Medical Surgical Nursing**, Exam.

Following surgery, Mario complains of mild incisional pain while performing deep-breathing and coughing exercises. The nurse's best response would be

The nurse needs to carefully assess the complaint of pain of the elderly because older people

Answer: C. experience reduced sensory perception . Degenerative changes occur in the elderly. The response to pain in the elderly maybe lessened because of reduced acuity of touch, alterations in neural pathways and diminished processing of sensory data.

Mary received AtropineSO4 as a pre-medication 30 minutes ago and is now complaining of dry mouth and her PR is higher than before the medication was administered. The nurse's best

Ana's postoperative vital signs are a blood pressure of 80/50 mm Hg, a pulse of 140, and respirations of 32. Suspecting shock, which of the following orders would the nurse question?

Mr. Pablo, diagnosed with Bladder Cancer, is scheduled for a cystectomy with the creation of an ileal conduit in the morning. He is wringing his hands and pacing the floor when the nurse enters his room. What is the best approach?

Answer: D. "Mr. Pablo, you appear anxious to me. How are you feeling about tomorrow's surgery?".

The client is showing signs of anxiety reaction to a stressful event. Recognizing the client's anxiety conveys acceptance of his behavior and will allow for verbalization of feelings and concerns.

After surgery, Gina returns from the Post-anesthesia Care Unit (Recovery Room) with a nasogastric tube in place following a gall bladder surgery. She continues to complain of nausea. Which action

would the nurse take?

Mr. Perez is in continuous pain from cancer that has metastasized to the bone. Pain medication provides little relief and he refuses to move. The nurse should plan to

A client returns from the recovery room at 9AM alert and oriented, with an IV infusing. His pulse is 82, blood pressure is 120/80, respirations are 20, and all are within normal range. At 10 am and at 11 am, his vital signs are stable. At noon, however, his pulse rate is 94, blood pressure is 116/74, and respirations are 24. What nursing action is most appropriate?

A 56 year old construction worker is brought to the hospital unconscious after falling from a 2-story building. When assessing the client, the nurse would be most concerned if the assessment revealed Which of the ff. statements by the client to the nurse indicates a risk factor for CAD?

Mr. Braga was ordered Digoxin 0.25 mg. OD. Which is poor knowledge regarding this drug?

Valsalva maneuver can result in bradycardia. Which of the following activities will not stimulate Valsalva's maneuver ?

Answer: A. Use of stool softeners. Straining or bearing down activities can cause vagal stimulation that leads to bradycardia. Use of stool softeners promote easy bowel evacuation that prevents straining or the valsalva maneuver.

The nurse is teaching the patient regarding his permanent artificial pacemaker. Which information given by the nurse shows her knowledge deficit about the artificial cardiac pacemaker?

Answer: D. may engage in contact sports. The client should be advised by the nurse to avoid contact sports. This will prevent trauma to the area of the pacemaker generator.

A patient with angina pectoris is being discharged home with nitroglycerine tablets. Which of the following instructions does the nurse include in the teaching?

Answer: Place one Nitroglycerine tablet under the tongue every five minutes for three doses. Go to the hospital if the pain is unrelieved. Angina pectoris is caused by myocardial ischemia related to decreased coronary blood supply. Giving nitroglycerine will produce coronary vasodilation that improves the coronary blood flow in 3-5 mins. If the chest pain is unrelieved, after three tablets, there is a possibility of acute coronary occlusion that requires immediate medical attention

A client with chronic heart failure has been placed on a diet restricted to 2000mg of sodium per day. The client demonstrates adequate knowledge if behaviors are evident such as not salting food and avoidance of which food?

A student nurse is assigned to a client who has a diagnosis of thrombophlebitis. Which action by this team member is most appropriate?

A client receiving heparin sodium asks the nurse how the drug works. Which of the following points would the nurse include in the explanation to the client?

Answer: B. It prevents conversion of factors that are needed in the formation of clots. Heparin is an anticoagulant. It prevents the conversion of prothrombin to thrombin. It does not dissolve a clot.

The nurse is conducting an education session for a group of smokers in a "stop smoking" class. Which finding would the nurse state as a common symptom of lung cancer?

Which is the most relevant knowledge about oxygen administration to a client with COPD?

When suctioning mucus from a client's lungs, which nursing action would be least appropriate?

Dr. Santos prescribes oral rifampin (Rimactane) and isoniazid (NH) for a client with a positive Tuberculin skin test. When informing the client of this decision, the nurse knows that the purpose of this choice of treatment is to

Answer: D. Delay resistance and increase the tuberculostatic effect Pulmonary TB is treated primarily with chemotherapeutic agents for 6-12 mons. A prolonged treatment duration is necessary to ensure eradication of the organisms and to prevent relapse. The increasing prevalence of drug resistance points to the need to begin the treatment with drugs in combination. Using drugs in combination can delay the drug resistance.

Mario undergoes a left thoracotomy and a partial pneumonectomy. Chest tubes are inserted, and one-bottle water- seal drainage is instituted in the operating room. In the postanesthesia care unit Mario is placed in Fowler's position on either his right side or on his back to

A client with COPD is being prepared for discharge. The following are relevant instructions to the client regarding the use of an oral inhaler EXCEPT

A client is scheduled for a bronchoscopy. When teaching the client what to expect afterward, the nurse's highest priority of information would be

The nurse enters the room of a client with chronic obstructive pulmonary disease. The client's nasal cannula oxygen is running at a rate of 6 L per minute, the skin color is pink, and the respirations are 9 per minute and shallow. What is the nurse's best initial action?

The nurse is preparing her plan of care for her patient diagnosed with pneumonia. Which is the most

appropriate nursing diagnosis for this patient?

Answer: C. Impaired gas exchange. Pneumonia, which is an infection, causes lobar consolidation thus impairing gas exchange between the alveoli and the blood. Because the patient would require adequate hydration, this makes him prone to fluid volume excess.

A nurse at the weight loss clinic assesses a client who has a large abdomen and a rounded face. Which additional assessment finding would lead the nurse to suspect that the client has Cushing's syndrome rather than obesity?

Which statement by the client indicates understanding of the possible side effects of Prednisone therapy?

The nurse is attending a bridal shower for a friend when another guest, who happens to be a diabetic, starts to tremble and complains of dizziness. The next best action for the nurse to take is to

An adult, who is newly diagnosed with Graves disease, asks the nurse, "Why do I need to take Propranolol (Inderal)?" Based on the nurse's understanding of the medication and Grave's disease, the best response would be

Answer: C. "The medication will block the cardiovascular symptoms of Grave's disease." Propranolol (Inderal) is a beta-adrenergic blocker that controls the cardiovascular manifestations brought about by increased secretion of the thyroid hormone in Grave's disease

During the first 24 hours after thyroid surgery, the nurse should include in her care

On discharge, the nurse teaches the patient to observe for signs of surgically induced hypothyroidism.

The nurse would know that the patient understands the teaching when she states she should notify the MD if she develops

What is the best reason for the nurse in instructing the client to rotate injection sites for insulin?

Which of the following would be inappropriate to include in a diabetic teaching plan?

Included in the plan of care for the immediate post- gastroscopy period will be

Which description of pain would be most characteristic of a duodenal ulcer?

The client underwent Billroth surgery for gastric ulcer. Post-operatively, the drainage from his NGT is thick and the volume of secretions has dramatically reduced in the last 2 hours and the client feels like vomiting. The most appropriate nursing action is to

After Billroth II Surgery, the client developed dumping syndrome. Which of the following should the nurse exclude in the plan of care?

The laboratory of a male patient with Peptic ulcer revealed an elevated titer of Helicobacter pylori.

Which of the following statements indicate an understanding of this data?

What instructions should the client be given before undergoing a paracentesis?

The husband of a client asks the nurse about the protein-restricted diet ordered because of advanced liver disease. What statement by the nurse would best explain the purpose of the diet?

Answer: A. The liver cannot rid the body of ammonia that is made by the breakdown of protein in the digestive system. The largest source of ammonia is the enzymatic and bacterial digestion of dietary and blood proteins in the GI tract. A protein-restricted diet will therefore decrease ammonia production

Which of the drug of choice for pain controls the patient with acute pancreatitis?

Immediately after cholecystectomy, the nursing action that should assume the highest priority is

A Sengstaken-Blakemore tube is inserted in the effort to stop the bleeding esophageal varices in a patient with complicated liver cirrhosis. Upon insertion of the tube, the client complains of difficulty of breathing. The first action of the nurse is to

The client presents with severe rectal bleeding, 16 diarrheal stools a day, severe abdominal pain, tenesmus and dehydration. Because of these symptoms the nurse should be alert for other problems associated with what disease?

A client is being evaluated for cancer of the colon. In preparing the client for barium enema, the nurse should

The client has a good understanding of the means to reduce the chances of colon cancer when he states

Days after abdominal surgery, the client's wound dehisces. The safest nursing intervention when this occurs is to

An intravenous pyelogram reveals that Paulo, age 35, has a renal calculus. He is believed to have a small stone that will pass spontaneously. To increase the chance of the stone passing, the nurse would instruct the client to force fluids and to

Postoperative thyroidectomy nursing care includes which measures?

What would the nurse note as typical findings on the assessment of a client with acute pancreatitis?

A client is found to be comatose and hypoglycemic with a blood sugar level 50 mg/dl. What nursing action is implemented first?

Which medication will the nurse have available for the emergency treatment of tetany in the client who has had a thyroidectomy?

What is the primary action of insulin in the body?

What will the nurse teach the diabetic client regarding exercise in his/her treatment program?

The nurse is caring for a client who has exophthalmos associated with her thyroid disease. What is the cause of exophthalmos?

What is characteristic symptom of hypoglycemia that should alert nurse to an early insulin reaction?

A client is scheduled for routine glycosylated hemoglobin (HbA1c) test. What is important for the nurse to tell the client before this test?

A client has been inhalation vasopressin therapy. What will the nurse evaluate to determine the therapeutic response to this medication?

A client with diagnosis of type 2 diabetes has been ordered a course of prednisone for her severe

arthritic pain. An expected change that requires close monitoring by the nurse is

The nurse performing an assessment on a client who has been receiving long-term steroid therapy would expect to find

A diabetic client receives a combination of regular and NPH insulin at 0700 hours. The nurse teaches the client to be alert for signs of hypoglycemia at

It is important for the nurse to teach the client that metformin (Glucophage)

A nurse assessing a client with SIADH would expect to find laboratory values of

A priority nursing diagnostic for a client admitted to the hospital with a diagnosis of diabetes insipidus is

A client admitted with a pheochromocytoma returns from the operating room after adrenalectomy. The nurse should carefully assess this client for

When caring for client in thyroid crisis, the nurse would question an order for

A client is prescribed levothyroxine (Synthroid) daily The most important instruction to give the client for administration of this drug is

The nurse would question which medication order for a client with acute-angled glaucoma?

A client tells you she has heard that glaucoma may be a hereditary problem and she is concerned about her adult children. What is the best response?

What will be important to include in the nursing care for the client with angle-closure glaucoma?

A child is scheduled for a myringotomy. What goal of this procedure will the nurse discuss with the parents?

After a client's eye has been anesthetized, what instructions will be important for the nurse to give the client?

A child diagnosed with conjunctivitis. Which statement reflects that the child understood the nurse's teaching?

What medication would the nurse anticipate giving a client with Meniere's disease?

When teaching a family and a client about the use of a hearing aid, the nurse will base the teaching on what information regarding the hearing aid?

What statement by the client recovering from cataract surgery would indicate to the nurse need for additional teaching?

A client is walking down the hall and begins to experience vertigo. What is the most important nursing action when this occurs?

To promote and maintain safety for a client after a stapedectomy. What would be included in the nursing care plan?

The nurse would question the administration of which eye drop in a patient with increased ICP?

A client is being admitted for problems with Meniere's disease. What is most important to the nurse to assess?

A client calls the nurse regarding an accident that just occurred during which an unknown chemical was splashed in his eyes. What is the most important for the nurse to tell the client to do immediately?

A 25-year old woman comes to the clinic complaining of dizziness, weakness and palpitations. What will be important for the nurse to initially evaluate when obtaining the health history?

A child with leukemia is being discharged after beginning chemotherapy. What instructions will the nurse include in the teaching plan for the parents of this child?

Which client is most likely to have iron deficiency anemia?

A client has an order for one unit of whole blood. What is a correct nursing action?

The nurse is caring for a client who is receiving a blood transfusion. The transfusion was started 30 mins ago at a rate of 100 ml/hr. The client begins to complain of low back pain and headache and is increasing restless, what is the first nursing action?

The nurse is preparing to start an IV infusion before the administration of a unit of packed red blood cells, what fluid will the nurse select to maintain the infusion before hanging the unit of blood?

A client in sickle cell crisis is admitted to the emergency department what are the priorities of care?

A client in the ICU has been diagnosed with DIC. The nurse will anticipate administering which of the following fluids?

The nurse is assessing a client who has been given a diagnosis of polycythemia vera. What characteristics will the nurse anticipate finding when assessing this client?

A client has been diagnosed with pernicious anemia what will the nurse teach this client regarding medication he will need to take after he goes home?

First postop day after a right lower lobe (RLL) lobectomy, the client breathes and coughs but has difficulty raising mucus. What indicates that the client is not adequately clearing secretions?

What nursing observations indicate that the cuff on an endotracheal tube is leaking?

The client with COPD is to be discharged home while receiving continuous oxygen at a rate of 2 L/min via cannula. What information does the nurse provide to the client and his wife regarding the use of oxygen at home?

The wife of a client with COPD is worried about caring for her husband at home. Which statement by the nurse provides the most valid information?

Which statement correctly describes suctioning through an endotracheal tube

Medical Surgical Nursing Exam 1 (61) - Medical Surgical Nursing Exam 1 (61) by Nursing Practice Exam 26,683 views 2 years ago 39 minutes - Take this free **Medical Surgical Nursing**, Exam to see what types of questions are on the **Medical Surgical Nursing**, Exam.

Mrs. Chua a 78 year old client is admitted with the diagnosis of mild chronic heart failure. The nurse expects to hear when listening to client's lungs indicative of chronic heart failure would be

Patrick who is hospitalized following a myocardial infarction asks the nurse why he is taking morphine. The nurse explains that morphine

Which of the following should the nurse teach the client about the signs of digitalis toxicity?

Nurse Trisha teaches a client with heart failure to take oral Furosemide in the morning. The reason for this is to help...

What would be the primary goal of therapy for a client with pulmonary edema and heart failure?

Answer: B. The primary goal of therapy for the client with pulmonary edema or heart failure is increasing cardiac output. Pulmonary edema is an acute medical emergency requiring immediate intervention

Nurse Linda is caring for a client with head injury and monitoring the client with decerebrate posturing.

Which of the following is a characteristic of this type of posturing?

A female client is taking Cascara Sagrada. Nurse Betty informs the client that the following maybe experienced as side effects of this medication

Dr. Marquez orders a continuous intravenous nitroglycerin infusion for the client suffering from myocardial infarction. Which of the following is the most essential nursing action?

Answer: D. Administration of Intravenous Nitroglycerin infusion requires pump for accurate control of medication

During the second day of hospitalization of the client after a Myocardial Infarction. Which of the following is an expected outcome?

A 68 year old client is diagnosed with a right-sided brain attack and is admitted to the hospital. In caring for this client, the nurse should plan to

Nurse Liza is assigned to care for a client who has returned to the nursing unit after left nephrectomy. Nurse Liza's highest priority would be...

Answer: A. After nephrectomy, it is necessary to measure urine output hourly. This is done to assess the effectiveness of the remaining kidney also to detect renal failure early

A 64 year old male client with a long history of cardiovascular problem including hypertension and angina is to be scheduled for cardiac catheterization. During pre cardiac catheterization teaching, Nurse Cherry should inform the client that the primary purpose of the procedure is.....

During the first several hours after a cardiac catheterization, it would be most essential for nurse Cherry to...

Kate who has undergone mitral valve replacement suddenly experiences continuous bleeding from the surgical incision during postoperative period. Which of the following pharmaceutical agents should Nurse Aiza prepare to administer to Kate?

Answer: A. Protamine Sulfate is used to prevent continuous bleeding in client who has undergone open heart surgery.

In reducing the risk of endocarditis, good dental care is an important measure. To promote good dental care in client with mitral stenosis in teaching plan should include proper use of...

Answer: C. The use of electronic toothbrush, irrigation device or dental floss may cause bleeding of gums, allowing bacteria to enter and increasing the risk of endocarditis.

Among the following signs and symptoms, which would most likely be present in a client with mitral gurgitation?

Kris with a history of chronic infection of the urinary system complains of urinary frequency and burning sensation. To figure out whether the current problem is in renal origin, the nurse should assess whether the client has discomfort or pain in the...

Nurse Perry is evaluating the renal function of a male client. After documenting urine volume and characteristics, Nurse Perry assesses which signs as the best indicator of renal function.

John suddenly experiences a seizure, and Nurse Gina notice that John exhibits uncontrollable jerking movements. Nurse Gina documents that John experienced which type of seizure?

Smoking cessation is critical strategy for the client with Burgher's disease, Nurse Jasmin anticipates that the male client will go home with a prescription for which medication?

Nurse Lilly has been assigned to a client with Raynaud's disease. Nurse Lilly realizes that the etiology of the disease is unknown but it is characterized by

Nurse Jamie should explain to male client with diabetes that self-monitoring of blood glucose is preferred to urine glucose testing because...

Answer: A. Urine testing provides an indirect measure that maybe influenced by kidney function while blood glucose testing is a more direct and accurate measure.

Jessie weighed 210 pounds on admission to the hospital. After 2 days of diuretic therapy, Jessie weighs 205.5 pounds. The nurse could estimate the amount of fluid Jessie has lost...

Nurse Donna is aware that the shift of body fluids associated with Intravenous administration of albumin occurs in the process of

Myrna a 52 year old client with a fractured left tibia has a long leg cast and she is using crutches to ambulate. Nurse Joy assesses for which sign and symptom that indicates complication associated with crutch walking?

Which of the following statements should the nurse teach the neutropenic client and his family to avoid?

A female client is experiencing painful and rigid abdomen and is diagnosed with perforated peptic ulcer. A surgery has been scheduled and a nasogastric tube is inserted. The nurse should place the client before surgery in

Which nursing intervention ensures adequate ventilating exchange after surgery?

George who has undergone thoracic surgery has chest tube connected to a water-seal drainage system attached to suction Presence of excessive bubbling is identified in water-seal chamber, the nurse should...

A client who has been diagnosed of hypertension is being taught to restrict intake of sodium. The nurse would know that the teachings are effective if the client states that...

A male client with a history of cirrhosis and alcoholism is admitted with severe dyspnea resulted to ascites. The nurse should be aware that the ascites is most likely the result of increased...

A newly admitted client is diagnosed with Hodgkin's disease undergoes an excisional cervical lymph node biopsy under local anesthesia. What does the nurse assess first after the procedure?

Answer: C. Assessing for an open airway is the priority. The procedure involves the neck, the anesthesia may have affected the swallowing reflex or the inflammation may have closed in on the airway leading to ineffective air exchange.

A client has 15% blood loss. Which of the following nursing assessment findings indicates hypovolemic shock?

Nurse Lucy is planning to give pre operative teaching to a client who will be undergoing rhinoplasty. Which of the following should be included?

Paul is admitted to the hospital due to metabolic acidosis caused by Diabetic ketoacidosis (DKA). The nurse prepares which of the following medications as an initial treatment for this problem?

Answer: A Metabolic acidosis is anaerobic metabolism caused by lack of ability of the body to use circulating glucose. Administration of insulin corrects this problem

Dr. Marquez tells a client that an increase intake of foods that are rich in Vitamin E and beta-carotene are important for healthier skin. The nurse teaches the client that excellent food sources of both of these substances are

Answer: D. Beta-carotene and Vitamin E are antioxidants which help to inhibit oxidation. Vitamin E is found in the following foods: wheat germ, corn, nuts, seeds, olives, spinach, asparagus and other green leafy vegetables. Food sources of beta-carotene include dark green vegetables, carrots, mangoes and tomatoes.

A client has Gastroesophageal Reflux Disease (GERD). The nurse should teach the client that after every meals, the client should...

After gastroscopy, an adaptation that indicates major complication would be

A client who has undergone a cholecystectomy asks the nurse whether there are any dietary restrictions that must be followed. Nurse Hilary would recognize that the dietary teaching was well understood when the client tells a family member that

Nurse Rachel teaches a client who has been recently diagnosed with hepatitis A about untoward signs and symptoms related to Hepatitis that may develop. The one that should be reported immediately to the physician is

Which of the following antituberculosis drugs can damage the 8th cranial nerve?

Answer: D. Streptomycin is an aminoglycoside and damage on the 8th cranial nerve (ototoxicity) is a

common side effect of aminoglycosides.

The client asks Nurse Annie the causes of peptic ulcer. Nurse Annie responds that recent research indicates that peptic ulcers are the result of which of the following

Ryan has undergone subtotal gastrectomy. The nurse should expect that nasogastric tube drainage will be what color for about 12 to 24 hours after surgery?

Nurse Joan is assigned to come for client who has just undergone eye surgery. Nurse Joan plans to teach the client activities that are permitted during the post operative period. Which of the following is best recommended for the client?

A client suffered from a lower leg injury and seeks treatment in the emergency room. There is a prominent deformity to the lower aspect of the leg, and the injured leg appears shorter than the other leg. The affected leg is painful, swollen and beginning to become ecchymotic. The nurse interprets that the client is experiencing

Nurse Jenny is instilling an otic solution into an adult male client left ear. Nurse Jenny avoids doing which of the following as part of the procedure

Nurse Bea should instruct the male client with an ileostomy to report immediately which of the following symptom?

Jerry has diagnosed with appendicitis. He develops a fever, hypotension and tachycardia. The nurse suspects which of the following complications?

Answer: B. Complications of acute appendicitis are peritonitis, perforation and abscess development. Which of the following complications should the nurse carefully monitor a client with acute pancreatitis.

Which of the following symptoms during the icteric phase of viral hepatitis should the nurse expect the client to exhibit?

Answer: B. Liver inflammation and obstruction block the normal flow of bile. Excess bilirubin turns the skin and sclera yellow and the urine dark and frothy

Core Curriculum for Medical-surgical Nursing

This Core presents a comprehensive body of knowledge to promote excellence in medical-surgical nursing practice.

Core Curriculum for Medical-Surgical Nursing, 6th Edition

This comprehensive resource provides the foundational body of knowledge for medical-surgical nursing practice. This must-have reference book is written by expert medical-surgical nurses who designed it for new and experienced nurses. Each chapter ends with a Case Study where you will learn to apply your knowledge to real life patient care. Presented in an easy-to-use topic and outline format, the Core Curriculum for Medical-Surgical Nursing is your go-to guide for medical-surgical nursing, best practices, and exam preparation.

Core Curriculum for Plastic Surgical Nursing

Effective both as an introductory guide for nurses new to the discipline, and as a review for experienced perioperative nurses, this one-of-a-kind core reference presents the required knowledge and clinical skills for perioperative nursing. It identifies AORN Standards and Recommended Practices as they relate to specific subjects within the specialty. The book discusses historical, technical, and professional aspects of perioperative nursing, as well as educational issues. Plus, each chapter features 2 practice scenarios that demonstrate how the concepts apply to specific patient situations. Individual chapters cover asepsis, environmental safety, sterilization, care planning, wound closure, positioning, anesthesia, professional development, and training new perioperative nurses. In addition, readers will find controversy boxes that present opposing viewpoints on critical subjects as well as boxes and tables that highlight key information.

Core Curriculum for Plastic Surgical Nursing

Leading ambulatory surgical nurses offer the basic content needed to prepare for the CAPA certification exam. A user-friendly outline and question-and-answer format make review easier. Question-and-answer sections at the end of each chapter include rationales and aid in immediate self-assessment and review. Includes a chapter on each type of surgical specialty: dental/oral surgery, neurosurgery, ophthalmic surgery, cardiac surgery, gynecologic surgery, minimally invasive surgery, and more. Contains individual chapters on home support after surgery, anesthetic agents commonly used in the outpatient setting, transcultural issues in nursing, and test-taking techniques. Offers a unit on the life span, with a summary chapter on growth and development, and individual chapters on different phases of the life span. Presents a comprehensive unit on how to manage an ambulatory surgical center, with coverage of relevant policies and procedures, personnel issues, team building, and conflict management. Features a question-and-answer section at the end of each chapter to aid in immediate self-assessment and review.

Perioperative Nursing Core Curriculum

An official publication of the Society for Vascular Nursing, the Second Edition of the Core Curriculum for Vascular Nursing provides the core knowledge needed by the novice entering the specialty. It also serves as a manual for the nursing instructor, a study guide for cardiovascular certification, and a reference for the experienced vascular clinician caring for the challenging vascular patient. Topics include the evolution of vascular nursing, vascular assessment and diagnosis, vascular nursing research, and guideline-directed medical, endovascular and surgical therapy for the treatment of carotid artery stenosis, aortic aneurysm, renal artery stenosis, vascular access, venous disease, vascular trauma, amputations, and lymphedema.

Ambulatory Surgical Nursing Core Curriculum

Wound, Ostomy, and Continence Nurses Society Core Curriculum Ostomy Management, 2nd Edition Based on the curriculum blueprint of the Wound, Ostomy, and Continence Nursing Education Programs (WOCNEP) and approved by the Wound, Ostomy, and Continence Nurses Society™ (WOCN®), this practical text for ostomy care is your perfect source for expert guidance, training and wound, ostomy, and continence (WOC) certification exam preparation. Full of expert advice on ostomy care, Core Curriculum Ostomy Management, 2nd Edition is one of the few nursing texts to cover this practice area in detail. This is essential content for those seeking WOC certification; nursing students in ostomy programs; nurses caring for patients with an ostomy; nurses in gastroenterology, urology and surgical nursing; graduate nursing students and nursing faculty.

Core Curriculum for Vascular Nursing

ADULT NURSING encompasses the nursing care of adults who are at risk or who are experiencing pathological disorders. This comprehensive medical-surgical textbook covers the core curriculum for students on the adult branch of diploma and degree courses in nursing. It covers the full range of specialties as well as providing a foundation of common problems encountered in medical-surgical nursing such as pain and bereavement. Transparency Acetates (6854); Computerized Test Bank (IBM 3.5 07418 and IBM 5.25 06860); Transparency Acetates (06854); Student Learning Guide (07417); Text and Student Learning Guide Package (07416) and section). UK contributors: Christine Brooker, BSc, RGN, RM, RNT, Valerie El Gamel, DN(e), RGN, Dip Counselling, Dip Prof Studies in Nursing, with Prakash Gotecha, BSc, MR Pharm Not available in the U.S

Wound, Ostomy, and Continence Nurses Society Core Curriculum: Ostomy Management

This practical, thorough, and concise pocketbook is the perfect companion to the clinical skills needed for life on the wards. It covers all the essential elements that lie at the heart of medical practice in which students must prove their competence, and lays the foundations needed for the rest of their medical career. Part One covers history taking, examination and communication; and Part Two provides an overview of key practical procedures and diagnostic skills, all of which are typically examined via Objective Structured Clinical Examinations (OSCEs) or other clinical case format examinations. The coverage of examination skills alongside practical procedures and explanations of typical tests and investigations make this pocketbook invaluable for students new to clinical medicine. The authors are

specialists in teaching clinical skills from both a medical and surgical perspective, and are perfectly placed to cover these cornerstones of medical practice.

Adult Nursing

An official publication of the International Transplant Nurses Association, the updated Second Edition provides a guide to safe and effective care for solid organ transplant recipients worldwide. It includes coverage of the unique requirements of each organ transplanted, with separate chapters for heart, lung, kidney, liver, small intestine, and pancreas/islet cell transplantation. Other chapters cover important topics that affect all organs, such as immunology, infections, pharmaceutical agents, and patient education and discharge planning. The Core is an ideal review and study guide for the solid organ.

Study Guide to Core Curriculum for Critical Care Nursing

Prepare to succeed on the CPAN® and CAPA® exams with this authoritative guide from ASPAN! PeriAnesthesia Nursing Core Curriculum, 4th Edition is a comprehensive reference that helps you care for patients before and after anesthesia in all types of settings. Coverage of the full scope of perianesthesia nursing makes it an ideal resource for both inpatient and outpatient care. To keep you current on the many facets of perianesthesia, this edition also describes the newest advances in interventional radiology, robotics, and endoscopy procedures. Written by the American Society of PeriAnesthesia Nurses (ASPAN) and edited by respected perianesthesia nurses Lois Schick and Pam Windle, this book will help you build the skills and expertise you need to excel on your certification exam and in practice. Perianesthesia Complications chapter now appears after the System Competencies section to quickly display complications for all system competencies in one spot to help you find this vital information easily. System Competencies chapters have been updated to focus on specific, non-redundant topics to help you grasp key points right away. UPDATED! Certification of Perianesthesia Nurses and Testing Concepts and Strategies appendices provide helpful tools for CPAN® or CAPA® certification to assist you to prepare for these exams. This authoritative guide written by ASPAN covers the full scope of perianesthesia practice to help you prepare to succeed in practice and on the CPAN® and CAPA® exams. Easy-to-use outline format serves as a quick review and reference. Objectives at the beginning of each chapter focus on key content to allow you to use the book more effectively. Plentiful boxes, tables and illustrations highlight important references to ensure you get the most out of the book's multifaceted topics. A bibliography at the end of every chapter provides additional resources to make it easy for you to research at an in-depth level. NEW! Two-color and two-column design arranges information logically to help you quickly find key information. NEW! Content on enhanced recovery after surgery (ERAS), gender diversity, DNR/DNAR/DNI, and the drug Bridion® (sugammadex) showcases a wide variety of important topics to help you gain a deep understanding of the spectrum of perianesthesia. NEW! Updated content reflects changes in the ASPAN Core Curriculum as well as CPAN® and CAPA® testing to ensure you stay current in perianesthesia in the classroom and in clinicals.

Core Curriculum for the RN First Assistant

Written by expert clinicians, Core Curriculum Wound Management, 2nd Edition is one of the few nursing texts to offer the basic pathology, physiology and current clinical skills required for high-level wound care. This is essential content for those seeking WOC certification, including nursing students in wound care programs; nurses involved in wound care; nurses in gastroenterology, urology, and surgical nursing; graduate nursing students and nursing faculty.

Core Curriculum for Ophthalmic Nursing

Wound, Ostomy, and Continence Nurses Society Core Curriculum Wound Management, 2nd Edition Based on the curriculum blueprint of the Wound, Ostomy, and Continence Nursing Education Programs (WOCNEP) and approved by the Wound, Ostomy, and Continence Nurses Society(tm) (WOCN®), this practical text for wound assessment and management is your perfect source for expert guidance, training and wound, ostomy and continence (WOC) certification exam preparation. Written by expert clinicians, Core Curriculum Wound Management, 2nd Edition is one of the few nursing texts to offer the basic pathology, physiology and current clinical skills required for high-level wound care. Chapter features include: Objectives at the start of each chapter, Key Points that expand on important concepts, Tables that offer clinical guidelines and care strategies, Case Studies that optimize clinical decision-making, and End-of-Chapter Review Q&A's -- multiple choice questions followed by answers and rationales. This is essential content for those seeking WOC certification, including

nursing students in wound care programs; nurses involved in wound care; nurses in gastroenterology, urology, and surgical nursing; graduate nursing students and nursing faculty. Incorporating the latest developments in clinical practice, this evidence-based content is your complete map to gaining WOC certification -- and to providing safe, optimal patient care. Follow evidence-based best practices with this top-level nursing guide to wound care ... NEW chapter on professional practice NEW chapter on incontinence-associated dermatitis (IAD) Easy-to-follow format that breaks down pathology, physiology and patient management topics into easy-to-remember terms Numerous illustrations, full-color photos and tables Evidence-based guidelines that address all crucial facets of wound care nursing, including: General principles of wound management - goal-setting and systemic support Wound cleansing and dressing selection Skin and wound care for various populations - neonatal and pediatric, geriatric, bariatric, spinal cord-injured patients Management of surgical wounds Nutritional strategies Pathology and management of venous, arterial and neuropathic wounds Principles and guidelines for wound debridement Assessment and management of wound-related infections and traumatic wounds Prevention and management of moisture-associated skin damage, medical adhesive-related skin injury and skin tears Pressure injury prevention Fistula management About the Clinical Editors Laurie McNichol, MSN, RN, CNS, GNP, CWOCN, CWON-AP, FAAN is a Clinical Nurse Specialist and WOC nurse at Cone Health in Greensboro, North Carolina. She was Co-Editor of the Core Curriculum Wound Care, first edition. She is a past President of the Wound, Ostomy, and Continence Nurses Society™ (WOCN®) and the National Pressure Injury Advisory Panel (NPIAP®). She has authored numerous key publications and is a well-known lecturer in the areas of wound, ostomy and continence management, and professional practice for the WOC nurse. Catherine R. Ratliff, PhD, RN, GNP-BC, CWOCN, CFCN, FAAN is a Geriatric Nurse Practitioner with more than 25 years of wound care experience and research. A former Program Director for a WOCNEP offering graduate credits at the UVA School of Nursing, she is widely published in the field of wound and ostomy care and serves as Ostomy Section Editor for the Journal of Wound, Ostomy, and Continence Nursing (JWOCN®). Stephanie S. Yates, MSN, RN, ANP-BC, CWOCN is an Adult Nurse Practitioner and WOC Nurse at Duke University Hospital Cancer Center. She previously practiced in acute care and outpatient wound care. She is a past President of the Wound, Ostomy, and Continence Nurses Society™ (WOCN®). She has lectured locally, regionally and nationally, and published wound care-related articles in peer-reviewed journals.

Clinical Skills and Examination

Published under the auspices of the Infusion Nurses Society (INS), this book provides complete coverage of the nine core areas of infusion nursing practice, helping nurses in all medical-surgical settings update their infusion skills and prepare for the certification examination in infusion nursing. Chapters cover technology and clinical applications; fluid and electrolyte balance; pharmacology; infection control; pediatric infusion therapy; transfusion therapy; antineoplastic agents; parenteral nutrition; and performance improvement. This updated edition reflects recent changes in infusion nursing practice, including needleless systems, new safety devices, new drugs and chemotherapeutic agents, and advances in parenteral nutrition.

Core Curriculum for Transplant Nurses

This comprehensive publication is an excellent, unique, resource for all urologic nurses. This new practice resource contains over 700 pages of content written by and for urologic professionals. The high-quality content Impacts the everyday practice of RNs, APRNs, PAs, technicians, and urologic associates. Content encompasses every stage of life, from pediatric to geriatric patient populations. The Core offers fundamental curriculum for the novice and in-depth knowledge for the experienced practitioner in a hybrid text. The Core provides essential information and reflects the complexity, diversity, and unique clinical challenges encountered by urology nurses caring for the urologic patient across the lifespan. It provides a comprehensive resource for all urologic nurses and professionals, in all care settings, who are involved in the care of urologic patients, enabling them to practice confidently and delivery clinically effective, patient-centered care.

PeriAnesthesia Nursing Core Curriculum E-Book

From the Publisher: Deliver the best patient care before, during, and after surgery with straightforward information to guide you through each step. Student-friendly features including chapter outlines and summaries, review questions, technique boxes, and a full-color design make even complex material easier to understand. Revised to match the latest AST Core Curriculum guidelines, this new edition

covers the topics and procedures from a variety of surgical disciplines you'll use in practice. Plus, new and revised chapters on technology, postoperative recovery, energy sources, and much more keep you at the cutting edge of the field. Vibrant, full-color design with bullets, numbering, and technique boxes makes it easier to read and understand important information. Easy-to-follow organization helps you build up your knowledge from chapter to chapter. Procedures broken down into surgical goals, pathology, technique, and discussion allow you to learn each surgical procedure step-by-step. New Skills DVD provides instructors with the tools to demonstrate the skills their students must master and provides a tool for students to work independently to enhance their knowledge and understanding of each skill. Death and Dying chapter details the proper techniques for handling sensitive issues in the operating room. Biomedical and Computer Technology chapter includes vital content on technology you'll use and see in the field with discussions of the latest technological advances. Postoperative Recovery chapter helps you understand patient care after a surgical procedure. Updated information on energy sources, minimally invasive surgery, diagnostic endoscopy, and robotics follows the AST Core Curriculum and ensures you have the most up-to-date and accurate knowledge for the operating room. Content reflects the revised AST Core Curriculum for Surgical Technology guidelines. Complete index listings of medical prefixes, suffixes, and root words offer a quick and convenient guide to reinforce your medical vocabulary. Chapter outlines, bulleted chapter summaries, and chapter review questions strengthen your understanding of key content.

Wound, Ostomy and Continence Nurses Society Core Curriculum: Wound Management

The only reference focused on progressive care nursing, this complete reference includes all of the key information you need to know for success in practice and on the PCCN certification exam. Expert authors from the American Association of Critical-Care Nurses provide the most authoritative content on caring for patients in step-down, intermediate and telemetry units and prepare you to treat patients from every phase of progressive care. Plenty of illustrations and easy-reference tables clarify difficult concepts and make it easy to review content quickly. AACN authorship ensures you receive the most accurate and dependable information available from the same group that administers the PCCN examination. Comprehensive coverage including everything from basic to advanced concepts makes this an essential resource for nurses of any level of expertise. Content most likely to be on the exam is highlighted to help you study more efficiently. The latest, most authoritative references categorized by disorder make it easy to find resources for further research. Concise outline format with organization by body system helps you quickly locate information. Priority organization presents nursing management information in order of clinical priority. Content written from a collaborative care perspective includes medical management and interventions integrated throughout the text. User-friendly two-color design clarifies difficult concepts and makes illustrations and tables easy to understand.

Core Curriculum Wound Man 2e (int Ed)

Corresponding to the 9th edition of Ignatavicius, Workman, and Rebar's Medical-Surgical Nursing: Concepts for Interprofessional Collaborative Care, this thoroughly updated study guide provides you with a thorough review of core med-surg content while also developing your clinical judgment and clinical reasoning skills. Completely revised with a fresh emphasis on interprofessional collaboration, NCLEX-style questions, and core textbook content, it helps facilitate a deeper understanding of the core textbook content to ensure that you are thoroughly prepared for med-surg exams, the NCLEX Examination, and safe nursing practice. Provides a thorough review of core textbook content while uniquely developing your clinical nursing judgment skills. UNIQUE! Emphasis on clinical nursing judgment prepares you to confidently make safe and effective decisions in clinical practice. UNIQUE! Renewed emphasis and focus on core textbook content helps you focus limited study time on learning core medical-surgical content from the textbook, rather than searching for content from other sources. UNIQUE! Stronger emphasis on NCLEX Exam question formats, including alternate-item formats, familiarizes you with NCLEX question formats to better prepare for the NCLEX Examination. Answer key in the back of the book facilitates self-study and remediation NEW! UNIQUE! Focus on nursing concepts and exemplar disorders helps you overcome content saturation by focusing on broad concepts and how they are exemplified in disorders. NEW! UNIQUE! Focus on interprofessional collaboration includes application of the Core Concepts for Interprofessional Collaborative Practice (IPEC, 2016) in every chapter. NEW! Thoroughly revised and updated throughout to match the changes in the 9th edition of the Ignatavicius textbook.

Core Curriculum for Infusion Nursing

Published in collaboration with the ONS, this text is the definitive source for concepts and practices in oncology nursing and can be used for orientation of nurses to oncology, inservice and continuing education programs for practicing nurses, a basis for curriculum development in graduate programs, and as a review tool for certification. Based on the blueprint of the certification examination by the ONCC (Oncology Nursing Certification Corporation), the book is in outline format to help readers focus on the most important information. Instructor resources available; contact your sales representative for details. Covers the entire scope of the specialty ensuring comprehensive coverage Outline format helps the reader focus on the most important information Effective guide for teaching and learning for in-service, continuing education, and academic programs Powerful study tool for the ONCC certification exam Tables and figures illustrate complex concepts * Entirely revised, updated, and expanded to reflect the current state of oncology nursing practice. * Expanded pain management content. * New content on nonpharmacologic interventions (e.g. heat massage, imagery). * New content on alternative therapies.

Core Curriculum for Urologic Nursing

Get an in-depth review of the medical-surgical nursing Concepts and Exemplars covered in Ignatavicius's Medical-Surgical Nursing: Concepts for Clinical Judgment and Collaborative Care, 11th Edition and develop your clinical judgment skills! Corresponding to the chapters in the Ignatavicius textbook, this thoroughly updated study guide is a practical tool to help you review, practice, and apply medical-surgical nursing concepts. Traditional review questions now include exercises and item types for the Next-Generation NCLEX® Exam (NGN) to reinforce your understanding of the textbook's nursing concepts and their application to exemplar disorders. Answers and rationales make it easy to improve upon any areas of weakness. With this study guide, you will prepare for success in class, on the NGN, and in medical-surgical nursing practice. Complete review of textbook information builds your clinical judgment skills and enhances your ability to make safe and effective clinical decisions. UNIQUE! Emphasis on the textbook's Concepts and Exemplar disorders highlights key medical-surgical nursing concepts and how they are reflected in common health conditions. Hundreds of review questions allow you to practice prioritizing, develop clinical judgment, simulate interprofessional collaboration, and apply the steps of the nursing process and clinical judgment cognitive skills. Multiple-choice and multiple-select questions for the NCLEX® Exam are included in addition to the questions for the NGN, to better prepare you for all item types included in the NGN. Answer Keys now follow each chapter and include in-depth rationales to reinforce your understanding and boost your test-taking skills. NEW! Updated content aligns with revisions and updates in the Ignatavicius Medical-Surgical Nursing, 11th Edition textbook, reflecting the most current national and international guidelines and protocols. NEW! Exercises and questions for the Next-Generation NCLEX® Exam (NGN) are now included, all aligned with the NCSBN Clinical Judgment Measurement Model's six cognitive skills that are needed to make appropriate clinical judgments, deliver safe care, and increase readiness for the NGN. NEW! Added variety of study and review questions includes formats such as fill-in-the-blank, matching, and more to promote understanding and application of key information. NEW! New full-color design and illustrations clarify concepts and promote in-depth learning.

Surgical Technology

Get a thorough review of medical-surgical nursing Concepts and Exemplars while developing your clinical judgment skills! Corresponding to Medical-Surgical Nursing: Concepts for Interprofessional Collaborative Care, 10th Edition, from Ignatavicius, Workman, Rebar, and Heimgartner, this Study Guide is thoroughly revised with a fresh emphasis on the Concepts and Exemplars featured in the textbook. It adds application-level NCLEX® Exam-style questions and exercises, new NCLEX alternate item questions, and a completely new collection of Case Studies to prepare you for the Next Generation NCLEX Examination. With this practical study guide, you will prepare for NCLEX success and build the clinical reasoning skills you need for safe, effective nursing practice. Complete review of textbook content builds students' clinical nursing judgment skills and enhances their ability to make safe and effective clinical decisions. UNIQUE! Focus on interprofessional collaboration provides tips for coordinating care with other health professionals, and includes application of IPEC's Core Competencies for Interprofessional Collaborative Practice. Answer Key follows each chapter and adds new in-depth rationales for improved self-study and remediation. UNIQUE! Unparalleled emphasis on NCLEX® Exam-style questions includes multiple-choice and multiple-select formats, familiarizing students with all NCLEX question formats to better prepare them for the NCLEX Examination. UNIQUE! Emphasis on the textbook's Concepts and Exemplar disorders focuses students on key medical-surgi-

cal nursing concepts and how they are exemplified in common disorders. NEW and UNIQUE! Focus on Concepts and Exemplars reflects the conceptual emphasis of the Ignatavicius textbook. NEW! Higher percentage of application-level NCLEX® Exam-style questions is distributed throughout the chapters, plus additional NCLEX alternate item formats to help students develop clinical nursing judgment. NEW! Completely new collection of Next-Generation NCLEX®-style Case Studies to develop students' clinical judgment skills and begin to prepare them for the Next-Generation NCLEX Exam (NGN). NEW! Detailed rationales in Answer Keys (now following each chapter) are provided for questions above the "Knowing" level of Bloom's taxonomy, for improved remediation and development of clinical nursing judgment consistent with the NGN. NEW! Updated content throughout matches the 10th edition of the Ignatavicius textbook for more efficient study of essential medical-surgical nursing knowledge.

Core Curriculum for Progressive Care Nursing - E-Book

Providing a solid foundation in medical-surgical nursing, Susan deWit's Medical-Surgical Nursing: Concepts and Practice, 3rd Edition ensures you have the information you need to pass the NCLEX-PN® Examination and succeed in practice. Part of the popular LPN/LVN Threads series, this uniquely understandable, concise text builds on the fundamentals of nursing, covering roles, settings, and health care trends; all body systems and their disorders; emergency and disaster management; and mental health nursing. With updated content, chapter objectives, and review questions, this new edition relates national LPN/LVN standards to practice with its integration of QSEN competencies, hypertension, diabetes, and hypoglycemia. Concept Maps in the disorders chapters help you visualize difficult material, and illustrate how a disorder's multiple symptoms, treatments, and side effects relate to each other. Get Ready for the NCLEX® Examination! section includes Key Points that summarize chapter objectives, additional resources for further study, review questions for the NCLEX® Examination, and critical thinking questions. Nursing Care Plans with critical thinking questions provide a clinical scenario and demonstrate application of the nursing process with updated NANDA-I nursing diagnoses to individual patient problems. Anatomy and physiology content in each body system overview chapter provides basic information for understanding the body system and its disorders, and appears along with Focused Assessment boxes highlighting the key tasks of data collection for each body system. Assignment Considerations, discussed in Chapter 1 and highlighted in feature boxes, address situations in which the RN delegates tasks to the LPN/LVN, or the LPN/LVN assigns tasks to nurse assistants, per the individual state nurse practice act. Gerontologic nursing presented throughout in the context of specific disorders with Elder Care Points boxes that address the unique medical-surgical care issues that affect older adults. Safety Alert boxes call out specific dangers to patients and teach you to identify and implement safe clinical care. Evidence-based Practice icons highlight current references to research in nursing and medical practice. Patient Teaching boxes provide step-by-step instructions and guidelines for post-hospital care — and prepare you to educate patients on their health condition and recovery. Health Promotion boxes address wellness and disease prevention strategies that you can provide in patient teaching.

Study Guide for Medical-Surgical Nursing

Learn the clinical judgment skills you need to succeed on the Next-Generation NCLEX® Exam and in medical-surgical nursing practice with Iggy's trendsetting, concept-based approach! From a team of nursing experts led by Donna Ignatavicius, Medical-Surgical Nursing: Concepts for Clinical Judgment and Collaborative Care, 11th Edition provides a solid foundation in medical-surgical nursing care that is patient-centered, evidence-based, and collaborative. In each chapter, content is organized by the most important concepts of care followed by commonly occurring exemplars for each concept. This perennial bestseller helps you learn to think like a nurse and learn how to apply your knowledge in the classroom, simulation laboratory, and clinical settings. UNIQUE! Unparalleled focus on clinical judgment and systems thinking ensures alignment with the NCSBN Clinical Judgment Measurement Model and emphasizes the six cognitive skills that you'll need in order to develop effective clinical judgment, to succeed when taking the Next-Generation NCLEX® Exam (NGN), and to enter clinical practice as a safe, competent, compassionate generalist nurse. UNIQUE! Data-driven Concept and Exemplar selections provide a strong foundation in professional nursing concepts and health and illness concepts, with application in each chapter. UNIQUE! Exceptional emphasis on NGN preparation includes chapter-opening Learning Outcomes and chapter-ending Get Ready for the Next-Generation NCLEX Examination! sections, plus NCLEX Examination Challenge questions and Mastery and NGN Questions, with an answer key including rationales on the Evolve website. Consistent use of interprofessional terminology promotes interprofessional collaboration through the use of a common

healthcare language, instead of using nursing-specific diagnostic language. Emphasis on patient safety highlights safety and evidence-based practice with Nursing Safety Priority boxes, as well as Drug Alert, Critical Rescue, and Action Alert boxes. Focus on care coordination and transition management addresses the continuity of care between acute care and community-based care. Direct, easy-to-read writing style features concise sentences and straightforward vocabulary, making this one of the most readable medical-surgical nursing textbooks available. Sherpath (sold separately) for Ignatavicius et al. Medical-Surgical Nursing, 11th Edition provides an interactive, adaptive learning experience!

Core Curriculum for Oncology Nursing

This new text is the first of its kind, organized, written, and endorsed by the American Academy of Ambulatory Care Nurses. CORE CURRICULUM FOR AMBULATORY CARE NURSING focuses on the practice of staff nurses working with ambulatory care patients and coordinating the workflow in ambulatory care settings. It includes identification and specification of unique role dimensions, such as telephone nursing and care coordination. This valuable text also references the AACN Ambulatory Care Nursing Administrative and Practice Standards as well as the AACN Telephone Practice Administration and Practice Standards.TOC:

Study Guide for Medical-Surgical Nursing - E-Book

Here's everything you need to know to care for adult medical-surgical patients and pass the NCLEX-PN®. Easy-to-understand guidance helps you confidently grasp the principles, concepts, and skills essential for practice.

Gastroenterology Nursing

Wound Management, First Edition, is the first volume in the Series that follows the Curriculum Blueprint designed by the Wound Ostomy Continence Nurses Society (WOCN). Is the ideal resource for anyone seeking certification as a wound, ostomy or continence nurse, covering wounds caused by external mechanical factors and specific disease process, lower extremity ulcers, and the management of enterocutaneous fistulas and percutaneous tubes.

Core Curriculum Ostomy Management 2

"Aligned to the 2013 NCLEX-RN Test Plan"--Cover.

Study Guide for Medical-Surgical Nursing - E-Book

Written by the American Society of PeriAnesthesia Nurses (ASPAN), this all-in-one reference includes the vital information needed to succeed on the CAPA and CPAN certification exams and excel in practice. Includes new chapters on bariatric care and and newest guidelines.

Medical-Surgical Nursing - E-Book

Master the essential medical-surgical nursing content you'll need for success on the Next-Generation NCLEX® Exam (NGN) and safe clinical practice! Medical-Surgical Nursing: Concepts for Interprofessional Collaborative Care, 10th Edition uses a conceptual approach to provide adult health knowledge and help you develop the clinical nursing judgment skills that today's medical-surgical nurses need to deliver safe, effective care. "Iggy" emphasizes three emerging trends in nursing - interprofessional collaborative care, concept-based learning, and clinical judgment and systems thinking - trends that will ground you in how to think like a nurse and how to apply your knowledge in the classroom, simulation laboratory, and clinical settings. A perennial bestseller, "Iggy" also features NCLEX Exam-style Challenge and Mastery questions to prepare you for success on the NGN! UNIQUE! Interprofessional collaborative approach to care views medical and nursing management through the lens of the nursing process and the NCSBN Clinical Judgment Model and aligns with the Interprofessional Education Collaborative (IPEC) Core Competencies for Interprofessional Collaborative Practice. Consistent use of interprofessional terminology promotes interprofessional collaboration through the use of a common healthcare language, instead of using isolated nursing-specific diagnostic language. UNIQUE! Enhanced conceptual approach to learning integrates nursing concepts and exemplars, providing a foundation in professional nursing concepts and health and illness concepts and showing their application in each chapter. Unparalleled emphasis on clinical reasoning and clinical judgment helps you develop these vital skills when applying concepts to clinical situations. UNIQUE! Emphasis on

Next-Generation NCLEX® Exam (NGN) preparation includes chapter-opening Learning Outcomes and chapter-ending Get Ready for the NCLEX Examination! sections, plus NCLEX Examination Challenge questions and new Mastery Questions, with an answer key in the back of the book and on the companion Evolve website. Emphasis on QSEN and patient safety focuses on safety and evidence-based practice with Nursing Safety Priority boxes, including Drug Alert, Critical Rescue, and Action Alert boxes. Direct, easy-to-read writing style features concise sentences and straightforward vocabulary. Emphasis on health promotion and community-based care reflects the reality that most adult health care takes place in environments outside of high-acuity (hospital) settings. NEW! Strengthened conceptual approach with data-driven Concept and Exemplar selections adds the concepts of pain, inflammation, and infection, and presents Exemplar disorders with a nursing-process format and depth to help prepare you for the Next-Generation NCLEX® Exam (NGN). NEW and UNIQUE! Enhanced focus on clinical judgment and systems thinking ensures alignment with the NCSBN Clinical Judgment Model and emphasizes the six cognitive skills you'll need for effective clinical judgment, for the NGN, and for safe clinical practice. NEW! Emphasis on need-to-know content provides a solid foundation for beginning nurse generalists, including only the most important patient problems for each medical condition, with streamlined chapters and concise coverage of nursing skills for preoperative and postoperative care. NEW! Updated content throughout reflects the latest national and international evidence-based guidelines and protocols. NEW! Improved learning resources on the companion Evolve website are thoroughly updated and closely integrated with the textbook. NEW! Interprofessional Collaboration boxes highlight how the nurse collaborates with other members of the healthcare team. NEW! Ethical/Legal Considerations boxes address dilemmas that medical-surgical nurses face related to technological changes and socioeconomic disparities. NEW! Increased emphasis on home care, health promotion, and community-based care reflects the ongoing shift of care from hospitals to the home environment. NEW! Updated illustrations include new anatomy and physiology images, procedure images, and disorder photos. NEW! Updated drug tables are designed for quick reference and the use of drug trade names is eliminated for better alignment with the NGN. NEW! Coverage of opioid misuse is updated to reflect the opioid crisis in the U.S. NEW! Content on personal safety and preparedness for mass casualty events has been expanded to equip you for the realities of healthcare today. NEW! Key terms and definitions at the beginning of each chapter give you advance familiarity with essential terminology. NEW! Revised Key Points align closely with Learning Outcomes and each includes a QSEN or Clinical Nursing Concept "tag" to maximize your study efficiency. NEW! Simplified and streamlined chapters make the book easier to use and information easier to find.

Written by renowned wound care experts Sharon Baranoski and Elizabeth Ayello, in collaboration with an interdisciplinary team of experts, this handbook covers all aspects of wound assessment, treatment, and care.

AAACN Core Curriculum for Ambulatory Care Nursing

The Clinical Nursing Judgment Study Guide for Ignatavicius & Workman's Medical-Surgical Nursing: Patient-Centered Collaborative Care, 8th Edition, provides extensive practice in developing clinical judgment and reasoning skills while facilitating deep learning of the core textbook content. Completely revised under new authorship and with a fresh emphasis on NCLEX-style questions and core textbook content, the 8th edition Study Guide ensures that you are thoroughly prepared for today's NCLEX Examination and safe nursing practice. Provides a thorough review of core textbook content while uniquely developing your clinical nursing judgment skills. Emphasis on clinical decision-making prepares you to confidently make safe and effective decisions in clinical practice. Answer key in the back of the book facilitates self-study. NEW! Stronger emphasis on NCLEX Exam question formats, including alternate-item formats, familiarizes you with NCLEX question formats to better prepare you for the NCLEX Examination. NEW! Tips for Student Success introductory chapter helps you apply academic knowledge to the clinical setting. NEW! Renewed emphasis and focus on core textbook content helps you focus limited study time on learning core medical-surgical content from the Ignatavicius & Workman textbook, rather than searching for content from other sources. NEW! Extensive revision under new authorship facilitates learning of essential textbook content with greater quality, accuracy, and consistency. NEW! Expanded use of long-term care questions addresses the shift in clinical sites toward long-term skilled care settings.

Core Curriculum for Radiologic and Imaging Nursing

The easy-to-use Clinical Companion for Ignatavicius and Workman's Medical-Surgical Nursing: Patient-Centered Collaborative Care, 8th Edition, is an A-Z guide to more than 250 common medical-surgical conditions and their management. Written in a reader-friendly, direct-address style, this resource is a convenient tool that you can carry with you on clinical days. Now organized in a streamlined collaborative care format, complete with new QSEN highlights and a reorganized Concepts in Medical-Surgical Nursing section, it will quickly become your best bedside reference. A-Z synopses of more than 250 diseases and disorders, along with related collaborative care, serve as both a quick reference for clinical days and a study resource for diseases/disorders and related collaborative care. Consistent collaborative care format mirrors the coverage provided in the Ignatavicius & Workman textbook to more effectively prepare students for clinical days. UNIQUE! Nursing Safety Priorities reinforce critical safety measures at the bedside and mirror those in the Ignatavicius & Workman text: Drug Alert, Critical Rescue, and Action Alert. Special Considerations highlights call students' attention to important aspects of nursing care, such as Genetic/Genomic Considerations, Considerations for Older Adults, Gender Health Considerations, and Cultural Considerations. A Concepts of Medical-Surgical Nursing section (Part One) includes a NEW! concept on fluid and electrolyte balance, reflects the emphasis on concepts from Giddens' Concepts of Nursing Practice, and provides students with an understanding of essential concepts needed for effective nursing practice. A-Z printed thumb tabs appear along the edges of the pages to facilitate quick access to clinical information for just-in-time learning and reference at the bedside. 8 quick-reference appendices provide need-to-know, quick-reference coverage of common and some less typical clinical topics. NEW! Updated content matches the 8th edition of the Ignatavicius & Workman textbook for a reliably seamless reference and study experience. NEW! Streamlined collaborative care format helps you focus more effectively on nursing care priorities. NEW! QSEN highlights each focus on one or more of the six core QSEN competencies (Patient-Centered Care, Teamwork & Collaboration, Evidence-Based Practice, Quality Improvement, Safety, and Informatics) to help you understand how to apply QSEN competencies for safe patient care.

Medical Surgical Nursing Exam 8 (68) - Medical Surgical Nursing Exam 8 (68) by Nursing Practice Exam 594 views 2 years ago 52 minutes - Take this free **Medical Surgical Nursing**, Exam to see what types of questions are on the **Medical Surgical Nursing**, Exam.

Intro

Answer: B. O2 therapy, analgesia. All the nursing interventions listed are important in the care of Mr. Duffy. However relief of his pain will be best achieved by increasing the O2 content of the blood to his heart, and relieving the spasm of coronary vessels.

During the first three days that Mr. Duffy is in the CCU, a number of diagnostic blood tests are obtained. Which of the following patterns of cardiac enzyme elevation are most common following an MI?

Answer: C. CK peaks first (12-24 hours), followed by the SGOT (peaks in 24-36 hours) and then the LDH (peaks 3-4 days). Although the timing of initial elevation, peak elevation, and duration of elevation vary with sources, current literature favors option letter c.

On his second day in CCU Mr. Duffy suffers a life- threatening cardiac arrhythmia. Considering his diagnosis, which is the most probable arrhythmia?

You decide to discuss glaucoma prevention. Which of the following diagnostic tests should these

clients request from their care provider?

Answer: C. tonometry. Option A is most often used to detect corneal lesions; B is a test for visual acuity using snellen's chart; D is used to focus on layers of the cornea and lens looking for opacities and inflammation

You also explain common eye changes associated with aging. One of these is presbyopia, which is Some of the diabetic clients are interested in understanding what is visualized during funduscopic examination During your discussion you describe the macular area as

Answer: B. The area of central vision, seen on the temporal side of the optic disc, which is quite avascular. Options A and C refer to the optic disc, D describes the color of the retina.

One of the clients has noted a raised yellow plaque on the nasal side of the conjunctiva. You explain that this is called

You know that all but one of the following may eventually result in uremia. Which option is not implicated?

You did the initial assessment on Mr. Kaplan when he came to your unit. What classical signs and symptoms did you note?

Answer: B. Weakness, anorexia, pruritus. Weakness and anorexia are due to progressive renal damage; pruritus is secondary to presence of urea in the perspiration. Fruity smelling breath is found in diabetic ketoacidosis. Polyuria, polydipsia, polyphagia are signs of DM and early diabetic ketoacidosis. Oliguria is seen in chronic renal failure. The skin is more sallow or brown as renal failure continues

Numerous drugs have been used on Mr. Kaplan in an attempt to stabilize him. Regarding his diagnosis and management of his drugs, you know that

individualization of therapy and often a decrease in dose is essential Metabolic changes and alterations in excretion put the client with uremia at risk for development of toxicity to any drug. Thus alteration in drug schedule and dosage is necessary for safe care

The point of maximum impulse (PMI) is an important landmark in the cardiac exam. Which statement best describes the location of the PMI in the healthy adult?

During the physical examination of the well adult client, the health care provider auscultates the heart. When the stethoscope is placed on the 5th intercostal space along the left sternal border, which valve closure is best evaluated?

The coronary arteries furnish blood supply to the myocardium. Which of the following is a true statement relative to the coronary circulation?

Ms. Baker has decided to have surgical correction of her stenosed valve at this time because her subjective complaints of dyspnea, hemoptysis, orthopnea, and paroxysmal nocturnal dyspnea have become unmanageable. These complaints are probably due to

On physical exam of Ms. Baker, several abnormal findings can be observed. Which of the following is not one of the usual objective findings associated with mitral stenosis?

You are seeing more clients with diagnoses of mitral valve prolapse. You know those mitral valve prolapse is usually a benign cardiac condition, but may be associated with atypical chest pain. This chest pain is probably caused by

The most common lethal cancer in males between their fifth and seventh decades is

Of the four basic cell types of lung cancer listed below, which is always associated with smoking?

Answer: B. squamous cell carcinoma (epidermoid). Textbooks of medicine and nursing classify primary pulmonary carcinoma somewhat differently. However most agree that squamous cell or epidermoid carcinoma is always associated with cigarette smoking.

Chemotherapy may be used in combination with surgery in the treatment of lung cancer. Special nursing considerations with chemotherapy include all but which of the following?

Which of the following operative procedures of the thorax is paired with the correct definition?

The episodes Mr. Liberatore has been experiencing are probably

Mr. Liberatore suffers a left sided CVA. He is right handed. The nurse should expect

Upper motor neuron disease may be manifested in which of the following clinical signs?

During your assessment of Julie she tells you all visual symptoms are gone but that she now has a severe pounding headache over her left eye. You suspect Julie may have

Answer: B. the aura and headache of migraine. The warning sign or aura is associated with migraine although not everyone with migraine has an aura. Migraine is usually unilateral and described as pounding. Julie's symptoms are most compatible with migraine.

You explain to Julie and her mother that migraine headaches are caused by

A thorough history reveals that hormonal changes associated with menstruation may have triggered Julie's migraine attack. In investigating Julie's history what factors would be least significant in

migraine?

A client with muscle contraction headache will exhibit a pattern different for Julie's. Which of the following is more compatible with tension headache?

Glioma is an intracranial tumor. Which of the following statements about gliomas do you know to be false?

Acoustic neuromas produce symptoms of progressive nerve deafness, tinnitus, and vertigo due to pressure and eventual destruction of

Whether Mr Snyder's tumor is benign or malignant, it will eventually cause increased intracranial pressure. Signs and symptoms of increasing intracranial pressure may include all of the following except

Mr Snyder is scheduled for surgery in the morning, and you are surprised to find out that there is no order for an enema. You assess the situation and conclude that the reason for this is

Postoperatively Mr. Snyder needs vigilant nursing care including all of the following except

Potential postintracranial surgery problems include all but which of the following?

You are responsible for teaching Mrs. Hogan deep breathing and coughing exercises. Why are these exercises especially important for Mrs. Hogan?

On the morning of Mrs. Hogan's planned cholecystectomy she awakens with a pain in her right scapular area and thinks she slept in poor position. While doing the preop check list you note that on her routine CB report her WBC is 15,000. Your responsibility at this point is

Mrs. Hogan is scheduled for surgery 2 days later and is to be given atropine 0.3 mg IM and Demerol 50 mg IM one hour preoperatively. Which nursing actions follow the giving of the preop medication?

Mrs. Hogan is transported to the recovery room following her cholecystectomy. As you continue to check her vital signs you note a continuing trend in Mrs. Hogan's status: her BP is gradually dropping and her pulse rate is increasing. Your most appropriate nursing action is to

Mrs. Hogan returns to your clinical unit following discharge from the recovery room. Her vital signs are stable and her family is with her. Postoperative leg exercises should be initiated

If breath sounds are only heard on the right side after intubation

Answer: C. Ventricular fibrillation. Moreover, ventricular fibrillation is 15 times more likely to occur during the first hour of an acute MI than the following twelve hours which is why it is vital to decrease the delay between onset of chest pain and arrival at a medical facility. First degree heart block is not a lethal arrhythmia.
