Milton Keynes didn't exist at this point. Well at least not as it is now. The city was part of a new development project in the 1960s. Before that the area was mostly farmland with very small population. It was inhabited ever since the bronze age it just never was an established city or even a town until the 1960s. I put it in because I simply made a mistake.

This could have been more than three or even less, it's hard to prove where one was born in the 12th century. Not many birth certificates were printed out at that time.

Technically he was only a "master of the scholars" since the chancellorship didn't exist yet but in practice he basically oversaw all the day to day administrations of the University just like a chancellor would. Another reason for staying may have been that Cambridge had a presence of ecclesiastical courts for the bishopric of Ely meaning students and specially law students would have had a great opportunity to work in the town as well as learn.

However there were new Universities in Scotland due to the fact that the oath by Cambridge and Oxford pertained only to England.

Hostels and halls are basically the same thing and the words are used interchangeable for the most part. However the main difference is that the word hostel was mainly used in Cambridge as the word Hall was mainly used in Oxford.

Hostels like St Bernard's or Physwick.

The Cambridge Ancient History

Volume III Part II describes the rise and fall of the great empires of Assyria and Babylonia, the sack of Jerusalem and the exile of the Jews in Babylon.

The Cambridge Ancient History

The period described in Volume X of the second edition of The Cambridge Ancient History begins in the year after the death of Julius Caesar and ends in the year after the fall of Nero, the last of the Julio-Claudian emperors. Its main theme is the transformation of the political configuration of the state and the establishment of the Roman Empire. Chapters 16 supply a political narrative history of the period. In chapters 7-12 the institutions of government are described and analysed. Chapters 13-14 offer a survey of the Roman world in this period region by region, and chapters 15-21 deal with the most important social and cultural developments of the era (the city of Rome; the structure of society; art, literature and law). Central to the period is the achievement of the first emperor, Augustus.

The Cambridge Ancient History

Authoritative history of the Roman Empire during a critical period in Mediterranean history.

The Cambridge Ancient History

This volume of 'The Cambridge Ancient History' embraces the wide range of approaches and scholarship which have in recent decades transformed our view of late antiquity.

The Cambridge Ancient History

Volume V of the new edition of The Cambridge Ancient History encompasses the first Classic age of European civilization--the fifth century BC. This was the first and last period before the Romans in

which great political and military power was located in the same place as cultural importance. This volume, therefore, is more narrowly focused geographically than its predecessors and successors, and hardly strays beyond Greece. Athens is at the center of the picture, both politically and culturally, but events and achievements elsewhere are assessed as carefully as the nature of our sources allows. Two series of narrative chapters, one on the growth of the Athenian empire and the development of Athenian democracy, the other on the Peloponnesian War that brought them down, are divided by a series of studies in which the artistic and literary achievements of the fifth century are described.

The Cambridge Ancient History

The publication of the Plates Volume to accompany the Cambridge Ancient History Volume III and that for Volume II part I inaugurates a new style and format for these books. The illustrations are now presented with a descriptive text and commentary, so that each chapter is a self-contained account of matters of archaeological and art-historical interest, relevant to the history of a period and place. The order of illustration is not always that of the chapters in the text volumes, but is determined by the material illustrated and the principal subjects it suggests. The intention is thus both to complement the text volumes and to provide an independent commentary on the material evidence of antiquity. The Plates for Volume III covers the prehistory of the Balkans, the Near Eastern kingdoms and Egypt, the rise of the Greek States in the period of colonisation and of their 'Archaic' art and culture, down to the later part of the sixth century BC. The narrative draws upon the evidence of topography, excavation and art history to demonstrate how these studies have succeeded in both illustrating and supplementing our knowledge of antiquity, won mainly from written sources.

The Plates Volume can also, however, stand on its own as a visual guide to the formative period of civilization in Egypt, the Middle East and the Aegean region from earliest times to about 1000 B.C.

The Cambridge Ancient History

Part II of volume I deals with the history of the Near East from about 3000 to 1750 B.C. In Egypt, a long period of political unification and stability enabled the kings of the Old Kingdom to develop and exploit natural resources, to mobilize both the manpower and the technical skill to build the pyramids, and to encourage sculptors in the production of works of superlative quality. After a period of anarchy and civil war at the end of the Sixth Dynasty the local rulers of Thebes established the so-called Middle Kingdom, restoring an age of political calm in which the arts could again flourish. In Western Asia, Babylonia was the main centre and source of civilisation, and her moral, though not always her military, hegemony was recognized and accepted by the surrounding countries of Anatolia, Syria, Palestine, Assyria and Elam. The history of the region is traced from the late Uruk and Jamdat Nasr periods up to the rise of Hammurabi, the most significant developments being the invention of writing in the Uruk period, the emergence of the Semites as a political factor under Sargon, and the success of the centralized bureaucracy under the Third Dynasty of Ur.

The Cambridge History of Ancient China

This volume covers the history of the Roman Empire from the accession of Septimius Severus in AD 193 to the death of Constantine in AD 337. This period was one of the most critical in the history of the Mediterranean world. It begins with the establishment of the Severan dynasty as a result of civil war. From AD 235 this period of relative stability was followed by half a century of short reigns of short-lived emperors and a number of military attacks on the eastern and northern frontiers of the empire. This was followed by the First Tetrarchy (AD 284-305), a period of collegial rule in which Diocletian, with his colleague Maximian and two junior Caesars (Constantius and Galerius), restabilised the empire. The period ends with the reign of the first Christian emperor, Constantine, who defeated Licinius and established a dynasty which lasted for thirty-five years.

The Cambridge Ancient History

During this period the dominant powers in the East were Assyria and then Babylonia. Each established an extensive empire that was based on Mesopotamia, and each in turn fell largely through internal strife.

The Cambridge Ancient History

Volume 11 of the second edition of The Cambridge Ancient History covers the history of the Roman empire from AD 70 to 192--Vespasian to the Antonines. The volume begins with the political and military history of the period. Developments in the structure of the empire are then examined, including the organization and personnel of the central government and province-based institutions and practices. A series of provincial studies follows, and the society, economy and culture of the empire as a whole are reviewed in a group of thematic chapters.

The Cambridge Ancient History

Volume II, Part II deals with the history of the region from about 1380 to 1000 B.C., and includes accounts of Akhenaten and the Amarna 'revolution' in Egypt, the expansion and final decline of the Mycenaean civilization in Greece, the exodus and wanderings of the Israelites, and the Assyrian and Hittite empires.

The Cambridge Ancient History

The vast empire that Alexander the Great left at his death in 323 BC has few parallels. For the next three hundred years the Greeks controlled a complex of monarchies and city-states that stretched from the Adriatic Sea to India. F. W. Walbank's lucid and authoritative history of that Hellenistic world examines political events, describes the different social systems and mores of the people under Greek rule, traces important developments in literature and science, and discusses the new religious movements.

The Cambridge Ancient History

The emergence of the Greek world from the Dark Ages to the height of its Geometric civilization was described in The Cambridge Ancient History Volume III Part I. Volume III Part III explores the new prosperity and growth of the young city-states in the eighth to the sixth centuries B.C. This was the great period of expansion and colonization which saw the establishment of Greek city-states from the Western Mediterranean to the Black Sea. This volume describes the East and Egypt, the importance of West Greece and the Aegean islands in trading and exploration, the special characteristics of the societies which were established by colonization. While societies outside the mainstream of expansion and trade retained their old institutions, those at the centre changed rapidly and the period was a time of warfare in mainland Greece. Athens is seen developing into a leading state under the influence of the reforms of Solon and assessment of the social, economic and material history of Greece during these years.

The Cambridge Ancient History: Volume 1, Part 2, Early History of the Middle East

In this, the first comprehensive survey of the economies of classical antiquity, twenty-eight chapters summarise the current state of scholarship in their specialised fields and sketch new directions for research. They reflect a new interest in economic growth in antiquity and develop new methods for measuring economic development, often combining textual and archaeological data that have previously been treated separately.

The Cambridge ancient history
