Genesis According to Methuselah

Methuselah, the oldest person who has ever lived, goes on a quest for truth, expanding the Bible with humor. He writes, My best marriage was to Sheilabenautumn, a living doll. I called her She. She called me Meth Honey. But I suffered from the neighbors evil gossip. I was 603, and She was a mere 133. The neighbors said I had robbed the cradle. The author, with tongue in cheek, traces the world of Adam and Eve, Noah, and the patriarchs through Methuselahs eyes and ears in a style that is a mock modernization of the terminology in the Bible. For example, God named the first man Adam and said, Live long and prosper. When Eve became overweight, Adam couldnt understand why. She explained, I think theres a person inside of me because I feel kicking in my stomach. I dont know from which orifice he will come out. This is a new version of the Bible that will cause readers to laugh aloud.

Genesis: Its Authenticity and Authority Discussed. The First Eleven Chapters

Hailed as "the most radical repackaging of the Bible since Gutenberg\

The First Book of Moses, Called Genesis

Creationism is an ardently proclaimed and widely held point of view, involving both scientific and biblical data. While much has been written about 'scientific' creationism, much less is available about its counterpoint, 'biblical' creationism. This book provides this much-needed evaluation of creationism by uniquely allowing the Bible to speak for itself. 'Genesis, Creation and Creationism' is a thought-provoking study on the relationship of science and religion that speaks to all Christian denominations. It provides excellent resource material for high school science classes, religion classes, and for seminarians engaged in biblical studies.

Genesis, Creation, and Creationism

Most Christians are familiar with the story of creation found in the book of Genesis. But have you ever considered God as a capable author who carefully designed the Bible, using Genesis chapter one as a table of contents which sets up the framework For The rest of the scriptures? Based on decades of research, Genesis One: God's Table of Contents To The Bible reveals this astonishing structure, taking into consideration not only the physical meaning of the words used within the Bible's first chapter, but also their spiritual implication. See these two realms actually relate! Prepare to see that God, The

creator of the universe, who called himself light, who also defined the laws of science and physics, shows the principle of the refracting of light into its spectrum of color right in that very same opening chapter! Be among the first to be filled with amazement as this dazzling discovery sweeps the planet, challenging biblical scholars and scientists alike to finally agree that each have had pieces of this puzzle correct all along and to concede that the Bible supports the natural right along with the supernatural!

Genesis One

The Genesis MenNoah & Sons, is the second book of a Bible Study Series designed for small group use or individual study. The questions aim to inspire readers to really look at each scriptural passage, especially the terminology used and the setting in which the story is told by the Biblical author. This book continues the history of the men of Genesis by following the family of Noah from chapters 7 through parts of chapter 11. These verses involve the first rains that ever fell upon the earth, lasting 40 days and 40 nights resulting in the first flood and destruction for all humans and animals not housed on the historical boat that Noah and his sons built. Noahs sons repopulated the earth after the flood ended.

The Genesis Men, Noah & Sons

The Book of Jubilees, an ancient text which details the history of the division of the Laws of Moses, is presented here complete. The text discusses the laws revealed to Moses and treats his character as a second creator of the world. Each chapter covers a range of history spanning 49 years, with Moses life story and other principal events told over a course of 2,410 years. Perhaps most importantly from a theological perspective, the book discusses the angels and how these entities formed a vital component of the Earth's creation. Enoch was taught by fallen angels; through them, he discovered writing and history. We also hear that early man was formed from a mating of Earthly humans and fallen angels, but that these hybrids were killed during the Great Flood. The status of the Book of Jubilees was not properly ascertained until the 20th century, with the famous discovery of the Dead Sea Scrolls. Prior to this, the only manuscripts of Jubilees that were available date to the 15th/16th centuries in what is today Ethiopia, which left scholars unsure of its true origins. Modern scholars agree that the text dates to approximately 150 BC. Today, the text is mostly held as canonical in Ethiopia, while the Protestant and Catholic churches consider the work pseudepigrapha. Robert Henry Charles, the translator of this edition, was an Irish theologian and scholar who translated a range of Old Testament apocrypha and pseudepigrapha. Highly respected, he contributed entries pertaining to his field to the Encyclopedia Britannica, and spent his later years as the archdeacon of Westminster, London.

The Book of Jubilees

"The aim of this study is to investigate the way Genesis 1:1-11:19 was rewritten in the Book of Jubilees."--P. 5.

Primaeval History Interpreted

In this book, Peter Thacher Lanfer seeks to evaluate texts that expand and explicitly interpret the expulsion narrative of Adam and Eve in Genesis beyond the biblical canon.

Remembering Eden

God is very much interested in man. He is seeking to obtain the man after His own heart. Indeed, He is determined to provide for His only begotten Son a counterpart in man. And in relation to that end and purpose, there is to be found depicted in the Bible's very first book the biographies of especially eight different persons; and in each one of these eight individuals God has worked into him one special quality or characteristic of His beloved Son Jesus Christ. By combining these particular eight qualities together, there emerges the man after God's heart whom He shall give to His Son as the Beloved's counterpart. For by putting these eight characteristics or qualities together, the result shall be the Bride of the Lamb of God. Now these eight individuals and their differing qualities or characteristics are as follows: Adam and the Tree of Life—even the life of God (in Christ), Abel and his sacrifice: a lamb, Enoch's walking with God into heaven, Noah's ark of abiding (in Christ), Abraham's altars, Isaac's wells of living water, Jacob's testimonial pillars, and Joseph's throne life. Those who possess these qualities shall constitute the Bride of the Lamb. May God soon obtain the Bride for His beloved Son!

Men After God's Own Heart

Complete, Unabridged Guide to Methuselah. Get the information you need--fast! This comprehensive guide offers a thorough view of key knowledge and detailed insight. It's all you need. Here's part of the content - you would like to know it all? Delve into this book today!..... : (21) And Enoch lived sixty and five years, and begat Methuselah: (22) And Enoch walked with God after he begat Methuselah three hundred years, and Enoch begat sons and daughters: (23) And all the days of Enoch were three hundred sixty and five years: (24) And Enoch walked with God: and he [was] not; for God took him. ... Some believe that Methuselah's extreme age is the result of an ancient mistranslation that converted months to years, producing a more credible 969 lunar months, or 78½ years, but the same calculation applied to Enoch would have him fathering Methuselah at the age of 5 using numbers from the Masoretic Text. ... Another commentator argued that the Septuagint Genesis 5 numbers are in tenths of years, which will explain how it was that they read 930 years for the age of Adam instead of 93 years, and 969 years for Methuselah instead of 96 years, and 950 years for that of Noah instead of 95 years. . . . Among those who believe that all the numbers of Genesis 5, including Methuselah's age, have no meaning at all, Kenneth Kitchen calls them pure myth, Yigal Levin believes they are intended simply to speed the reader from Adam to Noah, and Claus Westermann believes they are intended to create the impression of a distant past. There is absolutely nothing that isn't thoroughly covered in the book. It is straightforward, and does an excellent job of explaining all about Methuselah in key topics and material. There is no reason to invest in any other materials to learn about Methuselah. You'll understand it all. Inside the Guide: Methuselah, Sefer haYashar (midrash), Patriarchs (Bible), Methuselah Foundation, Maximum life span, Longevity myths, Longevity, Lamech (father of Noah), Jared (biblical figure), Harrowing of Hell, Generations of Adam, Genealogies of Genesis, Enoch (ancestor of Noah), Cheshvan, Book of Enoch, Blade Runner

Genesis and Science; Or The First Leaves of the Bible

Methuselah's Pillar moves at quantum speed as the action thriller combines worlds of germ warfare, espionage, myth and ancient history. A shepherd minding his flock thinks he's heard thunder. He's soon running for his life as rockets swoosh by. A missile explodes on a ravine hillside and opens a crevasse. He dives in for cover but falls into an ancient sanctuary where he finds a lost ancient artifact known as Methuselah's Pillar. According to legend, Methuselah had received the inscribed pillar from his seven times great grandfather, Adam, and then went on to become the oldest man who ever lived. Later, Moses possessed the pillar and delivered the Hebrews from the powerful Egyptian army with miracles. Did some of Moses' divine help come from another time and place? Does the pillar contain information, secrets, that today's scientists could find extremely helpful, or deadly, to humanity? American surveillance drones in Afghanistan discover something that demands closer investigation. Samantha Conway, a renowned archaeologist and expert in ancient writings, soon finds herself caught between the CIA and insurgents in a race to translate miraculous recipes of life and death as the last and most deadly of Moses' plagues returns.

The First Book of the Bible, Genesis

Recounts the Biblical story of Adam, Eve, and the Garden of Eden, arguing for its literal truth, and explains why it led to the need for a savior in Jesus Christ.

Methuselah - Unabridged Guide

Unfortunately, most of our well-versed, highly educated, scripturally correct, biblically strong, doctrinally true interpreters of the Christian Bible have a tendency in their presentation of biblical topics, interpretations, and various studies to utilize generic terms without taking time to define the terminology so that everyone is on the same basic foundation. This book, Genesis, the Origin of the Beginnings, however, brings out the basic foundational subject matters as inspired by God through men. It establishes the theme and purpose of the whole Bible, shows you why every subject revealed throughout the scripture began in Genesis, and focuses on definitely defining terms such as Gods love so that you will not have to rely on your own interpretation based on such statements as Gods love is sacrificial, unconditional, etc. You will no longer struggle with the question what image of God am I? and the true meaning of life and so on. You will then, in your future study of the scripture, be able to interpret all the symbolic, figurative, parabolic, and illustrative biblical revelations based on the foundational principles found in Genesis. You will find that the foundational principles are straightforward and transcend time, while situations are not and do not. Remember there is nothing simplistic about the written Word of God, who

has created all the scripture to be known to all mankind of all times, regardless of future accumulation of knowledge and experience. So read Genesis, the Origin of the Beginnings and continue to grow in the Word.

Methuselah's Pillar

Methuselah, the recording angel of history, is correcting the mistakes in Exodus that the dyslexic and nearsighted scribe who copied the Bible first made. For instance, Moses's mother takes an entire month to make the basket for the baby since Macy's has not yet come into existence. The infant's sister, Miriam, places the basket in the bulrushes of Nile to save the Hebrew baby from being killed. Pharaoh's daughter, who has severe psoriasis, rescues the infant and raises him in the palace. When Moses is ten, he is taught how to box. At the age of sixteen, he learns how to drive a chariot. That gives him the inspiration to initiate chariot races when he's seventeen—long before the Roman ones as depicted in Ben-Hur. Moses is placed in an anger management class that he hates. He becomes an unquestionably great leader but never fully controls his temper for the rest of his eventful life.

The True Account of Adam & Eve

Reprint of the original, first published in 1860.

Genesis, the Origin of the Beginnings

Creation, Fall and Redemption is a verse-by-verse commentary of the foundational book of the Bible, Genesis 111. Pastor Bill takes the reader through a devotional and informative tour of the Creation, fall of man, Cain and Abel, the creation of the first city, the development of civilization, the conditions leading to the flood, and the Tower of Babel, and the division of humanity. This book shows us that not only are the early chapters of Genesis about our beginnings but they also foreshadow the end times and final judgments of the Lord upon this earth. But the book is also a testament to the salvation of God, right from the beginning, through the seed of the woman promise, which is the key to unlocking all of the Book of Genesis.

Exodus According to Methuselah

A handy study of Genesis 1-11, this book gives insightful commentary into the stories most often labeled as "myth" by those who want to chip away at the Bible. Morris details amazing evidence that the first 11 chapters of Genesis are literal history that shapes us today.

The Genesis of the Earth and of Man

Ronald S. Hendel offers a careful and thorough re examination of the text of Genesis 1 11. He takes a strongly positive position on the value of the Septuagint as a reliable translation of its Hebrew parent text. This position is contrary to that taken in most existing studies of the text of Genesis, including some in standard editions and reference works. Nevertheless, Hendel shows, there is an accumulating mass of evidence indicating that his position is correct. Hendel begins with a discussion of theory and method, and points out the lessons to be learned from the new biblical manuscripts discovered at Qumran. He goes on to argue for the preparation of eclectic critical editions of books of the Hebrew Bible a task long pursued in Classical, New Testament, and Septuagint studies, but still highly controversial with respect to the Hebrew scriptures. The critical edition of Genesis 1 11 which follows is Hendel's first step toward such a comprehensive task.

Creation, Fall and the Hope of Redemption

"Genesis 1-11 is a text that may well have received more attention than any other in the history of literature. Nevertheless, what do we know about the personal names that occur in these chapters and whose influence has permeated all of Western literature? Hess provides a thorough investigation of the ancient Near Eastern background of these names and discusses how each played a key role in adding significance to the stories and genealogies in which they are found. By studying both the linguistic contexts in the surrounding cultures and the wordplay in the biblical texts, the author provides the first comprehensive study of the importance of these names and traces the implications of his results for the antiquity and power of the familiar stories in which they appear." -- Publisher description.

Commentary on Genesis, Vol. 2: Luther on Sin and the Flood

It seems we wake each day to a world engulfed in chaos and confusion... a society mired in godlessness and humanism... and families struggling to guide their children in faith. Yet, God gave us the answer... His Holy Word. Begin as He recorded for us to begin, with Genesis. After many years of teaching and speaking on the importance of foundational faith, leading apologetics author Ken Ham of Answers in Genesis has created a clear and powerful study that helps root families and young or struggling believers in biblical truth. He makes it easy to build a vital Genesis-founded worldview in this simple yet profound study that explores the importance and implications of pivotal events, verse by verse, from Creation to Babel. Discover important context to answer relevant faith questions Easy-to-understand exploration of the biblical text The essential guide to laying a faith-foundational view Faith without a strong foundation crumbles in the face of today's relentless cultural rejections. Christians, young and old, will find the strong foundation they need in the biblical bedrock of Genesis.

The Beginning of the World

An essential biography of one of the Bible's most influential books During its 2,500-year life, the book of Genesis has been the keystone to almost every important claim about reality, humanity, and God in Judaism and Christianity. And it continues to play a central role in debates about science, politics, and human rights. With clarity and skill, acclaimed biblical scholar Ronald Hendel provides a panoramic history of this iconic book, exploring its impact on Western religion, philosophy, science, politics, literature, and more. Hendel traces how Genesis has shaped views of reality, and how changing views of reality have shaped interpretations of Genesis. Literal and figurative readings have long competed with each other. Hendel tells how Luther's criticisms of traditional figurative accounts of Genesis undermined the Catholic Church; how Galileo made the radical argument that the cosmology of Genesis wasn't scientific evidence; and how Spinoza made the equally radical argument that the scientific method should be applied to Genesis itself. Indeed, Hendel shows how many high points of Western thought and art have taken the form of encounters with Genesis--from Paul and Augustine to Darwin, Emily Dickinson, and Kafka. From debates about slavery, gender, and sexuality to the struggles over creationism and evolution, Genesis has shaped our world and continues to do so today. This wide-ranging account tells the remarkable story of the life of Genesis like no other book.

The Text of Genesis 1-11

DigiCat Publishing presents to you this special edition of "The Autobiography of Methuselah" by John Kendrick Bangs. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

Studies in the Personal Names of Genesis 1-11

SHORT SUMMARY: Beyond Genesis offers an alternative explanation for the origin of man that is unique and different from either side in the familiar Creationism versus Evolution debate. The author explores a refreshingly new interpretation of the book of Genesis that he believes was not meant to be understood completely until the present age of information and reason. He reveals new insights which uncover a storyline in Genesis that has gone unnoticed through the ages. He offers timely new explanations for all the other "myths" of Genesis, including the source of Cain's wife and the flood of Noah. All hypotheses are based on sound, recent science and the field of genetics, and are supported through references to the original sources. The central theme of the entire book is that the book of Genesis really is accurate historically, and that modern man is a product of BOTH the evolutionary processes, and a unique, separate line of man, the one referred to in Genesis. The book also reveals that the "plan" for man is not finished. **LONG SUMMARY:** There has been considerable interest lately in the debate between science and religion over creation and the existence of God. In order to gain a larger base of support, many religious groups are changing the wording of their agenda from 'Creationism' to 'Intelligent Design' because of problems with the stories in the book of Genesis. If we study the history of man as contained in the book of Genesis, and compare it to the archeological evidence, we do find that there are some common grounds. The differences exist mostly because historians refuse to consider the stories contained in the Bible as anything other than myths or exa

Creation to Babel

Foreword / Henry M. Morris -- Foreword / John MacArthur -- Prologue / Terry Mortenson, Thane Hutcherson Ury -- The Church Fathers on Genesis, the Flood, and the age of the Earth / James R. Mook -- A brief overview of the exegesis of Genesis 1-11 : Luther to Lyell / David W. Hall -- "Deep time" and the church's compromise : historical background / Terry Mortenson -- Is nature the 67th book of the Bible? / Richard L. Mayhue -- Contemporary hermeneutical approaches to Genesis 1-11 / Todd S. Beall -- The Genre of Genesis 1:1-2:3 : what means this text? / Steven W. Boyd -- Can deep time be embedded in Genesis? / Trevor Craigen -- A critique of the framework interpretation of the Creation Week / Robert V. McCabe -- Noah's Flood and its geological implications / William D. Barrick -- Do the Genesis 5 and 11 genealogies contain gaps? / Travis R. Freeman -- Jesus' view of the age of the Earth / Terry Mortenson -- Apostolic witness to Genesis Creation and the Flood / Ron Minton -- Whence cometh death? : a biblical theology of physical death and natural evil / James Stambaugh -- Luther, Calvin, and Wesley on the Genesis of natural evil : recovering lost rubrics for defending a "very good" creation / Thane H. Ury -- A biographical tribute to Dr. John C. Whitcomb Jr. / Paul J. Scharf -- Affirmations and denials essential to a consistent Christian (biblical) worldview

Genesis

Many people today search for truth in either science or religion. What if both are true? Many people believe in God, yet still believe the earth is more than 6000 years old. Quantum string theory physics now conclude a Universal Consciousness is the root of all consciousness and life. Archaeological research also proves many Biblical stories and places did indeed exist. The first two chapters of Genesis have caused much consternation among scholars and theologian alike, not to mention the average reader. Many theories have been given, yet none have been able to logically explain the discrepancies of the two chapters. The Genesis Mystery Revealed gives a complete and comprehensive analysis of this mystery. It explains the true date of Adam's creation, the mysteries of Cain's wife, the sons of God, and the Nephilim, along with other food for thought. Was humanity already here prior to Adam and Eve? Who helped Cain build his city? How did giants appear again after the Flood? All these questions and more are answered in The Genesis Mystery Revealed. Prior to this book, many people felt they must choose science or religion, never both. This book shows how both science and religion combine to present an indisputable truth that has been overlooked for too long. Theories of aliens, ancient astronauts, and "fallen angels" are also presented. There are so many theories on the web, in bookstores, and on television, that one cannot help but be confused over what is truth or fiction. If you are one of the many who are not sure what to believe, who are skeptical of some of these theories, read this book and then decide. If you believe the Bible to hold truths yet are still confused over the supposed discrepancies, then read this book and see for yourself that the answers contained within are justified. If you think archaeological discoveries and scientific research cannot be disputed, read this book and see how these findings relate and harmonize with what is explained within its pages. The Genesis Mystery Revealed is truly an eye-opening experience; a book you will read more than once! Get Ready to E X P A N D Your Mind!(tm)

The Book of Genesis

If you have been confused about the message of the first few chapters of Genesis, or feel uncomfortable with current interpretations of these chapters, the book, "Binocular Vision" Featuring Genesis 1-5 and Genesis 6:1-6, may be of interest to you. This word-for-word interpretation of the first few chapters of the Bible tends to take the confusion out of God's Creation, how He did it, and how different groups of people happened. Allow yourself / your group to study this book and see if it doesn't put an end to the Creative (Intelligent) Design / Darwinism debate. Also pay close attention to the "Time" segment. Don't judge the book by its cover; you need to actually read (study) the entire Genesis account and "Time" to get a Spiritual and historical understanding of the Creation and mankind's plight and progress. Great for individual study, group study, and discussion. Even though, for the Genesis study, the King James Version is readily available on the left side of the open book for your immediate reference, be prepared to check and re-check your own Bible regularly to affirm its actual message. The author of "Binocular Vision" studied for 11 years to find the answers to something entirely different (acknowledged in the Introduction, parts of Geneses and the Letter) from the most common and current interpretations; but, when the book was finished it became clear that the Genesis account of the Bible holds answers to archaeological and anthropological questions as well. "Binocular Vision" is for anyone who is interested in God's Word, especially those who have found contradiction and confusion in the first few chapters of the Bible. Be prepared for some surprises. Here's wishing you enlightening adventures in the world of Genesis.

The Autobiography of Methuselah

A critical, experimental, and practical commentary on the Bible, this three-volume work is renowned for its scholarship and keen insight into the Scriptures. While scholarly, the commentary is not overly technical and so is accessible to pastor, student, and layperson alike. C. H. Spurgeon commented on Jamieson-Fausset-Brown, It contains so great a variety of information that if a man had no other exposition he would find himself at no great loss if he possessed and used it diligently.

Beyond Genesis

"A treatise from Genesis v:27, showing the many opportunities which Methusaleh had for making a Christian record, and how by letting them pass unnoticed for nine hundred and sixty-nine years, he died and was lost"--P. 3.

Coming to Grips with Genesis

Genesis is a book of origins--the origin of the universe, the origin of life and the origin of man. It places man in his cosmic setting, shows his particular uniqueness, explains his wonder and his flaw, and begins to trace the flow of human history through space and time. Many today, however, view this book as a collection of myths, useful for understanding the Hebrew mind, perhaps, but certainly not a record of what really happened. Dr. Francis A. Schaeffer challenges that view and shows how the first eleven chapters of Genesis stand as a solid, space-time basis for answering the tough questions posed by modern man.

The Genesis Mystery Revealed

Hamilton's study on the first 17 chapters of the Book of Genesis is part of The New International Commentary on the Old Testament. Like its companion series on the New Testament, this commentary devotes considerable care to achieving a balance between technical information and homiletic-devotional interpretation.

Binocular Vision

Although it opens with an argument that the earth, and not humanity, is the real subject of Genesis 1-11, this collection of essays focuses first on female personalities in Genesis (Eve, Hagar, Rebekah, Tamar and the four tribal matriarchs), then on male characters (Abraham, Ishmael, Pharaoh). The treatment ranges from historical-critical analysis, through discourse analysis and narrative, ideological and psychological analyses, to postmodern autobiographical exegesis. Among the many delights of this selection are the mingling of traditional and contemporary perspectives, especially the interplay of

gender at the level of the biblical text and of the modern author-and perhaps also of the modern reader of this fascinating assortment of studies on tales of human ancestry.

The Early Narratives of Genesis

In his clear and readable, style Walter Brueggemann presents Genesis as a single book set within the context of the whole of biblical revelation. He sees his task as bringing the text close to the faith and ministry of the church. He interprets Genesis as a proclamation of God's decisive dealing with creation rather than as history of myth. Brueggemann's impressive perspective illuminates the study of the first book of the Bible. Interpretation: A Bible Commentary for Teaching and Preaching is a distinctive resource for those who interpret the Bible in the church. Planned and written specifically for teaching and preaching needs, this critically acclaimed biblical commentary is a major contribution to scholarship and ministry.
