The Annals of St-Bertin, covering the years 830 to 882, are the main narrative source for the Carolingian world in the ninth century. This richly-annotated translation by a leading British specialist makes these Carolingian histories accessible in English for the first time, encouraging readers to reassess and evaluate a crucially formative period of European history. Produced in the 830s in the imperial palace of Louis the Pious, The Annals of St-Bertin were continued away from the Court, first by Bishop Prudentius of Troyes, then by the great scholar-politician Archbishop Hincmar of Rheims. The authors' distinctive voices and interests give the work a personal tone rarely found in medieval annals. They also contain uniquely detailed information on Carolingian politics, especially the reign of the West Frankish king, Charles the Bald (840-877). No other source offers so much evidence on the Continental activities of the Vikings. Janet L. Nelson offers in this volume both an entrée to a crucial Carolingian source and an introduction to the historical setting of the Annals and possible ways of reading the evidence. The Annals of St-Bertin will be valuable reading for academics, research students and undergraduates in medieval history, archaeology and medieval languages. It will also fascinate any general reader with an interest in the development of European culture and society.

### The Negro in France

A review of the original French edition of this book in the American Journal of Sociology hailed it as "the most finished product yet to emerge from the new (Marxist) school of French urban sociology... The aim of the book is nothing less than to reconceptualize the field of urban sociology. It is carried out in two stages: a critique of the literature of urban sociology (and urbanization) and an attempt

to lay the Marxist bases for a reconstructed urban sociology." The problems facing the world's cities, whether problems of development or of decay, cannot be solved until they have been diagnosed. The race riots in Detroit, the shantytowns of Paris, the financial crisis of New York must not be seen in isolation. The mushrooming cities of the third world, demolition and urban sprawl at home are located in a network of economics, social welfare and power politics, and the decisions we are called upon to make elude us in a fog of ideology. This brilliant exposition of the function of the city in social, economic and symbolic terms illuminates the creation and structuring of space by action administrative, productive and more immediately human. The interaction of environment and life-style, the complex of market forces and state policy against a background of traditional social practice is scrutinized with the aim of establishing concepts and research methods that will enable us to come to grips with the cities themselves and the way in which we view them. Castells draws on urban renewal in Paris, the English New Towns, the American megalopolis for concrete data in his empirical and theoretical investigation. In this English edition, a new Part V has been added on urban development in America. The chapters on the pobladores in Chile and the struggle of the FRAP in Quebec have been greatly extended and an Afterword traces the development of research in the past five years. -- Amazon.com.

Dictionnaire général de biographie et d'histoire, de mythologie, de géographie ancienne et moderne...

This important and insightful book provides, for the first time, a broad presentation of ongoing research into public participation in landscape conservation, management and planning, following the 2000 European Landscape Convention which came into force in 2004. The book examines both the theory of participation and what lessons can be learnt from specific European examples. It explores in what manner and to what extent the provisions for participation in the European Landscape Convention have been followed up and implemented. It also presents and compares different experiences of participation in selected countries from northern, southern, eastern and western Europe, and provides a critical examination of public participation in practice. However, while the book's focus is necessarily on Europe, many of the conclusions drawn are of global relevance. The book provides a valuable reference for researchers and advanced students in landscape policies and management, as well as for professionals and others interested in land-use planning and environmental management.

Festivals and the French Revolution--the subject conjures up visions of goddesses of Liberty, strange celebrations of Reason, and the oddly pretentious cult of the Supreme Being. Every history of the period includes some mention of festivals; Ozouf shows us that they were much more than bizarre marginalia to the revolutionary process.

In this book Kauppi develops a structural constructivist theory of the European Union and critically analyses, through French and Finnish empirical cases, the political practices that maintain the Union's

'democratic deficit'. Kauppi conceptualises the European Union as both an arena for political contention and a nascent political order. In this evolving, multi-levelled European political field, individuals and groups construct material and symbolic structures of political power, grounded in a variety of social resources such as nationality, culture, and gender. The author shows how the dominance of both executive political resources and domestic political cultures has prevented the development of European democracy. Supranational executive networks have become more autonomous, reinforcing the dominance of the resources they control. At the same time, national political cultures condition the political status of elected institutions such as the European parliament. The book is particularly suited for undergraduate and graduate students in the fields of European Politics, European Union Studies and International Relations.

#### Geschichte des Staates Israel

First published in Germany in 1929, *The End and the Beginning* is a lively personal memoir of a vanished world and of a rebellious, high-spirited young woman's struggle to achieve independence. Born in 1883 into a distinguished and wealthy aristocratic family of the old Austro-Hungarian Empire, Hermynia Zur Muhlen spent much of her childhood travelling in Europe and North Africa with her diplomat father. After five years on her German husband's estate in czarist Russia she broke with both her family and her husband and set out on a precarious career as a professional writer committed to socialism. Besides translating many leading contemporary authors, notably Upton Sinclair, into German, she herself published an impressive number of politically engaged novels, detective stories, short stories, and children's fairy tales. Because of her outspoken opposition to National Socialism, she had to flee her native Austria in 1938 and seek refuge in England, where she died, virtually penniless, in 1951. This revised and corrected translation of Zur Muhlen's memoir - with extensive notes and an essay on the author by Lionel Gossman - will appeal especially to readers interested in women's history, the Central European aristocratic world that came to an end with the First World War, and the culture and politics of the late nineteenth and early twentieth centuries.

What role do the people play in defining and developing human rights? This volume explores the very topical issue of the lack of democratic legitimisation of national and international courts and the question of whether rendering the original process of defining human rights more democratic at the national and international level would improve the degree of protection they afford. The authors venture to raise the crucial question: When can a democratic society be considered to be mature enough so as to be trusted to provide its own definition of human rights obligations?

#### Wöchentliches Verzeichnis der erschienenen und der vorbereiteten Neuigkeiten des deutschen Buchhandels

Originally published in German in 1935, this monograph anticipated solutions to problems of scientific progress, the truth of scientific fact and the role of error in science now associated with the work of Thomas Kuhn and others. Arguing that every scientific concept and theory—including his own—is culturally conditioned, Fleck was appreciably ahead of his time. And as Kuhn observes in his foreword, "Though much has occurred since its publication, it remains a brilliant and largely unexploited resource." "To many scientists just as to many historians and philosophers of science facts are things that simply are the case: they are discovered through properly passive observation of natural reality. To such views Fleck replies that facts are invented, not discovered. Moreover, the appearance of scientific facts as discovered things is itself a social construction, a made thing. A work of transparent brilliance, one of the most significant contributions toward a thoroughly sociological account of scientific knowledge."—Steven Shapin, *Science*

"Ramzy Baroud's book of Palestinian prisoners' stories is a remarkable work. With each story, there is a roll-call of the best of humanity. courage, struggle, determination, generosity, passion, humility .. Everyone should read this searing and beautiful book." JOHN PILGER "... you will delve into the lives of men and women, read intimate stories that they have chosen to share with you, stories that may surprise you, anger you and even shock you. But they are crucial stories that must be told, read and retold." KHALIDA JARRAR, Palestine Legislative Council "The rationale for Palestinian resistance is heightened by having law and morality on the side of demands for an end to the oppressive Israeli occupation and the persistent abuse of fundamental Palestinian rights...." RICHARD FALK, former UN Special Rapporteur, Prof. Emeritus, Princeton Hundreds of thousands of Palestinians have experienced life in Israel's prisons since 1967, as did many more in previous decades during the course of the ongoing Israeli military occupation. Yet rarely has the story of their experiences in Israeli jails been told by the prisoners themselves. Typically the Western media portrays them as 'terrorists' while well-meaning third-party human rights advocates paint them as hapless victims. They are neither. This book permits the reader to access the reality of Palestinian imprisonment as told by Palestinian prisoners themselves -- stories of appalling suffering and determination to reclaim their freedom. The stories in this book are not meant to serve as an account of Israeli torture methods. Instead, each story highlights a distinct experience -- each so personal, so profound -- in order to underline the humanity of those who are constantly dehumanized by Israeli hasbara and the mainstream corporate media's biased accounts.. Palestinian prisoners are an essential element in the collective resistance against Israeli colonialism, apartheid and military occupation. Rather than being viewed as unfortunate victims, their steadfastness exemplifies the ongoing fight of the Palestinian people as a whole. In reality, all Palestinians living under Israeli occupation and siege are also prisoners. The Gaza Strip is often referred to as the "world's largest open-air prison." It is in this context that this book becomes an essential read

Drawing on two decades of international experience in political consulting, Dominik Meier and Christian Blum give profound and honest insights into the inner workings of power. Introducing their Power Leadership Approach, the authors provide a conceptual analysis of power and present the tools to successfully exercise it in the political domain. "Power and its Logic" is a guidebook for politicians, business leaders, civil society pioneers, public affairs consultants and for every citizen who wants to understand the unwritten rules of politics.

#### Definition and Development of Human Rights and Popular Sovereignty in Europe

This book critically examines multiple ways in which cultural diversity is, and has been represented and handled. It questions the construction of differences in doing culture while emphasizing the fluidity of cultural entanglements. It is an invitation to re-think norms, practices and negotiations of diversity and otherness, to distinguish emancipatory from standardizing approaches and to "transculturalize" the study and the politics of culture.

Totalitarianism has been an object of extensive communicative research since its heyday: already in the late 1930s, such major cultural figures as George Orwell or Hannah Arendt were busy describing the visual and verbal languages of Stalinism and Nazism. After the war, many fashionable trends in social sciences and humanities (ranging from Begriffsgeschichte and Ego-Documentology to Critical Linguistics and Critical Discourse Analysis) were called upon to continue this media-centered trend in the face of increasing political determination of the burgeoning field. Nevertheless, the integration of historical, sociological and linguistic knowledge about totalitarian society on a firm factual ground remains the thing of the future. This book is the first step in this direction. By using history and theory of communication as an integrative methodological device, it reaches out to those properties of totalitarian society which appear to be beyond the grasp of specific disciplines. Furthermore, this functional approach allows to extend the analysis of communicative practices commonly associated with fascist Italy, Nazi Germany and Soviet Union, to other locations (France, United States of America and Great Britain in the 1930s) or historical contexts (post-Soviet developments in Russia or Kyrgyzstan). This, in turn, leads to the revaluation of the very term »totalitarian«: no longer an ideological label or a stock attribute of historical narration, it gets a life of its own, defining a specific constellation of hierarchies, codes and networks within a given society.

In this book Michels analyzes the tendencies that oppose the realization of democracy, and claims that these tendencies can be classified in three ways: dependence upon the nature of the individual; dependence upon the nature of the political structure; and dependence upon the nature of organization. During the last few decades historians of science have shown a growing interest in science as a cultural activity and have regarded science more and more as part of the general developments that have occurred in society. This trend has been less evident among historians of mathematics, who traditionally concentrate primarily on tracing the development of mathematical knowledge itself. To some degree this restriction is connected with the special role of mathematics compared with the other sciences; mathematics typifies the most objective, most coercive type of knowledge, and therefore seems to be least affected by social influences. Nevertheless, biography, institutional history and history of national developments have long been elements in the historiography of mathematics. This interest in the social aspects of mathematics has widened recently through the study of other themes, such as the relation of mathematics to the development of the educational system. Some scholars have begun to apply the methods of historical sociology of knowledge to mathematics; others have attempted to give a Marxist analysis of the connection between mathematics and productive forces, and there have been philosophical studies about the communication processes involved in the production of mathematical knowledge. An interest in causal analyses of historical processes has led to the study of other factors influencing the development of mathematics, such as the formation of mathematical schools, the changes in the professional situation of the mathematician and the general cultural milieu of the mathematical scientist.

The controversial journalistic analysis of the mentality that fostered the Holocaust, from the author of *The Origins of Totalitarianism* Sparking a flurry of heated debate, Hannah Arendt's authoritative and stunning report on the trial of German Nazi leader Adolf Eichmann first appeared as a series of articles in *The New Yorker* in 1963. This revised edition includes material that came to light after the trial, as well as Arendt's postscript directly addressing the controversy that arose over her account. A major journalistic triumph by an intellectual of singular influence, *Eichmann in Jerusalem* is as shocking as it is informative—an unflinching look at one of the most unsettling (and unsettled) issues of the twentieth century.

#### These Chains Will Be Broken

The Arab spring, protest movements in the EU, Russia, Turkey or elsewhere, are often labeled as twitter-revolutions. A crucial role is attributed to the new media, coverage of events abroad and ensuing mutual reactions. With the dissemination of print, revolts in early-modern times faced the challenge of a similar media-revolution. This influenced the very face of the events that could become full-fledged propaganda wars once the insurgents had won access to the printing press. But it also had an impact on revolt-narratives. Governments severely persecuted dissident views in such delicate issues as revolts. Observers abroad had no such divided loyalties and were freer to reflect upon the events. Therefore, the book focuses mainly on representations of revolts across borders.

The volume examines imperial rule in the Middle Ages. It asks for the characteristics of imperial leadership as well as the reasons why some rulers strove for imperial titles such as emperor whereas others voluntarily shrank from them. Thus, the authors adopt a transcultural perspective, covering Europe, Byzantium and the Islamic Middle East.

The concept of »postmigration« has recently gained importance in the context of European societies' obsession with migration and integration along with emerging new forms of exclusion and nationalisms. This book introduces ongoing debates on the developing concept of »postmigration« and how it can be applied to arts and culture. While the concept has mainly gained traction in the cultural scene in Berlin, Germany, the contributions expand the field of study by attending to cultural expressions in literature, theatre, film, and art across various European societies, such as the United Kingdom, France, Finland, Denmark, and Germany. By doing so, the contributions highlight this concept's potential and show how it can offer new perspectives on transformations caused by migration.

#### Power and its Logic

Die Beiträge dieses Bandes gehen auf eine internationale Tagung zurück, die 2017 in Manchester stattgefunden hat. Sie untersuchen die Darstellung von Geschichte in der mittelalterlichen deutschen Literatur auf der Basis von aktuellen erzähltheoretischen Forschungsansätzen. Dabei wird ein breites Spektrum an Texten, Gattungen und Diskursen in den Blick genommen; als Angelpunkt für zahlreiche relevante Fragestellungen erweist sich die im 12. Jahrhundert entstandene »Kaiserchronik«. Geleitet von der Erkenntnis, dass Vergangenheit erst im Erzählen zu Geschichte wird, analysieren die Beiträge einschlägige narrative Strategien.

#### Diversity and Otherness

This book explores literary culture in England between 1630 and 1700, focusing on connections between material, epistemic, and political conditions of literary writing and reading. In a number of case studies and close readings, it presents the seventeenth century as a period of change that saw a fundamental shift towards a new cultural configuration: neoclassicism. This shift affected a wide array of social practices and institutions, from poetry to politics and from epistemology to civility.

#### Transformative Translations in Jewish History and Culture

This book examines the most frequent form of Jew-hatred: Israel-related antisemitism. After defining this hate ideology in its various manifestations and the role the internet plays in it, the author explores the question of how Israel-related antisemitism is communicated and understood through the language used by readers in below-the-line comments. Drawing on a corpus of over 6,000 comments from traditionally left-wing news outlets The Guardian and Die Zeit, the author examines both implicit and explicit comparisons made between modern-day Israel and both colonial Britain and Nazi Germany. His analyses are placed within the context of resurgent neo-nationalism in both countries, and it is argued that these instances of antisemitism perform a multi-faceted role in absolving guilt, re-writing history, and reinforcing in-group status. This book will be of interest not only to linguistics scholars, but also to academics in fields such as internet studies, Jewish studies, hate speech and antisemitism.

Events such as the 2004 Indian Ocean Tsunami, Hurricane Katrina in 2005 and the Japanese earthquakes and tsunamis in 2011 have provided unfortunate reminders of the susceptibility of many communities to devastating losses from natural hazards. These events provided graphic illustrations of how extreme hazard events adversely impact on people, affect communities and disrupt the community and societal mechanisms that serve to organize and sustain community capacities and functions. However, there is much that communities can do to mitigate their risk and manage disaster consequences. The

construct that epitomizes how this is done is resilience. The contents of this volume provide valuable insights into how societal resilience can be developed and sustained. This considerably expanded new edition presents major topics of: Coexisting with Natural Hazards; Urban Resilience in Asia; Lifelines and Urban Resilience; Business Continuity in Disaster; Hazard Mitigation in Communities; Hazard Readiness and Resilience; Child Citizenship in Disaster Risk; Old Age and Resilience; Gender and Disaster Resilience; Impact of High Functionality on Resilience; Art and Resilience; Cross-Cultural Perspectives and Coping with Hazards; Religious Practices and Resilience; Living in Harmony with our Environment; Critical Incidence Response; Governance; Heat Wave Resilience; Wildfire Disaster Resilience; and Progress and Challenges to Disaster Risk Reduction and Resilience. This exceptional book brings together contributions from international experts in core areas and includes chapters that provide an overarching framework within which the need for interrelationships between levels to be developed is discussed. The book will be an outstanding resource for those researching or teaching courses in emergency management, disaster management, community development, environmental planning and urban development. In addition, it will serve law enforcement and emergency agencies, welfare agencies, and professionals in applied psychology.

The great English novel about Egypt, which is also the great Egyptian novel about England. This is a love story, a story about growing up, a story about what it's like to be a woman (Eastern and Western), a story about the history of the post-imperial Middle East during the last 30 years or so, perplexed and bloody years, and a story about home. In London in 1979, Asya reflects on events in Cairo more than a decade before. It's May, 1967: Asya's studying for university is interrupted by war between Israel and Egypt, a conflict that shapes Asya's coming of age as a woman in modern Egypt. For Asya, education, love, sexuality and marriage are bound up with, and touched by, the violent conflicts between Egypt and Israel -as well as the seductions, and disappointments, of Europe. \_\_\_\_\_ 'Ahdaf Soueif is one of the most extraordinary chroniclers of sexual politics now writing' EDWARD SAID, author of *Orientalism* 'A convincing and skilful writer' SUNDAY TIMES 'Highly unusual and richly impressive' GUARDIAN

This book is available as open access through the Bloomsbury Open Access programme and is available on [www.bloomsburycollections.com](http://www.bloomsburycollections.com). The role of sport in development initiatives has grown dramatically over the last five years, now finding a place in the UN's millennium development goals. In *Sport and Development for Peace*, Simon Darnell outlines the most recent sociological research

on the role of sport in development initiatives. The book analyses the relationship between sport and international development and looks at what this reveals about socio-political economy. It addresses a gap in the literature by focusing on issues of politics, power and culture, particularly looking at volunteer experience, mega-sporting events and sporting celebrity in the context of development. Darnell questions the belief that sport can offer a 'solution' to enduring development issues. Drawing on the latest empirical research, the book is a thorough and timely analysis of the social and political implications of tying sport to development.

The SAGE Handbook for Social Research Methods is a must for every social-science researcher. It charts the new and evolving terrain of social research methodology, covering qualitative, quantitative, and mixed methods in one volume. The Handbook includes chapters on each phase of the research process: research design, methods of data collection, and the processes of analyzing and interpreting data. As its editors maintain, there is much more to research than learning skills and techniques; methodology involves the fit between theory, research questions, research design, and analysis.

A dynamic new contribution to the study of luxury in the Canadian context. From the history of the fur trade to the latest Indigenous fashion movement, from the T. Eaton Company's 1920s "Made-in-Canada" campaign to the on-again-off-again Toronto Fashion Week, from Vancouver public art commissions to Montréal's future-forward fashion tech sector, the essays in this volume explain what makes and breaks Canadian luxury. The book announces a new collective of thinkers who focus on Indigenous and Canadian instances of luxurious production, experiences, and sites to propose a new definition of luxury that includes a plurality of regional practices. Challenging Western perceptions that bind luxury to a colonial past or a consumerist present, these original case studies redefine luxury for Canada, highlighting the notion that Canadian luxury is centered on community and connection.

### How to Read Journal Articles in the Social Sciences

"This defining work will be valuable to readers and researchers in social sciences and humanities at all academic levels. As a teaching resource it will be useful to instructors and students alike and will become a standard reference source. Essential for general and academic collections." --CHOICE  
This Encyclopedia provides readers with authoritative essays on virtually all social science methods topics, quantitative and qualitative, by an international collection of experts. Organized alphabetically, the Encyclopedia of Social Science Research Methods covers research terms ranging from different methodological approaches to epistemological issues and specific statistical techniques. Written to be accessible to general readers, the Encyclopedia entries do not require advanced knowledge of mathematics or statistics to understand the purposes or basic principles of any of the methods. To accomplish this goal, there are two major types of entries: definitions consisting of a paragraph or two to provide a quick explanation of a methodological term; and topical treatments or essays that discuss the nature, history, applications, and implications of using a certain method, including suggested readings and references. Readers are directed to related topics via cross-referenced terms that appear in small capital letters. By assembling entries of varied origins and serving different research purposes, readers will be able to benefit from this immense source of methodological expertise in advancing their understanding of research. With three volumes and more than 900 signed entries, the Encyclopedia of Social Science Research Methods will be a critical addition to any social science library.

To most scientists, and to those interested in the sciences, understanding is the ultimate aim of scientific endeavor. In spite of this, understanding, and how it is achieved, has received little attention in recent philosophy of science. *Scientific Understanding* seeks to reverse this trend by providing original and in-depth accounts of the concept of understanding and its essential role in the scientific process. To this end, the chapters in this volume explore and develop three key topics: understanding and explanation, understanding and models, and understanding in scientific practice. Earlier philosophers, such as Carl Hempel, dismissed understanding as subjective and pragmatic. They believed that the essence of science was to be found in scientific theories and explanations. In *Scientific Understanding*, the contributors maintain that we must also consider the relation between explanations and the scientists who construct and use them. They focus on understanding as the cognitive state that is a goal of explanation and on the understanding of theories and models as a means to this end. The chapters in this book highlight the multifaceted nature of the process of scientific research. The contributors examine current uses of theory, models, simulations, and experiments to evaluate the degree to which these elements contribute to understanding. Their analyses pay due attention to the roles of intelligibility, tacit knowledge, and feelings of understanding. Furthermore, they investigate how understanding is obtained within diverse scientific disciplines and examine how the acquisition of understanding depends on specific contexts, the objects of study, and the stated aims of research.

This collection offers a new reflection on rape in war time through 15 case studies, ranging from Greece to Nigeria. It questions the specificity of rape as a universal transgression, its place in memories of war, its legacies, including children born from rape, and the challenge of writing about intimate violence as both a scientist and a human.

The papers traverse a broad terrain, sometimes technically and other times socially oriented, sometimes theoretical and other times practical in their perspective, and sometimes reflecting dispassionate analysis whilst at other times suggesting interested strategies for action. The journal is relevant for academics in the social sciences, applied sciences, the humanities, the professions and education, research students, public administrators in local, provincial and state government, representatives of the private sector and trainers and industry consultants.
