The Story of the World, History for the Classical Child

A book that won the Newberry Prize in 1921 for an Outstanding Contribution in Children's Literature, The Story of Mankind, by Hendrik van Loon is indeed a classic that has been enjoyed by generations of children and adults. The book is an engagingly written work, dedicated to the author Hendrik van Loon's two young son's Hansje and Willem. It was created to convey the history of the human race to young people in a way that was interesting, memorable and would spur them onto further research and reading into the subject. Tracing the origins of mankind from about 500,000 BC into the present era, The Story of Mankind encompasses anthropology, culture, sociology and history. This book creates a vivid portrayal of the development of the human race from the time of the caveman to the intelligent dominate species that it is today. Designed to be read by young readers and perhaps their parents and teachers along with them, it provides valuable lessons in a variety of subjects in a very readable fashion. Modern day readers may find some of the concepts politically incorrect or not quite enlightened. Some critics

have also found that van Loon takes Biblical concepts and presents them as proven history. However, aside from these small blips, the book is indeed a treasure trove of information. It also describes the foundations of Western thought and culture. It traces the development of art, music, literature, culture and civilization itself in the Western World. Van Loon was motivated to select the areas of history that he would describe by apparently asking himself whether this particular person or event changed the course of civilization or not. After World War I, the author added one more chapter called "After Seven Years" and in later years, his children and other writers have added more chapters to make the book more contemporary and relevant for modern readers. The original illustrations by the author added to the appeal of the book as he was a talented artist and naturalist. The book was also adapted to film in 1957, in a quirky version starring the inimitable Marx Brothers. As basic reading for anyone interested in the history of the human race, *The Story of Mankind* provides a great launching pad from which to explore the deep and complex mysteries that are contained in the origin of our species on earth. Story of the World 2 Bundle (Story of the World)

This collection employs a multi-disciplinary approach treating ancient childhood in a holistic manner according to diachronic, regional and thematic perspectives. This multi-disciplinary approach encompasses classical studies, Egyptology, ancient history and the broad spectrum of archaeology, including iconography and bioarchaeology. With a chronological range of the Bronze Age to Byzantium and regional coverage of Egypt, Greece, and Italy this is the largest survey of childhood yet undertaken for the ancient world. Within this chronological and regional framework both the social construction of childhood and the child's life experience are explored through the key topics of the definition of childhood, daily life, religion and ritual, death, and the information provided by bioarchaeology. No other volume to date provides such a comprehensive, systematic and cross-cultural study of childhood in the ancient Mediterranean world. In particular, its focus on the identification of society-specific definitions of childhood and the incorporation of the bioarchaeological perspective makes this work a unique and innovative study. *Children in Antiquity* provides an invaluable and unrivalled resource for anyone working on all aspects of the lives and deaths of children in the ancient Mediterranean world.

The Story of the World

“Remains a marvel: a sparkling, erudite, idiosyncratic tour through the human experience. . . . What a pageant this charming narrator continues to offer us!”—Wall Street Journal Winner of the first John Newberry Medal, Hendrik Willem van Loon’s *The Story of Mankind*, originally written for the author’s grandchildren, has charmed generations with its warmth and wisdom. Beginning with the origins of human life and sweeping forward to illuminate all of history, van Loon’s incomparable prose and illustrations presented a lively rendering of the people and events that have shaped world history. This new edition, updated by best-selling historian Robert Sullivan, continues van Loon’s personable style and incorporates the most important developments of the early twenty-first century, including the war on terrorism, global warming, and the explosion of social media. The result remains extremely “valid in broad outline if not detail and, as ever, a grand and thought-provoking read” (Kirkus Reviews).

Children in Antiquity

Take a rollercoaster ride through the past with this fact-including and visually stunning children's history encyclopedia. Discover what the major turning points in history were, from the evolution and migrations of early humans, to the rise and fall of great empires such as Ancient Rome and the Aztecs. This visual reference encyclopedia uses stunning photographs and supporting illustrations to trace the history of science from Ancient Greece, through the major contributions of the Islamic world, the Scientific Revolution, the Space Race, and on to modern technology. The arts, religions, and ideas are also showcased, from the Renaissance and Greek drama to the origins of major world religions, such as Christianity and Buddhism. *Explanatorium of History* is the ultimate visual encyclopedia for kids aged 10-14, telling the story of "us\

The Story of Mankind (Updated) (Liveright Classics)

The Story of Mankind covers the history of western civilization beginning with primitive man, the development of writing, art, and architecture, the rise of major religions, and the formation of the modern nation-state. Van Loon explains in the book how he selected what and what not to include by subjecting all materials to the question: Did the person or event in question perform an act without which the entire history of civilization would have been different?
