Protection of Human Rights in Criminal Justice Administration

A survey of Czech business law, tax and accounting regulations. The political, legal and economic systems of the Republic are outlined.

Human Rights and Criminal Justice

We now live in a world which thinks through the legislative implications of criminal justice with one eye on human rights. Human Rights and the Criminal Justice System provides comprehensive coverage of human rights as it relates to the contemporary criminal justice system. As well as being a significant aspect of international governance and global justice, Amatrudo and Blake argue here that human rights have also eclipsed the rhetoric of religion in contemporary moral discussion. This book explores topics such as terrorism, race, and the rights of prisoners, as well as existing legal structures, court practices, and the developing literature in Criminology, Law and Political Science, in order to critically review the relationship between the developing body of human rights theory and practice, and the criminal justice system. This book will be of considerable interest to those with academic concerns in this area; as well as providing an accessible, yet sophisticated, resource for upper level undergraduate and postgraduate human rights courses.

Human Rights and the Criminal Justice System

Independent legal professionals play a key role in the administration of justice and the protection of human rights. Judges, prosecutors and lawyers need access to information on human rights standards laid down in the main international legal instruments and to related jurisprudence developed by universal and regional monitoring bodies. This publication, which includes a manual and a facilitator's guide, seeks to provide a comprehensive core curriculum on international human rights standards for legal professionals. It includes a CD-ROM containing the full electronic text of the manual in pdf format.

Protection of Human Rights in Criminal Justice Administration

Human beings have always cherished the freedom and have strived hard to protect and preserve the same. Though the freedom is the idealistic state yet the same is subjected to constraints in the larger interests of the masses but still providing for the minimum sufficient levels for the enjoyment of the individuals. There had been the moments of eclipse of freedom in the struggle of existence of mankind, yet the freedom had upsurged more vigorously thereafter. The right to freedom aims at emancipation from the constraints of fear and want preserving the dignity of man and is the destiny of mankind. It signals a state of equilibrium between tyranny and despotism. The right of free However, these ideals are sacrificed at the alter of lust of power leading to the formulation and re-emphasising on preservation of the ideals at a post-eclipsed stage as the existence of mankind revolves around these basic postulates.

The Protection of Human Rights in the Administration of Criminal Justice

This book analyses the rights of crime victims within a human rights paradigm, and describes the inconsistencies resulting from attempts to introduce the procedural rights of victims within a criminal justice system that views crime as a matter between the state and the offender, and not as one involving the victim. To remedy this problem, the book calls for abandoning the concept of crime as

an infringement of a state's criminal laws and instead reinterpreting it as a violation of human rights. The state's right to punish the offender would then be replaced by the rights of victims to see those responsible for violating their human rights convicted and punished and by the rights of offenders to be treated as accountable agents.

11.3 Release on bail

Criminal Justice & Human Rights

Prisons and imprisonment have become a commonplace topic in popular culture as the setting and rationale for fiction and documentaries and most people seem to have a clear notion of what it is like in prison, ranging from the idea of the prison cell as a cosy nook with fast internet access to that of a dungeon with a hard bed and a diet of bread and water. But what is prison really like? Do prisoners have the same rights as everyone else? What are the similarities and differences between prisons in different European countries? This book answers all of these questions, whilst also presenting cutting-edge research on the living conditions of long-term prisoners in Europe and considering whether these conditions meet international human rights standards. Bringing together leading experts in the field, with comprehensive coverage of the issues in Belgium, Croatia, Denmark, England, Finland, France, Germany, Lithuania, Poland, Spain and Sweden, this book offers the first comparative study on the subject. Whereas past research in this area has concentrated on the Anglo-American experience, this book offers a truly comparative European approach and pays due attention to the differences in prison systems between the post-Soviet countries and continental Europe. This book will be key reading for academics and students of criminology, criminal justice and penology and will also be of interest to students and practitioners of law.

Justice for Victims of Crime

Contributed articles presented at two conferences held on human rights defenders in 2011 and on the role of police and human rights mechanisms in criminal justice administration in 2012; and from a colloquium held in 2012 at University of Hyderabad.

Criminal Justice, Police Powers and Human Rights

In recent times, the idea of 'victims' rights' has come to feature prominently in political, criminological and legal discourse, as well as being subject to regular media comment. The concept nevertheless remains inherently elusive, and there is still considerable ambiguity as to the origin and substance of such rights. This monograph deconstructs the nature and scope of the rights of victims of crime against the backdrop of an emerging international consensus on how victims ought to be treated and the role they ought to play. The essence of such rights is ascertained not only by surveying the plethora of international standards which deal specifically with crime victims, but also by considering the potential cross-applicability of standards relating to victims of abuse of power, with whom they have much in common. In this book Jonathan Doak considers the parameters of a number of key rights which international standards suggest victims ought to be entitled to. He then proceeds to ask whether victims are able to rely upon such rights within a domestic criminal justice system characterised by structures, processes and values which are inherently exclusionary, adversarial and punitive in nature.

Long-Term Imprisonment and Human Rights

"This Manual is a practical aid. The principles to be applied by prosecutors in their daily work are to be found in international instruments, regional instruments and commentaries as enacted in domestic law. The Manual introduces practitioners to issues and principles of universal and regional application - practitioners in individual jurisdictions may then marry the applicable principles to provisions of the domestic laws of their own jurisdictions and thus obtain a complete code of conduct for any part of the world and for any official procedure. The Manual includes comments that may assist in that process by putting the quoted texts in a practical context."

Human Rights in India

Argues that the real need is for fundamental rethinking of crime and punishment, rather than short-term tinkering with a prison system that is in an intolerable state of crisis.

Victims' Rights, Human Rights and Criminal Justice

Over the past two decades, human rights as legal doctrine and practice has shifted its engagement with criminal law from a near exclusive condemnation of it as a source of harm toward increasingly invoking it as a necessary remedy for abuses. These shifts are most visible in the context of sexuality, reproduction, and gender. Criminal law appears in modern states as a tool for societies to define forbidden acts (crimes) and prescribe punishments. It authorizes the state to use force as an aspect of expressing and establishing norms—societal expectations for acceptable behavior which when breached permit individuals to be excluded and stigmatized as unfit for inclusion. But the core principles of human rights oppose exclusion and stigma and embrace the equality and dignity of all. Therefore there is an insuperable tension when human rights actors invoke criminal law to protect and vindicate human rights violations. *Beyond Virtue and Vice* examines the ways in which recourse to the criminal law features in work by human rights advocates regarding sexuality, gender, and reproduction and presents a framework for considering if, when, and under what conditions, recourse to criminal law is compatible with human rights. Contributors from a wide range of disciplinary fields and geographic locations offer historical and contemporary perspectives, doctrinal cautionary tales, and close readings of advocacy campaigns on the use of criminal law in cases involving abortion and reproductive rights, HIV/AIDS, sex work and prostitution law, human trafficking, sexual violence across genders, child rights and adolescent sexuality, and LGBT issues. The volume offers specific values and approaches of possible use to advocates, activists, policy makers, legislators, scholars, and students in their efforts to craft dialogue and engagement to move beyond state practices that compromise human rights in the name of restraining vice and extolling virtue. Human Rights Manual for Prosecutors

A practical tool for legal professionals who wish to strengthen their skills in applying the European Convention on Human Rights and the case law of the European Court of Human Rights in their daily work. This is the second and expanded edition of a handbook intended to assist judges, lawyers and prosecutors in taking account of the requirements of the European Convention on Human Rights and its Protocols ("the European Convention") – and more particularly of the case law of the European Court of Human Rights – when interpreting and applying codes of criminal procedure and comparable or related legislation. It does so by providing extracts from key rulings of the European Court and the former European Commission of Human Rights that have determined applications complaining about one or more violations of the European Convention in the course of the investigation, prosecution and trial of alleged offences, as well as in the course of appellate and various other proceedings linked to the criminal process.

Human Rights in the Administration of Criminal Justice

In recent years, more and more scholars in the world feel interested in the topic of human right protection status in China. This book hopes to serve as a window through which its readers will have a better understanding of theory and practice of human rights protection in the Chinese context. The book systematically introduces the dynamic development and progress of human rights protection in China, attaching great importance to the first white paper on Human Rights in China, "The state respects and guarantees human rights" included in the Constitution, National Human Rights Action Plan of China, and then putting forth fundamental principles to achieve international human rights standards and specific measures to improve human rights protection standards in China. Then the book further discusses "Foundations of Human Rights Guarantee in Contemporary China", "Human Rights, Culture and Their Reconstruction in the Chinese Context" and "Socialist Legal System with Chinese Characteristics". Then, a final chapter is dedicated to the topic of "Judicial Protection System of Human Rights in China". In appendices, four important documents on human rights in China, as well as a list of the author's major articles and works in the past 10 years are provided.

The Criminal Justice System

The book gives an account of socio-legal analysis relating to prevailing state of justice administration system. Justice delayed is justice denied. If the system is pregnant with justice, then should it deliver? Pregnancy is good news, but no delivery is bad news. If the pregnancy crosses period of gestation without delivery, miscarriage of justice is bound to happen. In this book, the author has identified ninety-nine most sensitive areas of social life, which need immediate attention for the sake of justice administration. Issues like justice to the children, the girl child, the women in society, weaker sections, labor communities, education to all, malnutrition and health care, unemployed youth, existing poverty conditions, human rights violations and the human dignity, concepts of distributive justice, criminal justice system, justice to the victims of crime, increasing trends of corrupt practices among incapables, justice to the environment, etc., are the crucial issues, amongst others, that need to be judiciously and carefully addressed to by the caretakers of the system. In addition to suggestive measures to the issues as the author comprehends out of his socio-legal research, he has number of questions also to be taken into consideration for ensuring social justice. Author has expressed his serious concerns about existing state of affairs about socioeconomic and political systems. Book goes for a clear warning signal if timely corrective measures are not taken there is an apprehension for failure of social machinery in the years to come.

Beyond Virtue and Vice

The Routledge International Handbook of Criminology and Human Rights brings together a diverse body of work from around the globe and across a wide range of criminological topics and perspectives, united by its critical application of human rights law and principles. This collection explores the interdisciplinary reach of criminology and is the first of its kind to link criminology and human rights. This text is divided into six sections, each with an introduction and an overview provided by one of the editors. The opening section makes an assessment of the current standing of human rights within the discipline. Each of the remaining sections corresponds to a substantive area of harm prevention and social control which together make up the main core of contemporary criminology, namely: criminal law in practice; transitional justice, peacemaking and community safety; policing in all its guises; traditional and emerging approaches to criminal justice; and penalty, both within and beyond the prison. This Handbook forms an authoritative foundation on which future teaching and research about human rights and criminology can be built. This multi-disciplinary text is an essential companion for criminologists, sociologists, legal scholars and political scientists.

Human rights and criminal procedure

This book analyses current developments in Europe and Latin America towards the greater involvement of the parties in the administration of criminal justice. Focusing on both national criminal proceedings and transnational cases, this study employs a comparative law approach to examine the shift experienced by Italy and Brazil from the long tradition of mixed criminal justice to unprecedented adversarial trends. The identification of common needs and divergences from the national approach to criminal justice paves the way for a subsequent analysis of new solution models emerging from international human rights law and EU law. To a great extent, these developments are due to the increasing impact of international human rights case-law on the criminal justice systems of the countries in question. The book concludes by proposing a set of qualitative requirements for a participatory model of criminal justice.

Human Rights Protection System in China

The presumption of innocence is universally recognized as a fundamental human right and a core principle in the administration of criminal justice. Nonetheless, statutes creating criminal offences regularly depart from the presumption of innocence by requiring defendants to prove specific matters in order to avoid conviction. Legislatures and courts seek to justify this departure by asserting that the reversal of the burden of proof is necessary to meet the community interest in prosecuting serious crime and maintaining workable criminal sanctions. This book investigates the supposed justifications for limitation of the presumption of innocence. It does so through a comprehensive analysis of the history, rationale and scope of the presumption of innocence. It is argued that the values underlying the presumption of innocence are of such fundamental importance to individual liberty that they cannot be sacrificed on the altar of community interest. In particular, it is argued that a test of 'proportionality', which seeks to weigh individual rights against the community interest, is inappropriate in the context of the presumption of innocence and that courts ought instead to focus on whether an impugned

measure threatens the values which the presumption is designed to protect. The book undertakes a complete and systematic review of the United Kingdom and Strasbourg authority on the presumption of innocence. It also draws upon extensive references to comparative material, both judicial and academic, from the United States, Canada and South Africa.

Pregnant with Justice

In recent years the English criminal justice system has been shaken by certain notorious cases such as the Guildford Four, the Birmingham Six, and the Cardiff Three. The quashing of convictions in these and other cases has brought to public notice the structural deficiencies which exist in the criminal justice system. In this book Professor Ashworth addresses one of the most controversial areas of the entire criminal process: the pre-trial stage. Taking as his starting point the detention of suspects in police custody, the author examines six key issues in the pre-trial process: the questioning of suspects, cautioning of offenders, prosecutorial review, remand decisions, mode of trial decisions, and plea bargaining. Drawing upon empirical research, substantive law, and official guidance, the author considers how the rights of victims and defendants are promoted within the system, and in particular considers the potential impact of the European Convention of Human Rights on the administration of criminal justice in England and Wales. The recommendations of the 1993 Royal Commission on Criminal Justice are critically appraised.

The Routledge International Handbook of Criminology and Human Rights

The title of this work illustrates the two difficulties which the chosen theme poses, difficulties which arise from the confrontation between collective and individual interests. On the one hand, the criminal process is based on the protection of society; on the other hand, human rights implies respect for all individuals implicated in that process, be they victim, witness or accused. A third difficulty arises in relation to the new influence of European law. While the right to judge has long appeared to be the most obvious indication of national sovereignty, it is now subject to supranational control and a State can be censured by the European Court of Human Rights. Part One of this volume analyses the period of reform in various Eastern and Western European countries; Part Two explores the debate among jurists, historians, sociologists and philosophers on the subject of the criminal trial in a democratic society. Finally, Part Three reflects on the issue within the context of the European Community and the European Council and explores the question of a future model for the European criminal trial. Professor "Mireille Delmas-Marty" teaches at l'Universite de Paris I - Pantheon Sorbonne and is a member of l'Institut Universitaire de France. She is the editor of "The European Convention" "for the Protection of Human Rights, International Protection versus" "National Restrictions" (Martinus Nijhoff Publishers, 1992.)

Audi Alteram Partem in Criminal Proceedings

The prevention of violations of human rights must become the dominant protection strategy of the twenty-first century, nationally, regionally, and globally. This book clearly identifies the need for preventive human rights strategies, maps what exists by way of such strategies at the present time, and offers policy options to deal with the world of the future. Written by a former UN High Commissioner for Human Rights, the book suggests the future lies in strong national protection systems backed up by regional and international organs and an international criminal justice system. The book explores the future of preventive human rights through a wide range of contemporary issues, including: climate change pandemics mass migration global poverty and pervasive inequality inter-state conflicts terrorism, including WMD terrorism gross violations of human rights the financial and economic crisis We are already in a quite different world in the 21st century, and human rights thinking will need to evolve to meet its needs. This important and contemporary volume calls for the modification of current preventive human rights strategies, and is essential reading for all those concerned with the future of international relations and human rights.

The Presumption of Innocence

The Oxford Handbook of Criminal Process surveys the topics and issues in the field of criminal process, including the laws, institutions, and practices of the criminal justice administration. The process begins with arrests or with crime investigation such as searches for evidence. It continues through trial or some alternative form of adjudication such as plea bargaining that may lead to conviction and punishment, and it includes post-conviction events such as appeals and various procedures for

addressing miscarriages of justice. Across more than 40 chapters, this Handbook provides a descriptive overview of the subject sufficient to serve as a durable reference source, and more importantly to offer contemporary critical or analytical perspectives on those subjects by leading scholars in the field. Topics covered include history, procedure, investigation, prosecution, evidence, adjudication, and appeal.

The Criminal Process

'Comparative Perspectives on Criminal Justice in China is highly recommended. The editors have assembled the leading Western and Chinese scholars in the field to examine the administration of criminal justice in China, showing both how far the system has come and the challenges that lie ahead. This is an important and timely book. It is essential reading for anyone who wants to understand or has to deal with the Chinese criminal justice system.' Klaus Mühlhahn, Freie Universität Berlin, Germany 'This highly informative and engaging volume on the Chinese criminal justice system today provides a window into the vagaries of law and its operation in the People's Republic. McConville and Pils bring together an impressive array of scholars whose studies span the criminal process. From initial police investigation, through to prosecution and sentencing of defendants, we see how dominant values in the Chinese state and its structures of power make the practice of criminal justice today still intensely political.' Susan Trevaskes, Griffith University, Australia Comparative Perspectives on Criminal Justice in China is an anthology of chapters on the contemporary criminal justice system in mainland China, bringing together the work of recognised scholars from China and around the world. The book addresses issues at various stages of the criminal justice process (investigation and prosecution of crime and criminal trial) as well as problems pertaining to criminal defence and to parallel systems of punishment. All of the contributions discuss the criminal justice system in the context of China's legal reforms. Several of the contributions urge the conclusion that the criminal process and related processes remain marred by overwhelming powers of the police and Party-State, and a chapter discussing China's 2012 revision of its Criminal Procedure Law argues that the revision is unlikely to bring significant improvement. This diverse comparative study will appeal to academics in Chinese law, society and politics, members of the human rights NGO and diplomatic communities as well as legal professionals interested in China.

The Criminal Process and Human Rights

Countries emerging from conflict often suffer weak or non-existent rule of law, inadequate law enforcement and justice administration capacity, and increased instances of human rights violations. This situation is often exacerbated by a lack of public confidence in State authorities and a shortage of resources. These rule-of-law tools will provide practical guidance to field missions and transitional administrations in critical transitional justice and rule of law-related areas. This publication specifically sets out basic principles and approaches to truth commissions and is intended to assist United Nations and other policymakers in advising on the development of truth-seeking mechanisms.

Preventive Human Rights Strategies

Preface.

The Oxford Handbook of Criminal Process

Traditionally, human rights have protected those facing the sharp edge of the criminal justice system. But over time human rights law has become increasingly infused with duties to mobilise criminal law towards protection and redress for violation of rights. These developments give rise to a whole host of questions concerning the precise parameters of coercive human rights, the rationale(s) that underpin them, and their effects and implications for victims, perpetrators, domestic legal systems, and for the theory and practice of human rights and criminal justice. This collection addresses these questions with a focus on the rich jurisprudence of the European Court of Human Rights (ECtHR). The collection explores four interlocking themes surrounding the issue of coercive human rights: First, the key threads in the doctrine of the ECtHR on duties to mobilise the criminal law as a means of delivering human rights protection. Secondly, the factors that contribute to a readiness to demand coercive measures, including discrimination and vulnerability, and other key justificatory reasoning shaping the development of coercive human rights. Thirdly, the most pressing challenges for the ECtHR's coercive duties doctrine, including: - how it relates to theories and rationales of criminalisation and criminal punishment; - its implications for the fundamental tenets of human rights law itself; - its relationship to transitional justice objectives; and - how (far) it coheres with the imperative of effective protection for persons in precarious

or vulnerable situations. Fourthly, the (prospective) evolution of the coercive human rights doctrine and its application within national jurisdictions.

Comparative Perspectives on Criminal Justice in China

Recommended by The Independent Anti-Slavery Commissioner, Dame Sara Thornton, in her 2020 report on "The Modern Slavery Act 2015 Statutory Defence: A call for evidence" "Rarely can the talent of so many practitioners be accessed in one convenient resource." *Crimeline Human Trafficking and Modern Slavery Law and Practice*, Second Edition provides guidance to those who deal directly or indirectly with those affected by modern slavery and trafficking, employ or manage a workforce, or have oversight of supply chains. It enables practitioners to deal with issues of law and procedure by providing an accessible, but comprehensive, summary of the points that need to be considered in order to plan a coherent litigation or compliance strategy. This Second Edition focuses on areas which have become of critical importance such as: - The modern slavery defence - Corporate accountability and modern slavery compliance statements - National Referral Mechanism for victims - How to identify victims of trafficking and modern slavery - How to elicit key information from victims of trafficking and modern slavery - Council of Europe Convention on Action against Trafficking in Human Beings - The EU Anti-trafficking Directive This highly accessible guide draws on the expertise and experience of professionals in different disciplines, so that practitioners can receive guidance for their own practice and an understanding of the inter-relationship with other practice areas. Criminal, immigration, commercial and civil lawyers will find this an essential guide. It is also important for businesses when undertaking human rights due diligence assessments, as well as for those who work in law enforcement, the judiciary and academia.

Rule-of-law Tools for Post-conflict States

In *The Rights of Victims in Criminal Justice Proceedings for Serious Human Rights Violations*, Juan Carlos Ochoa offers a systematic analysis of international and comparative domestic law on the position of the victim in the prosecution of these infringements, points to the deficiencies of the current state of customary international law, and proposes specific reforms.

The Protection of Human Rights in African Criminal Proceedings

The rule of law is becoming a victim of the struggle against terrorism.

Coercive Human Rights

This book is a study of the workings of the Discretionary Lifer Panels of the Parole Board, the body charged with the responsibility for making decisions on the release of discretionary life sentence prisoners. It traces the origins and development of the Discretionary Lifer Panels following the landmark *Weeks* and *Thynne* decisions of the European Court of Human Rights which led to the establishment of DLPs, and examines the way in which the DLPs developed subsequently - often rather differently to what was originally envisaged as necessary to comply with the decision of the ECHR. This book provides a fascinating case study of a little-known part of the criminal justice system, and explores at the same time the wider issues that have arisen - in particular the impact of the ECHR and the Human Rights Act on the criminal justice system; the relationship between the Parole Board and the Prison and Probation Services; the differences between release procedures for different categories of life sentence prisoner, and those detained compulsorily under the Mental Health Act; the broader social, legal and political context in which DLPs operate, and the nature of discretionary decision-making in the criminal justice system field. the first detailed study - from a leading authority in the field - of the way decisions are reached on discretionary life sentence prisoners explores the impact of the decisions of the European Court of Human Rights and the Human Rights Act on the working of the criminal justice system of interest to practitioners and academics concerned with the criminal justice system.

Judicial Review

Derived from the renowned multi-volume International Encyclopaedia of Laws, this convenient volume provides comprehensive analysis of the legislation and rules that determine civil procedure and practice in Italy. Lawyers who handle transnational matters will appreciate the book's clear explanation of distinct terminology and application of rules. The structure follows the classical chapters of a handbook on civil procedure: beginning with the judicial organization of the courts, jurisdiction issues, a discussion of the various actions and claims, and then moving to a review of the proceedings as such. These general chapters are followed by a discussion of the incidents during proceedings, the legal aid and legal costs, and the regulation of evidence. There are chapters on seizure for security and enforcement of judgments, and a final section on alternative dispute resolution. Facts are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Succinct, scholarly, and practical, this book will prove a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Italy will welcome this very useful guide, and academics and researchers will appreciate its comparative value as a contribution to the study of civil procedure in the international context.
