Look Up, America! I-95: Middle Atlantic: Walking Tours of Towns Along America's Busiest Highway

Interstate 95 stakes its claim as "America's Highway" by passing through the country's most densely populated region - the Eastern Seaboard. Some 110 million people live within hailing distance of its 1,917 miles reaching from the Canadian border to Miami, Florida. The average daily traffic volume on any stretch of highway is 72,000 vehicles with an estimated 565 million trips of over 100 miles taken each year. More than one in every three miles traveled by Americans takes place on I-95. There are 670 exits along Interstate 95 - many leading to America's most famous and historic towns. In the Middle Atlantic the traveler encounters the only part of the highway that is not finished. Here are two of America's greatest cities to walk - New York City and Philadelphia - and a handful of smaller cities that

are equally intriguing. There is no better way to see the towns along Interstate 95 than on foot. And there is no better way to appreciate what you are looking at than with a walking tour. Whether you are visiting a new town or just out to look at your own town in a new way, a walking tour is ready to explore when you are. Each walking tour describes a mix of historical and architectural and ecclesiastical landmarks. A quick primer on identifying architectural styles seen on America's streets can be found at the back of the book. Tours Included: New York City NY Newark NJ Elizabeth NJ New Brunswick NJ Trenton NJ Philadelphia PA Wilmington DE Newark DE

Pennsylvania Off the Beaten Path®

Tired of the same old tourist traps? Whether you're a visitor or a local looking for something different, let Pennsylvania Off the Beaten Path show you the Keystone State you never knew existed. Discover extinct creepy crawlies at the Insectarium, the country's largest bug museum. Put your car in neutral, take your foot off the brake, and feel the spooky effects of Gravity Hill. Head 150 feet underground to get an up-close look at the history of coal mining at Tour-Ed Mine. So if you've "been there, done that" one too many times, get off the main road and venture Off the Beaten Path.

Paul Hogarth's Walking Tours of Old Philadelphia

How does a so-called bad neighborhood go about changing its reputation? Is it simply a matter of improving material conditions or picking the savviest marketing strategy? What kind of role can or should the arts play in that process? Does gentrification always entail a betrayal of a neighborhood's roots? Tackling these questions and offering a fresh take on the dynamics of urban revitalization, *The Philadelphia Barrio* examines one neighborhood's fight to erase the stigma of devastation. Frederick F. Wherry shows how, in the predominantly Latino neighborhood of Centro de Oro, entrepreneurs and community leaders forged connections between local businesses and cultural institutions to rebrand a place once nicknamed the Badlands. Artists and performers negotiated with government organizations and national foundations, Wherry reveals, and took to local galleries, stages, storefronts, and street parades in a concerted, canny effort to reanimate the spirit of their neighborhood. Complicating our notions of neighborhood change by exploring the ways the process is driven by local residents, *The Philadelphia Barrio* presents a nuanced look at how city dwellers can make commercial interests serve the local culture, rather than exploit it.

Lost Philadelphia is the latest in the series from Anova Books that traces the cherished places in a city that time, progress and fashion have swept aside before the National Register of Historic Places could save them from the wrecker's ball. Organised chronologically, starting with the earliest losses and ending with the latest, the book features much-loved Philadelphia institutions that failed to stand the test of time, such as the Horn & Hardart automat or the Market Street ferries. Grand buildings erected in the Victorian era that were too costly to be refurbished, or movie theaters that the age of television made redundant are featured. Philadelphia's tradition of shipbuilding is one of the more recent losses with the Navy Yard closing in 1995 and the historic Cramp & Sons shipyard disappearing much earlier in 1946. Lost Philadelphia is a nostalgic journey back in time to visit some of the lost treasures that the city let slip through its grasp.

More Americans trace their ancestry to Germany than to any other country. Arguably, German Americans form America's largest ethnic group. Yet they have a remarkably low profile today, reflecting a dramatic, twentieth-century retreat from German-American identity. In this age of multiculturalism, why have German Americans gone into ethnic eclipse--and where have they ended up? *Becoming Old Stock* represents the first in-depth exploration of that question. The book describes how German Philadelphians reinvented themselves in the early twentieth century, especially after World War I brought a nationwide anti-German backlash. Using quantitative methods, oral history, and a cultural analysis of written sources, the book explores how, by the 1920s, many middle-class and Lutheran residents had redefined themselves in "old-stock" terms--as "American" in opposition to southeastern European "new immigrants." It also examines working-class and Catholic Germans, who came to share a common identity with other European immigrants, but not with newly arrived black Southerners. *Becoming Old Stock* sheds light on the way German Americans used race, American nationalism, and mass culture to fashion new identities in place of ethnic ones. It is also an important contribution to the growing literature on racial identity among European Americans. In tracing the fate of one of America's largest ethnic groups, *Becoming Old Stock* challenges historians to rethink the phenomenon of ethnic assimilation and to explore its complex relationship to American pluralism.

Celebrate!

Determined to escape a 9 to 5 life but equally determined not to do anything socially worthwhile, Andy Moseley took the only option available to him and packed his bags and left for America. His plan was to see as much of the country as he could in 90 days. Starting in Washington and ending in San Francisco, he passed through Canada and along Route 66 taking in several places not on any logical route across the country, and eventually covering half of the States of America, and a few bits of Canada too. In one of the hottest summers on record he got caught in more storms than should have been possible, accidentally committed three very petty crimes, appeared on the stage of a top TV sitcom, and got mistaken for both a serious art collector and a potential terrorist before returning home. *Around the States in 90 Days* is the story of a journey across interstates, highways and dirt tracks, that passes through cities, one horse towns, and no horse towns.

Humanities

Philadelphia has Athens to thank for its classical structure, London for its Georgian and Victorian treasures, Paris for its grand boulevard, and William Penn for its name. Translated from the Greek, Philadelphia means "City of Brotherly Love." Ben Franklin's guiding hand also appears, the great polymath was involved in the world's first lending library and America's first hospital, medical school, think tank, and nondenominational college. This book pairs rare old archive images with modern views to show how the city has fared since the 19th and 20th centuries. Locations include Betsy Ross House, Elfreth's Alley, London Coffee House, Reading Terminal, Wannamakers, Poe House, Carpenter's Hall, Second Bank, Bourse Building, Masonic Temple, Eastern State Penitentiary, Philadelphia Waterworks, Fairmount Park, University of Philadelphia, Shibe Park, League Island, Penn Cottage, and Girard College. Extensively revised from the original version with new sites, new text, and additional photos.

The flagship publication of the National Parks Conservation Association, National Parks Magazine (circ. 340,000) fosters an appreciation of the natural and historic treasures found in the national parks, educates readers about the need to preserve those resources, and illustrates how member contributions drive our organization's park-protection efforts. National Parks Magazine uses images and language to convey our country's history and natural landscapes from Acadia to Zion, from Denali to the Everglades, and the 387 other park units in between.

This e-book is compiled from papers presented at a prior PICMET conference (Portland International Conference on Engineering and Technology Management). The papers deal with several aspects of managing technological innovation. The first paper by Wei-Wei et al examines strategic planning for technology management. The authors developed a model, which is based on the capability maturity model (CMM) and fitness landscape theory. The next three papers study behavioral elements which need to be considered carefully in managing technological innovations.. The second paper by Chen et al. studied entrepreneurship by applying the Chinese entrepreneur aptitude scale to Taiwanese youth. The third paper again by Chen at al. explores the relationship between supervisory support and work-family conflict. The fourth paper by Lin explores the relationships in the workplace including R & D department. The final two papers present tools for evaluating technological innovations. Lin et al. present a novel method of integrating multiple theories for forecasting technological innovations. Lai et al demonstrate use of an enhanced multi criteria decision model for evaluation of research and development projects.

Around the States in 90 Days

This book, originally published in 1963, discusses the place of history in education and general culture, methods of teaching and how to tackle reading. It deals with problems that are among the most pressing intellectual issues of the twentieth century as well as being a practical handbook, on how to read history.
