What is a HAZOP? A Crash Course - What is a HAZOP? A Crash Course by Icarus-ORM Academy 155,579 views 8 years ago 7 minutes, 52 seconds - We'll explore a widely-used methodology within the engineering safety and risk management: a Hazard and Operability study ...
Intro

HAZOP stands for hazard and operability study

With a facilitator to guide the team to achieve high quality decisions

Identify the risk by asking what can cause a hazardous event...

The consequence of vessel rupture can be a fatality

Evaluate the risk based on the severity and probability without any safeguards

Make a decision to accept the risk or make a recommendation to further reduce the risk

Make a recommendation when the risk is not acceptable

A HAZOP alone does not change your risks exposure unless there are effective actions sustainable for operation

What is a LOPA? A Crash Course - What is a LOPA? A Crash Course by Icarus-ORM Academy 86,338 views 8 years ago 10 minutes, 31 seconds - We'll take a look at another PHA methodology which complements the **HAZOP**,. By using a Layer of Protection Analysis (LOPA), ...

Intro

LOPA stands for Layer of Protection Analysis

The level of risk acceptance is expressed in terms of tolerable frequency

Identify a single consequence to analyze

Understand your company's tolerable frequency for the consequence

Assess the probability of the initiating events

Identify independent protection layers and assign a risk reduction factor

Calculate the expected frequency of the consequence scenario

Decide if risk is acceptable based on the tolerable frequency

Determine the additional safeguards to reduce the risk to meet the tolerable frequency

Let's add an independent high pressure shutdown to the blanket gas as a safeguard

This safeguard is a safety instrumented function (SIF)

Or you can say the safety instrumented function must meet the requirements of safety integrity level 2

Adding a safety instrumented function is one option to meet the tolerable frequency.
