15 Steps to Force Your Way Out of Poverty - 15 Steps to Force Your Way Out of Poverty by Alux.com

598,741 views 3 years ago 21 minutes - In this Alux.com video we will be answering the following

questions: How to get out of poverty? What are the steps to get out of ...

Intro

Accept that things have to change

Honestly analyse your life and put everything down

Identify the bare minimum for survival

Cut everything else out for at least 6 months

Get a job or Increase your work volume

Prioritise immediate high interest debts

Save 1 month worth of essential money

Pride aside, take every handout you can get

Identify sustainable opportunities to increase your income

Start build good credit

Refinance long-term debts for better terms

Save 4 months worth of essential money

Use free resources to build your skillset and monetize that

Become a contractor instead of an employee

Group-source your way out of poverty

Climate Change (A Ladybird Expert Book)

What is climate change? How does it work? Learn from the experts in the ALL-NEW LADYBIRD EXPERT SERIES Learn about one of the most important issues facing our world today in this clear, simple and enlightening introduction. From HRH The Prince of Wales, environmentalist Tony Juniper and climate scientist Dr Emily Shuckburgh, it explains the history, dangers and challenges of global warming and explores possible solutions with which to reduce its impact. You'll learn about . . . - The causes and consequences of climate disruption - Heatwaves, floods and other extreme weather - Disappearing wildlife - Acid oceans - The benefits of limiting warming - Sustainable farming - New, clean technologies - The circular economy Learn about other topics in the Ladybird Experts series including Gravity, Quantum Physics, Climate Change and Evolution. Written by the leading lights and most outstanding communicators in their fields, the Ladybird Expert books provide clear, accessible and authoritative introductions to subjects drawn from science, history and culture. For an adult readership, the Ladybird Expert series is produced in the same iconic small hardback format pioneered by the original Ladybirds. Each beautifully illustrated book features the first new illustrations produced in the original Ladybird style for nearly forty years.

Climate Change (A Ladybird Expert Book)

Evolution (A Ladybird Expert Book)

Part of the new Ladybird Expert series, Evolution is a clear, simple and entertaining introduction to Charles Darwin's pioneering and revolutionary theory of how all life changes through natural selection. Written by broadcaster, prize-winning author and geneticist Professor Steve Jones, it explores the extraordinary diversity of life on our planet through the complex interactions of one very simple theory. You'll discover the common origins of dogs and Brussels sprouts, how it is we're all mutants, where wings, ears and tails came from, why sex is good for you, how some dinosaurs evolved and survived, and why human evolution may finally have stopped. Written by the leading lights and most outstanding communicators in their fields, the Ladybird Expert books provide clear, accessible and authoritative introductions to subjects drawn from science, history and culture. Other books currently available in the Ladybird Expert series include: · Climate Change · Quantum Mechanics For an adult readership, the Ladybird Expert series is produced in the same iconic small format pioneered by the original Ladybirds. Each beautifully illustrated book features the first new illustrations produced in the original Ladybird style for nearly forty years.

Plate Tectonics: A Ladybird Expert Book

Part of the ALL-NEW Ladybird Expert series. Discover in this accessible and authoritative introduction the fundamental theory of how our dynamic planet works. Written by the celebrated geologist, academic and popular science presenter Iain Stewart, Plate Tectonics explores the Earth as a planetary machine and investigates the people and ideas that changed the way we look at the world. You'll learn about the make up of the Earth in the past and the present, from monsoon-like currents in our planet's

radioactive interior to magnetic force lines and what the planet would look like without water. - Our planet as an active living system - The planetary force field - Fault lines that cross continents - How plates tectonics protects life on Earth - And much more . . . Written by the leading lights and most outstanding communicators in their fields, the Ladybird Expert books provide clear, accessible and authoritative introductions to subjects drawn from science, history and culture. For an adult readership, the Ladybird Expert series is produced in the same iconic small hardback format pioneered by the original Ladybirds. Each beautifully illustrated book features the first new illustrations produced in the original Ladybird style for nearly forty years.

Shackleton (A Ladybird Expert Book)

Part of the new Ladybird Expert series, Shackleton is a clear, simple and enlightening introduction to perhaps the most extraordinary survival stories of all time. Polar explorer Ben Saunders draws on his own experience of the Antarctic to bring to life the history, dangers and challenges of Shackleton's Endurance expedition. Inside, you'll discover how Shackleton, by successfully bringing all his men home in the face of near insurmountable odds, earned his reputation as one of the greatest leaders in history. Written by the leading lights and most outstanding communicators in their fields, the Ladybird Expert books provide clear, accessible and authoritative introductions to subjects drawn from science, history and culture. Other books currently available in the Ladybird Expert series include: · Climate Change · Quantum Mechanics · Evolution · Battle of Britain For an adult readership, the Ladybird Expert series is produced in the same iconic small hardback format pioneered by the original Ladybirds. Each beautifully illustrated book features the first new illustrations produced in the original Ladybird style for nearly forty years.

Quantum Mechanics (A Ladybird Expert Book)

Part of the new Ladybird Expert series, Quantum Mechanics is a clear, simple and entertaining introduction to the weird, mind-bending world of the very, very small. Written by physicist and broadcaster Professor Jim Al-Khalili, it explores all the key players, breakthroughs, controversies and unanswered questions of the quantum world. You'll discover how the sun shines, why light is both a wave and a particle, the certainty of the Uncertainty Principle, Schrodinger's Cat, Einstein's spooky action, how to build a quantum computer, and why quantum mechanics drives even its experts completely crazy. 'Jim Al-Khalili has done an admirable job of condensing the ideas of quantum physics from Max Planck to the possibilities of quantum computers into brisk, straightforward English' The Times Written by the leading lights and most outstanding communicators in their fields, the Ladybird Expert books provide clear, accessible and authoritative introductions to subjects drawn from science, history and culture. Other books currently available in the Ladybird Expert series include: · Climate Change · Evolution For an adult readership, the Ladybird Expert series is produced in the same iconic small format pioneered by the original Ladybirds. Each beautifully illustrated book features the first new illustrations produced in the original Ladybird style for nearly forty years.

A Natural History of Ladybird Beetles

A comprehensive, full-colour work providing insights into recent advances in the ecological understanding of ladybirds.

Witchcraft: A Ladybird Expert Book

Part of the new Ladybird Expert series, Witchcraft is an accessible, authoritative and captivating introduction to the magical myths that have coloured the popular imagination for centuries. Written by celebrated historian and broadcaster Dr Suzannah Lipscomb, Witchcraft explores the moment in history when witches were perceived to be especially dangerous: the famous witch hunts between 1450 and 1750. You'll learn how the figure of the witch remains culturally relevant. In horror films, TV shows and pop culture, the figure of the witch retains her potency to attract and repel. Witch hunts in one form or another have persisted for thousands of years. Understanding why people were and continue to be persecuted for witchcraft matters now, more than ever.

Ladybirds

This revised and updated edition of Ladybirds provides a succinct but comprehensive and accessible overview of the biology of ladybirds and their parasites, focusing on ecology in an evolutionary context.

It provides the latest information, coverage of recent additions to the British list including the harlequin ladybird, and makes suggestions for further research, both short and long term, highlighting gaps in knowledge and showing readers how to get involved with recording and studying ladybirds. It includes updated keys for the identification of ladybirds at late-instar larval and adult stages, and techniques for studying ladybirds and their parasites in both laboratory and field. The authors hope that this book will be a valuable resource, not only for students, from school to university and beyond, but also for anyone with an interest in natural history, whether professional or recreational.

Rewilding

Discusses the benefits and risks, as well as the economic and socio-political realities, of rewilding as a novel conservation tool.

The Bench

#1 New York Times Bestselling Picture Book Meghan, The Duchess of Sussex's first children's book, *The Bench*, beautifully captures the special relationship between father and son, as seen through a mother's eyes. The book's storytelling and illustration give us snapshots of shared moments that evoke a deep sense of warmth, connection, and compassion. This is your bench Where you'll witness great joy. From here you will rest See the growth of our boy. In *The Bench*, Meghan, The Duchess of Sussex, touchingly captures the evolving and expanding relationship between father and son and reminds us of the many ways that love can take shape and be expressed in a modern family. Evoking a deep sense of warmth, connection, and compassion, *The Bench* gives readers a window into shared and enduring moments between a diverse group of fathers and sons - moments of peace and reflection, trust and belief, discovery and learning, and lasting comfort. Working in watercolour for the first time, Caldecott-winning, bestselling illustrator Christian Robinson expands on his signature style to bring joy and softness to the pages, reflecting the beauty of a father's love through a mother's eyes. With a universal message, this thoughtful and heartwarming read-aloud is destined to be treasured by families for generations to come.

Blitzkrieg: Book 1 of the Ladybird Expert History of the Second World War

Part of the ALL-NEW Ladybird Expert series. Learn about the fall of Europe in the Second World War in one of the most successful military strategies of modern warfare in this accessible, insightful and authoritative account. Historian, author and broadcaster James Holland draws on the latest research and interviews with participants to bring colour, detail and a fresh perspective to the story. You'll find out how Hitler quickly turned Germany into a war machine: the recruitment of key allies, control over German media, the significance of Poland and military attitudes towards the power of Germany's armies. Inside, you'll discover . . . - Why the Germans allied with the Soviet Union - Why it was so easy for Germany to invade Poland - The propaganda war in Germany, France and Britain - Why the German approach to war was called *Bewegungskrieg* - The power of radio - And much more . . . Written by the leading lights and most outstanding communicators in their fields, the Ladybird Expert books provide clear, accessible and authoritative introductions to subjects drawn from science, history and culture. For an adult readership, the Ladybird Expert series is produced in the same iconic small hardback format pioneered by the original Ladybirds. Each beautifully illustrated book features the first new illustrations produced in the original Ladybird style for nearly forty years.

What Has Nature Ever Done For Us?

From Indian vultures to Chinese bees, Nature provides the 'natural services' that keep the economy going. From the recycling miracles in the soil; an army of predators ridding us of unwanted pests; an abundance of life creating a genetic codebook that underpins our food, pharmaceutical industries and much more, it has been estimated that these and other services are each year worth about double global GDP. Yet we take most of Nature's services for granted, imagining them free and limitless ... until they suddenly switch off. This is a book full of immediate, impactful stories, containing both warnings (such as in the tale of India's vultures, killed off by drugs given to cattle, leading to an epidemic of rabies) but also the positive (how birds protect fruit harvests, coral reefs protect coasts from storms and how the rainforests absorb billions of tonnes of carbon released from cars and power stations). Tony Juniper's book will change whole way you think about life, the planet and the economy

The One-Week Baby Sleep Solution

Gina Ford has helped thousands of families resolve challenges over the years and her bestselling *New Contented Little Baby Book* has sold over 1 million copies around the world. In this life-saving new book, she offers exhausted parents clear, step-by-step solutions to resolving a whole range of sleep issues. Whether it's feeding to sleep, rocking to sleep, night-waking, co-sleeping, dummy attachment - whatever the problem - Gina knows how to fix it. You'll find out how to set gentle day and night routines that will resolve the specific issue and in just one week you'll be on your way to calm and peaceful nights!

Rebugging the Planet

"This is a lovely little book that could and should have a big impact...Let's all get rebugging right away!"—Hugh Fearnley-Whittingstall Meet the intelligent insects, marvelous minibeasts, and inspirational invertebrates that help shape our planet—and discover how you can help them help us by rebugging your attitude today! Remember when there were bugs on your windshield? Ever wonder where they went? We need to act now if we are to help the insects survive. Robin Wall Kimmerer, David Attenborough, and Elizabeth Kolbert are but a few voices championing the rewilding of our world. *Rebugging the Planet* explains how we are headed toward "insectageddon" with a rate of insect extinction eight times faster than that of mammals or birds, and gives us crucial information to help all those essential creepy-crawlies flourish once more. Author Vicki Hird passionately demonstrates how insects and invertebrates are the cornerstone of our global ecosystem. They pollinate plants, feed birds, support and defend our food crops, and clean our water systems. They are also beautiful, inventive, and economically invaluable—bees, for example, contribute an estimated \$235 to \$577 billion to the US economy annually, according to *Forbes*. *Rebugging the Planet* shows us small changes we can make to have a big impact on our littlest allies: Learn how to rewild parks, schools, sidewalks, roadsides, and other green spaces. Leave your garden to grow a little wild and plant weedkiller-free, wildlife-friendly plants. Take your kids on a minibeast treasure hunt and learn how to build bug palaces. Make bug-friendly choices with your food and support good farming practices Begin to understand how reducing inequality and poverty will help nature and wildlife too—it's all connected. So do your part and start rebugging today! The bees, ants, earthworms, butterflies, beetles, grasshoppers, ladybugs, snails, and slugs will thank you—and our planet will thank you too.

AI

The applications of Artificial Intelligence lie all around us; in our homes, schools and offices, in our cinemas, in art galleries and - not least - on the Internet. The results of Artificial Intelligence have been invaluable to biologists, psychologists, and linguists in helping to understand the processes of memory, learning, and language from a fresh angle. As a concept, Artificial Intelligence has fuelled and sharpened the philosophical debates concerning the nature of the mind, intelligence, and the uniqueness of human beings. Margaret A. Boden reviews the philosophical and technological challenges raised by Artificial Intelligence, considering whether programs could ever be really intelligent, creative or even conscious, and shows how the pursuit of Artificial Intelligence has helped us to appreciate how human and animal minds are possible.

Nuclear Deterrence

Part of the new Ladybird Expert series, *Nuclear Deterrence* is an accessible and authoritative introduction to the deterrent tactics employed to prevent war, drawing on the unprecedented power of nuclear weapons. Written by celebrated historian and professor of War Studies Sir Lawrence Freedman, *Nuclear Deterrence* explores the history behind the world's most lethal weapon. You'll learn about the history of the arms race, the implications of mutual assured destruction, the consequences of nuclear proliferation, and why disarmament proved to be so difficult.

Climate Change and British Wildlife

"Fascinating but frightening, compelling and concerning ... this book brings together all you need to know about how the climate is impacting wildlife." CHRIS PACKHAM There is no escaping the fact that the British climate is changing, and our wildlife is changing with it. In this remarkable account, Trevor Beebee examines the story so far for our plant, fungi and animal species. Warmer and wetter winters, combined with longer summers, have worked to the advantage of plants such as the rare Lady Orchid, and a whole range of insects. The UK is also hosting new arrivals that come in on the wing. But there

is adversity, too. Alpine plants and seabirds – particularly Kittiwakes – are suffering declines as our countryside warms. Given the evidence so far, can we predict what the future holds for our British ecosystems?

The Joyful Environmentalist

"This is the joy we need in our lives." – George Monbiot. "This book, practical and realistic as well as visionary, will keep that positive message before the reader's eyes. Joy is after all one of the best motivations we can have for change." – Dr Rowan Williams. Finally! A book about saving our planet that is fast, funny and inspiring too. Written in short chapters for busy people, Isabel doesn't bother with an examination of the problem but gets right on with the solutions. Her aim: to look for every single way we can take care of the planet; how we live and work, travel, shop, eat, drink, dress, vote, play, volunteer, bank – everything. And to do this wholeheartedly, energetically and joyfully. Beginning with losing her cool in a restaurant that will only provide plastic cutlery, Isabel journeys through native tree planting in the Highlands of Scotland, playing Samba drums with Extinction Rebellion, interviewing in person the people that supply her energy and food – through every solution she can find – until both narrator and reader are fully equipped to be part of the pollution solution. "She gave my spirit a lift and my feet somewhere to stand." – Sir Mark Rylance

Octopuses: A Ladybird Expert Book

Part of the ALL-NEW LADYBIRD EXPERT SERIES - Why is it octopuses, and not octopi or octopodes? - How did octopuses evolve to be so clever? - How can octopuses see and speak with their skin? EXAMINE these crafty hunters of the seabed - shape-shifting, skin-signalling and using complex tools - their remarkable abilities are still being uncovered. BENDY BODIES, BIG BRAINS Written by celebrated marine biologist and documentarian Helen Scales, Octopuses is an enthralling introduction to these utterly unique creatures, the myths and fiction they have inspired, and what they can tell us about the roots of intelligence.

GCSE Film Studies for WJEC

Shows what examiners are looking for in the GCSE coursework and in the exam. This resource provides coverage of the specification so that teachers can deliver the course with confidence and students can approach assessment fully prepared. It includes activities and case studies throughout to engage students with this subject.

The Eastern Front 1941-43

Part of the Ladybird Expert History of the Second World War series, The Eastern Front 1941-1944, is an authoritative and accessible introduction to the brutal confrontation between Nazi Germany and the Soviet Union along a 1,200 mile front. Historian, author and broadcaster James Holland draws on the latest research and interviews with participants to bring colour, detail and a fresh perspective to the story of the largest military campaign in history. Inside, you'll discover how tactics, organisation and new technologies were brought to bear, about the different challenges faced by both the Axis and the Allies, and, above all, the skill, bravery and endurance of those engaged in a contest that was of critical importance to the outcome of the war.

Our House is on Fire

The profoundly moving story of how love, courage and determination brought Greta Thunberg's family back from the brink 'Urgent, lucid, courageous ... a must-read message of hope ... It is a glimpse of a saner world' David Mitchell, Guardian This is the story of a happy family whose life suddenly fell apart, never to be the same again. Of two devoted parents plunged into a waking nightmare as their eleven-year-old daughter Greta stopped speaking and eating, and her younger sister struggled to cope. They desperately searched for answers, and began to see how their children's suffering reached far beyond medical diagnoses. This crisis was not theirs alone: they were burned-out people on a burned-out planet. And so they decided to act. Our House is on Fire shows how, amid forces that tried to silence them, one family found ways to strengthen, heal, and gain courage from the love they had for each other - and for the living world. It is a parable of hope and determination in an emergency that affects us all.

Butterflies

'If you thought butterflies were special, the clear intelligible science in this superb page-turner will make you realise they're ultra-special' - MATTHEW OATESThis new addition to the British Wildlife Collection is a unique take on butterfly behaviour and ecology, written by the former Chief Executive of Butterfly Conservation, Martin Warren. It explores the secret lives of our British species (also drawing on comparative examples from continental Europe), revealing how they have become adapted to survive in such a highly competitive natural world. Combining personal anecdote with the latest discoveries in the scientific literature, this book covers everything from why we love butterflies and their life-cycle from egg to adult, to their struggle for survival in a world of predators and parasites and the miracle of migration. The final chapters explore how butterflies are recorded, the change in their ranges and abundance during the 20th and 21st centuries, and the significance of managing habitats at a landscape scale, concluding with a passionate plea for why we must act now to reverse butterfly declines. Insightful, inspiring and a joy to read, Butterflies is the culmination of a lifetime of careful research into what makes these beautiful insects tick and how and why we must conserve them.

The Wonderful World of Ladybird Books for Grown-Ups

Can you imagine a world where there aren't just the thirty-two Ladybird Books for Grown-Ups you've seen in your local bookshop or downstairs toilet but hundreds and hundreds more? If you can't, then this book is here to imagine it for you. Here is an enormous collection of helpful guides to everything from worryingly high cholesterol to worryingly high mortgages - from teenagers you can't understand to prizewinning novels you can't understand - all presented simply and colourfully, in a way that even the most jaded, exhausted, baffled grown-up can enjoy. 'This is such a good idea I'm currently experiencing all the physical sensations of anger because I didn't think of it, whereas Jason and Joel did, the shits.' Charlie Brooker 'I do not hasten to say that these books are the new Da Vinci Code.' Aisling Bea 'These books are small masterpieces. They make me glad I learned to read.' David Quantick 'HILARIOUS. Beserkly brilliant.' Mel Giedroyc

The Story of Brexit

pioneered by the original Ladybirds. Each beautifully illustrated book features the first new illustrations produced in the original Ladybird style for nearly forty years.

See Inside Planet Earth - Internet Referenced

From frozen deserts to steaming jungles, our planet is amazingly rich and varied. But it is also under threat. Take a closer look at the challenges facing planet Earth today and discover what we can all do to make a difference.

Kindness Counts 123

Teaching little ones about kindness can be as easy as 1, 2, 3! This bright and engaging board book invites young readers to count down from 10 while discovering the many ways to make the world a kinder place. Through vibrant illustrations and age-appropriate language, this 26-page kindness book will help kids 2-5 learn the important concepts of empathy and compassion. Whether it be delivering cookies to a new neighbor, sharing toys, or saying "I love you" to Grandma and Grandpa, this book is filled with tangible ways kids can show kindness toward others. It's a perfect book to read aloud at home or in the classroom to spark conversations about kindness and empathy. Showcasing a diverse cast of children, this book's joyful illustrations and simple words encourage children to be their best selves wherever they go. Featuring durable cardstock pages and approachable, kid-friendly language, this book offers a thoughtful and fun read-aloud experience that young children will enjoy again and again. This book is crafted by childhood experts to promote strong social and emotional skills, strengthen early math skills and build positive associations with reading.

What to Look For in Summer

Explore the beauty of summer in this new edition of What to Look For in Summer. The increased warmth and long sunny days of summertime in the UK helps crops to grow, insects to thrive and animals to hunt. This book takes a closer look at ripening fruits, buzzing bees, summer storms and the solstice as the secrets of summer begin to appear in the world around us. Follow the changing seasons with the other titles in the What to Look For... series: What to Look For in Autumn What to Look For in Winter What to Look For in Spring

A Bear Grylls Adventure 1: The Blizzard Challenge

The first thrilling adventure in the brand-new collectible series for young readers from survival expert and Chief Scout BEAR GRYLLES. Olly isn't enjoying activity camp. Why should he bother building a shelter or foraging for food with his teammates - he'd rather be at home in the warm and dry, where the sofa and the video games are. But then Olly gets given a compass with a mysterious fifth direction. When he follows it, he's magically transported to a high mountain range where he meets survival expert Bear Grylls. With his help, Olly must learn to survive in sub-zero temperatures, including what to do if the ice cracks when you're crossing a frozen lake, or a blizzard sets in . . . But can his adventure with Bear Grylls change Olly's mind about teamwork and perseverance? And who will Olly give the compass to next? Each book in this fun new 12-book series from BEAR GRYLLES follows a different child on the outdoor activity camp. Once they are given the magical compass, they meet the inspirational adventurer in an amazing place and learn new skills and facts they can take back with them to their real life.

Consciousness: A Ladybird Expert Book

Part of the ALL-NEW LADYBIRD EXPERT SERIES. _____ Are other animals, or even plants, conscious? Can we create conscious robots? Are we able to assume the consciousness of someone else? We all experience the world differently. REALITY is shaped by our individual memories. So we respond to THE WORLD in our own ways. Our UNIQUE EXPERIENCE underpins what it means to be CONSCIOUS. This raises so many questions such as where does consciousness live? And what is it for? Discover the answers and more inside Hannah Critchlow's Ladybird Expert - Consciousness, the thrilling and accessible account that explains what it means to be conscious - from what defines it, to questioning the existence of free will.

Plate Tectonics: A Ladybird Expert Book

How do plate tectonics work? Learn from the experts in the ALL-NEW LADYBIRD EXPERT SERIES Discover in this accessible and authoritative introduction the fundamental theory of how our dynamic

planet works. You'll learn about the make up of the Earth in the past and the present, from monsoon-like currents in our planet's radioactive interior to magnetic force lines and what the planet would look like without water. You will learn about: - Our planet as an active living system - The planetary force field - Fault lines that cross continents - How plate tectonics protects life on Earth - And much more . . . Written by the celebrated geologist, academic and popular science presenter Iain Stewart, Plate Tectonics explores the Earth as a planetary machine and investigates the people and ideas that changed the way we look at the world. Learn about other topics in the Ladybird Experts series including Gravity, Quantum Physics, Climate Change and Evolution. Written by the leading lights and most outstanding communicators in their fields, the Ladybird Expert books provide clear, accessible and authoritative introductions to subjects drawn from science, history and culture. For an adult readership, the Ladybird Expert series is produced in the same iconic small hardback format pioneered by the original Ladybirds. Each beautifully illustrated book features the first new illustrations produced in the original Ladybird style for nearly forty years.

Storm in a Teacup

'A quite delightful book on the joys, and universality, of physics. Czerski's enthusiasm is infectious because she brings our humdrum everyday world to life, showing us that it is just as fascinating as anything that can be seen by the Hubble Telescope or created at the Large Hadron Collider.' - Jim Al-Khalili Our world is full of patterns. If you pour milk into your tea and give it a stir, you'll see a swirl, a spiral of two fluids, before the two liquids mix completely. The same pattern is found elsewhere too. Look down on the Earth from space, and you'll find similar swirls in the clouds, made where warm air and cold air waltz. In Storm in a Teacup, Helen Czerski links the little things we see every day with the big world we live in. Each chapter begins with something small - popcorn, coffee stains and refrigerator magnets - and uses it to explain some of the most important science and technology of our time. This is physics as the toolbox of science - a toolbox we need in order to make sense of what is around us and arrive at decisions about the future, from medical advances to solving our future energy needs. It is also physics as the toy box of science: physics as fun, as never before.

What Makes Me Sad?

What makes you feel sad? Are there things in your life that makes you sad? This little polar bear can name plenty. Follow along with the baby polar bear as he leaves his cozy den for the first time. The snow is cold, his tummy rumbles with hunger, and the ice he walks with his Mommy is thin and dangerous. Despite the sadness he feels as he misses his home, his Mommy reminds him that there are things to be happy about, even when they feel sad. Filled from cover to cover with bright pictures of polar bears and the icy tundra of the Arctic, What Makes Me Sad? will assure your child that it's okay to be sad sometimes. Use the discussion questions at the back of this book to teach your child about the important topic of global warming and the need to protect both the polar bears and the planet, as well as help your child recognize their emotions and make connections to the world around them. What Makes Me Sad? will comfort your child with the knowledge that everyone feels sad sometimes, and you can rely on the people who love you to help you feel happy again.

Weather - A Force of Nature

These are the most breathtaking images from previous years of the Weather Photographer of the Year competition, an annual contest held by The Royal Meteorological Society. They depict dramatic weather phenomena from every corner of the globe and often reveal fascinating stories about their impact on human society. Each image has been selected by a panel of meteorologists, photographers and photo editors who look for a combination of skillful camera work and meteorological observation.

Artificial Intelligence

'I propose to consider the question, 'Can machines think?' Alan Turing (1950) Part of the ALL-NEW Ladybird Expert series. This book is for everyone living in the age of Artificial Intelligence. And this is an accessible and authoritative introduction to one of the most important conversations of our time . . . Written by computer scientist Michael Wooldridge, Artificial Intelligence chronicles the development of intelligent machines, from Turing's dream of machines that think, to today's digital assistants like Siri and Alexa. AI is not something that awaits us in the future. Inside you'll learn how we have come to rely on embedded AI software and what a world of ubiquitous AI might look like. What's inside? - The British mathematician Alan Turing - Can machines 'understand'? - Logical and Behavioural AI - The

reality of AI today - AI tomorrow - And much more . . . For an adult readership, the Ladybird Expert series is produced in the same iconic small hardback format pioneered by the original Ladybirds. Each beautifully illustrated book features the first new illustrations produced in the original Ladybird style for nearly forty years.

Athelstan (Penguin Monarchs)

The formation of England occurred against the odds: an island divided into rival kingdoms, under savage assault from Viking hordes. But, after King Alfred ensured the survival of Wessex and his son Edward expanded it, his grandson Athelstan inherited the rule of both Mercia and Wessex, conquered Northumbria and was hailed as Rex totius Britanniae: 'King of the whole of Britain'. Tom Holland recounts this extraordinary story with relish and drama, transporting us back to a time of omens, raven harbingers and blood-red battlefields. As well as giving form to the figure of Athelstan - devout, shrewd, all too aware of the precarious nature of his power, especially in the north - he introduces the great figures of the age, including Alfred and his daughter Aethelflaed, 'Lady of the Mercians', who brought Athelstan up at the Mercian court. Making sense of the family rivalries and fractious conflicts of the Anglo-Saxon rulers, Holland shows us how a royal dynasty rescued their kingdom from near-oblivion and fashioned a nation that endures to this day.
