Rifts Africa

A unique interdisciplinary approach to disaster risk research, including global hazards and case-studies, for researchers, graduate students and professionals.

Extreme Natural Hazards, Disaster Risks and Societal Implications

The seismically and volcanically active East African Rift System is an ideal laboratory for continental break-up processes: it encompasses all stages of rift development. Its northernmost sectors within the Afar volcanic province include failed rifts, nascent sea-floor spreading, and youthful passive continental margins associated with one or more mantle plumes. A number of models have been proposed to explain the success and failure of continental rift zones, but there remains no consensus on how strain localizes to achieve rupture of initially 125-250 km-thick plates, or on the interaction between the plates and asthenospheric processes. This collection of papers provides new structural, stratigraphic, geochemical and geophysical data and numerical models needed to resolve fundamental questions concerning continental break-up and mantle plume processes. The focus is on how mantle melt intrudes and is distributed through the plate, and how this magma intrusion process controls along-axis segmentation and facilitates break-up.

Warlords of Russia

When an Afrikaans police captain is murdered in a small South African country town, Detective Emmanuel Cooper must navigate his way through the labyrinthine racial and social divisions that split

the community. And as the National Party introduces the laws to support the system of apartheid, Emmanuel struggles – much like Martin Cruz Smith's Arkady Renko – to remain a good man in the face of astonishing power. In a considered but very commercial novel, Malla Nunn combines a compelling plot with a thoughtful and complex portrayal of a fascinating period of history, illustrating the human desires that drive us all, regardless of race, colour or creed. A Beautiful Place To Die is the first of a planned series of novels featuring Detective Emmanuel Cooper. 'A terrific page-turning debut. Clever and multi-layered in its portrayal of the people and landscape of apartheid South Africa. I loved it' Minette Walters 'Remarkable' Literary Review 'A first crime novel of considerable power ' Sydney Morning Herald

The Afar Volcanic Province Within the East African Rift System

This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

A Beautiful Place to Die

An account of the location of black intellectuals in the modern world following the end of racial slavery. The lives and writings of key African Americans such as Martin Delany, W.E.B. Dubois, Frederick Douglas and Richard Wright are examined in the light of their experiences in Europe and Africa.

Rifts Role-Playing Game

The Burning Shore, another gripping installment in Wilbur Smith's Courtney Family Adventure series Centaine de Thiry grew up with privilege, wealth, and freedom on a sprawling French estate. Then war came crashing down around her, and a daring young South African aviator named Michael Courtney stole her heart amidst the destruction. But the tides of fate and battle sent the young woman on a journey across a dangerous sea to the coast of Africa. When Centaine's ship is torpedoed and sunk, she is plunged into a shark-filled sea miles from the unseen shore. And when she reaches land, Centaine puts foot not in the lush world that Michael Courtney described to her, but on the edge of a burning desert--alone and fighting for her life. In a strange world, under a great rushing sky, Centaine sets forth in the company of wandering Bushmen--and then into the arms of a renegade white soldier who may be her savior or destruction. As Michael Courtney's family searches for Centaine, she comes near her promised land--and the untold tragedy and riches that it holds...

Albion's Seed

Drink the Bitter Root is an international story about the ethical and environmental footprint world nations are leaving in Africa in their determined efforts to destabilize and loot the continent. In the spirit of Robert Kaplan and Samantha Power, Gary Geddes sets out in search of justice, healing and reconciliation. He begins his journey at the International Criminal Court in The Hague, then travels to Rwanda, Uganda, the Democratic Republic of Congo, Ethiopia and Somaliland, crossing Lake Victoria and the Great Rift Valley, where human life began. Geddes's quest takes the form of an intimate personal travelogue. Although he confronts the dark realities of abduction, rape, mutilation and murder, drawing on painful encounters, interviews and adventures that occur along the way, Geddes also brings back amazing stories of survival and unexpected moments of grace. His poet's eye and self-deprecating humor draw us ever more deeply into the lives of some amazing Africans, while never forgetting the complicity we all feel in the face of tragic events unfolding there. In the words of author and Africanist Ian Smillie, Drink the Bitter Root is not only poignant, literate and funny, but also "a deeply textured journey without maps into the unexplored rifts of sub-Saharan Africa, the human experience, and the psyche. It's also the masterful handling of a full palette."

Palladium Books Presents-- the Compendium of Weapons, Armour & Castles

This open access book presents a picture of the current energy challenges on the African continent (and the Sub-Saharan region in particular) and proposes pathways to an accelerated energy transition. Starting with an analysis of the status quo and the outlook for Africa's energy demand and energy access, it provides an account of the available resources, including hydrocarbons and renewable energy resources, which are playing an increasingly crucial role. It then moves on to analyze the level of investment required to scale-up Africa's energy systems, shedding light on the key barriers and elaborating on potential solutions. It also provides a suggestion for improving the effectiveness of EU–Africa cooperation. While mainly intended for policymakers and academics, this book also speaks to a broader audience interested in gaining an overview of the challenges and opportunities of the African energy sector today and in the future.

The Black Atlantic

For more than sixty years, Ngugi wa Thiong'o has been writing fearlessly the questions, challenges, histories, and futures of Africans, particularly those of his homeland, Kenya. In his work, which has included plays, novels, and essays, Ngugi narrates the injustice of colonial violence and the dictatorial betrayal of decolonization, the fight for freedom and subsequent incarceration, and the aspiration toward economic equality in the face of gross inequality. With both hope and disappointment, he questions the role of language in both the organization of power structures and the pursuit of autonomy and self-expression. Ngugi's fiction has reached wide acclaim, but his nonfictional work, while equally brilliant, is difficult to find. *Secure the Base* changes this by bringing together for the first time essays spanning nearly three decades. Originating as disparate lectures and texts, this complete volume will remind readers anew of Ngugi's power and importance. Written in a personal and accessible style, the book covers a range of issues, including the role of the intellectual, the place of Asia in Africa, labor and political struggles in an era of rampant capitalism, and the legacies of slavery and prospects for peace. At a time when Africa looms large in our discussions of globalization, *Secure the Base* is mandatory reading.

The Burning Shore

These are the heroes of the *Starry Rift*, a dark river of night that flows between the arms of our galaxy: a headstrong teenaged runaway who makes first contact with a strange alien race; a young officer on a deep-space salvage mission who discovers an exact double of a woman he thought he'd lost; and the crew of an exploration ship who must plead for the human race to avert an interstellar war.

Drink the Bitter Root

This multi-author book has been prepared by an international group of geoscientists that have been active in rift research since the late 1960s. In 1984, an informal, grass-roots study group was initiated to compare individual research results and to explore in greater depth the apparent differences and similarities in the interpretations from various rift systems. The group became known as the CREST working group, an acronym of Continental Rifts: Evolution, Structure and Tectonics, which not surprisingly became the title of this book. *Continental Rifts: Evolution, Structure, Tectonics* presents an overview of the present state of understanding and knowledge of the processes of continental rifting from a multidisciplinary, lithospheric scale perspective. The chapters have been structured on each rift system in approximately the same synoptic sequence, so as to facilitate comparisons of rifts by the reader. The book complements its predecessors by presenting a more unified picture. It succeeds in presenting the status of a representative majority of the continental rift systems that have been at the forefront of recent research. For students and experienced researchers alike, this book will be of significant value in assessing the current state of knowledge and in serving as a framework for future research.

Energy in Africa

A plane crashes on a desert island and the only survivors, a group of schoolboys, assemble on the beach and wait to be rescued. By day they inhabit a land of bright fantastic birds and dark blue seas, but at night their dreams are haunted by the image of a terrifying beast. As the boys' delicate sense of order fades, so their childish dreams are transformed into something more primitive, and their behaviour starts to take on a murderous, savage significance. First published in 1954, *Lord of the Flies* is one of the most celebrated and widely read of modern classics. Now fully revised and updated, this educational

edition includes chapter summaries, comprehension questions, discussion points, classroom activities, a biographical profile of Golding, historical context relevant to the novel and an essay on *Lord of the Flies* by William Golding entitled 'Fable'. Aimed at Key Stage 3 and 4 students, it also includes a section on literary theory for advanced or A-level students. The educational edition encourages original and independent thinking while guiding the student through the text - ideal for use in the classroom and at home.

Secure the Base

This new volume on the Geology of East Africa provides a concise account of the multi-faceted regional geology and stratigraphy of East Africa, that is Kenya, Tanzania and Uganda. Much of the data presented, however, is highly relevant to the surrounding countries and regions as well. Professionals and students, intending to delve into the details of the geological history of that region will appreciate the present volume as a stepping-stone, paving the way to additional studies of the numerous references given in this work.

Rifts Psyscape

During their childhood years in the Kenya Highlands of the 1950s, three girls from vastly different backgrounds become blood sisters, promising that nothing will ever destroy the bond between them. But as they grow up love rivalries, broken promises and the tensions and violence of a newly independent Kenya threaten to tear their childhood dreams apart.

The Starry Rift

"Essential reading for anyone who wants to understand history – and then go out and change it."
–President Barack Obama
Nelson Mandela was one of the great moral and political leaders of his time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. After his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela was at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's antiapartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is still revered everywhere as a vital force in the fight for human rights and racial equality. *Long Walk to Freedom* is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela told the extraordinary story of his life -- an epic of struggle, setback, renewed hope, and ultimate triumph. The book that inspired the major motion picture *Mandela: Long Walk to Freedom*.

Continental Rifts: Evolution, Structure, Tectonics

'I am with you always, even unto the end of the world . . .' Peter Leigh is a missionary called to go on the journey of a lifetime. Leaving behind his beloved wife, Bea, he boards a flight for a remote and unfamiliar land, a place where the locals are hungry for the teachings of the Bible - his 'book of strange new things'. It is a quest that will challenge Peter's beliefs, his understanding of the limits of the human body and, most of all, his love for Bea. *The Book of Strange New Things* is a wildly original tale of adventure, faith and the ties that might hold two people together when they are worlds apart. This momentous novel, Faber's first since *The Crimson Petal and the White*, sees him at his expectation-defying best. WINNER OF THE SALTIRE BOOK OF THE YEAR AWARD SHORTLISTED FOR THE ARTHUR C. CLARKE AWARD AS HEARD ON BBC RADIO 4

Lord of the Flies

What does it mean for music to be considered local in contemporary Christian communities, and who shapes this meaning? Through what musical processes have religious beliefs and practices once 'foreign' become 'indigenous'? How does using indigenous musical practices aid in the growth of local Christian religious practices and beliefs? How are musical constructions of the local intertwined with regional, national or transnational religious influences and cosmopolitanisms? *Making Congregational Music Local in Christian Communities Worldwide* explores the ways that congregational music-making is integral to how communities around the world understand what it means to be 'local' and 'Christian'. Showing how locality is produced, negotiated, and performed through music-making, this book draws on case studies from every continent that integrate insights from anthropology, ethnomusicology,

cultural geography, mission studies, and practical theology. Four sections explore a central aspect of the production of locality through congregational music-making, addressing the role of historical trends, cultural and political power, diverging values, and translocal influences in defining what it means to be 'local' and 'Christian'. This book contends that examining musical processes of localization can lead scholars to new understandings of the meaning and power of Christian belief and practice.

Geology of East Africa

Volume 2 provides an in depth study of the sedimentary rocks, stratigraphic architecture, early dinosaur and reptile footprints, and vertebrate fossils of the Central Atlantic Magmatic Province.

Blood Sisters

Futuristic novel by the author of 'Rynosseros' about the invasion of Earth by the all-powerful Nobodoi and their servant races. Some of the chapters have previously appeared as stories in science fiction magazines.

Rifts Australia

ENGLISH TRANSLATION The book is a Russian textbook on geopolitics. It systematically and detailed the basics of geopolitics as a science, its theory, history. Covering a wide range of geopolitical schools and beliefs and actual problems. The first time a Russian geopolitical doctrine. An indispensable guide for all those who make decisions in the most important spheres of Russian political life - for politicians, entrepreneurs, economists, bankers, diplomats, analysts, political scientists, and so on. D.

Long Walk to Freedom

Taking the Great Rift Valley - the geological fault that will eventually tear Africa in two - as his central metaphor, Alex Perry explores the split between a resurgent Africa and a world at odds with its rise. Africa has long been misunderstood - and abused - by outsiders. Perry travelled the continent for most of a decade, meeting with entrepreneurs and warlords, professors and cocaine smugglers, presidents and jihadis, among many others. Opening with a devastating investigation into a largely unreported war crime in Somalia in 2011, he finds Africa at a moment of furious self-assertion. This is a remade continent, defiantly rising from centuries of oppression to become an economic and political titan: where cash is becoming a thing of the past, where astronomers are unlocking the origin of life and where, twenty-five years after Live Aid, Ethiopia's first yuppies are traders on an electronic food exchange. Yet, as Africa finally wins the substance of its freedom, it must confront the three last false prophets of Islamists, dictators and aid workers, who would keep it in its bonds.

The Book of Strange New Things

Examines the land, vegetation, wildlife, and people of the Great Rift Valley, a 4,000-mile fissure in the earth's crust that stretches from the Lebanon to Mozambique.

Rifts Book of Magic

Despite the lingering effects of more than a decade of sanctions and economic stagnation, South Africa retains the most powerful, industrialized, and diversified economy in sub-Saharan Africa. Today, as a postapartheid future is constructed and as the old political and economic barriers with the rest of the continent crumble, it is probable that th

Rifts Mercenaries

Published by the American Geophysical Union as part of the Geodynamics Series, Volume 8. During the past decade of the International Geodynamics Program many publications dealing with specific rift areas of the Earth's surface have appeared. Most of them followed symposia that were held in the respective rift zones. Among the rifts thus treated are the Rhinegraben, Afar, Iceland, the Baikal rift, the Oslo paleorift, the Rio Grande rift and the Dead Sea rift. Furthermore, publications dealing with studies of the ocean floor have discussed many oceanic rift areas.

Realms of Time

"Definitely the best of the series!""Felt like I was part of the team--so much flippen fun.""Devoured it. Ready for the next book, like right NOW."-----Welcome to the fourth installment of the Scrapyrd Ship series, Realms of Time. Captain Jason Reynolds and his team are up against a new, and unexpected foe--an adversarial force that has every intention of aligning with the powerful and dreaded Craing Empire. The enemy strikes from Earth's high orbit, deploying five time-shifting spheres. The spheres are strategically positioned to link-up and set Earth's clock back 100 years, erasing present time. But when that course of action is interrupted by The Lilly's crew, the results become far worse. Fluctuating time realms rapidly spread across the globe and threaten to rip the planet apart. Join Jason, Billy,

Traveler, Ricket and Dira on their mission as they literally travel to the ends of time to bring Earth back to the twenty-first century.

Hab 12

"Buckle up--this is another crazy ride!" The Scrapyard Ship sci-fi "cliff-hanger" adventures continue with HAB 12, the second book in the series: Captain Jason Reynolds faces new challenges, not only on Earth but from the far side of the universe as well. The only way to stop the Craing this time will be to square off with them on their home turf. Jason's been informed that three powerful Craing warships, having similar technology as The Lilly, will soon be en route to Earth. The Alliance must destroy the Craing's wormhole means of distant space travel to avert Earth's total annihilation. Unfortunately, there's no way to reach the Craing worlds in time, at least not through conventional means. It's up to Jason and his hand-picked assault team to traverse, by advanced phase-shifting means, through the hazardous environment of HAB 12. This is an adventure fraught with carnivores of a Jurassic Age magnitude, and a terrain so deadly that turning back may be their only hope of survival. Note from the author: Don't be surprised by cliff-hanger endings. I'll do my best to keep Scrapyard Ship as well as the Tapped In series books coming so you won't have long to wait for the next book. Enjoy!

Scrapyard Legacy

Better buckle up ... the Scrapyard Ship gang is back for a new interstellar romp!... Over the past year, things have been relatively peaceful within the Planetary Alliance. Captain Jason Reynolds is looking forward to a fishing trip in the deep wilderness on Alantia Dastile with Michael, his six-year-old son. His wife, Dira, and his father, the Fleet Omni, are away on a diplomatic mission to the Sommis of Adriark. It's the perfect time for an interstellar getaway. Or is it? Jason just needs to check on one thing first--a flurry of mechanical issues recently plaguing the Parcical, the Omni's Rogue Class spacecraft--something about a Zoo habitat using increasing amounts of the vessel's memory, that and a flurry of malfunctions with onboard Caldurian technologies. Caught off guard, it's soon discovered; a different kind of war is coming. The Alliance is not prepared. The U.S. Fleet is not prepared. A new enemy rears its ugly head and quickly becomes the dominant force within the sector. For those who survive the coming rampage -- the coming war -- everything will change. The Scrapyard Ship gang unites one more time for this action-packed adventure. Together, they will endeavor to give the Planetary Alliance a fighting chance against almost certain devastation that's heading toward the Sol system.

Space Vengeance

"I LOVED this book!" "Great Book!" "Get Another Fix!" "Fun and Great Series!" "The crazy ride continues... and never lets up!" Captain Jason Reynolds is back! In the third installment of the Scrapyard Ship sci-fi adventure series, Space Vengeance, Jason, his family, and The Lilly's crew face the impending destruction of their internal nano-devices. What's worse, what remains of the Craing fleet, some 1500 warships, is back and headed straight toward the already decimated planets within Allied space. In what looks to be a one-way suicide mission, Jason must leave Nan and Mollie behind on Earth and out of harm's way. While war rages on sixty light years from Earth, maniacal space raider Captain Stalls and hundreds of his pirated warships close in on Earth. Stalls knows exactly what he wants: to find and kill Captain Reynolds and take the beautiful Nan Reynolds for his own. Note from the author: If you've made it to this third installment, you already realize this is an ongoing series. With that said, more often than not these books have cliff-hanger endings!

Plague Ship

Chairman Juan Cabrillo and the rest of the Corporation's mercenaries fight to stop a corrupt activist group from unleashing a viral attack in this #1 New York Times bestselling adventure from the Oregon Files. Captained by the rakish, one-legged Juan Cabrillo and manned by a crew of former military and spy personnel, the Oregon is a private enterprise, available for any government agency that can afford it. They've just completed a top secret mission against Iran in the Persian Gulf when they come across a cruise ship adrift at sea. Hundreds of bodies litter its deck, and, as Cabrillo tries to determine what happened, explosions rack the length of the ship. Barely able to escape with his own life and that of the liner's sole survivor, Cabrillo finds himself plunged into a mystery as intricate -- and as perilous -- as any he has ever known and pitted against a cult with monstrously lethal plans for the human race. . . plans he may already be too late to stop

Strengthening Forensic Science in the United States

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Starship Alexander

A washed-up captain. A worn-out ship. A crew of green cadets. And they're Earth's only hope. The *Alexander* is the last true warship, a relic from the days of interstellar war. She's destined for the scrapyards, and her captain, Richard Hammett, is about to retire. Their last mission is a training run with a ship full of cadets. It's supposed to be a routine hop through a wormhole Gate. But Gates have been going offline, one after another, and Hammett knows in his bones it means trouble. The kind of trouble only a real warship can handle. Defying orders, he takes the *Alexander* through another Gate, and puts the ship smack dab in the path of an alien invasion. Now a captain at the end of his career will have to take dozens of terrified cadets and forge them into a crew of warriors, because the *Alexander* is all that stands between the Earth and the swarming ships of the Hive.

Gun Ship

Fifty years have passed since the first Earth Day, on 22 April 1970. This accessible, incisive and timely collection of essays brings together a diverse set of expert voices to examine how the Earth's environment has changed over this past half century, and what lies in store for our planet over the coming fifty years. *Earth 2020: An Insider's Guide to a Rapidly Changing Planet* responds to a public increasingly concerned about the deterioration of Earth's natural systems, offering readers a wealth of perspectives on our shared ecological past, and on the future trajectory of planet Earth. Written by world-leading thinkers on the front-lines of global change research and policy, this multi-disciplinary collection maintains a dual focus: some essays investigate specific facets of the physical Earth system, while others explore the social, legal and political dimensions shaping the human environmental footprint. In doing so, the essays collectively highlight the urgent need for collaboration across diverse domains of expertise in addressing one of the most significant challenges facing us today. *Earth 2020* is essential reading for everyone seeking a deeper understanding of the past, present and future of our planet, and the role of humanity in shaping this trajectory.

Earth 2020: An Insider's Guide to a Rapidly Changing Planet

Examines differences in taste between modern French classes, discusses the relationship between culture and politics, and outlines the strategies of pretension.

Distinction

An ancient starship discovered...An eternal enemy revealed...An impossible mission to save humankind...The Goliath has been discovered, the first of its secrets revealed. Now the race is on for Captain Mitchell Williams and his crew to return to Liberty and recover Origin's lost memories before the enemy can complete its violent conquest. It's a mission with a near-zero chance of success. A mission that only the Riggers would be crazy enough to accept, and skilled enough to survive. A mission that will test the limits of Mitchell's mind, body, and soul, and force him to make an impossible choice that could cost the lives of millions. This is war, and if he can't win a battle for a single planet, how can he possibly change the outcome of a conflict that has raged beyond eternity?

The End of Liberty (War Eternal, Book Two)

The Weightless World

A funny, colorful, fascinating tour through the work and life of one of today's most influential graphic designers. Esquire. Ford Motors. Burton Snowboards. The Obama Administration. While all of these brands are vastly different, they share at least one thing in common: a teeny little bit of Aaron James Draplin. Draplin is one of the new school of influential graphic designers who combine the power of design, social media, entrepreneurship, and DIY aesthetic to create a successful business and way of life. *Pretty Much Everything* is a mid-career survey of work, case studies, inspiration, road stories, lists, maps, how-tos, and advice. It includes examples of his work—posters, record covers, logos—and presents the process behind his design with projects like *Field Notes* and the “Things We Love” State Posters. Draplin also offers valuable advice and hilarious commentary that illustrates how much more goes into design than just what appears on the page. With Draplin's humor and pointed observations on the contemporary design scene, *Pretty Much Everything* is the complete package.

Draplin Design Co.

Move Over, Buffy! Tinker Not Only Kicks Supernatural Butt She's a Techie Genius, Too! Inventor, girl genius Tinker lives in a near-future Pittsburgh which now exists mostly in the land of the elves. She runs her salvage business, pays her taxes, and tries to keep the local ambient level of magic down with gadgets of her own design. When a pack of wargs chase an Elven noble into her scrap yard, life as she knows it takes a serious detour. Tinker finds herself taking on the Elven court, the NSA, the Elven Interdimensional Agency, technology smugglers and a college-minded Xenobiologist as she tries to stay focused on what's really important her first date. Armed with an intelligence the size of a planet, steel-toed boots, and a junk yard dog attitude, Tinker is ready to kick butt to get her first kiss. At the publisher's request, this title is sold without DRM (Digital Rights Management). "Each and every character is fascinating, extraordinarily well-developed, and gets right under your skin. . . . A terrific, memorable story." ³/₄Julie E. Czerneda, author of *In the Company of Others* "Spencer takes her readers on a fast-paced journey into disbelief. [Her] timing is impeccable and the denouement stunning." ³/₄Romantic Times (four-star review) "This novel [Alien Taste] is keeper-shelf material." ³/₄BookBrowser "Wonderfully inventive . . . a fun protagonist." ³/₄Locus

Tinker

The Great Space They knew the day would come--the day when Earth itself would come under direct attack by the Craing. After destroying much of Jhardon and the Mau planet of Carz-Mau, an elite Vanguard fleet of seven Craing dreadnaughts, planet killers, enters Earth's orbit. Captain Jason Reynolds and the crew aboard his Caldurian ship, *The Lilly*, are once again pulled into action to fend off what just might be their most ruthless and powerful adversary yet. In an unanticipated turn of events, thousands of molt weevils are unleashed on Earth, swarming insectoid aliens with one intent ... kill every man, woman, and child on the surface of the planet. Nan and Mollie must utilize their own cunning and resourcefulness to stay alive long enough to be rescued.

The Great Space

“TRANSMISSION is riveting, unexpected, and firmly rooted in strong psychological profiles backed with thriller and sci-fi elements: what more could readers wish for? (Just the quick publication of Book Two, Arrival.)” --Midwest Book Review From #1 worldwide bestselling fantasy author Morgan Rice comes book #3 in a long-anticipated science fiction series. With planet Earth destroyed, what will become of 13 year old Kevin and Chloe in the mother ship? Will the aliens enslave them? What do they want? Is there any hope of escape? And will Kevin and Chloe ever return to Earth again? “Action-packed Rice’s writing is solid and the premise intriguing.” –Publishers Weekly, re A Quest of Heroes “A superior fantasy... A recommended winner for any who enjoy epic fantasy writing fueled by powerful, believable young adult protagonists.” –Midwest Book Review, re Rise of the Dragons “An action packed fantasy sure to please fans of Morgan Rice’s previous novels, along with fans of works such as THE INHERITANCE CYCLE by Christopher Paolini.... Fans of Young Adult Fiction will devour this latest work by Rice and beg for more.” –The Wanderer, A Literary Journal (regarding Rise of the Dragons) Book #4 in the series is also now available! Also available are Morgan Rice’s many series in the fantasy genre, including A QUEST OF HEROES (BOOK #1 IN THE SORCERER’S RING), a free download with over 1,300 five star reviews!

Ascent (The Invasion Chronicles—Book Three): A Science Fiction Thriller

The Hidden Ship - Blurb I am Brian Polk, a captain in the U.S. Air Force. Was already back stateside for close to a year when all hell broke loose-otherwise I'd be dead right now-like the tens of millions of other poor souls lost. Military installations worldwide were the first targets hit. It was a reign of terror-an interstellar invasion-the beginning of the end of civilization as we knew it. The largest cities were turned to rubble. Government centers were laid to waste, then law enforcement resources were targeted. Finally, the aliens eliminated humanity's means to electronically communicate. The Earupitan's technology, their weaponry, was so remarkable and advanced that we never had a chance. But now, two years later, we're long past self-incrimination-playing the blame game. Today they walk brazenly among us-their reptilian eyes always watchful, always scrutinizing. At their discretion they drag any of us into their headquarters. Most seized never see the light of day after that. Many of us live in fear, wondering what's next for humanity. Then again, there are some amongst us who have befriended the enemy. But not me. I'm far more interested in killing them, maybe a lot of them. Luckily, I possess something of theirs. Something dangerous. So in my own small way I just might make a difference-that, or die trying.

The Hidden Ship

For the first time ever, Bill Willingham's acclaimed, Eisner Award-winning series FABLES is presented in a deluxe hardcover edition collecting issues #1-10. When a savage creature known only as the Adversary conquered the fabled lands of legends and fairy tales, all of the infamous inhabitants of folklore were forced into exile. Disguised among the normal citizens of modern-day New York, these magical characters have created their own peaceful and secret society within an exclusive luxury apartment building called Fabletown. When Snow White's party-girl sister, Rose Red, is apparently murdered, it's up to Fabletown's sheriff, the reformed and pardoned Big Bad Wolf, to find the killer. Meanwhile, trouble of a different sort brews at the Fables' upstate farm where non-human inhabitants are preaching revolution – and threatening Fabletown's carefully nurtured secrecy.

Fables: The Deluxe Edition Book One

First Contact: Assess human with the flawed, rudimentary, mind ... It's a moonless summer night when a severely damaged intergalactic spacecraft enters Earth's upper orbit. The alien pilot is desperate. Needs to hold up long enough to make repairs--do so before his pursuers find him. Cuddy Perkins lives a simple life with his mother, his dog Rufus, and a scattering of farm animals that still inhabit their old, dilapidated, Woodbury Tennessee ranch. He was used to the insults; retard ... simpleton ... village idiot. Momma says to just ignore them ... people can be heartless. But Cuddy already knew he was different. Ever since the accident back when he was seven. He didn't know how long ago that was, exactly, but he did know he was pretty big now--he was taller than his older brother, Kyle ... who was in prison, as well as the Woodbury Sheriff--the man who put him there. Unbeknownst to Cuddy Perkins, his simple, uneventful, life was about to be turned completely upside down.

The Simpleton

This is a study of the material life of information and its devices; of electronic waste in its physical and electronic incarnations; a cultural and material mapping of the spaces where electronics in the form of both hardware and information accumulate, break down, or are stowed away. Where other studies have addressed "digital" technology through a focus on its immateriality or virtual qualities, Gabrys traces the material, spatial, cultural and political infrastructures that enable the emergence and dissolution of these technologies. In the course of her book, she explores five interrelated "spaces" where electronics fall apart: from Silicon Valley to Nasdaq, from containers bound for China to museums and archives that preserve obsolete electronics as cultural artifacts, to the landfill as material repository. *Digital Rubbish: A Natural History of Electronics* describes the materiality of electronics from a unique perspective, examining the multiple forms of waste that electronics create as evidence of the resources, labor, and imaginaries that are bundled into these machines. Ranging across studies of media and technology, as well as environments, geography, and design, Jennifer Gabrys draws together the far-reaching material and cultural processes that enable the making and breaking of these technologies.

Digital Rubbish

Focusing on the arcades of 19th-century Paris--glass-roofed rows of shops that were early centers of consumerism--Benjamin presents a montage of quotations from, and reflections on, hundreds of published sources. 46 illustrations.

USS Hamilton

****Winner of the Financial Times and Goldman Sachs Business Book of the Year Award**** 'Brad Stone's definitive book on Amazon and Bezos' *The Guardian* 'A masterclass in deeply researched investigative financial journalism . . . riveting' *The Times* The definitive story of the largest and most influential company in the world and the man whose drive and determination changed business forever. Though Amazon.com started off delivering books through the mail, its visionary founder, Jeff Bezos, was never content with being just a bookseller. He wanted Amazon to become 'the everything store', offering limitless selection and seductive convenience at disruptively low prices. To achieve that end, he developed a corporate culture of relentless ambition and secrecy that's never been cracked. Until now... Jeff Bezos stands out for his relentless pursuit of new markets, leading Amazon into risky new ventures like the Kindle and cloud computing, and transforming retail in the same way that Henry Ford revolutionised manufacturing. Amazon placed one of the first and largest bets on the Internet. Nothing would ever be the same again.

The Arcades Project

Craing Dominion, Book 5 of the best-selling *Scrapyard Ship* series. Truly dark times have come to the Allied forces, the crew of *The Lilly*, and Earth -- we knew they were coming but nothing will have prepared you for this ...With the introduction of Craing commander Ot-Mul, there's a new standard for evil that will not only shape the rest of this series, but Science Fiction literature as a whole. Join Captain Jason Reynolds as he ventures into the proverbial lion's den in a last ditch effort to even the playing field with the Craing -- an empire that has embarked on a pursuit that will guarantee their de facto dominance for millennia to come.

The Everything Store: Jeff Bezos and the Age of Amazon

Winner of the Wellcome Book Prize 2017. Longlisted for the Man Booker International Prize 2016. Now a major French film, *REPARER LES VIVANTS/HEAL THE LIVING*, directed by Katell Quillevere and starring Emmanuelle Seigner. A twenty-four-hour whirlwind of death and life. In the depths of a winter's night, the heart of Simon Limbeau is resting, readying itself for the day to come. In a few hours' time, just before six, his alarm will go off and he will venture into the freezing dawn, drive down to the beach, and go surfing with his friends. A trip he has made a hundred times and yet, today, the heart of Simon Limbeau will encounter a very different course. But for now, the black-box of his body is free to leap, swell, melt and sink, just as it has throughout the years of Simon's young life. 5.50 a.m. This is his heart. And here is its story. Translated from the French by Jessica Moore

Craing Dominion

Based on first-hand experience with companies such as Volvo, BP, Proctor and Gamble, ICI and Fuji Xerox, Elkington defines the triple bottom line of 21st century business as profit, environmental sustainability and social responsibility.

Mend the Living

Bristol's Green Roots has drawn on the thoughts and memories of more than a hundred people who have worked in Bristol's environmental movement over the last 40 years to make our city, and the world, more sustainable, people-friendly and equal. Tracing the beginnings of organisations like Sustrans, Centre for Sustainable Energy and Bristol Friends of the Earth as well as the work of some of the extraordinarily dedicated sustainable businesses, community groups, initiatives and individuals, this publication celebrates the achievements of those who strive to make Bristol a better place to live. Bristol's Green Roots is a Schumacher Institute project supported by the Heritage Lottery Fund. It documents the history of Bristol's modern environmental movement to ensure that the achievements, successes and lessons learned over the past four decades are recorded for future generations.

Cannibals with Forks

This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. Beyond Observation is structured by the argument that the 'ethnographicness' of a film should not be determined by the fact that it is about an exotic culture – the popular view – nor because it has apparently not been authored – a long-standing academic view – but rather because it adheres to the norms of ethnographic practice more generally. On these grounds, the book covers a large number of films made in a broad range of styles across a 120-year period, from the Arctic to Africa, from the cities of China to rural Vermont. Paul Henley discusses films made within reportage, exotic melodrama and travelogue genres in the period before the Second World War, as well as more conventionally ethnographic films made for academic or state-funded educational purposes. The book explores the work of film-makers such as John Marshall, Asen Balikci, Ian Dunlop and Timothy Asch in the post-war period, considering ideas about authorship developed by Jean Rouch, Robert Gardner and Colin Young. It also discusses films authored by indigenous subjects themselves using the new video technology of the 1970s and the ethnographic films that flourished on British television until the 1990s. In the final part of the book, Henley examines the recent work of David and Judith MacDougall and the Harvard Sensory Ethnography Lab, before concluding with an assessment of a range of films authored in a participatory manner as possible future models.

USS Hamilton

Carmer and Grit investigate a mysteriously magical flying circus in the follow-up to "a fun and frolicking middle grade adventure full of enough fantasy, humor and heart to make giddy even the most finicky reader." (BookPage) Shortly after saving the faeries of Skemantis, magician's apprentice Felix Carmer III and his faerie companion, Grit, head out to see the world. They soon come across a mysteriously magical flying circus. As they get to know the outlandish world of Rinka Tinka's Roving Wonder Show, it becomes clear there's something not quite normal about this circus or its inventor—and that recent airship disasters plaguing nearby Driftside City may have a sinister explanation. Fans of the Wildwood trilogy and Lockwood & Co. series will love the thrills and chills of Carmer and Grit, Book 2: The Crooked Castle as it takes readers up in the air with a flying circus, under the sea to the evil Unseelie kingdom, through a terrifying magical snowstorm, and on a chase with the menacing Wild Hunt.

Boy Gone

The author explores dozens of scriptural passages from the psalms, offering personal ideas and insights and sharing his testimony that "no matter what the trouble and trial of the day may be, we start and finish with the eternal truth that God is for us."--

Bristol's Green Roots

When a cluster of blazingly fast meteorites strikes Earth's upper stratosphere in the year 2129, they release three destabilizing elements into the atmosphere-Strongzine, Stradamine, and Starlox-which encircle the Earth's surface in a thick, partially solidified layer of cloud and begin to spew a constant stream of acid rain onto the surface below. Organic life forms are all but obliterated, and the human race is reduced to a tiny fraction of its population. This event is known as the Ruin. But five centuries

later, humanity still survives. *Cloudwalkers* tells the story of Conn Brataich, a young man who lives a privileged life above the cloudbank, relying on his noble heritage-and the abilities it provides-to guide him through his beautiful but treacherous realm in the New York skylands, and Misty Casper, a Grounder who lives an arduous and somber life hundreds of feet below in the former subway tunnels of crumbling midtown Manhattan. Their two cultures live in uneasy, segregated codependence, rarely interacting until late one fall evening when, mysteriously, an experienced Cloudwalker of noble blood falls five hundred feet to his death. Conn is sent to recover the body in secret, but he doesn't expect to encounter Misty on the dangerous streets of the dying city. Their chance encounter triggers a domino effect that throws them both headlong into a struggle for their very survival. Conn and Misty soon discover that only by working together can they succeed, but first they'll have to put aside their preconceived notions about one another. Dark forces, long thought to have been expunged, have returned and are threatening to destroy both their ways of life. Through love, loss, and the looming threat of war, Misty and Conn will be forced to face their greatest fears for the sake of their very world and each other.

Beyond observation

300+ pages of diagrams, descriptions of techniques and a comprehensive overview of the role direct action plays in resistance--from planning an action, doing a soft blockade, putting up a treesit or executing a lockdown; to legal and prisoner support, direct action trainings, fun political pranks, and more. The DAM has been compiled and updated by frontline activists from around the US to help spread the knowledge and get these skills farther out in the world.

Carmer and Grit, Book Two: The Crooked Castle

Shipping and Logistics Management serves to consolidate the knowledge its authors have acquired from being educators and observers of the shipping industry. Against the background of a global business environment, it explains how the shipping market functions, examining the strategic and operational issues that affect entrepreneurs in this industry. The authors discuss global trends and strategies in the shipping business, looking at the role of logistics service providers and at how the use of information technology can help shipping operations. *Shipping and Logistics Management* also aims to answer several important questions in the shipping industry, including: what are the shipping cost structures?, what are the patterns of sea transport? and how do companies in the shipping industry operate? An invaluable source of information for researchers and advanced, or graduate, students, *Shipping and Logistics Management* is also a useful reference for shipping practitioners and consultants.

For Times of Trouble

Out of Control chronicles the dawn of a new era in which the machines and systems that drive our economy are so complex and autonomous as to be indistinguishable from living things.

Cloudwalkers

This updated edition of *The Secret State* revises Hennessy's picture of the Soviet threat that was presented to ministers from the last days of the Second World War to the 1960s. He maps the size and shape of the Cold War state built in response to that perceived threat, and traces the arguments successive generations of ministers, the military and civil servants have used to justify the British nuclear capability. He also adds new material exploring the threats presented by the IRA and radical Islamic terrorists post 9/11. In what circumstances would the Prime Minister authorize the use of nuclear force and how would his orders be carried out? What would the Queen be told and when? In this captivating new account, Peter Hennessy provides the best answers we have yet had to these questions.

Earth First! Direct Action Manual

Now available for the first time—more than 50 years after it was written—is the memoir of Michael Dillon/Lobzang Jivaka (1915–62), the British doctor and Buddhist monastic novice chiefly known to scholars of sex, gender, and sexuality for his pioneering transition from female to male between 1939 and 1949, and for his groundbreaking 1946 book *Self: A Study in Ethics and Endocrinology*. Here at last is Dillon/Jivaka's extraordinary life story told in his own words. *Out of the Ordinary* captures Dillon/Jivaka's various journeys—to Oxford, into medicine, across the world by ship—within the major

narratives of his gender and religious journeys. Moving chronologically, Dillon/Jivaka begins with his childhood in Folkestone, England, where he was raised by his spinster aunts, and tells of his days at Oxford immersed in theology, classics, and rowing. He recounts his hormonal transition while working as an auto mechanic and fire watcher during World War II and his surgical transition under Sir Harold Gillies while Dillon himself attended medical school. He details his worldwide travel as a ship's surgeon in the British Merchant Navy with extensive commentary on his interactions with colonial and postcolonial subjects, followed by his "outing" by the British press while he was serving aboard The City of Bath. Out of the Ordinary is not only a salient record of an early sex transition but also a unique account of religious conversion in the mid-twentieth century. Dillon/Jivaka chronicles his gradual shift from Anglican Christianity to the esoteric spiritual systems of George Gurdjieff and Peter Ouspensky to Theravada and finally Mahayana Buddhism. He concludes his memoir with the contested circumstances of his Buddhist monastic ordination in India and Tibet. Ultimately, while Dillon/Jivaka died before becoming a monk, his novice ordination was significant: It made him the first white European man to be ordained in the Tibetan Buddhist tradition. Out of the Ordinary is a landmark publication that sets free a distinct voice from the history of the transgender movement.
