Official Textbook Adoption List

"In Tyranny of the Textbook, a retired educational director, gives a fascinating look behind-the-scenes of how K-12 textbooks are developed, written, adopted, and sold. Readers will come to understand why all the reform efforts have failed. Most importantly, the author clearly spells out how the system can change so that reforms and standards have a shot at finally being effective"--

Indiana Code

The Trouble with Textbooks sounds the alarm about how textbooks disparage some groups and teach historical distortions. Our schools are supposed to instill young people with American values and provide students with the knowledge necessary for good citizenship. Instead, textbooks are filled with mistakes and misrepresentations. Book jacket.

Procedure for Textbook Adoptions

'Narratives from the Classroom' introduces the reader to many important classroom issues surrounding the field of teaching. It is a collection of personal accounts and ideas written by the teachers and teacher educators.

Indiana Comprehensive Assessment and Program Planning System Annual Report ... Reading, Composition, Spelling

Includes sections: Bill digests (House and Senate), Legislative action, Legislative calendars (House and Senate).

Tyranny of the Textbook

Vividly revealing the multiple layers on which print has been produced, consumed, regulated, and contested for the purpose of education since the mid-nineteenth century, the historical case studies in Education and the Culture of Print in Modern America deploy a view of education that extends

far beyond the confines of traditional classrooms. The nine essays examine “how print educates” in settings as diverse as depression-era work camps, religious training, and broadcast television—all the while revealing the enduring tensions that exist among the controlling interests of print producers and consumers. This volume exposes what counts as education in American society and the many contexts in which education and print intersect. Offering perspectives from print culture history, library and information studies, literary studies, labor history, gender history, the history of race and ethnicity, the history of science and technology, religious studies, and the history of childhood and adolescence, *Education and the Culture of Print in Modern America* pioneers an investigation into the intersection of education and print culture.

The Trouble with Textbooks

ABOUT BOOK ONE AND THE BOOK SERIES *The Giant Slayers* is a story about a little league baseball team from a small community. The story addresses the challenges that face these young people as they become a team made up of both boys and girls from different cultural backgrounds. *The Giant Slayers* is the first book in the series *The Village of Crossroads*. This multicultural community provides a setting where youth experience growing up in today's world. In this exciting adventure series *The Giant Slayers*, with prayer, faith, and the word of God to guide them, confront and grow through the challenging situations and choices before them.

The Indiana Teacher

This book emerges from concern about the condition of First Amendment freedoms in the schools and libraries of this country--dealing with censorship of libraries, texts and teaching.

Journal of the Senate of the State of Indiana

Textbooks have been standard schoolroom fixtures for as long as most living citizens of this country can remember. Many turn-of-the-century students were introduced to reading through the moralistic McGuffey Readers and struggled through the rather drab and colorless pages of volumes on history, geography and civics. In contrast, today's textbooks contain not only narrative content accompanied by colorful photographs and graphics, but also section and chapter exercises that are extended through the use of worksheets and other materials. Moreover, the textbook and its related student materials are packaged together with teacher's editions and tests in grade-level sets that amount to content area programs rather than mere texts.

West's Annotated Indiana Code

In recent years, textbooks have been widely criticized for low standards, lack of imaginativeness, and insensitivity to racial and gender issues. Increasingly, they are cited as another "weak link" in American public education. This book goes beyond the headlines to examine how textbooks are produced, how they are selected, and what pressures are placed on textbook authors and publishers. The book focuses on the relationship of the textbook to the educational system and includes important issues such as the politics of textbook policy, the determinants of textbook content, the role of textbooks in educational reform, and the process of selection at the state level. The authors offer current research on textbook policy including perspectives from those directly involved with textbooks—from several thoughtful analyses by textbook editors and publishers to the views of California's Superintendent of Public Instruction.

Journal of the House of Representatives of the State of Indiana at Their ... Session

Because Teaching Matters provides teachers with a realistic depiction of today's classrooms while highlighting the enormous impact they have on everyday lives. The second edition presents material around a framework of five professional commitments that allows them to make sense of what it means to be a teacher. A new critical-thinking framework helps them manage the content better and retain more of what they learn. Increased coverage of diversity and technology is integrated throughout the chapters. A new chapter has also been added on the history and philosophy of education. This book will help teachers make decisions and take responsibility for the consequences of those choices.

Indiana Register

"Over the next 150 years, members of the Association stood ready to advance the cause of education. This advancement was neither steady nor easy. The Association endured many crises, some financial and some organizational. Pushed at times by charismatic leaders and driven at other times by the winds of cultural change, the Association was, and still is, an organization of individuals." "The history of ISTA is divided into three eras. The first period deals with the defining of the Association and chronicles its quest for universal public education, and its efforts to establish professional standards and secure benefits for teachers. Although this group of educators was a loosely knit association of individuals, they were able to accomplish much."--Jacket.

Narratives from the Classroom

Recent proposals for school reform have involved a significant shift in how curriculum decisions are made, particularly at the state level. In response to these proposals, actions taken by educators have underscored the critical nature of the issue regarding who makes curriculum decisions. This book examines the issues involved in how this pivotal concern has been addressed in the past and how it is being handled now. Each chapter contributes to a more complete understanding of the complexities involved in the recent trend toward the centralization of curriculum decision-making. The book will assist both researchers and practitioners in better understanding the issues involved as well as the impact of the movement.

Intro

The Course Book The Teacher and Course Materials Evaluating a Course Book

Reasons to Use a Course Book The state requires its use The teacher is inexperienced The teacher believes it is an excellent book The learners advocate for using the book

1. Adapting the Course Book - if a book is adopted, teachers may want to supplement it because: . It is missing desired activities • It does not fit age, proficiency, time constraints, or desired

1. Adapting a Course Book: • Add or omit content • Change the sequencing of content • Change the format and presentation • Add or omit monitoring • Add or omit assessment

Adopting Other Materials Because: • The text does not meet the needs of the course • Diverse materials aligns more closely with student needs • Enable participants to negotiate course content .

The environment does not lend itself to a course book • The course book is not based on research

Evaluating a Course Book: . Does it meet language and content needs? • Is it inexpensive and manageable? • Does the format and presentation attract learners? • Is the book complete-able? Are the activities doable? • Is there a balance in the four strands? • Is it well developed reading helps, glossary, snapshots
