Metodologi Penelitian untuk Ilmu Sosial Humaniora Dengan Pendekatan Kuantitatif

Berawal dari keprihatinan penulis terhadap mahasiswa (baik jenjang Diploma, Sarjana, maupun Doktoral) yang masih mengalami kendala dalam penelitiannya, penulis terdorong untuk menyusun buku yang mengangkat tema penelitian di bidang Sosial Humaniora. Khususnya, metode penelitian dengan pendekatan kuantitatif. Pemahaman tentang penelitian ilmiah bermodel kuantitatif selama ini lebih banyak bersifat teknik penggunaan analisis penghitungan dengan dukungan software statistik tertentu. Namun, yang tidak kalah pentingnya dari hal itu adalah bagaimana pemahaman peneliti sendiri terhadap model penelitian dan proses yang sebenarnya harus dilakukan sehubungan dengan standar karya ilmiah yang baik. Masih banyak mahasiswa atau peneliti yang terjebak pada suatu karya penelitian yang belum memuat unsur-unsur penelitian ilmiah yang sebenarnya. Sehingga, pada saat dilakukan seminar proposal, bahkan seminar hasil penelitian, tidak jarang hasil laporan penelitian terlihat tidak menunjukkan adanya korelasi antarbagiannya serta cenderung bias. Buku ini diharapkan mampu menjadi jembatan yang membantu para peneliti untuk menemukan solusi terbaik atas kendala yang dijumpai dalam keseluruhan proses penelitiannya. Mulai dari perencanaan, proses penelitian, hingga penyusunan laporan hasil penelitiannya.

"This textbook is an advanced introduction to quantitative methods for students in communication and allied social science disciplines that focuses on why and how to conduct research that contributes to social justice. Today's researchers are inspired by the potential for scholarship to make a difference for society, to push toward more just and equitable ends, and to inform members of the public so that they can make decisions about how to navigate the social, cultural, and political world equipped with accurate, fair, and up-to-date knowledge. This book illustrates the mechanics and the meaning behind quantitative research methods by drawing extensively from studies conducted by researchers addressing questions of social justice and the transformation of structures, practices, and understandings in society through community and civic engagement and policy formation. It contains step-by-step guidance in quantitative methods--from conceptualization through all the stages of execution of a study--and demonstrates how researchers can engage with social justice issues in systematic, rigorous, ethical, and meaningful ways. Family Communication

The major textbook in communication theory. Denis McQuail provides a brisk, elegantly organized, and comprehensive overview of the ways in which mass communication has been viewed by social scientists and by practitioners. The wealth of thinking in the field; the enormous range of issues studied

and questions raised; the proliferation of schools, approaches and tendencies: McQuail marshalls this welter of material into a clear, easy to follow textbook for students at all levels of communication studies. He reviews: ways in which the mass media have been defined theories of their function and purpose views of the organizational structures and processes of mass media content analysis and the other techniques for interpreting the meaning of media content theories of what an audience is and what it does Cultivation theory, traditional sociology, classical marxism, the Frankfurt school, 'hegemony' theory, Soviet media theory, the uses and gratifications approach, development media theory, free press theory, organizational theory -- all these and much more -- are described and placed in their historical and scholarly context. McQuail's extensive references will guide anyone interested in mass communication to the key work in the field. Diagrams, a Media Theory Map, summaries, indexes and other features will further help new students to keep a hold on all the separate strands in the field. About the author: Denis McQuail is currently Professor of Mass Communication, University of Amsterdam, the Netherlands. After graduating from Corpus Christi College, Oxford with a BA in Modern History and a Diploma in Public and Social Administration, he received a PhD in social studies from the University of Leeds. He has since been affiliated to the Television Research Unit, University of Leeds; the University of Southampton; and the Annenberg School of Communication, University of Pennsylvania. His major publications include: *Television and the Political Image* (with J Trenaman) 1961; *Television in Politics: Its Use and Influence* (with J G Blumler), 1968; *Towards a Sociology of Mass Communications*, 1968; *Sociology of Mass Communication* (editor) 1972; *Communication*, 1975; *Review of Sociological Writing on the Press*, 1976; *Analysis of Newspaper Content*, 1977; *Communication Models for the Study of Mass Communication* (with Sven Windahl), 1982. Why this textbook? Why choose this textbook for use in your courses over others that are available? McQuail has drawn on his own extensive teaching experience to make sure his book offers the following qualities and features: The frameworks: for ease of organization, McQuail arranges the theories of media effect processes, or mass media and social change in new, clarifying frameworks. He aims to present all the principal theories within a single integrative framework. Its range: McQuail's extraordinary feat of organization encompasses theories from all the principal approaches to communication from all over the world. His book will be useful in a variety of cultural and national settings. Its thoroughness: McQuail provides over 300 references to guide your students to the primary sources. Not only is each theory described, and its sources and histories plotted, but its implications and intellectual context are explored. Consensus theories are given equal weight with the more contentious, critical understandings. Controversy is faced, fairness maintained. Its currency: The most recent research is expressed in the form of theoretical propositions. New approaches are discussed that are not reviewed in other textbooks: a revision of the functional theory, the notion of emerging 'public definitions', and a revision of the 'four theories of the press'. Other unique features: A thorough review of theories of the audience. Questions of media power and normative theories of media are given a central place at various points. Professor Denis McQuail provides a thorough review of the history, structure, and processes of the mass media, and the views taken of them. The first chapter defines the terms and issues of mass media studies. It also traces the development of mass media since the first newspapers in the 17th century. McQuail notes the origins, typical forms, and applications of mass media at different times. He then provides a framework for understanding the different approaches to the study of mass media. Mass society theory, Marxist approaches of different types, message-centred theory, and theory of audience and effect are the perspectives reviewed. Chapter Three explores the ideological, political, and cultural contexts in which the mass media operates, and which define the media's functions. The institutional forms of mass communication are characterized in Chapter Four. In Chapter Five, the meaning of the information provided by the media is analyzed. Different kinds of content, such as news or fiction, are examined from different theoretical perspectives. Chapter Six describes alternative approaches to the study of the audience, the different aspects of audiences which they study, and the conclusions they have reached. Chapter Seven focusses on the study of the impact and effect of media. Different scientific approaches to this study are described, and the results of this research given. The final chapter looks at the lessons of mass communication study for issues of current concern such as international communication and new technological developments.

McQuail's Mass Communication Theory

The industrial nations of the world have become Information Societies. Advanced technologies have created a communication revolution, and the individual, through the advent of computers, has become an active participant in this process. The "human" aspect, therefore, is as important as technologically advanced media systems in understanding communication technology. The flagship book in the Series

in Communication Technology & Society, Communication Technology introduces the history and uses of the new technologies and examines basic issues posed by interactive media in areas that affect intellectual, organization, and social life. Author and series co-editor Everett M. Rogers defines the field of communication technology with its major implications for researchers, students, and practitioners in an age of ever more advanced information exchange.

The Handbook of Islamic Banking comprises 25 studies by leading international experts on Islamic banking and finance specially commissioned to analyse the various debates and the current state of play in the field. From its origins thirty years ago, Islamic banking has expanded rapidly to become a distinctive and fast growing segment of the international banking and capital markets. Despite this expansion, Islamic banking still remains poorly understood in many parts of the Muslim world and continues to be a mystery in much of the West. This comprehensive Handbook provides a succinct analysis of the workings of Islamic banking and finance, accessible to a wide range of readers. At the same time, it seeks to bring the current research agenda and the main issues on Islamic banking before a wider audience. Islamic banking offers, as an alternative to conventional interest-based financing methods, a wide variety of financial instruments and investment vehicles based on profit-and-loss sharing arrangements. These are all explored in detail along with other subjects such as governance and risk management, securities and investment, structured financing, accounting and regulation, economic development and globalization. M. Kabir Hassan, Mervyn Lewis and the other contributors have created an authoritative and original reference work, which will contribute to a wider understanding of Islamic banking as well as provoking further discussion and research. It will be invaluable to all scholars, researchers and policymakers with an interest in this subject.

British Fashion Design explores the tensions between fashion as art form, and the demands of a ruthlessly commercial industry. Based on interviews and research conducted over a number of years, Angela McRobbie charts the flow of art school fashion graduates into the industry; their attempts to reconcile training with practice, and their precarious position between the twin supports of the education system and the commercial sector. Stressing the social context of cultural production, McRobbie focuses on British fashion and its graduate designers as products of youth street culture, and analyses how designers from diverse backgrounds have created a labour market for themselves, remodelling 'enterprise culture' to suit their own careers.
