Intro to Psychology Lecture 1 - Intro to Psychology Lecture 1 by Eric Silk 189,693 views 11 years ago 14 minutes, 47 seconds - Intro to **Psychology**, Lecture **1**, Part **1**.

Intro

Set of procedures used for gathering and interpreting objective information in a way that minimizes error and yields dependable generalizations

Cognition refer to the private, internal workings of the mind.

Behavioral Data defined: - Behavioral data are reports of observations about behavior and conditions under which they occur • Researchers choose an appropriate level of analysis • Measures of behavioral data must be objective

Descriptions describe what happened Explanations look to explain "how" behavior works

A Closer Look at Scientific Prediction - Based on an understanding of the ways events relate to one another -Suggests what mechanisms link those events to certain predictors A Closer look at Causal Prediction - Specifies conditions under which behaviors will change

How does the mind work?

What is the nature of free will?

School of Structuralism Contents of the mind and concept of reductionism All human mental experience can be understood as a combination of simple elements or events - Wilhelm Wundt .

First psychological experimental laboratory Edward Titchener • Brought Structuralism to America - Max Wertheimer • Concept of Gestalt psychology
