Blank Book Template for Kids

This practical book provides teachers with step-by-step guidance for developing a class culture that welcomes curiosity and ignites social action. Student-driven inquiry has a lasting impact on learning, yet questions posed from students' own contexts rarely serve to shape their understanding of the outside world. The authors show teachers how to use literature to introduce characters and worlds that exist outside of their students' lived experiences. Through this exposure, students can develop questions that seek to build empathy for others, which ultimately positions young people to be change agents in their communities and in the larger world. This book translates ideas from theorists in critical literacy, student motivation, and culturally responsive pedagogy into practical approaches for the English language arts and social studies classroom (6–12). Each chapter poses questions designed to get teachers thinking about how to use mind-opening texts with students to address social problems. Book Features: Shows teachers how to use literature to help students navigate a shifting world. Equips students with the skills to advocate for themselves and others, including using digital tools in meaningful, effective ways. Asks students to face controversial points-of-view head on and interrogate the world in which they live. Includes examples of discussions that lead to projects and opportunities that allow youth to do work in the community. Demonstrates how to move theory into practice, providing teachers with the rationale for using inquiry as disruption if questioned by stakeholders. Contains a scope and sequence that outlines an entire year devoted to inquiry, as well as how to break it down into individual units and lessons.

Igniting Social Action in the ELA Classroom

Science Student Lab Notebook

As modern technologies continue to develop and evolve, the ability of users to interface with new systems becomes a paramount concern. Research into new ways for humans to make use of advanced computers and other such technologies is necessary to fully realize the potential of 21st century tools. Human-Computer Interaction: Concepts, Methodologies, Tools, and Applications gathers research on user interfaces for advanced technologies and how these interfaces can facilitate new developments in the fields of robotics, assistive technologies, and computational intelligence. This four-volume reference contains cutting-edge research for computer scientists; faculty and students of robotics, digital science, and networked communications; and clinicians invested in assistive technologies. This seminal reference work includes chapters on topics pertaining to system usability, interactive design, mobile interfaces, virtual worlds, and more.

Human-Computer Interaction: Concepts, Methodologies, Tools, and Applications

Aspects of Secondary Students' Understanding of Plant Nutrition

This is a beautiful book that will show you how a seed grows into a plant. The entire process has been illustrated in a format that would encourage easy reading and understanding. Share this book with a friend or two to spread the knowledge on botany, too. Grab a copy today!

Seeds! Watching a Seed Grow Into a Plants, Botany for Kids - Children's Agriculture Books

This picture book teaches young readers what plants need to grow. Featuring vivid images and simple, repetitive phrases, students will be eager to learn about what plants need to grow. This title correlates to Next Generation Science Standards with a focus on plants.

Aspects of Secondary Students' Understanding of Plant Nutrition

Individual Big Book

Good Work: Plant Life

First Grade Fundamentals will delight young learners with activities on consonants and vowels, vocabulary, addition and subtraction, fractions, phonics, reading comprehension, time and money, and more. Filled with colorful pages, easy-to-follow directions, and grade-appropriate activities, the Fundamentals series introduces and reinforces introductory concepts in math and language arts. --The series covers all of the basics for success in PreK to Grade 2 and is perfect for year-round learning. The fun, challenging activities will supplement what children are learning in school, reinforcing their understanding of the subject matter and enhancing school performance. Each page features directions that teach and guide children through key areas of learning.

The Parts of a Plant

Introduces a plant's life cycle, explaining how seeds grow into flowers and trees.

First Grade Fundamentals

What happens when you plant a seed? Budding scientists will love learning all about plants' tiny beginnings and how they travel across the planet in this bright and informative book.

Seed to Plant

"Plants have magical effects on children and add a critical dimension to any play environment, whether it's a city park, a school playground, or a backyard. In *Plants for Play*, the author shares his years of experience in selecting plants that support children's play activities. More than 200 plant species are listed in eighteen plant function tables: Fragrance; Texture; Play Props; Fall Color; Fruits, Herbs & Nuts; Winter Flowers; Shade Quality; Wildlife Enhancement; and more. Plants are coded by climatic zone and a special section identifies and discusses poisonous plants."--The back cover.

Britannica Books Plant a Seed

Provides a guide to gardening, covering such subjects as preparing soil, fertilizing, and removing pests.

Plants for Play

TEACHERS / SCHOOLS: IF YOU WOULD LIKE TO ORDER 5+ COPIES, THEY CAN BE PURCHASED IN PACKS OF 5 FOR \$50 - EMAIL christa@christahastie.com TO ORDER. Can you imagine a world without plants and trees? It would be impossible for us to live without plants and trees as they provide us with the necessary oxygen that all humans and animals need to breathe. And since the beginning of time, the fruits, leaves, seeds, roots, and other parts of plants and trees have been used by humans and other animals for food, shelter and medicine. They provide us with nourishment, joy, and connect us to other people and our environment. The *Gardening Workbook PLUS Plant Science & Nutrition For Kids, Families and Classrooms* provides 32 fun and cohesive lessons about gardening, plant science, and nutrition for children in grades 2 through 6. Each lesson guides children in creating, maintaining and measuring individual container gardens and includes coordinated projects, creative writing prompts, and fun challenging questions that help their minds to grow stronger. And unlike typical handouts at school that get disposed of, stashed away, or lost from week to week, this workbook was created in hopes that each child would be able to receive their own copy. This means each child can have the opportunity to reflect on lessons over and over again and be inspired and empowered to maintain their container gardens as well as create fun, low to no cost crafts from basic materials during the months when school is out. Lessons: 1 - Planning For a Year-Round Garden 2 - Planting Seeds - Germination 3 - Container Gardening 4 - Regeneration: Regrown Gardening 5 - Garden Maintenance 6 - Gardening Benefits 7 - Garden Safety 8 - Garden Tools 9 - Healthy Soil & Mulch 10 - Compost 11 - Ecosystems 12 - Biodiversity 13 - Threats to Biodiversity 14 - Photosynthesis 15 - Consumption 16 - Decomposition 17 - All About Seeds 18 - Flowering Plant Life Cycle 19 - Plant Parts & Function 20 - Pollination 21 - Birds 22 - Bees 23 - Butterflies 24 - Snails 25 - Worms 26 - Garden Pests 27 - Spores & Fungi 28 - Harvest Time & Preserving Food 29 - Types of Plants 30 - Fruit & Vegetable Nutrition 31 - Food Geography 32 - GMO: Genetically Modified Organisms

A Green Kid's Guide to Watering Plants

Plants Alive! is designed to get amateurs interested in exploring the plant world around them and to give them the skill to record their observations through guided nature journaling. It then offers, to those who have been captivated by the field, advanced techniques for study. The book can be very useful in guiding science students into real science activities in rural, suburban, and urban environments. The authors questioning format will stimulate curiosity and entice readers to think about possible answers. For a variety of reasons, educators will embrace this book. First of all, it is a course in botany without any of the stigmas attached to textbooks. Also unlike texts, *Plants Alive!* enables students to do real science, and not just read about it. Experiments and exercises pass off as hands-on science abound, but opportunities for students to do real science and report their findings to the scientific community are rare.

The Gardening Workbook PLUS Plant Science and Nutrition

From a seed to a tree, how do plants come to be? Let's explore the enchanting world of botany! This powerful educational resource includes important information that you wouldn't want to miss out on. You can go over the pages of this book on your own pace as there is no pressure to learn everything at once. Grab a copy today!

Plants Alive!

A very simple series that introduces the first concepts that surround the sciences. The text combines statements and questions in such a way that develops a child's understanding of science as well as the language related to it. It also builds confidence by helping children appreciate the science they already know. Also included in the text are simple experiments and exercises which promote skills in sorting and handling data. The books are illustrated with full-colour photographs. Growing Plants examines the parts of a plant and the elements plants need to stay healthy.

A Plant's Life Cycle! from Small Sprouts to Big Leaves - Botany for Kids - Children's Botany Books

Parts are very important to all life on Earth. They provide food, clothing, shelter and even the oxygen that we breathe to live. This book discusses how plants grow, which provides the foundation of knowledge on caring for them. Help your child fall in love with reading one topic at a time. Grab a copy today!

Growing Plants

This picture book teaches young readers what plants need to grow. Featuring vivid images and simple, repetitive phrases, students will be eager to learn about what plants need to grow. This title correlates to Next Generation Science Standards with a focus on plants.

How Do Plants Grow? Botany Book for Kids | Children's Botany Books

Explores the intricate relationship between seeds and the plants which they produce.

Good Work

With 40 interactive activities and games divided into five categories, Kids' Garden encourages children to engage with the outdoors and appreciate the green world around them. Step-by-step instructions enhanced by colorful collage artwork on each double-s

From Seed to Plant

A simple description of a flowering plant's life cycle through the seasons.

Kids' Garden

The sustainable gardens movement is expanding and growing in school districts across America! Planting a school garden is extremely rewarding and provides endless lessons in sustainability for students and staff. This student observation journal is a great way for students and green teams to explore, observe, and document the process of growing plants. If you're looking for an elementary classroom tool to promote personalized learning, writing, and research, consider equipping your students with this school garden journal. Ideal for K-3 students and classrooms in public schools, Montessori, religious and private schools, and homeschooling families.

The Tiny Seed

This book explores the world's varied vegetation. Time for Kids Science Scoops Level 1.

My School Garden Journal

Presents thirty-nine experiments with plants, including "Why Plants Have Roots," "How a Bean Grows," and "How to Graft a Plant."

Plants!

This lively book is packed with exciting science activities which encourage children to explore the intriguing nature of plants. Readers can find out how to change the color of a leaf, how to tell the age of a tree and why a seedling always grows the right way up. All the experiments and tricks are safe to do, using only ordinary household equipment. Usborne Science Activities is an innovative series which responds to the growing emphasis on scientific exploration for young children. The text and illustrations are simple and clear so children can enjoy using the books by themselves. Further notes give fuller scientific explanations for adults who wish to work with their children.

Science for Kids

George goes green! “This picture book offers young children an appealing introduction to reusing and recycling.”—Booklist George loves to go to the science museum. So, when he finds out that the museum is planning a “Green Day” dedicated to recycling and planting trees, George is curious and wants to help out! But little monkeys eager to help can sometimes become little monkeys getting into trouble. When George begins to find and recycle things around town that aren’t quite ready for the recycle bin, he gets into a jam. Thankfully, George isn’t the only one who wants to help. The whole community can’t wait to lend a hand—and help George and the museum plant some trees! Originally published to coincide with the opening of the Margret & H.A. Rey Center in Waterville, New Hampshire, a model for energy conservation offering literary, educational, and other programs, this book also includes kid-friendly tips for helping the environment.

Science with Plants

Even some familiar plants have harmful aspects to them. This guide will make parents and other carers aware of the potential hazards to their children from poisonous, prickly or allergenic plants which can cause discomfort, illness, or even death.

Curious George Plants a Tree

A pack of four science topic texts for pupils on the theme of plants, with an accompanying teaching guide. Incorporating photographs and diagrams, the titles seek to convey essential information on the topic, in line with the National Curriculum, and should be suitable for school libraries and topic work for children between the ages of seven and nine, school years 3-4. The texts address: "Plants"; "Flowers"; "Trees"; and "Plants as Food". Each title incorporates features of non-fiction texts that pupils are required to study in Literacy lessons, such as contents lists, diagrams, flow charts, captions, report writing, glossaries and indexes. The teacher's guide is cross-referenced to the teaching objectives of the National Literacy Strategy and there are lesson plans and photocopiable activity sheets. An assessment checklist and merit award sheet is also included."

Plant Alert

The Value of Science Projects Science projects are an especially effective way of teaching students about the world around them. Whether conducted in the classroom or for a science fair, science projects can help develop critical thinking and problem solving skills. In a classroom setting, science projects offer a way for teachers to put “action” into the lessons. The students have fun while they’re learning important knowledge and skills. And the teacher often learns with the students, experiencing excitement with each new discovery. Science projects are generally of two types: non-experimental and experimental. Non-experimental projects usually reflect what the student has read or heard about in an area of science. By creating displays or collections of scientific information or demonstrating certain natural phenomena, the student goes through a process similar to a library research report or a meta-analysis in any other subject. Projects of this type may be appropriate for some students at a very early level, but they usually do not provide the experiences that develop problem-solving skills related to the scientific process. On the other hand, experimental projects pose a question, or hypothesis, which is then answered by doing an experiment or by modeling a phenomenon. The question doesn’t have to be something never before answered by scientist—that is not necessary to conduct original research. The process of picking a topic, designing an experiment, and recording and analyzing data is what’s important.

How Plants Grow

Offers more than 20 garden projects for kids as well as information about plants great for kids to grow.

Plants Starter Pack

Early Readers Examine How Plants Differ Because The Adaptations They Make.

SCIENCE PROJECTS IN RENEWABLE ENERGY AND ENERGY EFFICIENCY

Do you like chips? Oliver does. In fact, he won't eat anything else - until he plays a game with his grandpa. Whatever vegetable Oliver finds in the garden, he must eat. On Monday, he pulls up carrots, on Tuesday, it is spinach . . . An excellent book for parents with slightly fussy children, which also introduces the days of the week. Other titles in this series: Oliver's Fruit Salad Oliver's Milkshake

One Hundred and One Kid-friendly Plants

MORE SCIENCE IN THE GARDEN is the second of two books which encourages children to explore and engage with the living laboratory that exists on their doorstep. Children are prompted to step into the garden and observe, collect and record information about living and non-living things. This will help them to develop their scientific thinking, skills and processes and draw them into the spirit and beauty of science. Your students will begin to see the garden as an important resource which can help them to learn about the different parts of plants, trees, animals and insects, their adaptations and their connections. If the garden is not physically accessible, all of the lessons can still be completed. Some of the curriculum linked activities include: drawing a scientific sketch of a diving beetle, framing scientific questions to identify features of a legless lizard, making a plant container and setting up an experiment to deduce how a plant breathes. Answers for the teacher are provided at the back of the book.

Plant Adaptations

Photographs with simple text show early readers how plants grow from seed to tree. Includes list of words to know.

Oliver's Vegetables

'Science@school' books feature double-paged spreads which combine facts and prompt questions with colourful photographs and artwork, for individual reading or acting as a starting point for whole-class teaching. Each book contains a 'Words to Learn' section and is Internet-linked.

More Science in the Garden

An education question-and-answer book about plants for kids.

And too cold to play ball.

He sleeps on the mat

She sleeps on my mat.

I have a cute cat

I'm tired of being a dragon

Ferocious and brimming with flame

The cause of unspeakable terror

To brazenly pillage and loot.

Despicable ruthless and fierce

With talons designed to dismember

And fangs finely fashioned to pierce.

Carpenter, carpenter, build us a house

for a mouse and a spouse

To keep us from harm in a cold winter storm.

Carpenter, carpenter, build our house, please.
