500 Selenium Testing Interview Questions and Answers - Free Book

Knowledge for Free... Get that job, you aspire for! Want to switch to that high paying job? Or are you already been preparing hard to give interview the next weekend? Do you know how many people get rejected in interviews by preparing only concepts but not focusing on actually which questions will be asked in the interview? Don't be that person this time. This is the most comprehensive Selenium

Testing interview questions book that you can ever find out. It contains: 500 most frequently asked and important Selenium Testing interview questions and answers Wide range of questions which cover not only basics in Selenium Testing but also most advanced and complex questions which will help freshers, experienced professionals, senior developers, testers to crack their interviews.

FREQUENTLY ASKED INTERVIEW QUESTION'S

Introduction This is my attempt to consolidate all the tough & useful questions we can have regarding "Selenium" using "Python". This is similar to my previous attempt for creating a basic book on Python "_Frequently Asked Interview Questions : Core Python_" where I am consolidating FAQ's on **Core Python** only. I have two main objectives in writing this book, - First is it helps you find your next destination ;) and - Second it acts as a guide for learning Selenium through simple tasks. In order to achieve the second one, I have consolidated the list of questions in the appendix at the end. You can try to read the question and find the solution (*Thanks **Abhishek** for suggesting it :*) yourself and later check the answer, if you think your found answer is better, do email it to me (mayankjohri @ gmail . com), so that I can add it in this book. **NOTE** :arrow_right: This book will **only cover selenium** and will not cover any questions for Testing Frameworks such as PyTest etc. I will be creating another book on that topic in near future.* That book will extensively cover Testing Frameworks and nothing else. :) **Future Plans:** Plan is to have more than 501 questions with answers once the final version is released by end of 2018. > **Current Status**: 101 Questions have been added in various sections. **POM** & **best practices** have the least and will be adding more in future versions and "Cross browser testing" section is almost empty :(
