Supply Operations Manual

Phlebotomy Exam Review, Eighth Edition provides a comprehensive review of current phlebotomy theory and offers an ideal way to study for phlebotomy licensing or national certification exams. It also makes for an excellent study tool for students taking formal phlebotomy training programs. By answering the questions in this review, student can test their knowledge and application of current phlebotomy theory. Theory questions address recent federal safety standards, Clinical and Laboratory Standards Institute (CLSI) guidelines, and the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) phlebotomist competencies when applicable. Questions are standard multiple choice, like those used on national exams, with choices that often test your critical thinking abilities.

This manual is an overview of organizational supply and field service operations for all Army units, not just Quartermaster units. It is written for supply operations personnel, S4 officers, and commanders at battalion level and below. The manual is based on doctrine in FMs 8-10 10-1, 100-5, and 100-10. Planning: Supervisors must carry out the unit mission with the equipment and personnel available. They must be aware of the kinds of problems they will face. This manual details unit supply procedures and describes methods to organize unit resources. Operations: This manual summarizes existing doctrine. It gives suggestions and standards based on field experience. It relates tactics, techniques, procedures, and policies that apply to company, detachment, and battalion supply operations.
