Protecting the right to freedom of expression under the European Convention on Human Rights

European Convention on Human Rights – Article 10 – Freedom of expression 1. Everyone has the right to freedom of expression. This right shall include freedom to hold opinions and to receive and impart information and ideas without interference by public authority and regardless of frontiers. This article shall not prevent States from requiring the licensing of broadcasting, television or cinema enterprises. 2. The exercise of these freedoms, since it carries with it duties and responsibilities, may be subject to such formalities, conditions, restrictions or penalties as are prescribed by law and are necessary in a democratic society, in the interests of national security, territorial integrity or public safety, for the prevention of disorder or crime, for the protection of health or morals, for the protection of the reputation or rights of others, for preventing the disclosure of information received in confidence, or for maintaining the authority and impartiality of the judiciary. In the context of an effective democracy and respect for human rights mentioned in the Preamble to the European Convention on Human Rights, freedom of expression is not only important in its own right, but it also plays a central part in the protection of other rights under the Convention. Without a broad guarantee of the right to freedom of expression protected by independent and impartial courts, there is no free country, there is no democracy. This general proposition is undeniable. This handbook is a practical tool for legal professionals from Council of Europe member states who wish to strengthen their skills in applying the European Convention on Human Rights and the case law of the European Court of Human Rights in their daily work.

Bulletin of the Atomic Scientists

The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

Prevent strategy

The Prevent strategy, launched in 2007 seeks to stop people becoming terrorists or supporting terrorism both in the UK and overseas. It is the preventative strand of the government's counter-terrorism strategy, CONTEST. Over the past few years Prevent has not been fully effective and it needs to change. This review evaluates work to date and sets out how Prevent will be implemented in the future. Specifically Prevent will aim to: respond to the ideological challenge of terrorism and the threat we face from those who promote it; prevent people from being drawn into terrorism and ensure that they are given appropriate advice and support; and work with sectors and institutions where there are risks of radicalization which need to be addressed

What We Owe Each Other

First published in the United Kingdom by The Bodley Head, an imprint of Vintage, in 2021.

United States Government

This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

Bulletin of the Atomic Scientists

The Committee on House Administration is pleased to present this revised book on our United States Government. This publication continues to be a popular introductory guide for American citizens and those of other countries who seek a greater understanding of our heritage of democracy. The question-and-answer format covers a broad range of topics dealing with the legislative, executive, and judicial branches of our Government as well as the electoral process and the role of political parties.--Foreword.

A Question Of Trust

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

The Green Book

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Our American Government

The May 2007 White Paper "Meeting the energy challenge: a white paper on energy" (Cm. 7124, ISBN 9780101712422) set out the Government's international and domestic strategy to address the two main challenges: tackling climate change by reducing carbon dioxide emissions; and ensuring clean and affordable energy as the country becomes increasingly dependent on imported fuel. An online consultation on nuclear power and the role of the private sector: www.direct.gov.uk/nuclearpower2007 was produced at the same time. This White Paper sets out the Government's decision taken in response to the consultation. The Government believes it is in the public interest that new nuclear power stations should have a role to play in the country's future energy mix alongside other low-carbon sources; that energy companies should have the option of investing in them; and that the Government should take active steps to open up the way to the construction of new nuclear power stations. It will be for the energy companies to fund, develop and build the new stations, including meeting the full costs of decommissioning and their full share of waste management costs. Section 1 summarises the consultation process. Section 2 addresses the key issues that arose from the consultation and how they have been taken into account in shaping policy and reaching conclusions. Section 3 outlines the

facilitative actions the Government will take to reduce the regulatory and planning risks associated with investing in new nuclear power stations. Finally there are three annexes: alternatives to nuclear power; justification and strategic siting assessment processes; regulatory and advisory structure for nuclear power.

Model Rules of Professional Conduct

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Parenting Matters

Classic Books Library presents this brand new edition of “The Federalist Papers”, a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. “The Federalist”, as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation’s finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

Meeting the energy challenge

Dated October 2007. The publication is effective from October 2007, when it replaces "Government accounting". Annexes to this document may be viewed at www.hm-treasury.gov.uk

The Athenaeum

Get ready for the biggest curriculum change in more than a decade! To help teachers to deliver the new Curriculum, Scholastic has published the first complete printed version for Key Stages 1 and 2. Full programmes of study for all 11 primary subjects are included along with practical advice on how to implement the curriculum using Scholastic's time-saving resources - including the 1 million best-selling 100s series.

Language Power: Grades 3-5 Level A Teacher's Guide

Motivation is key to substance use behavior change. Counselors can support clients' movement toward positive changes in their substance use by identifying and enhancing motivation that already exists. Motivational approaches are based on the principles of person-centered counseling. Counselors' use of empathy, not authority and power, is key to enhancing clients' motivation to change. Clients are experts in their own recovery from SUDs. Counselors should engage them in collaborative partnerships. Ambivalence about change is normal. Resistance to change is an expression of ambivalence about change, not a client trait or characteristic. Confrontational approaches increase client resistance and discord in the counseling relationship. Motivational approaches explore ambivalence in a nonjudgmental and compassionate way.

Norton's Literary Gazette and Publishers' Circular

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide

professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Popular Science

Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

The Federalist Papers

This book is designed to introduce doctoral and graduate students to the process of conducting scientific research in the social sciences, business, education, public health, and related disciplines. It is a one-stop, comprehensive, and compact source for foundational concepts in behavioral research, and can serve as a stand-alone text or as a supplement to research readings in any doctoral seminar or research methods class. This book is currently used as a research text at universities on six continents and will shortly be available in nine different languages.

Norton's Literary Advertiser

When President Barack Obama announced his plans to shield millions of immigrants from deportation, Congress and the commentariat pilloried him for acting unilaterally. When President Donald Trump attempted to ban immigration from six predominantly Muslim countries, a different collection of critics attacked the action as tyrannical. Beneath this polarized political resistance lies a widely shared belief: that Congress, not the President, makes our immigration policies, dictating who can come to the United States, and who can stay, in a detailed and comprehensive legislative code. In *The President and Immigration Law*, Adam Cox and Cristina Rodriguez shatter the myth that Congress controls immigration policy. Drawing on a wide range of sources—rich historical materials, unique data on immigration enforcement, and insider accounts of our nation's massive immigration bureaucracy—they tell the story of how the President became our immigration policymaker-in-chief over the course of two centuries. From founding-era debates over the Alien and Sedition Acts to Jimmy Carter's intervention during the Mariel boatlift from Cuba, presidential crisis management has played an important role in this story. Far more foundational, however, has been the ordinary executive obligation to enforce the law. Over time, the power born of that duty has become the central vehicle for making immigration policy in the United States. A pathbreaking account of the President's relationship to Congress, Cox and Rodriguez's analysis helps us better understand how the United States ended up running an enormous shadow immigration system—one in which nearly half of all noncitizens living in America are here in violation of the law. It also provides a blueprint for reform, one that accepts rather than laments the role the President plays in shaping the national community, while outlining strategies to curb the abuse of law enforcement authority in immigration and beyond.

Managing Public Money

What really sets the best managers above the rest? It's their power to build a cadre of employees who have great inner work lives—consistently positive emotions; strong motivation; and favorable perceptions of the organization, their work, and their colleagues. The worst managers undermine inner work life, often unwittingly. As Teresa Amabile and Steven Kramer explain in *The Progress Principle*,

seemingly mundane workday events can make or break employees' inner work lives. But it's forward momentum in meaningful work—progress—that creates the best inner work lives. Through rigorous analysis of nearly 12,000 diary entries provided by 238 employees in 7 companies, the authors explain how managers can foster progress and enhance inner work life every day. The book shows how to remove obstacles to progress, including meaningless tasks and toxic relationships. It also explains how to activate two forces that enable progress: (1) catalysts—events that directly facilitate project work, such as clear goals and autonomy—and (2) nourishers—interpersonal events that uplift workers, including encouragement and demonstrations of respect and collegiality. Brimming with honest examples from the companies studied, *The Progress Principle* equips aspiring and seasoned leaders alike with the insights they need to maximize their people's performance.

The National Curriculum in England - Handbook for Primary Teachers

This report is based on a rethinking of the concept of motivation, which is redefined here as purposeful, intentional, & positive -- directed toward the person's best interests. This report shows how substance abuse treat. staff can influence change by developing a therapeutic relationship that respects & builds on the client's autonomy & makes the treat. clinician a partner in the change process. Describes motivational interventions that can be used at all stages of the change process, from pre-contemplation & preparation to action & maintenance, & informs readers of the research, results, tools, & assessment instruments related to enhancing motivation.

TIP 35: Enhancing Motivation for Change in Substance Use Disorder Treatment (Updated 2019)

American Government 3e aligns with the topics and objectives of many government courses. Faculty involved in the project have endeavored to make government workings, issues, debates, and impacts meaningful and memorable to students while maintaining the conceptual coverage and rigor inherent in the subject. With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from the fundamental principles of institutional design at the founding, to avenues of political participation, to thorough coverage of the political structures that constitute American government. The book builds upon what students have already learned and emphasizes connections between topics as well as between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses, future careers, and as engaged citizens.

Transforming the Workforce for Children Birth Through Age 8

Two Treatises of Government by John Locke. Suggested reading for Randolph High School Summer Reading.

Backpacker

This public inquiry report into serious failings in healthcare that took place at the Mid Staffordshire NHS Foundation Trust builds on the first independent report published in February 2010 (ISBN 9780102964394). It further examines the suffering of patients caused by failures by the Trust: there was a failure to listen to its patients and staff or ensure correction of deficiencies. There was also a failure to tackle the insidious negative culture involving poor standards and a disengagement from managerial and leadership responsibilities. These failures are in part a consequence of allowing a focus on reaching national access targets, achieving financial balance and seeking foundation trust status at the cost of delivering acceptable care standards. Further, the checks and balances that operate within the NHS system should have prevented the serious systemic failure that developed at Mid Staffs. The system failed in its primary duty to protect patients and maintain confidence in the healthcare system. This report identifies numerous warning signs that could and should have alerted the system to problems developing at the Trust. It also sets out 290 recommendations grouped around: (i) putting the patient first; (ii) developing a set of fundamental standards, easily understood and accepted by patients; (iii) providing professionally endorsed and evidence-based means of compliance of standards that are understood and adopted by staff; (iv) ensuring openness, transparency and candour throughout system; (v) policing of these standards by the healthcare regulator; (vi) making all those who provide care for patients, properly accountable; (vii) enhancing recruitment, education, training and support of all key contributors to the provision of healthcare; (viii) developing and sharing ever improving means of measuring and understanding the performance of individual professionals, teams, units and provider organisations for the patients, the public, and other stakeholders.

Social Science Research

The Institute of Medicine study *Crossing the Quality Chasm* (2001) recommended that an interdisciplinary summit be held to further reform of health professions education in order to enhance quality and patient safety. *Health Professions Education: A Bridge to Quality* is the follow up to that summit, held in June 2002, where 150 participants across disciplines and occupations developed ideas about how to integrate a core set of competencies into health professions education. These core competencies include patient-centered care, interdisciplinary teams, evidence-based practice, quality improvement, and informatics. This book recommends a mix of approaches to health education improvement, including those related to oversight processes, the training environment, research, public reporting, and leadership. Educators, administrators, and health professionals can use this book to help achieve an approach to education that better prepares clinicians to meet both the needs of patients and the requirements of a changing health care system.

The President and Immigration Law

The 1975 publication of Robin Tolmach Lakoff's *Language and Woman's Place*, is widely recognized as having inaugurated feminist research on the relationship between language and gender, touching off a remarkable response among language scholars, feminists, and general readers. For the past thirty years, scholars of language and gender have been debating and developing Lakoff's initial observations. Arguing that language is fundamental to gender inequality, Lakoff pointed to two areas in which inequalities can be found: Language used about women, such as the asymmetries between seemingly parallel terms like master and mistress, and language used by women, which places women in a double bind between being appropriately feminine and being fully human. Lakoff's central argument that "women's language" expresses powerlessness triggered a controversy that continues to this day. The revised and expanded edition presents the full text of the original first edition, along with an introduction and annotations by Lakoff in which she reflects on the text a quarter century later and expands on some of the most widely discussed issues it raises. The volume also brings together commentaries from twenty-six leading scholars of language, gender, and sexuality, within linguistics, anthropology, modern languages, education, information sciences, and other disciplines. The commentaries discuss the book's contribution to feminist research on language and explore its ongoing relevance for scholarship in the field. This new edition of *Language and Woman's Place* not only makes available once again the pioneering text of feminist linguistics; just as important, it places the text in the context of contemporary feminist and gender theory for a new generation of readers.

Council on Foreign Relations

The Consumer Price Index Manual: Concepts and Methods contains comprehensive information and explanations on compiling a consumer price index (CPI). The Manual provides an overview of the methods and practices national statistical offices (NSOs) should consider when making decisions on how to deal with the various problems in the compilation of a CPI. The chapters cover many topics. They elaborate on the different practices currently in use, propose alternatives whenever possible, and discuss the advantages and disadvantages of each alternative. The primary purpose of the Manual is to assist countries in producing CPIs that reflect internationally recommended methods and practices.

The Progress Principle

History text includes such features as Virtual Field Trips to encourage viewing of history sites on the Internet, Assessing Your Skills designed to hone critical thinking skills, and Taking Notes and Creating a Chapter Summary exercises to provide ways for students to organize content.
